ABOUT NINE MILLION DOLLARS IN CURRENCY IS PRODUCED EVERY DAY AT THE GREAT NEW PLANT OF THE BUREAU OF ENGRAVING AND PRINTING AT WASHINGTON

By EDWARD B. CLARK.

IN ONE building during the year ending June 30, 1915, Uncle Sam made thirty and a half billion dollars. This money factory is called the Bureau of engraving and printing. Uncle Sam is the head of the corporation which is actively engaged in the production of wealth, and he has with him as other members of the firm about one hundred million nephews and nieces.

This governmental factory produces paper money, bonds, revenue, postage and custom stamps, checks, drafts and all the important documents printed from engraved plates. The director of the bureau of engraving and printing is Joseph E. Ralph. He might be called the foreman of the greatest money-making shop in the United States of America and perhaps in the world. From director Ralph's own words we learn something specific about the activities of this big shop of the capital city.

"The daily output of United States notes, gold and silver certificates and national bank notes, is two and one-quarter million notes, having a face value of nine million dollars and weighing over three and a half tons. It laid out flat they would cover nine acres, and if placed end to end the daily output would make a chain two hundred and

ENGRAVING DIVISION

"In no other form of printing can the beautiful soft and yet strong effects in black and white be obtained as in steel engraving. The introduction of cheap mechanical process work has superseded the beautiful creations of our master engravers commercially, and now we find the art limited to the engraving of securities as applied to the government's bureau of engraving and printing.

"In the engraving division of the big shop there are about 1,000 artists, who are the engravers individually become skilled in some particular line of work. Some specialize on the work they are classified as portrait, script, square letter and geometrical lines, when the classification and division have been made each workman is made to confine himself to his own specialty, and so it that he becomes an expert in that branch. The result of this system is that not only better work is produced, but a much greater amount is turned out in a given time, and what, of course, is of much greater importance, increased salary for these skilled workmen.

"Everything which is issued from the engraving bureau is a private corporation, operated and maintained its plant under like conditions the attention of the engraver is directed to make the work perfect to it with a view to having these conditions changed, perhaps to the extent of closing up the shop.

In the building the government has provided for the operative lunchroom. It has furnished the necessary fixtures, kitchen utensils, heat, light and fuel, while the employees have organized themselves into a cooperative society, assessing each member a nominal sum as a membership fee and then proceeding to manage the lunchroom. The society has its officers and appoints a board of managers to conduct the business, purchase the necessary food and cook it, and serve it to the employees at cost.

"There is a special emergency hospital in the bureau of engraving and printing, with separate rooms for men and women. It is fully equipped and an experienced physician is on duty at all times, so that injured or sick employees may receive immediate attention. Of course, this treatment is in the nature of first-aid, the afflicted ones are sent as quickly as possible either to their homes or to the city hospitals.

"Uncle Sam makes a lot of money. He doesn't pay high salaries to either the men or the women who help him make it. The salary figures are what might be called comfortable, perhaps, and nothing more. So it is that some hundreds of young girls in Washington handle more money than a millionaire sees in a year, and yet they are not allowed to use any of it for themselves. Familiarity, however, breeds contempt, and it is said that the government's employees who finger fortunes every day never have any itching desire to close their hands upon wealth and attempt to make way with it.

AS TO FEEDING BABIES.

In a discussion at a recent meeting of the New York academy of Medicine on severe diarrhoea with acidity of the stomach, Dr Abraham Jacobi said one cause of it was excessive feeding of fats. He also urged physicians to stop prescribing milk sugar. He himself never used it, because he considered baby food enough for the little folks. And he said milk should not be given without barley or oatmeal water.

Drawback.

Schools in the trenches is the latest innovation of war carried in the reports. The whole war in all its variations has been educational from the start. The main drawback to its value is the uncertainty of graduating into a graveyard or a hospital.

America's Gold Production.

The value of new gold added to the home supply from mills and smelters operating on domestic ores (including those of Alaska, the Philippines, and Porto Rico) in 1915 is estimated at $99,000,000. This shows the substantial increase of $4,359,200 over the preceding year.

Blondes Again Happy

Chemical blondes are giving vent to their joy. Peroxide prices are coming down. Now for the blonde tresses again, the golden, shimmering locks, the flowing manes of yellow hair of yester-year. Shop girls, who have in anguished silence seen their hair turn back to its original raven hue, can shake off that feeling of despair. Forget the anguish which so sent their hearts when they took each morning to find, by the aid of the mirror, those ugly roots of dark streak in their golden hair. Not one of them will be forced to remain a brunette against her will. Great Britain has come to the rescue of the harassed blonde. Fifty per cent reduction in the price of peroxide has been made in the export of peroxide of hydrogen to America and the antiseptic will hereafter be shipped in sufficient quantities to insure an adequate supply for even the most ambitious of blondes. Because of the lifting of the ban, within 30 days the price has decreased until it is now eight dollars a gross and still dropping.

Trouble Is Their Meat.

"I never have a suit yet who wanted to listen to other people's troubles.

"Then I guess you've never known any lawyers."

HOW WAS SHE TO KNOW?

She Was Too Much Engrossed in Her Own Feelings to Give a Thought to His.

"Angelica," he said reasoningly, although his voice trembled a little, "I love you. You've got to marry me—"

"I—I couldn't do what you ask," she said in a low voice. "I—didn't know that you—cared!" She smiled a sad, Joan, provocative smile at Stephen.

"Didn't you know that I cared?" Stephen turned white. "Didn't you know that I cared? It's been plain enough to everyone else that you've made a fool of me! What other folly can I commit to convince you that I care? He bowed hotly.

Angelica looked down at her little square-toed slippers of black satin the sole that she had brought with her from Vienna.

"You never said anything before. How could I guess?" she retorted, tossing her reddened head.

"Do you pretend that you didn't know that I loved you, Angelica?" demanded the young man hotly. "Are you just the common flirt, ready to scare any man that comes near you? You know well enough that I've worshiped you ever since I saw eyes on you, and now—now you try to make me believe you've known nothing, felt nothing! Are all women deceivers?" groaned Stephen, looking very miserable.

Angelica touched the pleated hair tracing by her wrist and smoothed down the fluffiness of her striped silk sleeve. She lifted her eyelashes here at a provoking angle. Suddenly she leaned toward Stephen and laid a small hand on his arm. Her face was a little pale in spite of the dash of rouge on her cheeks, and there was the dazzling smile with which she regarded the lucky young gentlemen before her was a little tremulous.

"If—if you are quite through scolding me, Stephen, I would like to say that in I mean—you—you did not understand. How can I know you a little when I care so much? And why should you be angry with me for saying that I cannot bear to have you go? Even when I've known you for—for so long?" Her charming sob-fly suddenly broke down and she covered her face with her handkerchief.

For an instant Stephen gazed at her in bewilderment.

"Dear God, Angelica! What a fright you gave me!" he whispered, and folded her in his arms. Adele Carter Goodloe, in Berthner's Magazine.

To Shorten Time in School.

An experiment which may prove of tremendous significance to New York city's school children, their parents, and, in a financial way, to the city itself, has gone into operation at the Speyer school, a model elementary school used in the past largely as a laboratory for the practice of educational theories by teachers colleges. Its ultimate object is to reduce by a year, and possibly by two years, the length of the public school course. The scheme will be tried first on 200 specially selected boys, who have completed the sixth year in the elementary school. In two years, it is hoped to cover three years' work, so that they may at the end of that time enter the sophomore classes of the city high schools. Saving of time is to be accomplished partly by a modification of curriculum and by improved methods of instruction, partly by adjusting the rate of progress in classes to efficiency of students, so that the less apt in every particular subject will not retard the advance of the rest.

A Non-Carbonizing Insulator.

What promises to be of important importance in the field of electrical apparatus is the invention of a non-carbonizing insulator by John F. Green of Pittsburgh, Pa. After several years of study the inventor has succeeded in eliminating ferrous oxide and free carbon from asbestos, producing a substance insulator designated as fibrous quartz or Or Ferrozed asbestos, which is claimed to be absolutely non-carbonizing. The material can be made into sheets, rolled, or in any other form of approximately 7,500 degrees fahrenheit and yet will not carbonize. Experts who have examined the new insulation proclaim it immune to heat and most promising as an insulating material.—Scientific American.

Melba to Train Girls Free.

Mme. Melba, who is visiting friends at San Francisco, announced her intention of buying an estate near San Francisco as a convent home. She will open it to girls with voice, but no means to cultivate them. Mme. Melba plans to devote her time and experience to teaching these girls.

"So many voices are ruined each year," she said, "by the wrong kind of training. And I feel I simply must put out a restraining hand. I shall regard the girls as my wards. I shall consider it a privilege to train their personality and my sacred duty to advise them according to my ability."

Rare Cruelty to Children.

"Don't let the Kiddies Press," begins an advertisement, and we thought it was going on to be a charity appeal. But it continues: "Out of a warm room on a cold car—for a bitterly cold drive to school—downtown—or to bring dad home from the office—the wife, dying in the hospital for youngsters—or anyone else." And it tells of the virtues of a heater for motor cars. Can there be parents cruel enough to send their children to school in a cold motor car? Have we no laws? is civilization, as Fleet Street asked, a failure?—New York Tribune.

Non Compos.

"Oh, Mrs. Van Hash," cried the waitress, hurrying into the kitchen in great excitement. "That new boarder in the front room! He's crazy, I tell ye!" demanded the boarding-house mistress. "He asked for a second helping of prunes."

Safe.

"The telephone is a great convenience, isn't it?" I should say so. You can tell a man exactly what you think of him over the wire and have plenty of time to back down if he resents it."

THE SANDMAN STORY

By Mrs F A WALKER

MRS. ROBIN REDBREAST.

Mrs. Robin Redbreast was disconsolate ever since they came north in the early spring. Mr. Robin Redbreast had found fault with her. First it was the place where the nest was built. Robin told her they could have a nest in the apple tree in the old orchard at the end of the lane, and Mrs. Robin had selected the apple tree because she thought the apples would be nour at hand when she was on the nest but after they were settled Robin told her if they had gone to the elm tree it would not have the sparrows bothering them.

Then Mrs. Redbreast said nothing, but she slipped a way she put the children to bed and wondered what had come over Robin.

"These children should be taught to fly," said Robin one morning. "They should be learning to find worms for themselves. If you were any sort of a mother you would have begun long days ago."

"Why, Robin," replied his wife, "they are only babies; they would be sure to fall off the limb the first try. I will teach them in a month, for then they are not strong enough yet."

Mrs. Redbreast worried with her work that morning and then she put the children close together in the nest down. Robin was so glad to see her that he forgot to ask her where she had been. He flew right over beside her and peeked her bill, which, of course, was a kiss. "Where are the children?" he asked; "I miss their chatter."

"Yes!" I thought they were old enough to have a nest by themselves," said the wise Mrs. Redbreast, "and they are asleep in the bough above. Now I must set your supper. I was a little late. What will you have?"

"Anything you have," replied Robin. "You need not fret about keeping me waiting, for I am sure I was a little late getting home."

Mrs. Redbreast did not reply, but she prepared the sweet supper she could and they sat down to it.

"You certainly can make nice bugs," said Robin, helping himself to the third, "and as for that dinner this noon, I guess I was not hungry. My stomach was upset. I ate too fast a few days because I ate some cherries before they were ripe."

"You must be more careful," was all the reply that Mrs. Redbreast made.

Later, when Robin had settled down, she started to go to the children. "Don't be gone long," said Robin. "I think after all I ought to be doing them down here and then you won't have to be away so much."

Mrs. Redbreast flew up to the nest. The children were all right, but she a mother you would have begun some days ago."

"Why, Robin," replied his wife, "they are only babies; they would be sure to fall off the limb the first try. I will teach them in a month, for then they are not strong enough yet."

Mrs. Redbreast worried with her work that morning and then she put the children close together in the nest

The Nest Was Empty.

"Don't you move," she told them. "I am going to market to get something nice for dinner.

"Give me the very tenderest worms you have," she said to the market man, "and I want them fat, too."

Then Mrs. Redbreast went home by the way of the cherry tree and picked a basket full of the most delicious cherries she could find. "Then," she said as she hurried home, "if they don't freshen his temper nothing will."

"What did you bring?" asked the little Redbreasts. "Can we have some?"

"You keep quiet," said their mother, "you can have some when dinner is ready and not before."

Mrs. Redbreast arranged her dinner and stood and admired the effect. "I look good enough to eat," she said. "I do not see where Robin can be."

Just then Robin came in sight and looked around, hoping to catch her with the dinner unprepared. He had eaten some crumbs and grain found in the yard and was not very hungry, therefore he felt in the mood to find fault with the best dinner that could be served.

Mrs. Redbreast watched him with anxious eyes. "Are these not nice, fat worms?" she asked after setting a minute.

"Yes, they are fat," answered Mr. Robin, "but will you never learn that worms and fruit are nothing good for breakfast? My mother used to select the best worms I ever ate. I wish you would do the same. I know that I do not suppose you ever will."

"Why, Robin, you told me that you liked the fattest worms I could find the other day," said Mrs. Redbreast. "Well, I thought so at that time," her chess, "you said the ones I had gathered were too long and lean and you will find the cherries nice," she added, without waiting for him to reply.

"They are too ripe," said Robin, hopping out to the end of the limb. "I might just as well not come home to dinner, there is never anything fit to eat."

Robin waited around a few minutes but his wife did not answer him or speak to him again and she gave the little Redbreasts their dinner and then began to clear the table, and Robin, seeing that there was no use trying to quarrel with her, flew away.

It took Mrs. Robin all the rest of the day to accomplish what she had to do, and when night came she had quite a long story to tell her mate and the children about their own, and at bedtime they all went to sleep and not one of them.

Then Mrs. Redbreast began to watch for Robin. He had no time to wait for the few home early to get supper. Harry had his dinner early made him very hungry.

He threw his cap into the nest and sat down on the edge of the nest and the supper he had expected to and the nest was empty, not one of the nest and the whole family was gone.

Robin looked around on the high looking behind the leaves and then he looked on the ground, for he thought the little ones must have fallen out of the nest and their mother was watching over them but no, they were nowhere in sight. Robin was hungry, so I have said, and there was no supper, and he sat on the edge of the empty nest looking very forlorn and feeling very unhappy.

Mrs. Redbreast, of course, was watching him, and when she thought he was punished enough she flew

Arranging Hen and Eggs.

MUST PAY THEIR JUST DEBTS

Mongrel and Long Tom-Nailed Hens Are Only Lashers and Eat Profits —Sell Them Off.

Are you going to wait until you are ready to go into business? That's a long time to wait.

"Try not start now and learn now business, then you will be as fair."

Get your father to let you take care of the poultry. This is the right kind of a father he will be only too glad to let you take hold of the work. And him and you will be pleased.

First, catch all those mongrel and long tomtailed hens and give them to the church supper for a stew. They don't lay any eggs. They are only loafers who eat up all the profits which the good hens make for you. No business man would keep a stock of shoes that he couldn't sell at a profit. There is no more reason why you should keep hens that are no place that don't pay.

Now, you are the poultry house so that it is dry and clean. No business man would keep his stock in a leaky store. How can you expect it to be that your poultry be kept clean and dry.

And last, but not least, make some money out of it. Get your father to give you everything you make above what were his last year's profits. You are a stockholder in the concern, tell him, and you want your share of the profits. When he sees the fairness of the proposition, he can't very well refuse.

Get into business for yourself this winter—the poultry business. Give your boss comfortable quarters. Feed them right and care for them carefully. And if you don't make a satisfactory profit, you aren't the business man we think you are.

If you have any questions to ask, write to James G. Halpin, Madison, secretary Wisconsin Poultry association.

BABY WEEK TO BE OBSERVED BY WHOLE COUNTRY

More Than Four Hundred Communities in United States Preparing for It.

WOMEN'S CLUBS TAKE HOLD

Federal Department of Labor Pointing Way for Effective Work—State Health Officers of Various States Are Giving Active Co-Operation.

Washington.—"The facts about American babies and America's responsibility to her babies will this year be known as never before, because the first week in March will be Baby week throughout the country," said Miss Julia Lathrop, chief of the children's bureau of the department of labor.

Four hundred communities, representing every state in the Union, are planning for baby week, so that for seven days the needs of the babies may be presented that all parents in those communities may learn a little better how to care for their babies and all the citizens may realize that they have a special obligation to safeguard the conditions surrounding babies.

The Baby week idea, according to the children's bureau, originated in Chicago about two years ago. Then New York had a baby week, and also Pittsburgh and other cities. Such practical benefit has in each case resulted that the General Federation of Women's Clubs has undertaken to promote this nationwide observance. State health officials and national organizations interested in public health and child welfare have taken up the plan and in various ways are giving it not only their sanction but their active co-operation. The extension divisions of the state universities have promised special assistance in intensive work during Baby weeks in rural communities.

Causes of Infant Deaths.

The children's bureau believes that baby week will give more parents a chance to learn the simple principles of infant care, and will awaken every American to his responsibility for the death of the 300,000 babies who, according to the census estimates, die every year before they are twelve months old. Therefore the children's bureau has prepared a special bulletin of practical suggestions for baby week campaigns, adapted to the varying needs of communities of different types. Copies of this bulletin may be had free of charge from the children's bureau here.

This bureau is conducting a detailed inquiry into the social and economic causes of babies' deaths. Its report shows that the inquiry confirmed earlier data showing a very average infant death rate of 124 out of every 1,000 babies in a steel-making and coal-mining town as against a rate of but 40 out of every 1,000 in a residential suburb. An even greater contrast is found between the most congested section and the choicest residential section in each of these two communities.

Commenting upon these findings the report says: "The more favorable the civic and family surroundings and the better the general conditions of life the more clearly are they reflected in a lessened infant mortality."

The report shows, however, that no deductions can be made concerning the relation between the general infant mortality rate and industrial employment of women until the facts about the number and proportion of mothers at work continue in the unpaid occupations, returns are made available by tabulation.

Data for Study.

This tabulation is especially important to the success of the children's bureau. Among the subjects of study which the law directs the bureau to undertake are infant mortality, the birth rate, dependency, and diseases, all requiring information as to family structure. For 1910 and 1911 this information was secured, but the material has not been tabulated because there has been thus far no public demand for it such as secures, for example, the comprehensive information regarding manufacturers published by the bureau of the census every five years. But neither the census bureau nor the children's bureau has funds to make the tabulation that would render the body of human facts available for use.

Meanwhile the children's bureau is pursuing its inquiry into the relation of babies' deaths to wages and social conditions, believing that the inquiry will prove increasingly valuable as a stimulus to more active protection of the youngest and tenderest lives throughout the nation.

Such practical results have already followed the bureau's inquiry into the securing of infant-welfare nurses, improving the milk supply, and making community interest in kindred activities.

The bureau also approaches the problem of infant mortality in a constructive fashion through two pamphlets entitled "Parental Care and Infant Care," which are sent upon request to mothers.

Program for Baby Week.

The feature of baby week that affords the best opportunity for enlisting large numbers of volunteer workers is a series of special events for each day in the week. Some of those mentioned in the following list may be suggestive.

Baby Sunday may well begin the baby week.

The committee in charge of this part of the campaign should secure a list of the leaders of the religious bodies of the community. The members of this committee should call upon or write to each, explaining the purpose of baby week and asking each to preach on that subject. In order to aid in the preparation of such sermons, a copy of an outline of information on the subject of baby week should be furnished.

A letter from the mayor of the city endorsing the baby day movement should be read from the pulpit.

If the governor or state health department has issued a proclamation or a letter indorsing the entire idea of a certain week for Baby week, this may also be read from the pulpit on this day.

Sunday schools may arrange special programs for Sunday school on that day. The committee may send a request to the superintendent of each Sunday school that such a program be arranged.

Church societies of men may arrange that their meetings held during the week shall include a short discussion of the subject. The discussion should have as a leader someone with special knowledge of baby welfare. Church societies of women meeting during the week may plan similar programs.

Mass Meeting or Rally.

A mass meeting may well form a very useful feature of Baby week. An interesting speaker from another city may be secured for this meeting; many state departments of health are able, on application, to send out speakers for meetings if the expenses of such a speaker are paid. Short talks by representative people of the community should be included. The talks at this meeting should be on subjects of general interest. Such subjects as "The Purpose of Baby Week;" "What a City Owes to Its Babies;" "After Baby Week, What?" "This Community's Baby Death Rate;" "What Other Cities Have Done for Their Babies" might be included.

On Flag day, which may come either on the Saturday before baby week opens or on Monday, banners with the baby-week emblem are distributed to the homes of all the babies under one year of age that have been registered with the health department. Those banners may be made up very cheaply of muslin with the emblem printed in appropriate colors. The advantage of Flag day are that with the banners flying from the windows of the sections where there are the most babies are made particularly aware of the fact that it is baby week, and also that the flags are a direct recognition of the fact that these babies have been registered. With each present should be delivered a program of baby week and a leaflet on the care of the baby.

School Day.

On one day during the week special exercises may be held in the schools throughout the city. These may come as a regular part of the school work or be held in the afternoon as a special entertainment to which parents are invited. Some of the following features may be included in the program for this day:

1. The reading of a letter to the schoolchildren from the mayor or other official telling them how they can help save the babies.

2. A talk by the principal or teacher on what the children can do for their baby brothers and sisters.

3. The reading of one or several compositions on "How to Keep Baby Well," which have been selected from among the compositions written by the children in a certain room or school. It is quite likely that the newspapers will publish one or more of the best of these compositions.

4. In schools where Little Mothers leagues are organized the program may consist of compositions and demonstrations by members of these leagues and of talks by their teachers. If no Little Mothers leagues are at present organized, the school day may afford an opportunity for their organization in many schools.

5. The performance of a play.

It is desirable to have daily programs at the headquarters, some of the best programs presented in the schools may be repeated at the central headquarters later in the week.

One day in the week may be devoted especially to the fathers of babies.

If the weather permits, an outing day for mothers and babies forms an attractive feature. This may take the form of an automobile ride, a morning or an afternoon spent in the park, or an excursion on the water. If it is possible, an alternative indoor program for bad weather should be planned.

Visiting Day.

On this day a tour of inspection of all of the places where any work is done for babies may take place. Such a day is very important in communities where infant-welfare work has been begun either by the health department or by private organizations and where it is desirable that the public shall know of the work being done and the need for further work. This will include infant-welfare stations, day nurseries, baby hospitals, and any other place where something is done for babies. City officials and representatives of mens organizations and of societies for civic and mutual benefit should be invited to take part in the tour.

In communities where there is a special need for better birth registration it may be well worth while to concentrate the attention for one day on the importance of registering babies' births. On this day all the physicians might be sent a letter asking their aid in securing prompt and complete birth registration for their city.

The newspapers should be furnished with incidents showing the practical value of birth registration. The general suggestion may be made that parents will do well to ascertain when the births of their children have been duly recorded.

"CANNING" INDIAN MUSIC

Miss Frances Densmore of the United States museum in Washington probably knows more about Indian music than anyone else in this country. She is compiling a book of the songs of the red man. Miss Densmore has made photographic records of the tribal songs in all parts of the country. Here she is shown transposing the music from the phonograph to notes that may be played on the piano. The job of collecting Indian music is a difficult one, for many of the songs being of a religious nature, the Indians are loath to give them to the white man.

ATTACKS BULL WITH AUTO

South Dakota Man Saved by Neighbor, Finally Able to Leave the Hospital.

Hudson, S. D.—John Dolver has been discharged from the hospital here, partially recovered from his injuries received when he was attacked by a bull on a Lincoln county farm.

Dolver had been nearly killed by the animal when a neighbor chared the beast with an automobile and, after repeated assaults, drove it away.

"MOVIE" FAN BLIND

Enjoyment of Films Not Hindered by Loss of Vision.

Gib Tongue of Newsboy Interpreter Keeps Older Companion Posted on Floating Pictures and Story They Tell.

San Diego, Cal.—An unusual sight, that of a blind man attending motion picture shows in this city, caused considerable attention at first, but now the people of that city have grown accustomed to seeing "Blind Charlie" Gardner and his youthful companion, Harry Fisher, at the various theaters, as they have been steady devotees for a number of months. The blind movie fan sells papers for a living, having lost both eyes when he struck his pick into the muck in a gold mine at Ryolite, Nev., and exploded a forgotten charge which had failed to explode at the proper time.

Young Fisher, interpreter, is also a newsboy and the support of a widowed mother, who earns his way into the picture houses by his ability to translate with rapidity the pictures as they are projected on the screen. When questioned as to how he secured satisfaction from the pictures, "Blind Charlie" replied:

"My newsboy interpreter is an expert in describing action and scenic effects to me, and from his vivid descriptions I form the mental picture of what others can see with their eyes. Besides keeping me posted on the setting of each scene and the personalities, also the character development of the leading roles in the plays, he explains the plot and action to me as fast as they are unrolled on the screen.

"By keeping one hand on the boy's arm, I get the emotional quality of the story through the sense of touch, and also by listening to the variations in his voice. I seem to feel the atmosphere of the scenario, the intensity of the situations, through the audience.

"It is a sort of sixth sense, I suppose, though that doesn't really express it. If the picture is one of pathos, there is an inexplicable something in the air that grips me; it is the emotional forces of the audience that are at work in me. But when a large crop of inventions in England, throws from devices to give protection against Zeppelins to a toy warship which bucks and behaves so cleverly seems to be bottom of the nursery bathtub when its vital spot is struck by a miniature torpedo. The total of patents applied for in the United Kingdom during 1915, however, has fallen from 30,000 to about 18,000.

Besides a number of anti-Zeppelin inventions, there have been many contrivances for arresting torpedoes, submarines and mines and means for abling one submarine to communicate with another under water. Another new device is a projectile which, it is asserted, scatters molten metal at a temperature high enough to burn a hole through steel or solid concrete walls.

A body shield on wheels has been devised to enable infantrymen to charge unharmed right up to the enemy's trenches. For hospital purposes there is a hydraulic stretcher. Among the many new war toys and games one is painted as the "trench game," promises to become very popular.

IS NOT BAR TO TEACHING

Marriage Not Sufficient Cause for Dismissal of Married Teacher, Says Court.

Salem, Ore.—Marriage alone is not sufficient cause to warrant the dismissal of a school teacher, according to a decision rendered by the Oregon supreme court.

The decision affirmed the action of the circuit court of Multnomah county in issuing a writ of mandamus commanding the Portland school board to reinstate Mrs. Maud E. Richards, whom it had dismissed as a teacher because she married.

If You Are Deaf Read This
Ear Heading teaches "the eyes to hear." This study is easily acquired through our complete Correspondence Course. Do Something for your Cold.
Do not let it wear you out and encourage sickness. Take Dr. King's New Discovery. You will get instant relief.
Most of us neglect coughs and colds. We brush suggestions aside with the remark "I'll be better soon," and oftentimes we do get better. However, when that cough or cold gets a hold, it usually means severe, prostrating pain, with our work and often a spell of sickness follows. Don't it better immediately to check that cold and ease the cough? Dr. King's New Discovery does it! Search as you will, you will not find a better remedy.
Dr. King's New Discovery is made of Pine Tar extract, with soothing balsams and laxatives. It's antiseptic and kills the germs, allays the cold-fever and soothes the irritated, inflamed throat. The very first dose gives relief. You cough with less strain. And if you have a lurking or tight cough, painful relief follows and you soon drop into a restful and refreshing sleep. Get a bottle today and let Dr. King's New Discovery be your cold and cough doctor. At all druggists.

OUR PUBLIC FORUM

Chas. C. Prouty ON THE SHIPPER AND THE RAILROAD.

Chas. C. Prouty, while a member of the Interstate Commerce Commission, in discussing the relation of the Commission to the shipper and the railroad, said:

"The chief purpose of the Interstate Commerce Act was to protect the shipper. The most eminent man who ever sat on the Interstate Commerce Commission was its first chairman, Judge Cooley, and very early in the history of that commission Judge Cooley published an opinion in which he said that the existence of the commission was not to enable railroads to maintain reasonable rates, but to protect shippers against the imposition of unreasonable rates. Now I think since Judge Cooley published that opinion conditions have changed. I think that today it is just as much the duty of the Commission to see that the railroads are given reasonable rates which will yield to them a fair return, as it is to see that no unreasonable rate is charged the shipper, and I believe this is in the highest interest of the shipper himself.

"At the basis of all right thinking about this subject lies the fact, very often stated, very little apprehended, that the railroad is a public servant. The property is private property, but the thing done is a governmental function. It is done by the government in most European countries. Now, if the government is the master, and if the railroad is the servant, the servant cannot properly discharge its duty unless the master, instead of hampering and discouraging, uses its to assist and foster.

"You understand that if the business of this country is to develop the railroads must develop also. You also understand that in the case of many railroad systems, and perhaps most railroad systems, the business is developed up to the point where but little additional business could be taken on, with the present facilities.

"Now where is the money to come from with which this is to be done? Where did the money come from that built the railroads of this country? It came from the private investor; it came from exactly the same source that the money comes which operates your business, which operates every other business. And why was that money put into railroads? It was put into railroads because the people who put it into those railroads believed that it would pay a return. This money which must be had by the railroads for this country has got to come from this one source—private investors. In the past, railroads have been able to borrow whatever their economies required. Railroad stocks have been a favorite form of investment. Railroad bonds, next to municipal bonds, have sold higher than any other securities. Now, if that is to continue, it must be because the railroads make such earnings as will justify the investment."

MORTGAGE SALE
DEFAULT having been made in the conditions of a mortgage made by Ole Olsen and Ingeborg Olsen, his wife, to Ole Olsen, dated of September 4, A. D. 1912, and recorded in the office of the Register of Deeds for the county of Charlevoix and state of Michigan, on the 20th day of September, A. D. 1912, in liber 20 of mortgages on page 1, on which mortgage there is claimed to be due at the date of this notice the sum of Twenty-five hundred dollars (Twenty hundred dollars and Five hundred dollars) and no suit or action or proceeding having been instituted to recover the debt secured by said mortgage or any part thereof.
NOTICE IS HEREBY GIVEN that by virtue of a power of sale contained in said mortgage and the statute in such case made and provided, and pursuant thereto, on Saturday the 22nd day of April, A. D. 1916, at 10 o'clock in the forenoon, at the front door of the Court House in the City of Charlevoix, Charlevoix County, Michigan, the place where the Circuit Court for the County of Charlevoix is held, and at public auction to the highest bidder, there will be sold at public vendue, to satisfy said mortgage, the premises described in said mortgage, or so much thereof as may be necessary to satisfy the amount due on said mortgage, with interest and costs of sale, taxes, and all legal costs, together with said attorney fee, which premises are described in said mortgage as follows, to wit: All that part of the Southeast quarter of the Southeast quarter of Section 30, Township 34 North, Range 8 West, lying North of the West Branch Jordan River, and South of the West Branch Jordan River, and South of the Jordan River, and South of the Jordan River, and South of the

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by FRANK WALTERS

COPYRIGHT BY DODD, MEAD AND COMPANY

SYNOPSIS.

Birth of Dalby's brother. Dalby's father, a Swedish nobleman, married a Lappish man, as "The Lollingsmith Lumber Co. go about on it." He makes arrangements with the camp and the work he has done. Dalby's father dies and his mother survives. He knows little of his father. He intends to get a handful of the wealth in the silver mines of Montana. He gives Ellen permission to ride Black Bill, grows in the forests. Ellen rides Black Bill. Jamestown, Dalby rifle fires of "Treasure." He discovers the treasure and the sign of the Siberia crew of Lumber Jacks. Dalby's brother Jamie, Ellen's Pride of a Jackpine, Dalby's Secret, "The Night Wind on the Pines" and Shaun Ardmore.

CHAPTER VIII.

A Newcomer Among the Pines.

One day soon after the men returned with word of the girl's safe delivery into the hands of Captain Giraffe, Sandy, working over his books in the tiny office, was startled by a voice at the door.

"Oh, no," it was saying in fresh, sweet accents—and the very tone said that—"you need not trouble to get up to stay. If Kate is the office, or boardmasters of this place, I'll find someone in to change. Just put my trunk on that pile of timber. Be careful! Oh, do be careful! That case contains my typewriter, and it's more precious than gold. Is this Kate's right, now, and what do I owe you?"

There was an answer and the clink of money, and Sandy was just at the office door overend. It was the first time that confronted him. Fifth avenue it said, the whole inimitable metropolis refined into one woman.

"I must beg a thousand pardons," she said, her clear blue eyes raised to his face, "and a lot of indulgences I want to be taken in. Do you think anyone in this delightful place will do it?"

"The whole camp will fight for the privilege," promised Sandry rashly, falling in instantly with her bantering tone and regarding as the truthiest of her smile. He watched her slit down gracefully in the chair that he hurried to pulled forward. With the first glimpse of her the old nostalgia had returned upon him and his heart clamored for home.

"You are from New York," he said simply.

"Yes. And I suppose I must explain at once. You west-rners are so insistent on reasons. I'm Jessie Dwyer Ordway—and I am of that unfortunate and much criticised species, the woman with a life work."

The smile she turned upon him was electric, full of fun and kindly pity, which is distinctive of the vital woman, the woman of strong and excitable passions; it appealed to Sandry instantly, so that a thrill of gladness ran through him to his very finger tips.

"I have written a few short stories which have been well received in the eastern magazines but they fail to satisfy me. I have my first novel drafted, and it is over there on yonder table piling along with my precious typewriter. It is a tale of the human species—and I've come out to work on the ground. Do you think I can find sanctuary?"

"We'll see that you do," said Sandry pleasantly, "and you couldn't have struck a better spot for local color anywhere in the Northwest. We are sentimental here, right down to the primitive, and we are swamped with 'atmosphere.' You just come along to Ma Dalby," he promised, already using the tone of helpfulness which their common nativity and her frank manner had established between them.

Hungrily he watched her slather over skirts and precede him up the little path to the cook-shack, where Ma Dalby was already standing in the door to take inventory. Every little movement was so familiar, so potent in its suggestion of home.

Chatting fitfully, the stranger stepped up on the porch and smiled at the white-haired old woman.

"Ma Dalby," said Sandry—he had long since lost the sense of newness in the family atmosphere of the camp—"this is Miss Ordway of New York—a famous author—and she has come West to write a new book. Luckily she struck us in her search for local color. Can we take her in?"

Ma Dalby looked at the visitor sharp, and Sandry saw a scarce perceptible change pass over her chary features.

The vital blue eyes of the younger woman gave back the scrutiny with perfect openness.

"Please do, Ma Dalby," she said in her sweet voice. "Please, please do."

"Don't know," said Ma slowly; there isn't any room."

"I'll abdicate," put in Sandry quickly. "We may have my room and I'll put up a cot in the office."

Just at that moment Sliets came in at the west door and, crossing the big room, stood looking out upon the cross on the porch. Her dark eyes rested first with a fleeting glance on Sandry and then she saw the other girl.

She did not speak but leaned against the door-jamb drinking in this apparition, in the little pause that followed the turned to the old lady.

"Yes, mother," she said softly, "please do."

The teamster flashed a brilliant glance at her, and with an inimitably pretty gesture reached out a gloved hand and jerked her arm, bare under the rolled-up sleeve.

"Mr. Sandry" called John Daily, standing on the foot-log, "will ye come down for a minute?"

"Sliets," said Ma, when the glittering guest had been shut away in Sandry's little south room "what for do you want we should keep her?"

"Why—I don't know, mother," said the girl simply, "only she's too beautiful to let go. She looks like the sun shine."

"Yes, Yes, I think she does," repeated Ma inconsiste, "and a deal as cold and false."

Sandry joined his foreman he saw that something had ruffled the usually placid temper of the slow giant.

"What's the matter?" he asked.

"Hampden of the Tyee Pines is in the office," said Daily sharply, "an' ye know how he's got somethin' nasty up his sleeve."

"Oh, yes—Hampden—he's one of the owners, isn't he?"

The two men walked back to the office and found, seated in the swing chair, with his feet on Sandry's desk, a short, square man with a free and manner which set Sandry on edge at

Sandry on Edge.

the first glance. They took bespoke a nature self-satisfied to the point of pride, a crafty shrewdness that had been consistently successful and an ass mentative hardiness of purpose.

"Ah, Mr. Sandry," he said, taking his feet from the table with insolent ease, whereon the Hampden of the Yella Pines—and I come over on a little matter o' business."

"Sandry bowed.

"Glad to know you, Mr. Hampden," he said civilly, "business is business and the damaged railway cause suddenly to me. Shaving his appreciement of the man.

And I might as well get it over with. It's bound to be a pretty dose grain a bit."

At the phrase, a smile that was meant to be insolently spiteful but rapidly lost in the sense of newness of its family atmosphere of the camp

"This is Miss Ordway of New York—a famous author—and she has come West to write a new book. Luckily she struck us in her search for local color. Can we take her in?"

Sandry on Edge.

CHAPTER IX.

Hampden and the East Belt.

In the press of business and the pleasant mulling over the whole old city of New York with Miss Ordway, Sandry forgot all about Hampden in the next few days. Ma Daily had hotly on to say, keeping a grim silence which Sandry noticed. As for Sliets, she followed her with fascinated eyes whenever she appeared. Miss Ordway did not out with this one. Her morning hours were given up entirely to the incessant clicking of the typewriter in the seclusion of the little room, and dinner was served in one hour and with Ma Daily and Sliets, and invariably took a short walk in the afternoon.

In the evenings Sandry came in, and Sliets sat in the empty eating room, discussing with a common knowledge that seemed to bind them apart to gether, the things of the great outside world. At such times Sliets listened to their experiences, her dark eyes glow and her eyes like mysterious pools in the shadow of her heavy hair.

That week there were several arrivals at Daily's camp—wedded, responsible-looking men from Portland; and before they left Sandry had secured an order for logs to be plunged the camp into the hardest work, longest hours and highest over time it had ever known.

Also he sent out word to Toledo that he had room for all the men he could lay hands on.

The new crew was put to building the log trail up through the shaded opening to the East Belt, and activity permeated the hills.

The incessant shrill tools of the donkey, the hoarse and cough of its frost blows the rumble and clatter of the horses, the ring of the axes in the early days, and the letters he wrote to his father became brighter, filled with an enthusiasm of accomplishment.

For a day or two the work went forward finely and the new logs of the fresh laid trail gleamed white against the green of the mountain. Then Colonel Sent into the uncut timber ahead to blaze for further operations, returned to the works in doubtful-looking

"John," he said to the foreman, for none of the men would award Sandry the right of consultation unless it was unavoidable, even yet, so distinct and deep-rooted was their aversion to the Easterner and his ravenous; "John, I'm afraid we've bumped a black set in' square across the trail."

"The hell you say! Hampden!"

The logger nodded. The partner of Hampden's visit had been freely spread in the camp.

Daily turned to Sandry.

"There's a new claim settin' across our trail up in the track between here'n the East Belt, Mr. Sandry. Let's

Began a Systematic Search for Word of the Narrow Trail.

go up an' take a look at it," he said. "I guess Hampden's poakin' his bluff."

"Just so. Just so," said Hampden, "only I'm afraid well have to stop her operations for awhile." Sandry turned abruptly, and the two men strack up the new trail.

"I'll have to settle that man, Daily," said the owner; "has he been doing such things ever since I left? You men pasted have been rivals?"

"Pretty much. Sometimes we've been dolin' 'em," returned Daily grim ly. Sandry laughed.

"Well, you Westerners believe in fixing things first-hand, anyway, which helps some."

Far up in the heavy timber they came into a small natural clearing some 200 feet in extent, not like a base amid the solid bulk of the timber crowding close. In the center was a tiny log shack, shake-roofed, without doors or windows, the very least a man might do in grudging compliance

Began a Systematic Search for Word of the Narrow Trail.

with the homestead law. They looked at it from all sides, noticed a few blazes on the nearest trees, read a miserably crude and impudent notice, and returned to camp.

"And so with our big contract with the Portland Lumber mills" said Sandry. "I begin to see Daily, you gather out ten men and go up and take that shack to pieces just as quick as you know how. Don't leave a trace. Bring the timbers away and start felling from that end to meet the trail."

As the foreman went among the men picking his crew, Sandry turned down across the slough toward the office. Once settled at his desk he took out the records of the Dillingworth company and began a systematic search for word of the narrow trail of hill and timber between the camp and the East Belt.

When Daily returned at quitting time he found Sandry bending over the cabin and the start of the new cutting.

"Why, what for?" asked Sliets, her eyes still aglow.

"To have it, of course. You're dreadfully unsophisticated. Come along."

And swinging the mail sack he turned toward camp, leaning heavily at his heels, falling is behind with a certain instinct, and Sandry had an amazed appreciation of the tenderness processions he had seen enterprising Sliets, and the brilliant laughs and easing adjuncts. He turned presently to take a look at the man Coosmah brought it up with a faithfulness to detail that was convincing.

At the second door of the cook-shack they were met by Miss Ordway, looking like a brown-green giant behind plate glass, an incongruous element in her belted dress of light broadcloth. She leaned to the door-way with her table grace, an immaculate hand on the door-jamb.

"The wild huntress!" she smiled at Sliets.

"No," said the girl, "I never hunt. I love the deer best in the form."

"Yes?" said Miss Ordway curiously, and Sandry, kicking the clinging earth from his ranked boots, saw the divining spirit of the writer probing this elemental nature. "Why? Wouldn't you be proud of an antlered head with the mark of your skill between the eyes?"

Sliets flung out a hand in a quick gesture.

"Oh, no, no—I could never do it! Unless," she finished, still in that dreamy manner, "someone I loved were starving. Then I could."

Sandry looked at the two sweet faces, one so lovely in its smiling, amused alertness, the other so absent and alien to the human, her own soul had stirred, and a deep admiration for both filled him.

"Will to the wild," he said under his breath. "What are you, Little Sliets? I wonder if I'll ever know?"

"Sliets," broken in the foreman, passe in at lumbering fashion, "the Teamster's comin'. I heard today he's been seen a couple times—once crossin' in the Big Slough below the bridge, an' once in the hills."

Sliets had time since he had known this girl with her varied natures Sandry saw the swift lighting of gladish excitement in her face as she turned around at Daily

"Oh!" she cried gladly, "how soon will he be here, I wonder?"

"Don't know."

LOOKING ON THE SUNNY SIDE

Anything Is Better Than to Give Oneself Over to Pessimism That Will Spoil Everything.

Since we all have more or less misfortune to meet let us strive to meet it in the right way. Why sit down and brooding over it as if that is cure? Why turn our sorrow over and over in our minds, seeing it in ever one phases of misfortune? No! Let us stand up beneath its weight, so that we have heavy the load may seem and, with our eyes fixed on the glim mer of light, let us walk swiftly out of the dark paths into the sunlight.

Once we have learned to walk on the sunny side of life darkness will have no further terrors for us, for we will carry our sunshine around with us in the depths of our hearts. The sunshine of the heart is far warmer and brighter than the sunshine which we see and feel with our physical senses.

Once we have gained the true sense of our sunshine we will see the sunshine in all around us.

INVENTORS ARE KEPT BUSY

Ingenious Contrivances That Have Been Devised to Lessen Military Hardships.

There are sure to be many contrivances invented for alleviating the hardships and pains of soldiers before the present war comes to an end.

First and foremost there are boots with springs both heel and toe. This it is argued, will make marching less fatiguing, as the springs will prevent the jarring now felt by the soldier as he marches along, especially over hard roads.

There has also been invented a bullet-proof shield which is composed of wire. This shield is intended to buckle on to the soldier's body, and will protect the vital parts, although it will not interrupt the wearer's view, as he can see quite well between the strands of wire.

Soldiers often suffer terribly from thirst, and once more the inventor steps, unavailingly, into the breach. A helmet has been constructed the lower part of which is hollow. A broad

ICE KEEPS FIREMEN WARM

The Thicker the Coating of the Congealed Fluid the Better the Wearer Will Feel.

Want an overcoat that will shut out the chill better than fur or clinchilla? Then get draped in a suit of ice. It's the latest winter apparel, and is worn at conflagration functions by members of the Minneapolis fire department, says the Journal of that city.

The wearer may look like an acute sufferer who has been lower in a dose, but he will be as warm and snug as a person in a cabinet bath.

"People who see the firemen with their clothing increased with ice are moved to sympathy for the cold they believe the firemen are suffering," said Arthur C. Pierce, fire marshal. "As a matter of fact, the ice is the best protection against frigidity that the firemen have. It shuts out the air and hermetically seals in the body's warmth.

"It is practically impossible to keep from getting coated with ice at a winter fire. Even if a fireman keeps just in range of the nozzle or a broken hose line, he is certain to get soaked with a fine spray that fills the air. Once this moisture has taken like an icicle, and is almost as warm as a stove-poker.

"The only disadvantage is the weight. He feels about as uprights as a deep-sea diver. Sometimes the icing on his hat will be an inch thick or more.

"Occasionally, where firemen have to remain stationary for an hour or so while water pools about their feet, they get frozen in and have to be chipped out with axes. Do they feel warm? Yes, a bit of it. The ice keeps them warm.

"It is a common thing for firemen to get back to the stations and find themselves so crusted that they can't loosen their spanner bolts or unhoop their coats. I have seen firemen brought beat them with the flat part of axes."

Caruso's Grievance.

Pity the sorrows of Caruso! Many people think of him as the most envied of men. He gets $2,500 for a night—or is it $2,500?—with the maximum of pleasure and the minimum of exertion. How different is the lot of the unfortunate Caruso! Hear his famous tenor to a sympathetic friend: "When I was unknown I sang like a bird. Now I am famous, I suffer of nerves. But how my reputation is made my pleasure I look at that man who I am trying oppressed by a reputation which cannot increase, but which the least slip may make my compromise. My audiences, well disposed towards me, are sure to have to pay such high prices to hear me that they imagine I am a miser singer who must give them unheard-of results. That is why I am often the unhappiest of men. I tell you frankly I was happier when I was earning ten francs a night. I spent ten francs, and there, and been that my reputation was not ruined if I happened to give a croak. Today—! and the press and the public are sentence with a grunt. Yet, how many whimsicalities! Yesterday, I sang Coosmah brought it up with a faithfulness to detail that was convincing.

At the second door of the cook-shack they were met by Miss Ordway, looking like a brown-green giant behind plate glass, an incongruous element in her belted dress of light broadcloth. She leaned to the door-way with her table grace, an immaculate hand on the door-jamb.

Canadian Shipping.

The department of marine and fisheries of Canada, in its report on the shipping of Canada for 1914, gives a total new tonnage of 42,746, two largest figure in 14 years. Of this amount, 35,212 tons was credited to Ontario, which has been advancing as a shipbuilding and ship-building province since the lumbering fashion, the

AMERICANS GROW RICH IN CANADA

Testimony Proves Falseness of Statements as to Onerous Taxation and Conscription.

"The attempt to check emigration from the fertile and productive prairie provinces by publishing alarming statements about the enormous war taxes that are being paid here—$200 on a gun-rifter section yearly—about forcing your men to enlist for the war; about the cold, no room and any old story that by their extravagant boldness they imagine even and women from venturing north to Canada, is really in the list of curios to our people. Knowing the country, we can hardly take it seriously. Our governments, however, dominion and provincial, are taking steps to expose the false statements that are being made, and thereby keep the channel open for continuing the stream of settlers that has been pouring in for the past decade. We have thought to assist in this work and to do so purpose giving, from time to time, actual experiences of Americans who have come to Saskatchewan during late years. We give the statements of two farmers in full as follows:—

STATEMENT OF M. P. TYSDAL.

I lived near Lee, Illinois for 46 years. I came to Saskatchewan in the spring of 1912 and bought land near Kinistino. I paid $20 an acre for it. 1,680 acres, ever since. I have had great crops. In 1914 I had 100 acres of wheat that yielded 40 bushels to the acre. I sold this wheat at $1.50 per bushel.

I like the country and my neighbors. My taxes on each quarter section (160 acres) are about $15 a year. This covers municipal tax, school tax, hail insurance tax—everything. There is no war tax, so-called. I like the laws in Canada. The first treatment given me in any way. I am just as independent here as I was in Illinois, and I feel that my family and I are just as well protected by the laws of the province as we were in our old home in Illinois. What I earn here is my own. I have seven children and they take their places at school, in sports and at all public gatherings the same as the Canadian born.

(Signed) M. P. TYSDAL.

February 15, 1915.

STATEMENT OF STEVE SCHWETZBERGER.

I was born in Wisconsin, but moved with my parents when a boy to Steuben Co., Iowa. I was there farming for 30 years. I sold my land there for over $100 an acre. I moved to Saskatchewan and bought land near Prince Albert in the spring of 1912. I bought a half section of land. I have root broken 80 acres of it. I have 100 head of cattle, 20 head of horses, 20 head of sheep, 20 head of hogs. I have a half section of land. I have root broken 80 acres of it. I have 100 head of cattle, 20 head of horses, 20 head of sheep, 20 head of hogs. I have the same as in Iowa. We have perhaps a little more work, but the protection with a group. Yet, how many whimsicalities! Yesterday, I sang Coosmah brought it up with a faithfulness to detail that was convincing.

At the second door of the cook-shack they were met by Miss Ordway, looking like a brown-green giant behind plate glass, an incongruous element in her belted dress of light broadcloth. She leaned to the door-way with her table grace, an immaculate hand on the door-jamb.

"The wild huntress!" she smiled at Sliets.

"No," said the girl, "I never hunt. I love the deer best in the form."

"Yes?" said Miss Ordway curiously, and Sandry, kicking the clinging earth from his ranked boots, saw the divining spirit of the writer probing this elemental nature. "Why? Wouldn't you be proud of an antlered head with the mark of your skill between the eyes?"

Sliets flung out a hand in a quick gesture.

"Oh, no, no—I could never do it! Unless," she finished, still in that dreamy manner, "someone I loved were starving. Then I could."

Sandry looked at the two sweet faces, one so lovely in its smiling, amused alertness, the other so absent and alien to the human. Her own soul had stirred, and a deep admiration for both filled him.

"Will to the wild," he said under his breath. "What are you, Little Sliets? I wonder if I'll ever know?"

"Sliets," broken in the foreman, passe in at lumbering fashion, "the Teamster's comin'. I heard today he's been seen a couple times—once crossin' in the Big Slough below the bridge, an' once in the hills."

Sliets had time since he had known this girl with her varied natures Sandry saw the swift lighting of gladish excitement in her face as she turned around at Daily

"Oh!" she cried gladly, "how soon will he be here, I wonder?"

"Don't know."

HUSBAND SAVED HIS WIFE

Stopped Most Terrible Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Denison, Texas.—"After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous and had just been going on until I had almost given up when I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I was almost a walking skeleton and life was a burden to me until one day my husband's stepsister told my husband if he did not do something for me I would not last long and told him to get some medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and I have never had any female trouble since. I feel that I owe my life to you and your remedies. They did for me what doctors could not do, and I will always praise it wherever I go."—Mrs. C. O. Lowery, 419 W. Hendersy Street, Denison, Texas.

If you are suffering from any form of female ailment, get a bottle of Lydia E. Pinkham's Vegetable Compound, and commence the treatment without delay.

Soon Settled.

Father and mother were having a little chat in the nursery after prayers for the night. The future of their little ones was the interesting topic of their conversation.

"Then what about Harold?" said father presently.

"Ah, Harold," sighed mother, a shadow crossing her face. "I sometimes wonder what will become of Harold! He seems to take a fond fancy to anything he sees in Illinois and I feel that my family and I are just as well protected by the laws of the province as we were in our old home in Illinois. What I earn here is my own. I have seven children and they take their places at school, in sports and at all public gatherings the same as the Canadian born.

The KITCHEN CABINET

A light supper, a good night's sleep and a fine morning have often made a day of the same name when nothing else succeeded, a restless night and a rainy morning have proved a vexatious.—Chesterfield.

SANDWICHES FOR GUESTS.

Good wholesome bread is the great food in our homes and is still the most fitly prepared for the hungry man who has little time to prepare his food. Bread is the most important staple food.

Quick Bread.—Boil and mash seven potatoes, add a pint of water in which the potatoes have been boiled, and three pints of cold water, then stir in two and a half cakes of yeast dissolved in a little warm water, two tablespoonfuls of salt, two of sugar and three of flour, mix and add a pint of boiling water; when cool add to the first mixture and work with a cloth and knead ten hours. Then place in a moderately cool place until needed. For each loaf take two pints of mixture, add a scoop of flour, stir well and let rise in a warm place. When risen, knead lightly and place in a moderate oven.

Tea Rolls—Scald two cupfuls of milk and pour it over a cupful of sugar, three tablespoonfuls of butter and a teaspoonful of salt; add three cupfuls of flour, stirring in half an hour. Then add one cupful of yeast, dissolved in a fourth of a cupful of luke-warm water. Cover and let rise until it is light, then add two well-beaten eggs, three more cupfuls of flour and a teaspoonful of cinnamon. Place in a buttered pan, let rise until double in bulk. Form into small rolls and place in a buttered pan, let them rise until light, brush the tops with melted butter and bake in a hot oven for twenty minutes by adding to the above one-half a cupful of cocoa.

Popovers—Take two cupfuls of flour, two cupfuls of milk, three eggs and a teaspoonful of salt. Heat the eggs until light, add the milk and salt and pour gradually into the flour, beating all the time. Strain the batter and pour into hot greased gem pans, bake in a hot oven twenty-five minutes.

Let us examine severally whether we have been intrusted to us or kept.—Dickens.

Greatness is nothing if it is not humanity.—Gladstone.

HOUSEKEEPERS' HELPS.

The indispensable pocket in a kitchen apron may be put near the edge of the apron, but on the under side, so that it will not be caught and worn out by protruding point.

Treat your broom to a hot-water bath of hot soap suds, dipping it up and down in the water and then shake out the water. It will be found as sweetened and flavored whipped cream, dot with a cherry or bits of jelly.

Cut plain sponge cake in slices, split them and fill with jam, then put these together with sweetened rhubarb or raisins, cover with a plain icing, decorate the top with cream and a bit of jelly.

Orange sliced and placed as a filling in chocolate cake, served with a good cream is very delicious.

Cake crumbs of various kinds with any stewed or canned fruit, make a very delicious dessert served either strained hot or baked.

Strawberry Dessert.—Cut plain cake in squares, and dip in canned strawberry juice to soften, put on a layer of sliced bananas and decorate with a few choice preserved strawberries. Serve with whipped cream sweetened with the juice and slightly sweetened.

Fig Bits.—Take a couple of cake crumbs, melt a tablespoonful of butter and stir in the crumbs until they are moist. Place a layer of the crumbs in a baking dish, add a thin layer of apple and fig, finish with the buttered crumbs. Add enough lemon juice and water to keep the mixture from scorch to bake. Cook until the apple is tender.

Nellie Maxwell

"I Believe That is a Stuffed Cat."

"Yes," she added, "I'll go out to the barn and see if I can find some."

"Oh!" she added, "I'll go out to the barn and see if I can find some."

"Yes," said another, "that is not a real live Persian; I can tell by the feet one sight and looked at her, and then she turned to me and said, 'I know a place to live! I wish we had always lived here.'

One day the cook came to the barn and called Tabby. She had a nice time of it, and when Tabby had finished it the cook carried her into the house.

"You stay here tonight," she said. "This place is overrun with mice. That Angora Persian cat has as well be a stuffed cat for all the work she does."

Tabby purred and rubbed against the cook's dress. "I have won so far," she said to herself. "I guess I will get upstairs after a while, too."

A few days later Tabby heard her mistress call Tabby, Tabby, one morning, and she ran to the stairs and down they went.

Her mistress stroked her head and patted her, calling her good Tabby, and then took Tabby into a closet. Some bits of feathers and flowers were lying on the floor.

"See what those horrid mice have done," said her mistress. "It never happened while you were around here. Florette is a handsome cat, but she is not one-fifth of one as far as catching a mouse goes. She lets them walk all around her."

"Meow, meow," said Tabby.

"Yes," said her mistress, who seemed to understand her; "you are to stay; only keep the mice out, and here is a good cushion, right by the window in the sun. Florette cannot have all the nice things. Hitherto she has handsome dogs, and you certainly cannot be beaten catching mice."

Bobbie Knew.

Fond Mother—Bobbie, come here I have something awfully nice to tell you.

Bobbie (aged six)—Aw—I don't care. I know what it is. Big broth er's gone to college.

F. Mother—Why, Bobbie, how could you guess?

Bobbie—My bank don't rattle any more.—Awgwan.

Would Be Mister-Slipp.

Little Bobbie who has just begun the study of geography, was told by his aunt that the Mississippi was called the "Father of Waters" by the Indians. "You must be mistaken, aunty," replied the little fellow; "it was the Father of Waters it would be Mister-Slipp."

THE SANDMAN STORY

By Mrs F A WALKER

TABBY AND FLORETTE.

Tabby was a tiger cat, and could catch a great many mice. She was not afraid to look for them, and proved herself on the fact that where she was there were no mice to bother anyone.

But one day Tabby found a large yellow-and-white Angora cat had come to live in the house. The name of the new cat was Florette, and her eyes were blue, while Tabby's eyes were green.

"Your nose is broken," cried the cook when Tabby came crying into the kitchen when she had been driven downstairs. "That new cat is the pet now, and you will have to stay with us."

Tabby ate her supper in silence and knew that the cook spoke the truth, but she hunted mice and slept in the corner of the kitchen, right on a hot pound.

Soon night while she was watching for mice in the pantry she thought of a way to bring herself into favor with the house.

"I'll just stop catching mice," she said. "I don't believe that pretty Florette could catch a mouse; most likely she would be afraid of one if she saw it, or too lazy to exert herself."

"I Believe That is a Stuffed Cat."

Tabby was very quiet, and for two days she did not catch a mouse; most of the time she was sitting on the kitchen table, or else in the sitting room with the family. She was very quiet and very good, and the family noticed it.

"Florette is a good cat, and we have lost a lot of mice since she came," said one; "I wonder what ailed Tabby?"

"I don't know," said another, "but she is quiet and good, and I like her."

"Yes," said another, "that is not a real live Persian; I can tell by her feet one sight and looked at her, and then she turned to me and said, 'I know a place to live! I wish we had always lived here.'

One day the cook came to the barn and called Tabby. She had a nice time of it, and when Tabby had finished it the cook carried her into the house.

"You stay here tonight," she said. "This place is overrun with mice. That Angora Persian cat has as well be a stuffed cat for all the work she does."

Tabby purred and rubbed against the cook's dress. "I have won so far," she said to herself. "I guess I will get upstairs after a while, too."

A few days later Tabby heard her mistress call Tabby, Tabby, one morning, and she ran to the stairs and down they went.

Her mistress stroked her head and patted her, calling her good Tabby, and then took Tabby into a closet. Some bits of feathers and flowers were lying on the floor.

"See what those horrid mice have done," said her mistress. "It never happened while you were around here. Florette is a handsome cat, but she is not one-fifth of one as far as catching a mouse goes. She lets them walk all around her."

"Meow, meow," said Tabby.

"Yes," said her mistress, who seemed to understand her; "you are to stay; only keep the mice out, and here is a good cushion, right by the window in the sun. Florette cannot have all the nice things. Hitherto she has handsome dogs, and you certainly cannot be beaten catching mice."

Small Staying Power.

The household encouraged the little servant girl to go to the pictures. They felt this would be a good night's outing. She went, and they asked her afterwards whether she had enjoyed herself. "Yes," she said rather dubiously, "but I can't think them long. I only stayed two hours."—Exchange.

Two per cent of metallic sodium will harden lead so that it will ring when struck.

Daily Thought.

If men from their youth were made to understand that sauntering honest and useful occupations, of custom, let a great part of their life run listlessly away, they would find time enough to acquire skill and dexterity in hundreds of things.—Locke.

Hint for Mining Investors.

Did you ever notice how some of the silent mines is brazged about as being the richest, fat like people?—Bill Mo-Gonty, in Engineering and Mining Journal.

JAPANESE BOY BLACKSMITHS

Busiest and Hardest Workers in World —Have No Thought of Play While Work Is Before Them.

In Japan boys are apprenticed to learn a trade much younger than boys in other countries are. At Otsu, one of the Northwestern (Christian) Advocate. Thousands are put in shops to learn to be blacksmiths when an American boy would still be in school. A Japanese father has so many boys that he has to put them out at some useful trade in order that they may bring in money to support the family. The boys have to work long hours, from seven in the morning until six in the evening.

They are faithful workers, the busiest you could find anywhere in the world. You whose children come and stands in the door to watch one of their work he will not look up from his work. He has no thought of play as long as he is at work; but when his hours are over he by. Have to go out and have a little fun more than lot. A Japanese blacksmith shops open up to the street, so that the boy at his anvil sees within a few feet of the sidewalk. The shops are closed at night by putting boards in the front and barring them well. There are no doors with hinges. The hinge is unknown in Japan, what doors there are are made to slide back and forth.

There are many more blacksmith shops in Japan than in our country; there is one every few doors, and in some streets one may hear the ringing of the clangedang of hammers.

The boy wears a black apron with pockets, the back of which he can hold to start home in the evening. He wears wooden shoes—flat boards with straps over them to keep the shoes from falling off. His stockings are called tabs and come only to his ankle. And always there is a separate compartment for the big toe. Every American boy would have a hard time in keeping a pair of Japanese shoes on, yet a Japanese boy can put on a pair of shoes and tabs, leaving to hold his wooden sh

..DOLLAR DAY..

On Saturday, March 25th we offer the following as inducements for Dollar Day:

$1.50 Waists at	$1.00
$1.50 and $2.00 Dresses at	$1.00
10 yards of any piece goods at 12 1-2 cents a yard at	$1.00
$1.50 Men's Dress Shirts at	$1.00
$1.50 Men's Sweaters at	$1.00

A DOLLAR OFF ON ANY SPRING COAT OR SUIT.

Women's Hand Bags $1.50 value at $1.00

$1.25 Dress Goods for . . . $1.00

Go to ---LEVINSON'S--- Get the Habit

SPRING IS HERE

And With it comes Spring Housecleaning.

No doubt you have a room or two which need re-decorating. If it is Wall Paper, we can supply you or work with the very latest designs and colorings at very moderate prices. Or perhaps you wish to Kalsomine your walls, if so you cannot find anything better than **Hygienic**. It dries better, flows more freely showing no laps and will not rub off and will cover more surface than any other Kalsomine made.

Or you may want a Flat Wall Paint. It so there is nothing to equal **Velumina**. It is a sanitary flat paint producing a beautiful egg shell finish and of the softest tones obtainable. It has a covering capacity equaled by none—and is washable. Come in and get color cards.

The Reliable Housefurnishers.

OPEN-AIR KISS IS SAFEST

Sunlight, Too, Checks Transfer of Germs, Assertion Made by Eastern Experts.

A kiss in the open air is fraught with less danger and fully as much pleasure as a kiss indoors, asserts the Boston Post.

These germ-germs that have been laying siege to Boston and other important American cities will unable to make any flank attacks when a kiss is bestowed in the open air, but when the labial salutation is given in a closed room, the microbes are likely to make a mass attack and get at least one victim and possibly two. All this according to more or less wise Harvard students.

By the same token, kissing in sunlight is safer than kissing in moonlight, for the sun has a knack of dispersing germ-germs that the moon has thus far failed to acquire. Therefore, the most healthful kiss of all is the one that is given in the open air during the daytime, although it isn't being done very much this season. But if it has to be done at night, it is better for a swain to snatch a kiss on the veranda than in the parlor.

The check has the highest rating among the areas within which a kiss may be properly bestowed. The forehead is second and the lips take third money. Germs lurk in the least number on the cheek.

Kissing should not be done while the kissee is wearing a veil. Science has released the information that germs cling to the silken texture of a veil and they are likely to be readily transferred. Besides, a young woman is liable to strain her voice if she tries to wear a veil.

The difference between a regular kiss and a soul kiss is two minutes and upwards, the same Harvard authorities assert.

HERE IS A PROPER DIET

Daily Regimen That is Guaranteed to Banish a Multitude of Diseases.

In the American Magazine Dr. E. F. Bower gave a diet suited to the average wealthy person of indoor occupation:

"An ordinary domestic egg contains about eight grams of protein. This is approximately the amount contained in a cubic inch of steak, or a half pint glass of milk. A generous slice of bread contains about four grams of protein. This quantity of potatoes ordinarily dispensed at a meal equals two and one-half grams.

"Allowing for our inability completely to extract all the protein from any given amount of food, and convert it into assimilable pabulum, a liberal medium of albumin would be twelve Hindoo's proteid formula, or 600 grams. This, remember, for an entire day.

"Therefore, a regular eee five ounces of beefsteak, and one glass of milk should supply, for 24 hours, all the protein the system requires. The balance of the diet should consist of starches, sugars, fats and plenty of cellulose or bulk. This can best be found in vegetables such as tomatoes, carrots, celery, turnips, beets, lettuce, squash and all that great group of coarse foods containing much fiber and little nutriment.

"Try this regimen for a while, and see if fermentation, headache, insomnia, rheumatism, nervousness and 'that tired feeling' do not disappear like snow upon the desert's dusty face. And when they do, remember that the chances of later developing Bright's disease, hardening of arteries and heart failure have been reduced to the irreducible minimum.

"The eating game is the most important in life."

Groped in the Dark.

An investigation of the beginnings of big business men has been conducted for the American Magazine by Hugh S. Fullerton.

"An astonishing feature of this investigation," he says, "is that so few of these men who have achieved such successes have had the turning point in their lives until it is recalled to them. They never thought of it, yet when the idea was explained, every one of them could put his finger upon the exact spot at which they turned toward success. It was astounding to find that the majority of them were merely floundering through life without definite aim or purpose up to that point and that from that point on they saw the course plainly and worked with positive purpose toward an end.

"They were groping blindly and could not see an opening until it came almost as an inspiration. Yet each one with whom I talked claimed to accidentally the turning point and the opportunities of others."

On Thursday night last the water pipes at the F. M. station froze and burst. When the agent opened up in the morning he found the place flooded. It caused considerable trouble for some time, but the break was soon fixed and the place dried out.

One of the most charming and satisfying gastronomic events it has been our pleasure to attend was the St. Patrick's Day supper served by the ladies of the Catholic church in the Odd Fellows' dining hall. The tables were very appropriately trimmed. Two hundred and thirty people were served.

Mrs. Helen Newson, wife of Horace Newson, died at her home in Hayes township Friday evening, aged 64 years. The funeral took place from the Burgess school house Monday forenoon, interment in Brookside cemetery. Deceased was a daughter of the late Hev. B. H. Whitman, for several years Methodist pastor in this city.

THAT PERE MARQUETTE TRAIL

MR. BUTTARS ELUCIDATES HIS FAMILIARITY WITH ANCIENT HISTORY

To the Editor:

As considable controversy has arisen over a statement which I made at a meeting of the State Pioneer and Historical Society at its mid-winter meeting held at Petoskey, Michigan, February 24 and 25, 1916, that the Marquette Trail was a myth, I submit the following data as my foundation for the same.

I resided at what is now the City of Charlevoix, Michigan, part of the month of August, all of September October, November and until the thirtieth day of December, 1866. At that time there were only two white farm lies residing there; two others settling on Pine Lake. No Indian bands resided, at that time, in the present boundaries of Charlevoix County. There was no trail leading from Charlevoix either to Bear Creek on the north or to Elk Rapids on the south. Mrs. Dixon, with whom I stayed, informed me that during the previous year, having to go to Bear Creek on urgent business, she was compelled to go by way of the Beach of Lake Michigan, as there was no trail through the woods.

I spent a good deal of my time in the woods getting ready to set a line of traps for winter trapping and I never saw a trace of any trail, except one on the north side from the mouth of Pine River to Mr. Dixon's residence on Pine Lake, and one on the south side from the mouth of the river to Medal Thorpe son's. I was compelled, myself, when I went from Pine River to Elk Rapids in December of that year, to walk on the beach.

In the spring, summer and fall of 1867, with a Mr. Albert W. Bacon, I worked for the G. R. & I. railroad company examining their lands granted them by the United States government to aid in building their present line of railroad. Our place of work extended from the east shore of Grand Traverse Bay to lands east of the present line of the G. R. & I. railroad in township 29 30, north from Range 5 to 6 west, and we never saw any trails or traces of trails running north and south.

There was a trail commencing on the north shore of the Round Lake of the Elk Rapids chain of lakes and running in a south easterly direction, which was called the Saginaw Trail. This was well defined and much traveled by the bands of Indians at Skegemog and Kewadin, near Elk Rapids. I owned a small farm on Round Lake, where the trail commenced, and my place was known as the "Depot."

For corroborative evidence that Father Marquette never was at Petoskey on the said Marquette Trail, I would refer to his journal, translated by Dr. John Gurney Shea and found in volume five of the Historical Collections now in the State Library at Lansing, Michigan, from which I quote as follows:

"Arrived at Quebec from France, September 20, 1668. Arrived at Sault Ste Marie in the spring of 1669, sent to the Mission of La Pointe du St. Esprit, near the present site of Ashland, Wis., autumn 1669. Came with a band of Huron Indians from that place to St. Ignace in 1671, where we built a church and founded a Mission. In the spring of 1673, on order from his Superior, started on his journey up the Mississippi River, accompanied by the Sieur Joliet and five companions. Went down the Mississippi to the mouth of the Arkansas River, Kaskaskia and Chicago, and in the spring of 1675, from Chicago by land, started on a canoe for Mackinaw, and coasting on the eastern shore of Lake Michigan, died on the beach of the Pere Marquette river, May 9, 1675."

I also would refer to the volume two of 1877 and 1878, and volumes 38 of 1907 and 1908 of the Michigan Pioneer Collection; also to the map of his journeys in the memoirs of Father Marquette, and published by Burrough Brothers & Company, Cleveland, Ohio. A copy of same attached to this.

In view of these records, I again reiterate that Father Marquette never traveled on the trail at Petoskey, Michigan, notwithstanding the traditions and legends to the contrary.

ARCHIBALD BUTTARS.

BAPTIST REVIVAL

We are enjoying a great revival. To date 83 persons have dedicated their lives to Christ. We do not know when the meetings will close. Come and help us if you can, if not don't forget us when you pray.

Meetings each evening at 7:30, come.

Yours in His name,

Jesse Ellis.

Invents a Hilarity Recorder.

An English moving-picture man has invented an instrument for registering the hilarity caused by comedy films. It is called the ecnograph and is employed in the halls where new films are being tried on an audience for the first time. The proprietors of the film can then impress their customers or not, as the case may be, with the surprising result recorded.

RECEIVERS APPOINTED

In United States court in Grand Rapids on Monday A. Buttars, of Charlevoix, and A. B. Knowlton, of Grand Rapids, were appointed receivers of the Charlevoix Rock Product Co.

This action is welcomed by the legitimate promoters of the local concern as a measure calculated to place it on a stable working basis.

Look out for a freshet when the water begins to squirt.

LEAP YEAR HAY RIDE

Big leap year hay ride to Burgess box social Saturday night of this week.

The sleighs will leave the Baptist church at 6:30 standard time. You are invited to join the jolly crowd. Bring a box and a friend all out for a good time.

Committee, Henry Marshall, Florence Milner, Lester Smith, L. C. Vinyard, and Mrs. Wm. Poole.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HARSHA.

EMREY'S
End Season Sale

OF

Men's Suits and Overcoats.

BOYS' SUITS Greatly Reduced!

All Overcoats and Suits, except Blue Serges at Remarkable Price Cuts.

Whether you need an overcoat or suit now or not, this is an opportunity for you to profit while we reduce our stock. Your positively will get a better garment now than next year---with the rise in the price of wool advancing and a continuance in shortage of dye stuffs.

Equal Suffrage Notes

The objection that women would be obliged to serve on juries if they had the ballot is answered definitely by actual conditions in the states where women vote: In Washington women are eligible to serve, but a special law provides that no woman can be required to serve if she asks to be excused. In Arizona, Alaska, Colorado and Montana the word "male" has never been stricken out of the qualifications for jurors. There is no reason why women should not serve on juries in certain cases, but as a matter of fact they are exempted from jury duty for sufficient reasons just as men are.

Sir Wilfrid Laurier, leader of the Canadian Liberal Party, recently declared himself a convert to equal suffrage. Canada is having her eyes opened to the value of the ballot in the hands of women by learning of the good results in Australia where women have voted for years. A delegation of Australian Cadets recently attended a public reception, carrying a banner which read, "Our Mothers Vote, Why Can't Yours?"

"Women's ballots in Illinois according to the Anti-Saloon Year Book for 1915 closed 900 of the 1,100 saloons that went out of business that year. Among the hundreds of cities and towns that voted on the question there was not one where the women's vote turned the scale in favor of license, and there were 96 cities and towns that voted against license."—Kansas Sabetha Star.

Harry Lauder, the famous Scotch comedian, says emphatically: "I believe that women should have an equal right with men in voting. I am a firm believer in equal suffrage."

County Normal Notes

Mrs. C. E. Taggart and Mrs. Harry Newton visited the normal room Tuesday afternoon.

Ruth Chelin substituted in the 4th grade in the absence of Miss Mary Niles on Wednesday.

The class have been having some very interesting discussions on corn in connection with agriculture.

School Commissioner May L. Stewart visited the normal room Thursday.

Florence Malkowski substituted in the fifth grade room during the absence of Madge Allen Friday afternoon.

J. H. Gilford visited the normal room Wednesday morning and gave a very interesting talk on the conservation of bird and animal life.

Misses Zoe Burnett and McLean called at the normal Wednesday afternoon. Miss Burnett is a county normal graduate. She has taught for several years but has now given up teaching and is taking nursing as a profession.

The last meeting of the Teachers' Reading Circle for this school year will be held in county normal Saturday, March 25, at 2 o'clock. The topic for discussion is agriculture and life. Mr. D'Ooge and May L. Stewart will speak on this subject.

Not in the Dictionary.

Irate Customer—"I can't find words in the dictionary that are warm enough to express my opinion!" Cheerful Salesgirl—"I don't think so! The words you want aren't in the dictionary."

WATCH CHILD FOR WORMS

Worms sap child's strength, rob child of food and make child fretful, irritated, nervous. Watch stool and if there is signs of expulsion of worms give one-half to one lozenge Rickapoo Worm Killer, a candy worm remover. Gives immediate results, is laxative. Tasteless and removes the worms, improves digestion and general health of child. Continue giving Rickapoo Worm Killer until all signs of worms are gone. 25c at your Druggist.

C. DANTO & SON.

Sleep of Men and Women.

Women go to sleep less quickly than men, but they sleep more soundly and longer. For a short period of time—not more than about half an hour in each night—a man gets into a state of stress which is nearly profound than a woman's, but he comes out of this with a run and sleeps more lightly than the woman during the latter part of the night. His waking is more natural and he does not become fully awake so rapidly.

Appreciative Robert.

We were having a turkey dinner and expecting company. Little Robert came over and, seeing the turkey, asked to stay. After a generous helping he looked up with a bright smile and said: "Didn't God make a good thing when he made a stomach?"—Exchange.

Almost the Limit.

"Is your cook imperthinent?" "Well, rather. She couldn't be any worse if she was one of my own daughters."—Life.

SHE THOUGHT 'TWAS VOICE OF ANGELS

Mrs. Runkel Hears Music After Being Deaf for Twenty-seven Years.

Newport, Ky.—Here is the great adventure:

It is to hear music when one hasn't heard a sound in a lifetime of twenty-seven years.

To Mrs. Hilda Runkel of this place, it was as though angels had spoken.

Until a week ago Mrs. Runkel thought she heard a sound nor spoke a word. And she is twenty-seven.

One day last week she was visiting her downstairs neighbor—the Catholic John Cattlin—had fashioned a home-made violin out of a cigar box. It

She Pointed to the Violin.

was a fairly good violin at that. It is good enough to produce "My Old Kentucky Home." And that was what Cattlin was playing at the moment of the miracle.

Mrs. Runkel was seated. But suddenly she arose. In her eyes was a look of one to whom had been given a great revelation. She lifted her hand to her right ear and then she pointed to the violin, and then again to her ear. And thus she made it known that she had heard.

Each day since her hearing has improved. She is now learning to make the sounds she hears. In seven days she has learned fifty-two words. Mrs. Cattlin is her teacher.

"Mother" was her first word and "father" was the second.

The words came painfully like those of a baby learning to talk.

HID HUSBAND'S FALSE TEETH

Jefferson Swears That Is the Way His Wife Got Money from Him.

Pittsburgh.—It behooves all married tightwads who wear false teeth to beware. Often the subject of ridicule, artificial teeth have at last been found to serve a practical purpose in domestic life.

Frank Jefferson in divorce court told a harrowing story of the manner in which his wife had frequently forced him to "come across" with money by the simple expedient of taking his false teeth and hiding them.

The court, however, to Jefferson's way of thinking, was that even when he wrote many of his checks he refused to return his teeth. Only Uncle Sam's ceiling of the realm would persuade her that her hubby's molars were essential and necessary to his daily existence.

Mrs. Jefferson's side of the case was terse and to the point—her husband had refused her the money she believed she was entitled to as lady of the house. Consequently she took these measures to get it.

ONE SPREE IN 101 YEARS

Mississippi Man Had Another Exciting Day When He Smoked a Cigar.

Columbus, Miss.—Harrison Johnson of this city has just passed his one hundred and first birthday and is an almost daily figure in the business section of this city. He is said to be the oldest member of the B. P. O. E. in the world.

"I was never intoxicated but once," Johnson says in reply to a question. "Some years ago, I had smoked but one cigar in my life. He is the sole survivor of the rolls of the Confederate States government for services in the Seminole war in 1834. Johnson made a fortune out of a cotton mill, and says he always has had money because the state persisted in an effort to collect back taxes on it.

DANGERS OF DRAFT

Drafts feel but when we are hot and perspiring, just as they do when we are most dangerous and the result is Neuralgia, Stiff Neck, Sore Throat and Lumbago and attack of Rheumatism. In such cases apply Hoom's Liniment. It stimulates circulation to the sore and painful part. The blood flows freely and in a short time the stiffness and pain leaves. Those suffering from Neuralgia or Neuralgic Headache will find one or two applications of Hoom's Liniment will give grateful relief. The agonizing pain gives way to a tingling sensation of comfort and warmth and quiet rest and sleep is possible. Used for Neuritis too. Price 25c. at your Druggist.

THE IRISHMAN'S SMILE

Written For The Sentinel

The Irishman's smile, oh! the Irishman's smile!
As sweet and as fresh as his loved Emerald Isle:
The babe from its own mother's breast it would wile—
And long would you look for the peer of his style
When the rosy cheeked colleen he greets with that smile—
The heart it would break of the Sphinx by the Nile!

For his "top o' the mornin'" you'd walk a long mile—
Oh! its far yo would go for the charm of that smile;
'Tis the dearest heart wish that we ask for the while—
That the last of cold earth be that free from all guile
And pray that Saint Patrick be there at the stile,
To welcome us in with the "Irishman's Smile!"

CHICAGO. CHARLOTTE M. BOKELOW.

FIRST CHURCH OF CHRIST, SCIENTIST OF CHARLEVOIX, MICHIGAN, IS ORGANIZED

At the semi-annual business meeting of the Christian Science Society held January 3rd, it was voted to organize a church to be known as "First Church of Christ, Scientist, of Charlevoix, Michigan." The necessary requirements have been complied with and the church legally incorporated.

In the summer of 1906 a few loyal Christian Scientists who were spending the summer at Charlevoix started public services. For some years previous to this, services were held irregularly in various private homes. The two following summers these services were continued with increasing attendance. In the fall of 1906 the town people who were interested in Christian Science decided to continue services during the winter. On May 24,1909 this little band of earnest Truth seekers wishing to establish on a firmer foundation the teachings of the Bible and Science and Health with Key to the Scriptures, by Mary Baker Eddy, organized a Christian Science Society with nine charter members. From this time on the society carried on the work of a regularly organized church.

The church holds Sunday morning services at 10:45 and Wednesday evening at 7:45. The Wednesday evening meeting includes testimonies of Christian Science healing. Sunday School is held at the home of the Sentinel office. The church maintains a public reading room, the object of which is to provide a place where all who desire to read the literature of Christian Science are made welcome. The Bible and all authorized Christian Science literature may be obtained there. A loan library consisting of all of the books, and a large number of publications of the Christian Science Publishing Society is maintained, and is constantly being added to, the new books being freely lent to any responsible person who has become sufficiently interested in Christian Science to read the authorized literature.

Each year since the organization of this society, it has presented free of cost to the public, authorized lectures on the subject of Christian Science. As is the custom with all Christian Science organizations this society has responded lovingly and liberally to the needs of those in distress, whether at home or abroad, including several generous contributions to the European War Relief Fund.

The Public Library is supplied with all of the writings of Mrs. Eddy, the Discoverer and Founder of Christian Science, also the Christian Science Journal, Sentinel and Monitor, a daily newspaper.

This church is built on the Rock, Christ, and it desires to consecrate its activities to the sacred cause of establishing Truth on the earth, through its service to humanity, by healing the sick and reforming the sinner. The Christian Science church has no creed. It takes for its foundation the entire Bible and the religious tenets of this denomination include, "As adherents of Truth, we take the inspired Word of God as our sufficient guide to eternal Life."

No admission process to watch and pray for that Mind to be in us, which was also in Christ Jesus, to do others as we would have them do unto us; and to be merciful, just and pure." (Science and Health with Key Scriptures, page 497.)

When Jesus asked, "Whom do men say that I, the Son of man, am?" the shrewd no comprehension of his works or mission, but when he said, "But whom say ye that I am?" the question elicited the response from Peter "Thou art the Christ, the Son of the living God." The sense that Christ, Truth, and Jesus answered and said unto him, Blessed art thou, Simon Barjonas: for flesh and blood hath not revealed it unto thee, but my father which is in heaven. And I say also unto thee, That thou art Peter, and upon this rock I will build my church," showed that a comprehension of the true Sonship, and that this acknowledgement was the perception of truth, the rock upon which the church was founded. In human consciousness, the understanding of the true church, which church, though it be always existent in science, is not been fully comprehended, and against which Jesus said "the gates of hell shall not prevail." Peter's discernment of this divine ideal enabled him to heal the multitude, and the inevitable "signs following" must accompany this perception throughout all ages. It is this church of the "living God" which Christian Scientists are striving to assimilate.

Cooking Courses at the Firm's Expense.

A well-known firm of biscuit makers of London and Edinburgh have come to an interesting decision in regard to girls who leave to be married after being in their service for more than five years. Such employees will be sent to a school of cookery for three weeks at the firm's expense, and will receive full wages while they are taking the course.

Gets Them Both Ways.

A Chicago restaurant has provided a novel luncheon menu. On one side is the caption, "If you wish to reduce, select your order from this page." On the other page is a list of dishes that will not reduce the waist. The menus are based on United States government food tables.

First State Billiard Tables.

State billiard tables were first played on in Great Britain in 1827.

AN IDEAL SPRING LAXATIVE

A good and time tried remedy is Dr. King's New Life Pills. The first dose will move the sluggish bowels, stimulate the liver and clear the system of waste and blood impurities. You owe it to yourself to clean the system of body poisons, accumulated during the winter. Dr. King's New Life Pills will do it. 25c. at your Druggist.

To Clean Brass.

An ounce of alum, put in a pint of boiling water and when cooled, and bottled for use at any time, will remove all stains and tarnish from brass and will not injure the skin on the hands or do the metal itself. It only requires to be rubbed on the surface and wiped off.

The Stars.

"There is no room for reasonable doubt that the claim of the astronomers that they know perfect y well what the stars are made of." The improvement of the telescope and the mission of the stars is determined is called the "spectroscope," and its findings are not to be questioned.

Use of Metals as Money.

The use of metals as money is not of recent origin, but has gradually superseded other substances. At the varied activities of human life devoted by the aid of which the wants common use should be a substance convenient to handle.

A Stumbling Block.

There will never be quite a universal feeling of Christian brotherhood so long as men named Smith receive letters addressed to them as sometimes "Opened by mistake. Johnson."—Kansas City Star.

Barnard Doings.

The many friends of Mrs. Tullock will regret to know of her very serious condition, for the past week she has been very poorly.

Mr. and Mrs. Geo. Anderson, of Charlevoix, were guests at the home of Mr. Will Burns Friday and Saturday.

Miss Lucile Lewis is spending the week visiting in Boyne City.

Mrs. H. A. Starr and children spent the week end with Dennis Spayde and family.

William W. Lewis visited at his farm home Saturday and Sunday.

The Royal Oaks spent a pleasant evening Thursday at the Clarence Boattie home, and will meet March 29, with Mr. Charles Townsend.

Mrs. Edmund Shapton entertained her class of boys Saturday afternoon. The boys decided to organize their class and will be known as the "True Blue" boys—they choose as officers: President, Forest Spayde; Vice President, Donald Hennet; Secretary, Emerald Bolbuis; Treasurer, Geo. Cork. Pies have already been spoken of, and they are looking forward to some good times. A very pleasant feature of the afternoon were the "goodies" served by the hostess.

Mr. Will Burns's birthday will long be remembered as a most enjoyable occasion. Mr. and Mrs. Burns had invited their S. S. classes for a St. Patrick's party, and as it was the host's birthday their friends sprung a little surprise, and presented Mr. Burns with an Oxford teacher's Bible, and Mrs. Burns a very pretty Casserole. The house was tastefully decorated in green and yellow, and the guests received "Irish Flags and Shamrock Leaves" as favors. Each guest was required to call off some "stunt," and the Irish stories and jokes caused much merriment. Solos, duets, trios and other music were also enjoyed. Nearly sixty people were present, and a delicious lunch was served by the hostess, bringing to a close a jolly good time.

The Men's Bible Class perfected an organization Friday evening as follows: President, Edmund Shapton; Vice-President, John Smith; Secretary, Charles Graham; Treasurer, Isaac Mills. And will now be known as the "Gideons." May this class be able to do as much for our community as Gideons of old accomplished with his small army of real men.

Miss Merle Walker is assisting with the care of Mrs. Tullock, at the home of Allen Bolbuis.

Northern Michigan

Rev. Geo. W. Plews, Methodist Episcopal minister, formerly of Traverse City and late of Bellaire, is in the barracks at Windsor, Ont., as a private soldier in the Canadian army. Mrs. Plews has written a long letter which is published on Bellaire paper giving an account of his army life thus far. He also preaches in Windsor churches.

East Jordan Herald: Samuel Whitford passed away at his home on the West Side, Tuesday, March 7th, after a lingering illness from leakage of the heart. Deceased was born in DeKalb township, St. Lawrence county, New York, July 4th, 1836. He was united in marriage to Emily Jane Edmunds at Horsefoot, N. Y., July 26, 1856. He came to East Jordan with his brothers, Tom and Eddy, in 1880 and followed the blacksmith trade for a number of years.

The following, from an exchange, chronicles the 'big' day of Sist. E. Wilson, one time editor-propietor of The Citizen. Editor Sist E. Wilson of the Saline Observer is a lucky man. The other day he picked up a Winchester rifle and started up the street to deliver the weapon to its owner. Somehow the delinquent subscribers got it into their heads that he was on the warpath, and everyone he met insisted on paying him in full, one follow going so far as to offer him a certain sum of delinquency. And that was not all. When he got back to the office he found a load of hay, 15 bushels of corn, 10 bushels of potatoes, two cords of wood, a barrel of turnips and seven muskrat hides.

OLD STORY ALL OVER AGAIN

Man Visits Opera Fortune Teller and Later Misses Watch and Money.

Chicago.—George Sylvester of Chicago, Minn., being a little in doubt about his future, dropped in, with two friends, to visit Anna Leo, "gypsy" fortune teller.

He crossed the seers' palm with silver, in keeping with the rules in such cases, and then placed his watch, $15, and other valuables in a handkerchief, so as to show away the evil influence.

He was two blocks down the street before he found a wad of paper in his handkerchief instead of the valuables. Anna was arrested.

Getting the Better of an Invention.

Very wrong verdicts are come to by people who use modern inventions in the wrong way. The moving staircase at the Embankment station offered a chance that it is to be hoped was taken advantage of by some people who have been accustomed to ascend the descending side of the moving staircase there. There are no officials about, and after two plucky attempts she at last made progress and doggedly worked her way up to the top. Some people who saw her efforts waited for her at the top. When she recovered her breath she said: "Oh, I don't think them movin' staircases all the talk' about is any better than the old lift!"

"1900" Gravity Washer

What This Invention Means to Women

THE hardest part of the housework is the washing, when it is done in the old way—done with the tub and the wash-board. No matter whether you do it yourself or not, some woman does it. And its work that no woman should do. Servants dread it and rightly. Servants are always more contented if there is none of it. There should be none. Washing can now be done with one-fourth of the time.

* * * * * *

Suppose a man had the washing to do. How long do you suppose he would do it by hand? He would do just as men do with their work today—he would use a mechanical help. On the farm, in the factory—everywhere—men have machines to do their hard work now. Why should not women do likewise? They are less fitted for hard work than men are. There is no question about it. The "1900" Washer is a help that every home-wife should employ. Hundreds of thousands have done it already. The balance should do it now. There is no reason in the world why women should work, as women have worked to take care of the family washing. There is no need for any dread on anyone's part when washing day comes around.

IT IS EVEN CHEAPER.

The question of cost is a very slight matter compared with back-breaking labor.

If it cost twice as much to do the washing by machine, still women should use the machine. But it doesn't. On the contrary, the "1900" pays for itself, over and over, in the visible saving of expense.

The average family washing costs about $1.00 per week. You may pay it to a wash-woman or pay it for help. The average expense, as we find it, is that. The woman who does her own washing has more loss that to consider. She must figure her health and strength. But suppose you hire your washing done, and continue at that cost? Then the machine will save at least one-half the time. That will mean—will it save half of the cost. The saving can go first into paying for the washer, on the installment plan. Then it goes, year after year, into profit. So the "1900" is not an extreme. This saving in labor involves no extra cost. On the contrary, it is far cheaper to have the machine then to go without it. School Commissioner's Column

May L. Stewart, Commissioner

"THE AGENT MAN."

Will the Germans take Verdun? Why, of course they will!

Oh, no, I'm not German, but I love their language and I love their literature. They are a gritty race aren't they?

Well, here we are at the school house, school has just closed.

Mr. Schmidt: Air isn't much like the outdoors, is it? What you'd call stuffy, you know all the good gone out of it, used up in the lungs and then filled with poisons that those boys and girls sent out in every breath. I hate this stuffy air, don't you?

"Ach—it isn't so good yet, sometimes we open the windows. It don't matter so much already." It is in the warm weather that you open the windows, I suppose. Then you don't cool the room off too suddenly and waste your wood. It costs like everything you know. Of course the thing I was thinking of mostly was the danger in such air as this. You know people have to have air to live, but it's just one part of the air that we use. You wouldn't think that air was a mixture, would you? Well, it is—we use the oxygen that is in it, that is what keeps us warm. It kills germs and it gives us strength to fight sickness of every kind. Our lungs are regular separators, and you ought to see the little disks working, why they just take out that oxygen, into the cream, you know, and sluice it right into the blood, but the carbon-dioxide in the air isn't any good for us at all. So it just goes right out again, and there you are. When the boys and girls have been here one half hour they have breathed and separated every bit of air in the room. The rest of the day they are breathing the same air over and over again. It can't help but weaken them.

"The air comes in the cracks yet."

Oh, yes, surely, Mr. Schmidt. What do you like to have Heine sit near one of those cracks?—

"Oh, nothing. Mein Frau, she wants teacher to stuff them. We have rags in ours at home already."

"I suppose so. You know Mr. Schmidt, we use to think we just had to be sick a part of the time in the winter, we doctored through all the cold weather and then shut ourselves up in close rooms and breathed in air poisoned and separated air we could. In the spring we took sulphur and molasses to get rid of those poisons. Of course we know now that it isn't the cold weather at all, its just bad air.

"Isn't it?"

It certainly is. Ask your German doctor—ask any doctor. Have nothing but fresh air, evenly warm or evenly cold and you'll never have a sore throat. Do you know that if our homes and school houses were properly heated and ventilated we could do away with three fourths and maybe all of the catarrh, inflamed tonsils come from weakened throat conditions and many of the glanded operations are from the same cause. Our whole state, our whole nation is ringing with the fight against consumption and yet no animal that never slept under a roof made by man, was ever likely to die of consumption. Consumption cannot thrive in the open. In the sunshine and God's great out-of-doors, its little bacilli are every part of it no more. I tell you man, if we are to keep this disease from taking toll from every ten students in this school, we've got to bring the out doors right into this room. We've got to warm the air down and bring it into this work shop for our boys and girls.

"Well, I guess it is a good idea."

"Just as sure as you can be. You see you have a pretty good store here, its about the right size and is pretty good shape. The one we make is a little heavier, that's all, to stand extra strong. Well, suppose you had a hole out thru the wall of this building, here, about a foot or two from the floor."

"Up you do dat already?"

"We do that to get the fresh air and then we pipe it straight to the store. Around the stove we put a jacket that shuts that cold air in until it is warm. When your kitchen gets pretty warm Mr. Schmidt, have you ever noticed that it is warmest near the ceiling and coldest near the floor.

"Himmel—the floor, he's always cold."

"Of course, when you have an ordinary furnace you notice what has jacketed stove does. The cold air is forced in until its warm, then it rises, and keeps coming in forced in. It right out of there and it settles down all over

WHERE THEY MAKE THE MOVIES

MANY million dollars are invested in motion picture studios in southern California. Climate and scenery there ideal for "producing" the filmed drama.

By J. C. LESSEN.

THE first motion picture maker went to Los Angeles, Cal., to secure scenic or travelogue subjects, having issued from railroad folders of the beautiful scenery there. That was more than fifteen years ago. The scenic photographer secured the views desired and left, not once suspecting that the greater part of the industry would labor and California the best place to make pictures. About seven years ago another director discovered that government weather reports showed that till three hundred days of each year the sun shone brightly, and this man, Frank Thomas, found his employers the Selig company with producing plant then located in Chicago, to send a company to Los Angeles to open a studio. All effects of the company were packed in a small trunk. The first studio opened by the organization was on the roof of a downtown building. The first picture cost less than three hundred dollars and consisted of less than a thousand feet. Since that day the greatest motion picture the world has ever seen, costing more than a quarter million, was made but a short distance from the location of the first studio—but that is getting ahead of my story.

Cutting cost in production was so pleasing to this one manufacturer that he could not keep the secret of his success. The word reached his competitors, and they investigated Selig's plan, compiled by the government, and a few months later sent companies West.

"Go West," became the slogan of makers of "canned amusement," and one after another established plants in or near Los Angeles.

Besides the advantageous climatic conditions there are other reasons for film producers going to California. Within a radius of fifty miles of Los Angeles practically any kind of a scene desired may be "shot."

If the start during the last year or sixteen months that manufacturers came to realize fully that the producing end of the industry should be located in California, and now that some fully appreciate the economy of such a move they are building expensive permanent plants.

Before decisions for this move were reached, however, other places were offered for continuing in the West, and attempts made to prove the correctness of the choice of Los Angeles. Only one instance is added when the selling department of a concern is located in New York city, three thousand miles from the manufacturing plant.

New York city has always been, and, no doubt will for years remain, the theatrical center of this continent. There it is that all big theatrical producing companies have their headquarters. And so far the motion picture has to a very great extent taken the place of legitimate stage drama, comedy and musical shows, and is conducted largely by former theatrical men. Its headquarters should, the managers think, continue in that eastern metropolis.

With the offices and selling force at one side of the continent, and the manufacturing at the other additional expense is caused by the need of each department to touch with the other. Practically all of the communications go by wire, and the telegraph bills of some companies amount to scores a thousand dollars per month. In one or two instances wires across the continent are used from studio to Chicago or New York offices and operators maintained at the New York office and the studio, in the same manner as newspaper leased wires for news received. This has materially lessened the expense and at the same time added speed and efficiency to the service of the companies.

As the manufacturers come to realize the economical need of continuing permanently the making of motion pictures in California, they have gradually improved their properties here.

The first Universal producing company arrived in Los Angeles Thanksgiving, 1911, and the manager, director, scenario writer, scenic artist, property man, laboratory superintendent, and Actor Al. E. Christie, with his hand of thirty, leased a barn. To save the cost of buying stable to use as cloths, that there would be no shadows in the pictures and all need of artificial light can be entered the stage—which consisted of a mere flat platform—to be built in the north side of the barn where daylight players could work all day in shade without the sun smiling a single scene.

From this very humble beginning has grown the only municipality in the world devoted exclusively to the manufacture of motion pictures, Universal City, four miles north of Los Angeles. This mammoth plant consists of almost four hundred acres, contains a river, "lakes" with and picturesque nooks suitable for filming scenes. The ground are divided into two sections, because of foot hills extending through the center, with flat valleys on either side. In front are the administration buildings, a cafe with a capacity of serving one thousand people an hour; barber, manicuring, hair dressing and photography shops; the laboratories, where all film is developed and a positive print made; a wardrobe department containing clothing for an army can be had at a minute's notice, no matter what nation the army is to represent. Here, too, will be found the carpenter shop, scene painting studios and property department, with the space equivalent to four acres. All buildings are of concrete and steel. Beyond the foothills are other stages and the zoo, which contains approximately two hundred wild animals trained to work in pictures. Among the most recent additions are Indian, mesa wild-west horse and cattle corral and bunk house for the cowboys. The grounds are dotted at all times with settings built for this or that production. On one side will be seen a cross road, while on a few feet away is a reproduction from photographs of a street scene in Cairo, Egypt, and in the Bowery of New York—possibly a typical Scotch scene, or the native huts of Africa, Asia or the Isles of the Sea. Every fifty to five hundred feet long is frequently erected at a cost of several thousand dollars and torn down after the making of one scene, to be reproduced in film that will require one to five minutes to show on the theater. It is never known that the same scenery is used twice.

The world's greatest, privately owned collection of wild animals is said to be that at the zoo of the Selig company, located near a public park in Hancock Mission road, leading into Los Angeles from the famous San Gabriel missions.

This free show place, built at the expense of more than two hundred thousand dollars, contains thirty-eight cages—thirty of which are taken up by animal houses and pens and beautiful lawns and groves. In all there are seven hundred or more specimens, including forty lions, a herd of elephants, droves of ostriches, scores of monkeys and many rare exotic birds, together with birds and reptiles from every part of the world. All are maintained for exclusive use in motion pictures, and that they have benefited settings to "work" in, duplicates of their native haunts have been built on the ground, each one strongly inclosed to prevent escape, injuries or fatalities to employees, which in the long run would made all scenes for the fifteen episodes of the first serial motion picture, "The Adventures of Kathlyn," which had an East India locale, together with scores of other great animal pictures. Here also, was built and filmed the Alaskan village for "The Spoilers," adapted from the story by Rex Beach, one of the two most profitable pictures made.

More than a quarter of a million dollars is being spent in the building of a mammoth studio at Culver City, a suburb of Los Angeles, by the New York Metro Pictures corporation. Since 1916 this company has leased a tract of ground consisting of 18,000 acres three miles southwest of Los Angeles where cattle raising has been conducted in connection with the making of motion pictures. The company leasing this great tract was that the company originally intended making only western dramas. Later other kinds of stories were filmed, and recently the producing manager or director, Thomas H. Ince, became one of the three points of the Triangle Film corporation, which inaugurated in New York, Philadelphia and Chicago, motion picture theater programs, where two dollars was charged for the best seats. The new plant will consist of twenty or more concrete and steel fireproof buildings including nine separate in-door sets, ground glass stages—one for each producing organization.

The players will have every comfort, including individual dressing rooms, with steam heat, electric fans, and hot and cold water, etc. Factories in connection with the plant will manufacture all sets, furniture and wardrobe needed. The ranch studio will be maintained, and large two hundred acre pasture for animals making western drama will be maintained.

Every hamlet in the country has been invaded by Kevstone comedies made in Los Angeles. Four years ago Mack Sennett, director and actor, with a dozen or more comedians, formerly in vaudeville, opened a studio in Los Angeles, with from one to four companies working at each. It would be impossible to go from the center of the business district to the city limits to any direction without coming upon one or more motion picture plants.

TAKEN FROM EXCHANGES

Sterilizing Dentists' Tools.

Dr. H. F. Hasselius of the United States Public Health service contributes an article bulletin the necessity for sterilization of the instruments used by dentists, and the Journal of the American Dental association points out that most dentists are not nearly careful enough about this. Most of their instruments can be sterilized by immersion in water at 176 degrees Fahrenheit, and all others by immersion for at least an hour in 5 per cent solution of carbolic acid.

Eat Oranges.

Damascus, in Syria, is the oldest of all existing cities.

Egypt has 27 schools of higher education, technical and agricultural, and 4,000 students are enrolled.

Among the lower animals only about five per cent are defective at birth, a much lower ratio than among human beings.

Somewhat Mixed.

New York city is one of the few great ports of the world on a big navigable river below the farthest point upstream to which open going vessels can attain. Cheapness of water transportation as compared with land haul is one of the reasons for this, other circumstances being equal.

Linseed and Oilcake.

Linseed is the common name for the seed of the Linum usitatissimum, or flax plant. Flax is this country, where it is grown almost entirely for the seed, is raised principally in the north west. It is sown broadcast in the spring on new land or drilled on old land for wheat and oats. It is harvested and threshed by machinery. The seed is grown for the oil, which is obtained in two ways, by hot pressure and by extraction with naphtha or other solvents. Both processes have the residue known as "oilcake" as a by-product. The second process is the more economical, and almost all is employed at present. Oilcake is this country is used for linseed meal and largely exported; it is a rich food for animals.

Hair Peculiar Teeth Formation.

The teeth of rats and mice have no roots. As the animal wears them down by gnawing—which prevents them from becoming too long—they keep growing again.

Kin Hubbard Essays

SHORT FURROWS

By KIN HUBBARD.

"The girl o' t' day that can't play five hundred or bridge might jist as well take th' veil," said Mrs. Triflett, when yesterday afternoon, while addressin' a strugglin' remnant o' th' Home Culture Club.

"Th' last for gamblin' 'mongst our mothers an' girls will be a thing of th' past, nation if somethin' hain't done t' curb it. Women used t' box for pin money. Now it's pile money. What time has th' modern mother got t' study cow diseases an' first t' th' sanitary treatment o' children in crowded sweat shops? What time has th' modern woman got t' cook an' sweep an' train morsels' fingies an' make th' home attractive? How long will a home endure where th' mother slaps a pot full o' hash in th' fireless cooker at eight o'clock in th' mornin' an' lets it simmer till dark while she rushes off t' th' card tournament? Not long, I reckon. He comes jist as sure as Uncle Tom's candlesticks are liable t' be won by somebuddy she hates she playfully welcomes th' prizes an' substitutes a pair o' tan lisle center slate hose. I don't mean t' say all women play cards, neither do I say they do.

"Thousands o' women an' girls are enslaved t'day gamblin' for silk stockin's. In clubs where th' members are stuck up they play for nickels an' a game goes on under th' oilcloth o' recreation. Only yesterday I seen a poor sister o' a girl (chickens they call 'em) run up t' her mother an' throw her arms about her neck an' sob piteously. Oh, maums, th' cards wuz agin me an' I'm nearly out o' stockin's. Th' parent soothed her kindly an' with a sweet motherly expression on her face replied, 'There, there, darling, don't cry. I know how you feel, but you may have better luck t'morrow.'

"An' all th' while our cow pens an' market houses are becomin' more unsanitary an' our mothers' clubs contest t' see who can make th' prettiest card. Our mantle shelves groan beneath th' weight o' useless cut glass an' German silver an' napkins prize, an' our chif'roniers are fairly bursin' with silks hose while our ice boxes are filled with canned soups.

"I sneezed all afternoon an' last ever time an' I jist haven't th' heart t' go ahead with supper, dear, a woman'll say, handin' her husband a can opener an' throwin' herself wearily int' a chair. Talk about your luck. I knew a feller had a Chinese in hearin' an' cost for th' crocheted towels an' wan day a young wife'll say, as she warms th' breakfast coffee an' throws a cold tongue on th' table.

"Th' world'll lay in sighin fer th' old fashioned mother that didn't know a source from a divaspor an' who played croquet for th' love o' th' sport."

Th' Problem o' Eatin' While Travlin'

"Well," said Lafe Dot, this mornin', as he picked up his travelin' cases an' jumped t' git aboard a car which carry th' sugar bolt, "th' worst feature o' this commercial travelin' business is t' fillin' some place t' eat that don't interfere with your appetite.

"Take th' hotel t' start in, a crayon portrait house that throws th' portrait in free if you buy a thirty dollars dozen for a massive gold frame that cost a dollar an' twenty cents. Th' grub is good, th' smile like a cake o' toilet soap, an' his wife applies for a divorce at the end o' each trip.

"Continuin', Mr. Bud said, as his wife, who was named an another hour late, 'I skimp till I've saved enough t' git a cafe on eat.' I music t' court t' git food fer th' cigarette smoke. I say nothin' o' pepin' ten cents t' shove them toward Princess fer my hat. I've tried th' American plan, th' restaurant, dairy-lunch rooms, home-cook'n' places an' boardin' houses, an' what I mean is, I can't git no rest at th' next. Th' air o' mystery that dangles over a tureen full o' boarding house hash makes it impossible, an' if I go in an' sit down in a lunch room, I'm sure I'll git by a clothin house drummer an' have t' play with him in th' fireless cooker at eight. It takes an equilibrist t' eat in a commercial chair in a dairy-lunch room without scarfin' himself. If I stroll around t' some home-cooked grub shop I'm liable t' git my mother's beans or chicken dumplin's th' first thing I see a bunch, redolent blonde waitress arrangin' her hair in th' reflection t' th' coffee urn, or drum fer beer nails. I've been on th' road a long time, but I never seen th' I ate twice when th' other behind th' lunch counter didn't either have a cough or his wife.

"Take th' Limpin' restaurant, I have the residue known as "oilcake" as a by-product. The second process is the more economical, and almost all is employed at present. Oilcake in this country is used for linseed meal and largely exported; it is a rich food for animals.

The teeth of rats and mice have no roots. As the animal wears them down by gnawing—which prevents them from becoming too long—they keep growing again.

"CASCARETS" ACT ON LIVER; BOWELS

No sick headache, biliousness, bad taste or constipation by morning.

Get a 10cent box.

Are you keeping your bowels, liver, and stomach clean, pure and fresh with Cascarets, or merely forcing a passageway every few days with Salts, Cathartic Pills, Castor Oil or Purgative Waters?

Stop having a bowel wash-day. Let Cascarets thoroughly cleanse and regulate the stomach, remove the sour and fermenting food and foul gases, take the excess bile from the liver and carry out of the system all the constipated waste matter and poisons in the bowels.

A Cascaret to-night will make you feel great by morning. They work while you sleep—never gripe, sicken or cause any inconvenience, and cost only 10 cents a box from your store. Millions of men and women take a Cascaret now and then and never have Headache, Biliousness, Coated Tongue, Indigestion, Sour Stomach or Constipation. Adv.

A new electrical process makes charcoal from sawmill waste.

IF BACK HURTS CLEAN KIDNEYS WITH SALTS

Drink Lots of Water and Stop Eating Meat for a While if the Bladder Hurts.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Ordinarily these organs can clean the kidneys occasionally. You must remove them. Has you relaxes your bowels; removing all the acids, waste and poison, and you feel dull, sluggish in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, your tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush off the body's urinous waste act about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys and end bladder irritation. Jad Salts is inexpensive, harmless and makes a delightful effervescent lithia-water drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases.—Adv.

Real Celebrity.

"My boy," said the man of many million, "how do you expect to amount to anything in this world if you spend all your time dancing?"

"But, father," answered the youth, in an injured tone, "is it possible that you have never heard of my reputation?"

"I'm sure, sir, you are a nonentity."

"Such is fame! Why, I'm known as the dance of seven veils."—Adv.

Fair Warning.

"How did you happen to be late this morning, Jobson?"

"Why—ah—Mr. Waddy, I got interested in reading the war news in the morning paper, and was carried past my station."

"Hum.

"I trust it won't happen again, sir."

"If it does you will be at liberty to devote all your time and attention to becoming a war expert."

A Projecting Personality.

"Cap, we have to let this fellow go."

"Why?"

"He weighs 350 pounds, mostly bay window. If we put him in the front rank he will be conspicuous. And if we stick him in the rear rank he is the front rank, too."—Louisville Courier-Journal.

A Chicago inventor has patented an automobile so that a photograph can be used as a burglar alarm.

THE FIRST TASTE

Learned to Drink Coffee When a Boy.

If parents realized the fact that coffee contains a drug—caffeine—which is especially harmful to children, they would doubtless hesitate before giving their children a drink.

When I was a child in my mothers home and first began to nibble things at the table, mother used to use more sugar than coffee. And so I contracted the coffee habit early.

"I continued to use coffee until I was 37, and when I got into office work I began to have nervous spells. Especially mornings I felt so nervous I could scarcely attend to my correspondence.

"At night, after having had coffee for supper, I could hardly sleep, and on rising in the morning was tired, weak and nervous.

"A friend persuaded me to try Postum.

"I can now get good sleep, am free from nervousness and headaches. I recommend Postum to all coffee drinkers."

Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms:

Postum Cereal—the original formula, must be well boiled, 15c and 25c packages.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

Both forms are equally delicious and cost about the same per cup.

"There's a Reason" for Postum.

—sold by Grocers.

The Weather Prophet

By GERTRUDE MARY SHERIDAN

(Copyright, 1916, by W. G. Chapman.)

"Hook-hook!"

Crabbed, miserly old Jared Dunn, seated on the porch of his low summery house, bent his ear and listened intently.

"Hu-o-ok!"

His thin sour lips formed an expression of comprehension and satisfaction. He smiled in an eerie way.

"You beat 'em all, old bird!" he chuckled, "and I get the credit for it. Mornin' neighbor," he hobbed to a passing acquaintance—"growing."

"Meadow strip hay, yes."

"Get it in afore Wednesday, then," advised Jared, with a wise look at the sky.

"Wet spell?"

"Shouldn't thing, within twenty-four hours."

The sky was clear and spotless, but Rufus Dawes quickened his step. In this was one weather-vexed man to Bridgeton, it was Jared. He never prophesied wrong. The almanac might err, the signal service quibble, but Jared never made a mistake. Hence, his neighbor hobbled off at an accelerated pace to save his menaced hay crop.

Tom Jared Dunn, double-faced old skeesicks that he was! smiled cynically around to his extensive poultry yard. It was with eyes of pride and exultation that he surveyed one particular fowl among the numerous. This was a gloriously streaked and crested specimen, a rare and valuable specimen of the barred rock breed. Jared was proud of his fowl, and he was puffed up greatly when the fowl was brought to Bridgeton, it was Jared. He never prophesied wrong. The almanac might err, the signal service quibble, but Jared never made a mistake. Hence, his neighbor hobbled off at an accelerated pace to save his menaced hay crop.

"I Wouldn't Care to Part With You."

goose. It was pacing about in a consequential way, as though aware of the extreme superiority of its owner. It was still hobbling, yet low and crooning as though talking to itself.

"Daisy! Daisy! Hook-hook! Hook-hook!" approved Jared. Would it care to part with you?

Honolulu was a bird of passage, strongly domiciled in an alien land. A wild goose of extreme endurance and flying power, it had landed down in the pasture with a broken wing and civilized fellows about a year previous. There was a legend connected with it, and Jared came to examine it with the intelligent interest that he bestowed on all other creatures.

It was by pure accident that this arrow had pierced the impregnable part of the fortunes of Jared. He chanced to relate the incident to a colleagues fisher, whose fat and jovial face and kindred sciences. The professor took an interest in the circumstances. The arrow head was one identified as one, which the professor had in his museum by an obscure tribe in the Pacific Ocean Islands. It was apparent, therefore, that Honolulu had winged a numerous flight, which had passed over thousands of miles, to domesticate itself in Jared's poultry yard in a strange land. The incident of the long flight of the fowl was published in several scientific journals, the name of Jared was duly used, and he was puffed up greatly when the fowl was brought to National Ornithological society.

That was not all. Jared's fame became familiar with Honolulu and got to studying the fowl, he discovered that the intelligent bird was a natural weather glass. That "Honky Honk!" clarion note was diverse, but dependable. In time Jared could predict the circumscribed goose flight to a point where the changes in the barometer were vocally announced and rain, wind or sunshine followed two days in advance with unerring accuracy, and Jared Dunn took due credit to himself for his invincible weather prognostications, never mentioning Honolulu as the source of his erudite efficiency.

Jared Dunn had a nephew, his only living relative, estranged for some time. He was forever borrowing and now owing a hard and for small pay in the village. Harvey was in love with Tina Morton. They could not poor to marry as yet, but constantly had been in delight and love and hopeful.

The Morton family lived quite a distance from the town. One morning early Vera's father and mother drove away on a day's visit to some friends. Two frowsy tramps lurking behind a leafy porch witnessed the departure and heard Vera speak of a busy baking day, all alone in the house. One of the tramps carried a knife. When father and mother were well out of sight, the intruders threw the bag into meal and laboredly advanced to the open kitchen door.

"My pretty one," one of them called to, "don't get frightened. We're coming back of the road and grub the one only demand. You do as we ask and you wont get scared or hurt."

"You frighten me!" breathed Vera, apprehensively, "but what is it you want?"

Just this: there's a live goose in a bag we've just thrown into that shed yonder. We want it killed, dressed and roasted. I'll bet you're just a dandy cook and it will be nothing to you. If you want to throw in a loaf of that luscious bread you're baking, we'll go away with fondest memories of the handsomest gal we've seen in a year."

Vera hesitated. Then she resolved. The men looked peaceable. A little added comfort would not be amiss. But when Vera went out to the woodshed, hatchet in hand, she made a surprising discovery. The bag held Honolulu, which the tramps evidently had stolen from Jared Dunn.

Now Vera knew the fowl well from having seen it. She liked Mr. Dunn less than the goose, for she felt that Mr. Dunn had been unjust to her father. She turned Honolulu into a coop and selected one of their own geese. In some hurried time the two tramps gloatingly carried away a fine roasted fowl and a loaf of home-made bread and the tension on Vera's nerves was relieved.

Vera knew how the old man would miss his adopted pet, in fact within an hour a town constable came by in search of the missing fowl and describing Mr. Dunn in a frantic state of anxiety.

"I'll take Honolulu back to Mr. Dunn myself," announced Vera.

The old man stared hard at her as she appeared and emptied the feathered favorite out of the bag.

"You're the girl my nephew is going to marry," remarked the old man, curiously and intently studying Vera. "I see you a good deal for finding Honolulu. How was it?"

She told the story. The grim face of her auditor began to unbend. He let her on to talk of his nephew, a fair-way expression came into his eye. Did the purity, innocence and bright truthfulness of this charming girl bring back a memory of his dead sister, Harvey's mother?

"Just waiting for some one to get married on!" he spoke speculatingly, half to himself. "Harvey's been to see Honolulu—and you're a bright, good lass. I'll see—I'll see."

He did see. He everything in the sweet influence of this charming girl penetrated the fissure of his stony humor. As he turned away it was to hide a hungry longing for company probably.

"Come and see me again, will you?" he asked.

"I will be glad to," replied Vera in her simple straightforward way. "You are Harvey's uncle, and we both speak of you so often."

"Go away, child," he warned, in a choking tone. "I'm a selfish, hard-hearted old man and don't deserve you or Honolulu, and I'll make that right with you."

He made it so "right," that within a week there was a reconciliation with his nephew and a new house going up for the engaged pair.

"You brought it all about, you fam ous old bird!" exulted Jared to his recovered fowl, but old Honolulu only hobbled about. He could not consistently "honk" just then. There was a stormy weather condition bovver-ing—only sunshine!

LEECH ONCE HIGHLY PRIZED

In Days That Have Long Gone By the Bloodsucker Was Considered of Value.

Our great-grandfathers regarded the land as a kind of first-aid outfit for sick humanity. In the days when bloodletting was a popular remedy the innocent wound have worried less over the loss of his pill box than over the loss of his little friend. And so long as bloodletting was popular there was little danger of the efficiency of the leech.

Nature fitted him for the task to which the physicians adapted him. Long before he was used on humans he was used on animals, performing great of his own on fish, frogs and other neighbors of his in the mud and slime in the bottom of his marsh home.

His operating tools consist of a cupping glass at the end of his tail and another at his mouth. Also at his palate are three semicircular, sharp toothed jaws, which he works tooth for like a saw. With these he cuts his way through the scales of a fish and reaches the blood.

The leech's wormlike body begins to expand. He has 11 pairs of sacs in his stomach, and he must fill all these before he is satisfied. He drinks until he is from two to three times his normal size.

The leech is lifeless in day time, but at night he cuts up for a banquet. When winter comes he buries himself in the mud and waits for warmer weather.

Nerves Are Queer.

Aren't nerves the queer things? Here is a physician who finds that nervous prostration is merely a matter of stomach. Speaking on nerves in general and the nerves of a girl of society in particular, he says her nervous prostration is caused by—what do you think? Too much dancing? Wrong. Too late hours? Wrong again. No, neither of these, but simply too much parental dictation and too much attention to her husband. On the other hand there is the wife of the layman who surrounded by a dozen is doing the family wash is quite an array of her ut-most energy engaged in that exercise which is commonly supposed to lead to shattered nerves. Yet if anyone were to ask her if she were on the verge of nervous prostration she undoubtedly would ask what that meant.—New York Times.

Snakes and Snakes.

Crimsonbank—According to Professor Dedico transparent, translucent and opaque.

Crimsonbank—of women at an exhibitate has been very successful, judging from the quantity and quality of the work turned out in some British establishments which were displayed by the men laying for the second day. Some 800 in all are so employed. In one case where there are 700 girls 90 men are needed for tool setting, setting on work and other cases where strength is required. Some of the women have been at the work since May, 1916. Women superintendents are in charge day and night. Not only are products turned out to sugar, but the average output is reported wonderfully high.

Critical Definition.

Professor—Dedico transparent, translucent and opaque.

Student—I'm sure you are illustration instead, sir. I would say that the windows of this room were opaque, translucent, and the door was transparent.

Smart Coat of Checked Material

One more example of the successful management of lines and adjustment by means of new departures in the garment-cutters art may be studied in the coat pictured above. In the now spring models cutters appear to have thrown caution to the winds, but the coats justify them in this dependence.

It appears that the designers are striving to achieve the required fullness without making coats cumbersome, and to give to the figure the correct silhouette. In the model shown here the back of the coat and top of the sleeves appear to be cut in one piece. The introduction of a peculiarly shaped underarm piece leads one to think that this eccentricity of cut is often made with an eye to its decorative value as well as to the "hang" of the garment. The fronts are extended toward the back in a curved line over the hips, and contribute their share of the fullness about the bottom of the coat. It hangs trifmly straight down the middle of the front. It will be noticed, that in consumvation devoutly to be wished in the coat for spring.

This is one of many models in black and white checks, more or less large, evidently more. Even in suits few very small checks are shown. In them and in coats the modestly large star check seems to be best liked. The wide pointed belt and oddly shaped pockets give the dress design individuality. The collar and cuffs are gracefully shaped and finished with panels of black silk. In the collar one may see how cleverly the designer has taken advantage of the small cape idea without copying it outright. In the bottom used irregular white stripes appear on a black background. They might be effectively made of molds covered with black silk with greater elegance, but less durability. Speaking of bottoms, many of them in coats and suits are made of the same fabric as the garment.

Waiting for Spring

Now that the lenten season is upon us there is time for putting into execution plans for spring coffee, so that work meant for the family may bloom out at Easter time in something new. Perhaps nothing will be beautiful if the styles designed for small girls by great authorities in the realm of fashion are faithfully copied. Spring frocks for the little miss are ridiculously pretty and leave nothing to be wished for.

Breaking generally of frocks for "dress-up" wear, skirts are full and short and much bobbed. In some instances there is no waist line and sleeves are merely puffs of cotton or silk. Sometimes the waist is made on top of the arms. In wash frocks, for daily wear, the sleeves are show or the shoulder length. There are steep tiones, however, with sleeves reaching to the wrist.

One of the simplest of little silk dresses for a girl of five or more, years is shown here. It is made of foulard silk in a dark color with scattered white dots over its surface. The skirt is set on to a very short plain bodice, square at the back and fastening in the back with a row of tiny buttons. It goes together at the neck in a pointed with a flat shirred puff of the silk, and the frock is worn over an underbody of organdie.

The underbody has short, full sleeves finished with a hemstitched band. This finish is repeated at the neck.

For girls from five to twelve years there are frocks of taffeta in black, or colors, trimmed with narrow, fancy braid in these narrow braids gold or silver threads are introduced. One of the prettiest designs has a very full gathered skirt gathered into a loose bodice. This bodice is made of four straps which are tucked to the belt at the back and front. Two of these straps come at each side, extend over the shoulders and all of them, as well as the belt, are finished with braid. A bow of ribbon with short ends tied at the front supports the other bands. There are sixteen sleeves of the bands also.

A blouse of organdie or chiffon is worn under this frock. It is full with round neck and short puffed sleeves. Neck and sleeves are finished with frills.

Julia Bottomley

For Early Spring.

Tucked taffeta hats faced with hemstitching are among the great variety of so called sport hats.

Woman Good "Workmen."

The employment of women at machinists has been very successful, judging from the quantity and quality of the work turned out in some British establishments which were displayed by the men laying for the second day. Some 800 in all are so employed. In one case where there are 700 girls 90 men are needed for tool setting, setting on work and other cases where strength is required. Some of the women have been at the work since May, 1916. Women superintendents are in charge day and night. Not only are products turned out to sugar, but the average output is reported wonderfully high.

Critical Definition.

Professor—Dedico transparent, translucent and opaque.

Student—I'm sure you are illustration instead, sir. I would say that the windows of this room were opaque, translucent, and the door was transparent.

INTERESTING ITEMS FROM THE CITIES

Why Owners of Gotham Apartment Houses Rave

NEW YORK—"The average tenant is an apartment house" said a real estate man who has a number of apartments to rent, "thinks that the owner has nothing to do but to wait and grow fat in peace from his revenue from the rent checks each month, and he hasn't a care on his mind. But let me tell you the landlord who makes his expenses on property nowadays is lucky. In many cases it will get out and, more, too. I know of a million-dollar apartment house that suffered from a plague of red ants so persistently that it could not keep its tenants, and its value as an investment was seriously impaired until a good deal of money had been spent in finding a remedy for the pests. There is a number of big brick apartment houses where above the eighth floor let in the heavy rainstorms as if they were sieves instead of being 24 inches thick and of solid brick. No one knows why this is or what is an economical remedy for it.

"The red ant house" is said to be known locally, is one of the finest in the city. The cheapest apartment is $2,000 a year, and the most expensive—well, only the well-to-do can afford to live there and enjoy the every modern luxury that it furnishes. A short time after it was opened the red ants appeared—little ones at first, and much larger than pinheads, but there were millions of them. They got into the tenants' sugar, and those who tasted their morning coffee inadvertently learned that they had an unexpected flavor. They crawled over the canisas sheets at night, and the tenants learned that they could bite.

"Things came to such a pass that not only the occupants, but the agents and owners of the property were frantic. Losses began to be canceled, and the place was the sight of a deserted village. Every known remedy for their extermination was tried. Finally a German came along with a chemical preparation, and in a short time the place was free of the red ants. But it was many years before the landlords of the property caught up with the losses.

"Take another big apartment house quite as valuable as the foregoing, which is said to be typical of many in another popularity. This big building is 12 stories high. The crust and rear walls, when the rain came down in torrents, leaked so fast that the tenants have to keep sweeping the water up so that the floors will not be flooded. On a single rainy night the owners have appropriated from five to ten dollars for new slates for the eighth floor damp proof. Why are the walls porous above the eighth floor—or above, say, 100 feet from the ground, and impervious to moisture below that line? No one knows."

Wanted the Front Door Key of New York Hotel

NEW YORK—Henry Lightman, who hails from Jarbridge, Nev., and whose previous metropolitan experience was all garnered in Goldfield, will take back to his home bailiwick some big city adventures that will make the boys there gasp. Mr. Lightman has been sojourning, or, to be more explicit, starting out from the McAlpin hotel. He arrived here at the invitation of capitalists to convene on the subject of a tungsten mine in which he has a major interest. His expenses were being paid—a fact which Mr. Lightman dwelt on the other night when he approached Robert Dunlop, the assistant manager of the hotel.

"Pardner," he said, "you're connected with this are ranch around here, ain't ye?"

Dunlop was assured that Mr. Dunlop was. Mr. Lightman drew him to one side.

"Well, it's this away," he explained. "I'm out tonight with a friend that's with me" (referring to Jacob Diffold of Goldfield, also here on a visit) "and we may be out late. So if you'll just get me a key to your front door we'll do it up right."

Mr. Dunlop laughed weakly.

"Pretty good," he said, believing that the obvious answer, and he strolled away.

"Hey, wait a minute!" yelled Mr. Lightman. "About that key? We are going to stay out late, remember."

Mr. Dunlop, realizing that he meant it, assured him that the hotel keep open all night. Mr. Lightman then went back to his friend with a knowing wink and a newly found friend. That day Mr. Lightman was around the foyer of the hotel with a friend. That day Mr. Lightman was around the foyer with a friend. He was in the morning in company with a twin brother and early. He caught sight of Mr. Dunlop.

"How do you like the town?"

"Me" asked Mr. Lightman. "I like it. Say"—and then he told him of his wild, wild night.

Topeka Invaded by an Army of Hungry Rabbits

TOPEKA, KAN.—Some time on a recent night Topeka was invaded by the most timid army ever gathered together—an army made brave by the ranges of hunger, an army of rabbits. If it were and for the ordinance prohibiting the discharge of firearms within the city limits, the Topeka townsite would be as good a hunting ground as it was in the days when the first log cabin stood on the bank of the Kaw. There are rabbits in Topeka by the thousand, and a Topekan ventured the assertion that if he were and he had a shotgun and the ground the wolves and coyotes would stick close to their dens in the presence of the ranging, numbers, was not discovered until

next day, but the peeled bark of the brush piles in City park indicates that they have driven them in from the friendly ledge fences and wood patches. The brush was piled in City park last fall and, though it is now green, and while it makes poor food it is better than starvation. The twigs and branches are peeled clean where the rabbits have been at work and there are tracks around the piles by the million.

For weeks the ordinary food supply for bunny has been covered by the snow and ice. Rabbits have driven pillar to post by hunger, always keep at a safe distance from the haunts of man. He has been chased by dogs and shot at by men and boys when he was doing nothing worse than stripping branches and stock raisers from the taxation. This ought to set at rest every rumor that the farmer or the farmer's land is being taxed to pay the cost of the war.—Advertisement.

Philadelphia Woman Took Her Pet for a Ride

PHILADELPHIA—A woman rider in a Woodland avenue trolley car the other day presented about as ridiculous an appearance as possible and knew that every other person in the car was laughing at her, yet she did not seem to care. She got aboard with a big muff in her hand, which she held close up to her coat while she put her fare. When she sat down she appeared to be petting something in her muff, suddenly a cat's head appeared out of the end of the muff and in a flash the animal leaped to the floor of the car and was heading for the large curved seat in the back. The woman started after him, calling, "Here, baby, come back to your mother." The cat did not heed the other occupants of the car and after making an attempt to get out the back window, got under a seat, causing an unusual commotion among a crowd of women. The conductor brought up the rear of the parade, while the motor man stopped the car and sat laughing at the performance. All the people in the front of the car were craning their necks to see what happened.

With the conductor's aid the woman finally got h

DOINGS OF THE VAN LOONS

This landlord business is getting to be serious for Father

SERMON IS HALTED BY PIN IN SHIRT

On Resuming Pulpit, Pastor Advises Men to Inspect Laundry Carefully.

Des Moines, Ia.—"Look your laundry over carefully," was the unusual advice given from the pulpit by Rev. E. Roger S. Hig'oy of Grace Methodist Episcopal church to the male portion of his congregation. The pastor's remarks followed a trying experience during his sermon, in which he was forced to excuse himself and retire to the choir room to extract a stray pin that had been jabbed into him in the back.

Soon after the minister had begun his discourse members of the congregation noticed him reach around several times and fumble impatiently at a spot in the middle of his back. Finally when he could no longer endure his trouble his hearers howled with laughter.

Later he declared that was one sermon with a point to it.

Fumbled Impatiently at Spot in Middle of His Back.

MACKINAW IS LIFE SAVER

Spreads Out Like Parachute on Water and Prevents Man Drowning.

Chicago.—The chances are Ludwig Gergevig will never be drowned. It was a blue racer snake or a bottle headed cobra or a turkey with a bone net on that made him jump into the river.

The bartender at 60 East Kinzie street said Ludwig has been spoiling a lot of swimming holes and his landlady, Mrs. Lizzie Rasch, thought it was snakes. She said he was in bed and he'd have to go before he decided to commit suicide and mess up his room.

Ludwig was chased to the Rush street bridge at five o'clock. There he jumped. There were no snakes on the bridge after he jumped. Maybe they went with him. But he was in luck, as his mackinaw filled like a parachute and held him above the water until Policeman Joseph Connelly pulled him out.

The police thought the cold plunge would be invigorating to one who seemed so well stewed.

Ludwig shook himself and went his way.

MARRIED TWICE IN A DAY

Oklahoman With Supposed Bride at Depot When Word Is Sent of the Mistake.

Muskogee, Okla.—Lee Lamb of this city and Miss Hertha Turkosky of Cheestah were married twice in one day, and at least one was a binding ceremony.

Lamb obtained a license here, and a ceremony by a magistrate followed at the home of the bride, in an adjoining county. While at the Cheestah depot with his supposed bride, waiting for a train for this city, Lamb was attracted by a horseman riding furiously and waving his hat. The rider shouted: "Then Heaven joined you good Mr. Justice of the Peace Grimes told me to stop you all and tell you."

Then "Mr. Justice of the Peace Grimes" bore in sight, on a small beast, at breakneck speed. He explained that when he started to make his report of the wedding he discovered he had not been issued an another county, hence was not good at Cheestah.

Lamb and Miss Robinson were married again on their arrival here.

Men and Women.

A man can go his own way with much less opposition than a woman. And in that may be found the reason for the common opinion that men are more broad-minded than women.

Everything in Its Turn.

To everything there is a season and a time to every purpose.—Ecclesiastes.

WHEN HONEYMOON IS OVER

Getting Down to the Real Business of Life Generally Found to Be a Serious Proposition.

It's after the honeymoon that real living begins. All that precedes it is so intoxicatingly romantic that people are not responsible. At least their dreams are to be taken with a good margin. But after all the fuss, and flowers and "God-bless-you," there is the problem of getting down to real living. Then will come the battle for business, the grocer's bills, and the rent. Perhaps sickness may take a hand in affairs, or other things inject a loss. If you are living up to the last dollar or beyond it hardship must follow.

If love is to survive the second year after the honeymoon people must be considerate. Neither will expect the other to do what is beyond the common means. Each will sympathize with the other's efforts and cooperate for the common weal. You two are the builders of your future. Let good some easy row within the bounds at the start, and then you will be able to improve with the year. The biggest fool you are before the honeymoon the greater the comedown after it. The start now will be the inspiration for the future.—Pennsylvania Grit.

SCENTS MAKE FOR HEALTH

Among Other Important Matters is Their Tendency to Promote the Habit of Deep Breathing.

When we smell a beautiful flower we breathe deeply, we expand the chest, we inhale, our whole being expands with delight, which alone is beneficial, for to underbreathe is a fault which most everyone is guilty of, certainly if one is tired.

If the air of each room was laden with a different scent, it would tempt one to breathe more deeply in passing from room to room encountering the different scents. In fact, to breathe deeply would soon become a habit, and in this manner the lungs would expand and be brought into greater activity, which in turn would produce a better state of health—this leads to youth and beauty.

In fact, flowers and scents are a physical benefit to the weary housewife and mother, as well as the woman of leisure, and are equally beneficial to the busy man, clerk, stenographer, student, or anyone deeply engrossed in thought. The artist finds them valuable, but none for their good, but for the inspiration gained from color.

Your Wrist-Watch.

It is a marvel of minute workmanship. It is one of the most wonderful things the human hand fashions. The pivot of the balance-wheel has a diameter measured by the two hundredth part of an inch and, more marvelous still, in order that the pivot may have free play, the jewel-hole into which it fits is exactly one-five-thousandth part of an inch larger. The gauge which enables this to be done measures to the ten-thousandth part of an inch. But not only are the screws of a watch as minute as its hole, but they have a thread just like the big screws you drive into the door, but the thread of the watch's screw has as many as 260 turns to the inch. What is called a pallet jewel in a watch weighs a pound when there are 150,000 of them, and of the roller jewel it would need 250,000. The largest watch bair-spring stud in your watch is the four-hundredth of an inch in diameter and nine-hundredths of an inch in length.

Circulation of Money.

A man made $25 of honest, surplus, unearned increment by putting poor quality in a case of soldiers' shoes he shipped abroad. As he had lots more money, made the same way, he gave the $15 to a boat waiter to reserve a table for New Year's eve.

The head waiter gave the $15 to his wife, who handled the finance, and she used $24.95 of it to pay the head waiter's income tax.

The income tax will be devoted to supporting a navy to chase off some country that doesnt like us any more because we made poor shoes for its soldiers.

As for the odd nickel, that is still in service, as it were, and will be taken for another generation or two, when the son of the head waiter will throw it to the grandson of the shoe manufacturer as a sweet-smelling lighted lighter.

Money always goes somewhere.—New York Mail.

Example Counts for Much.

Preachers have more followers than reason. We unconsciously imitate what pleases us, and approximate to the characters we most admire. A generous habit of thought and action carries with it an incalculable influence.—Iowa.

His Mind on the Auto.

"Sue and her new husband have started on their bridal trip in yet, tabic ecstasy." "Is that one of the new makes?"—Baltimore American.

OUR PUBLIC FORUM

Peter Radford
ON THE BUSINESS PREACHER.

The recent confession of Dr. Newell Dwight Hillis from the pulpit of the Plymouth Church, Brooklyn, that he erred in becoming secular is in many respects the most important statement made from the American pulpit in this generation and if it marks the high tide of ministerial lust for worldly power that has been flooding this country for the past quarter of a century thus Dr. Hillis has not erred in vain.

It must be said to the credit of this noted divine that his purpose in stepping out of the pulpit was to acquire the means of rendering a more capable service to those who need and deserve assistance, but the pathway from the pulpit to the world is always strewn with good intentions. Satan knows as well how to tempt a saint as he does a sinner and he has lured many a minister from the princely pathway of worship to ruin, for no one knows better than his satanic majesty how easy it is to get a preacher to enter business or politics in the name of the Lord.

The lessons of the nation have viewed with alarm and the world with derision, the growing tendency of ministers of the gospel to abandon the pulpit as a power against evil and seek the influence of worldly success to put into effect their Christian ideals. The man who has not sufficient faith in the power of religion to grapple with the sins of this world ought not to be in the pulpit and if he wants to accumulate wealth in order to aid to be in the pulpit and if he wants to accumulate wealth in order to relieve poverty or wield a scepter in order to enforce morality, thus he ought to be a banker or a mayor, instead of a preacher.

The two great temptations that confront the Christian ministry today are business and politics and between the two evils, Dr. Hillis chose the least and by his able conduct has turned error to his credit and transgression to the advantage of the pulpit. It is no compliment to say a preacher is a sharp trader or a smooth politician and certainly no applause for the ministry would offer such qualifications as evidence of equipment for Christian work, and ministers engaged in undue activities in either field become a menace to the church and a peril to the state.

It is true the ministers, as a class, are underpaid, but their average income will exceed that of the average farmer. Stocks and bonds, land and securities, politics and the lecture platform have tempted many a preacher, but the plow handles are without sin so far as luring the minister from the pulpit is concerned. Any preacher who feels the inclination to abandon the pulpit should plow a few rounds and I venture the suggestion that he will hurry back to the pulpit.

Now that Dr. Hillis has led the business preacher "back to the pulpit" will some one of our leading political preachers confess their sins and lead their wayward brethren back to the fold?

PERE MARQUETTE

The Value of The Pere Marquette to Michigan

Did you ever stop to think what the Pere Marquette Railroad means to the State of Michigan—to this Community—to YOU?

Has it ever occurred to you what a factor the Pere Marquette is in the development of our State? This year it has brought into Michigan over a thousand families to settle on our undeveloped lands.

Do you realize how the Road connects up the cities and towns of Michigan, so that business between them is made easy and social intercourse possible—how, through its ferry ways, Chicago, Toledo, Milwaukee and Buffalo, it puts us all into touch with every other city and town in the country!

DO YOU KNOW That is how 1800 miles of track in Michigan?

That it serves 45 Counties of the State with a population of more than two million people?

That the Pere Marquette runs nearly a hundred passenger trains a day?

That it carries more than five million passengers per year?

That it moves over twelve million tons of freight a year?

That it requires more than 3000 locomotives, nearly as many coaches, and more than sixteen thousand freight cars to do business every day?

That it employs more than ten thousand people?

That its payroll amounts to seven and a third million dollars a year?

That most of our people live in Michigan and most of their wages are spent in the State?

That it pays this commonwealth in taxes more than one half a million dollars a year?

That it is the **only** Railroad that many Michigan communities have, and because it runs **"All Over Michigan"** it is the **most important** line into those towns and cities having more than one Railroad?

The Receivers are trying to pull out of its difficulties and put it on to its feet for the benefit of the people of the whole State. Are you helping? Are you boosting? Are you giving it your patronage? If not, begin now. Every passenger fare counts, and so does every pound of freight. Give us the business to do, and we will give you the service.

Operating Receiver,
Pere Marquette Railroad.

Talk No. 3

Treat Coughs and Colds At Once

Dangerous Bronchial and Lung Ailments Often Follow Neglected Colds.

Dr. King's New Discovery Instantly Relieves and Breaks Up the most Stubborn and Hard Colds.

We catch cold because our system has become weakened and lends itself unable to throw off the Cold germs. Nature in some cases will effect a cure; but generally, without aid we get worse. How much wiser to help nature fight and expel these cold germs! For this purpose there is no better remedy than Dr. King's New Discovery. It is composed of Pine Tar mixed with laxatives and healing balsams. It is antiseptic. The instant Dr. King's New Discovery comes in contact with the germs, they die or leave. Your cough loosens, the irritation is soothed, and you begin to get better at once. Don't take the risk of serious sickness. Take Dr. King's New Discovery. In use over 45 years and guaranteed all the time. All druggists.

Good Provider.

To understand the force of this story one must first know that Cain's storehouse is too place in New York where the scenery and properties of most of the theatrical productions that most of us unlucky fans on Broadway are sent for storage.

A great deal of interest was in the surgery of the Lambs' club on an afternoon not long ago. A somber gentleman, waving his hair long and wide rubber rims on his eyeglasses passed through.

"Who is that?" asked one of the party, addressing Hap Ward, the comedian.

Ward looked and recognized in the man a playwright who wrote no fewer than three pronounced failures last season.

"Oh, that," said Ward, "that's Cain's favorite author."—Saturday Evening Post.

Value of Art.

The managers of a certain evening newspaper that publishes a great many pictures found it necessary to cut expenses. They dismissed a special writer and two reporters, and most of the other employees became nervous about their positions. Nothing was done about it, however, and was not uneasy. He worked in what was called the art department.

One of his friends said to him, "Why aren't you afraid of losing your job?"

"Oh, they can't fire me," he replied.

"Why not? They are cutting all along it. Why do you feel safe?"

"Well, you see, our paper cannot afford to make a cut in its art department. We have so many subscribers who can't read!"—Youth's Companion.

Tribulations of a Volunteer.

Richard de Gompowder was an enthusiast. He was so enthusiastic that he enlisted in the Harvard Hundreds. Moreover, he was so very enthusiastic that he enlisted twice. Then matters became confused, for he was assigned to two different regiments. In some way, however, he managed to persuade his superior officers that he would rather be wholly and entirely in one company than partly in two. So one of his enlisted selves joined the other in the same squad. But now he was absolutely beside himself; every time he turned around he met himself in the back; whenever he was out of step he trod on his own heels; every time he—what should—what could he do? What would you have done?

But the captain was cleverer than you. He selected one of Richard's enlisted selves and made him an officer. So now Sergeant de Gompowder once more has complete command of himself.—Harvard Lampoon.

Rock Composed of Minute Fossils.

Near Reno, Nev., are familiar beds of diatomaceous earth. This chalk white material consists largely of fossil microscopic animalcules. These remains have collected here in numbers so immense that in some deposits hundreds of feet thick and in places make up almost the entire mass of the rock. It is so light that it will almost float on water.

To Start Child's Training.

The inventive mother will do a great deal of her own entertaining planning for the development of her nursery brood. She will visit the kindergarten shops, the toy shops and all the places where the wonderful and much heralded constructive materials and tools are shown to the purchasing public. But more than this, she will select for herself such materials as she believes are suited to her own experiences, and then will work out her own plans in accordance with the individual development and requirements of her children.—Mrs. Louise Hogan in Good Housekeeping.

SPIRIT OF PATRIOTISM.

Miss Helen Herendeen,

a sixteen-year-old American girl, prior to the war, attracted wide attention in society in the European capitals as an interpretative dancer. Her Americanism shot was in aid of preparedness at the Patriotic ball at the Biltmore, New York, and at that occasion she rendered two original dances—"The Spirit of Patriotism" and a "Dance Fantastique." The proceeds of the affair will be used for the purchase of an aeroplane for New York's coast defense.

If You Are Deaf Read This

Lip Reading teaches "the eye to hear." This study is easily acquired in our new course. Correspondence Course. By learning to read the speaker's lips you can again enjoy the comforts of conversation without embarrassment. Throw away all mechanical hearing devices and re-enter society. MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage made by Ella Bennett and Ira Bennett, to Charles Sweetman, dated September 4, A. D. 1912, and recorded in the Register's office in and for Charlevoix County, Michigan, on the 8th day of April, A. D. 1913, in Liber 50 of Mortgages, on page 1, which said mortgage was duly assigned by said Charles Sweetman to the undersigned, by an instrument dated the 1st day of April, A. D. 1913, and recorded in said Register's office in Liber 50 of Mortgages, on page 2, on which said mortgage there is claimed to be due at the date of this notice, the sum of Twenty-Five Hundred Dollars, principal, and the sum of Five Dollars, attorney's fee, of Twenty-five Dollars, provided for in said mortgage, and no suit or proceeding at law having been instituted to recover the debt secured by said mortgage, and the undersigned, the assignee of said mortgage, will sell the premises described in said mortgage, viz: Lots 1 and 2 of Section 31, Township 34 North, Range 8 West, eighty acres more or less, situated in the Township of Eveline, Charlevoix County, Michigan, at public auction, to the highest bidder, at the Front Door of the Court House, in the Village of Charlevoix, in said County, on the 29th day of April, A. D. 1916, at two o'clock in the afternoon of said day, to satisfy said mortgage, or so much thereof as may be necessary, with the costs and expenses of foreclosure and sale, and all legal costs, together with said attorney's fee, as provided for in said mortgage, and the statutory attorney's fee, as provided by the statutes of Michigan.

Dated, Charlevoix, Michigan, February 28th, A. D. 1916.

PATRICK J. DUFFALL, Mortgagee.
Assignee of Charles Sweetman, Mortgagee.
Hardman Hardman, Charlevoix City, Michigan, Attorneys for Assignee.

First Publication January 27th

State of Michigan,
The Circuit Court for the County of Charlevoix, in Chancery.

At a session of said court, held at the court house, in the City of Charlevoix, in said county, on the 27th day of January, A. D. 1916.

Present, the Honorable Benjamin W. Mayne, Circuit Judge.

Milton J. Hessman, Plaintiff,
vs.
David McKay, Defendant.

In this cause, it appearing by affidavit on file, that the defendant, David McKay, is not a resident of this state and that his place of residence is unknown, and that he is a necessary and proper party to a suit in chancery, brought by Plaintiff. It is ordered that the appearance of said defendant, David McKay, be entered herein within four months from the date hereof, in default of his entry of such appearance, that in case of his default in appearance, the bill of complaint to be filed and a copy thereof served on said defendant, David McKay, shall be taken pro confesso by the court.

And it is further ordered, that the said Plaintiff cause a copy to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said County of Charlevoix, and being the newspaper in Michigan and that publication be made twelve days from the date of this order, and that such publication be continued therein once in each week for six weeks in succession, or that the said Plaintiff cause a copy of this order to be personally served on the said defendant, David McKay, at least twenty days before the time prescribed for his appearance.

BENJAMIN W. MAYNE, Circuit Judge.

R. L. LEWIS, Attorney for Plaintiff.

We will have on hand for your inspection practically the entire line of these justly famous Hats, ranging in price from

$1.95 to $9.00

You are cordially invited to attend.

A SOUVENIR NEEDLE BOOK FREE.

A DESERVED PROMOTION

WARD W. BENNETT, OF THE LOCAL COAST GUARD STATION, GIVEN A RAISE.

The keeper of the Beaver Harbor coast guard station was suspended from the service last week.

On Friday last Ward W. Bennett, second in command of the Charlevoix station, received a telegram from the district superintendent, ordering him to proceed to proceed to St. James at once and take charge of that station. He arrived at St. James on Sunday.

The appointment is given as "temporary," but there is little doubt that Capt. Bennett will soon be given permanent command. The Beaver Harbor station is just classed as a "volunteer" station, but it is well known that the station is booked for a full service crew as soon as certain matters of title to the station grounds can be brought to a head.

Capt. Bennett is one of the beneficiaries of the "Carnegie Hero Fund" having, a few years ago received a medal and $1,000, for saving the life of a boy who broke through the ice at Clam River. It was a case of most conspicuous bravery, the boy having drifted under the ice in a strong current. The bearing of it is that Capt. Bennett is a modest hero.

Everybody here will be sorry to lose Capt. Bennett, but congratulate him on his deserved selection for advancement.

EDITOR C. E. CHURCHILL DEAD

C. E. Churchill, owner and proprietor of the Petoskey Evening News and Resort Journal, Petoskey Independent Record and the Churchill Printery, dropped dead on Thursday afternoon while on his way to the office of his physician. Mr. Churchill had been ill for more than a year.

Mr. Churchill came to Petoskey 130 years ago and had been in the newspaper business there since April 1900. He was a committeeman in the Michigan Press Association and was active in newspaper circles of the state. His widow survives him.

In his intercourse with his professional contemporaries Mr. Churchill always manifested a courteous and fraternal bearing, and the newspaper fraternity of Northern Michigan will sincerely mourn his loss. He was a "good fellow" in the highest sense of the term.

THE TWO DROMIOS

We have no desire for a controversy with our pastor, especially when we consider the fact that the two of us are classed as to the main form at issue.

Our pastor believes that saloons are an abomination.

So do we.

Our pastor believes that blind pigs and gambling resorts are schools of vice and should be driven out.

So do we.

Our pastor believes that influences that tend to decoy young men from the path of virtue should be driven from their hiding places.

So do we.

Along these lines our pastor and our editor are as alike as two peas in a pod, are a pair, and it takes three of a kind or a straight flush to beat us.

We are extremely sorry that the pastor took offense at what we said last week. We never dreamed that the pastor knew his statements to be true he should be able and willing to furnish the evidence, otherwise the said statements were a slander against the town. We admit that there may be a few dirty spots on our social raiment, but we believe that no town of our size in the State has fewer of them.

We assure our beloved pastor that we are far, very far from a state of imbecility. Indeed, we are feeling lusty. There never has been a time when we were mentally more able to fight social evils than now, and we were never more willing. On our life, we cannot understand why the pastor should have thrown that Sunday night fit. If he keeps it up he will be due at the midpost of senility before we get there. No, dear brother, do not lay the flattering unction to your soul that we are moribund.

Of course our pastor does not know it, but not so long ago we fought two battles for local option, and should the issue again arise, if we are alive, we shall fight just as we did before. Moreover, if state-wide prohibition is submitted we shall, if alive, support it with all the power of our immortal soul, and with all the energy of our alleged declining intellect.

We cannot say, truthfully, that the pastor is a dead duck; we can only fling back at him one word, and that is "mediocrity," and we question whether or not he has reached that degree of intellectual or religious influence.

We leave it to those who know the record of this paper upon all questions of social order and cleanliness to judge between us. For the church which the pastor represents we entertain the most sincere respect.

LOVING CAESAR NO LESS BUT ROME MORE

Evidently a too literal interpretation was given our reference last week to the Pere Marquette advertising proposition involving the co-operation of Charlevoix.

We do not think anyone will or can question the loyalty of the SENTINEL to any proper and equitable financial contribution having for its purpose the betterment of local industrial conditions. It was plugging for Charlevoix before two-thirds of its present inhabitants were born.

Looking toward the main desideratum the summer business is a potent factor, but we are reluctant to concede that it compases all that we yearn for. Valuable as it is we often find ourself dreaming that it is but an adjunct to a greater activity. Our contention is that more winter dinner-pails are wanted, and greater publicity in this direction is needed. If this be treason make the most of it.

DEATH OF MRS. R. W. TULLOCK

Died, Wednesday of last week, at her farm home in Banks, Mrs. R. W. Tullock, after a long illness.

Mrs. Tullock was born in England in 1842. In 1855, in company with a sister she came to Canada, where the greater of her girlhood were spent, in 1870 she was married to the late Robert W. Tullock, the couple coming to Michigan in 1871, locating on the Banks farm. About twenty-five years ago they came to Charlevoix, where they resided up to about twenty years ago, when Mr. Tullock died.

She leaves one daughter, Mrs. Allen Holbuis, with whom she lived on the Banks farm. Deceased was a sister of Mrs. Daniel Himebaugh, of this city, and of John Parsons, of Banks.

AN UNFAIR CHARGE

UPPER PENINSULA NEWSPAPER DEFENDS OSBORN AGAINST FREE PRESS SLANDERS

A recent issue of the Free Press recently printed an extended article in which it accused former Governor Osborn of having made conflicting promises to three men who had been discussed as possible candidates for governor, namely, G. J. Diekema, John Carton and General Green of Ionia. Mr. Osborn's effectually put the lie direct to the Detroit Saturday Night—presumably because he could not secure their publication in the Free Press—of the letters to these three men. They make clear that there was no misrepresentation by Mr. Osborn, and that he did not promise to any one of the men addressed to have an erroneous view of his attitude. This is conceded as far as Mr. Diekema is concerned by a letter he sent to the Free Press that at no time was he under any misapprehension as to Mr. Osborn's position.

The correspondence shows clearly that as between the present candidates Mr. Osborn is used up with Diekema. Its inference is now that the Free Press on occasions permits its dislike of Mr. Osborn to run away with its discretion and leads it to take a course of action that is palpably unfair.—Mining Journal.

THE DETROIT JOURNAL COMMENTS UPON E. W. ABBOTT'S CANDIDACY

"Edwin W. Abbott of Boyne City is in the field for nomination on the Republican ticket for representative from Charlevoix county to the legislature. He aims to succeed Dog. Herman Milian, who is retiring after serving two terms in the house.

Mr. Abbott lived for many years in Detroit and was known widely as "Abbott, the farm man." Finally he got out on the farming country himself and is the land commissioner now for the Boyne City, Gaylord & Alpena railroad. This line has stuck for years to the job of getting a cross-country railroad in the northern end of the lower peninsula and has two ends of it operating, but the center still is unconnected.

Developing prosperous farming communities out of the primeval wilderness and the cut-over lands is a man-sized job and the struggling railroad builder picked out as the livest wire available for development work. E. W. Abbott.

He has been at it three years now and his pioneer labors and boosting abilities have accomplished much in the line of tangible results. It's hard to keep a hustler from what he wants, so the farming hotels and boarding houses which bid for the custom of members of the legislature during regular sessions might as well start right now to keep an eye on Mr. Abbott."

FOR SALE—at less than first cost, three (3) Fine Lots in Crouter's Addition. Parties interested, apply to H. S. HARSHA.

SHAKESPEARE STUDY CLUB

LADIES' SHAKESPEARE STUDY CLUB HOLD TENTH ANNUAL BANQUET AT BARTLETT HOUSE MARCH 22

A banquet that will go down in the history of the Shakespeare Study Club as being the "best ever" was the one held at the Bartlett House on Wednesday evening, March 22nd. The doors opened at 7:45 o'clock and to Edison mos' the ladies with their husbands entered the dining room. Exclamations of delight were heard on all sides as they viewed the tables, the dimensions of which were 6 ft. by 40 ft. with covers laid for thirty-four.

The decorations were in the Shakespeare colors—purple and gold. Along the center of the table were potted plants of "Daffodils that come before the swallows dare and take the winds of March with beauty." There were Candelabra holding yellow candles throwing soft beams over everything. The flat decorations were a purple and gold center-piece with a fern border of smilax and a daffodil at each place. The programs answered as place cards as well. They were artistically decorated with a bunch of violets and gold lettering, the work of one of the young members, Mrs. Earl Young. Festoons of purple and gold crepe paper hung from the chandeliers.

Following is the menu:

"Do any you to welcome some superfluous" ..... Perkins

Fruit Cocktail

"To give satisfy a fresh appetite"—Gibbs.

Olives Walnut Pickles

"Nay we shall entertain some lovely delicate Tunes with Mushrooms.—Ben Jonson"

"As a princess fishes that are newly trimmed" ..... Henry VIII

Roast Young Turkey Cranberry Jelly
Mashed Potatoes Hot Rolls Rutabagas

"Autumn is here so abundant and sweet
Glad harvest! Thanking the giver"

Vegetable Salad Cottage Cheese
Wafers

"I think that good wine was born to do mankind"—Henry VIII.

Neapolitan Ice Cream Cake
Orange Sherbet Bon Bons

"Shakespeare quotations like they dear dishes
Relish" Merrick about Nothing

Coffee.

Here with a cup that's stored into the brim we drink this health to you"—Percival.

The refreshment committee, Mrs. Cromer, Mrs. Iddings and Mrs. Harsha with Mrs. Bartlett, deserve much credit for the planning and serving of this splendid dinner. Children of club members served as waiters and waitresses and performed their duties "excellently well." They were Willie Hampton, Irene Faulds, Bruce Armstrong and Katherine Harsha with Dorothy Bartlett to superintend.

Richard and Billy Bob Paddock with their phonograph furnished popular airs during dinner. "Cupido in the Brimey" seemed to strike a responsive cord in the breasts of some of the guests.

When the last course had been cleared away the president, Mrs. R. W. Paddock, arose and after a few words of welcome spoke of the different entertainments during the club's history where the husbands had been guests—told about the work of this year and its importance to all lovers of Shakespeare, because of his tercentenary on April 23d, and then drank "to the general toy of a whole table" and introduced as toastmistress, Mrs. F. W. Mayne, who spoke of the changes that have taken place in the families of the club members during the last ten years, then in a manner to introduce the speakers in turn. Mrs. Mayne's after dinner stories are always to the point and well told. She does truly "starve the ears of her listeners and makes them hungry the more she gives them speech.

Mrs. H. B. Armstrong responded to the subject, "Is Shakespeare Dead?" Easily showing with her ready wit, fluent speech and masterful manner that "living art is, indeed, but page to serve his wit." That Ben Jonson spoke truly, "Shakespeare is not for an age but for all time."

Mrs. A. A. Swinton in her toast to "Our Husbands" demonstrated her c

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

SYNOPSIS.

Effie of Dalny's lumber camp directs a stranger to Hampden's place. Hampden is the rightful heir to the Dalny lumber co., but is in hiding because of his quarrel with the group and the work he has done to keep the property from falling into their hands. He wishes to be called Jim. He intends to give a handful of the wealth he has amassed in secret, without permission to the rightful heir, Jim Hampden, who is in Europe. Effie's brother, Bob, is helping Effie's folks plant a garden when Jim comes to the camp. Effie's father, Sandy, is the camp boss. Effie's mother is a hopeless invalid. Effie's sister, Lily, is a beauty, and a coquette. Effie's brother, Jack, is a cripple. Effie's brother, Tom, is in the army. Effie's brother, Dick, is a boy. Effie's brother, Harry, is a boy. Effie's brother, Bob, is a boy. Effie's brother, Jim, is a boy. Effie's brother, Jack, is a boy. Effie's brother, Tom, is a boy

THEY FAIRLY BEAM WITH STYLE---

The Reliable Housefurnishers.

PADDY NEEDED THE MONEY

Respect for the Dead Evidently Had Little Place in the Makeup of This Irishman.

A good old story has been resurrected of Paddy Maher, who one time was a handy man for an undertaker in a town in the County Kerry.

So healthy had the people become that the undertaking business was very slack, and full time was never certain and overtime out of the question.

Therefore Paddy resolved to migrate to Liverpool. Arriving there practically penniless, he applied to an undertaker for a job.

"What can you do?" asked the undertaker.

"Anything at all about a funeral," said Paddy.

"Well, I can't give you a regular job," said the man, "but you can go and lay out old Cohen, the Jew, in Palestine st. or, for a start."

Away went our hero, and shortly returned, having done his work and brought measurements, etc.

"There's nothing else for an hour or so," said the boss, "so we'll go and have a drink."

"Just had one, and then Paddy said—'Now we'll have one with me.'"

"I thought you were spent up," said the boss.

"So I was," said Paddy, "but luck to be here."

And he produced a sovereign.

"Where did you get that?" asked the astonished boss.

"I found it in the cold Jew's hand when I laid him out."

"Oh, you shouldn't have touched that," said the boss in alarm. "The Jews always put gold in the hand of their departed. You've committed a great crime."

"What 'ud an cold Jew want with gold when he's dead?" asked Pat.

"To pay his fare across the Jordan," replied the undertaker.

"Oh," said Pat, with a broad grin, "let the cold chap swim. What are ye drinkin'?"—London Tit-Bits.

Graham Flour.

Graham flour is made by grinding the entire grain to a moderate grade of fineness. Entire wheat flour is made by grinding the grain and removing the bran coat or outer coats. If the germ were not removed from the flour, its color and its keeping qualities would be affected.

LOCAL NEWS.

Geo. W. Priest spent last Sunday in Petoskey.

A daughter at the home of Mr. and Mrs. Archie Livingston.

Suffragette Town Meeting, Tuesday evening, April 4th.

Mrs. A. M. Dolberg returned from southern Michigan last Saturday.

Rev. C. E. Taggart left Monday for southern Michigan on church business.

Miss Mary Finneran is spending the school vacation in Detroit visiting her sister Clare.

Mrs. Robt. Boothron is spending the week with her aunt, Mrs. Blackman, at Traverse City.

The suffragette band will make its first appearance in public Tuesday evening April 4th.

The annual spring vacation of the public schools is on this week. School begins again next Tuesday morning.

Mr. and Mrs. Ira Adams spent Saturday, Sunday and Monday here as the guests of Mr. and Mrs. W. A. Smith.

Road Commissioner, O. D. Hammond, attended the Good Roads Congress at Cadillac last week, also visiting Grand Rapids.

Glenn Dolberg left for Minneapolis last week to take a course in music in the university of that State or some other good school.

Mrs. Kerns, widow of the late Dr. Willis Kerns, who for eight years was clerk of Charlevoix county, died at Alden last week.

Charles Lamphear, who spent the winter in Flint, is back home again, and has begun to put the ice cream factory in shape for business.

Prosecutor Lewis went to East Jordan Tuesday to investigate a charge against a number of boys of breaking into houses. Three of the boys are over 18.

Last Sunday seven young men sang in the Congregational Church and were very much appreciated. Some very beautiful roses constituted the decorations.

Harry L. Oldham this week bought of the Nicholls estate the residence on Park avenue adjoining the Oldham home on the east. Mr. Oldham will improve the property.

The annual business meeting of the Charlevoix Historical Society to be held at Dr. F. H. Wilkinson's residence on March 31st will be postponed until Friday evening, April 7.

White Rose Hive will give the play "A Suffragette Town Meeting" in the I. O. O. F. hall at 8:00 o'clock Tuesday evening, April 4. The suffragette band of twenty-one pieces will furnish music for the evening. Admission 15c. Get your tickets early and avoid the rush.

There will be two meetings in the Congregational church Friday in the interest of the campaign of Friendship and Efficiency. The first meeting will be held in the afternoon at 2:30. At 7:30 there will be a platform meeting. Two visiting pastors will be present and take part. This is in connection with a state-wide movement of the same sort, and a large attendance is desired.

Wilbur Nice, of East Jordan, before going Mayne last week, pled guilty to the charge of taking indecent liberties, and was sentenced to Ionia prison from one to ten years, with the recommendation of three years. Oscar Richards, who shot his wife and then himself at East Jordan, plead guilty to the charge of assault with intent to commit murder, is awaiting sentence. Both lads are and his wife are recovering from their wounds.

Approximately $6,000,000 will be spent by the Pere Marquette during the coming season for maintenance, renewals and improvements, according to Receiver Paul King. He says the improvements have been made possible through increased earnings due to the support given by both employes and patrons. The total maintenance of way and structures which is planned, is said to amount to $2,200,000.

A radical change in the colors of the United States flag is threatened by the dye shortage, according to dye experts in St. Louis. Paul Langstraun, head of one of the largest dye works in the west, said the supply of red aniline in America is exhausted and that blue dye would soon be a thing of the past. He predicted that if the war continued another year the red stripes and blue background in the American flag would have to be dispensed with.

A Galesburg, (Illinois) special to the Sentinel, says: Because of sickness, Fred Gregory, former pitcher and out fielder of Charlevoix high school, has been unable to try out for a place on the Knox College base ball team until today. He made his first appearance in the squad of thirty men who are out for places on the team, this afternoon. The boys said men have been practicing out of doors for more than two weeks and are beginning to show form. C. G. Redden, a former University of Michigan player, will have charge of base ball at Knox this year, while the track men will train under the supervision of Coach DeTray.

Hay and Straw Wanted.
S. ORLOWSKI & SON.

WE HOPE THE COUNCIL WILL NOT ADOPT ANY RESOLUTIONS ON THE DEATH OF THE EDITOR OF THIS PAPER

Several good friends have called at this office since Sunday with bouquets for the editor's obsequies, but finding that the report of his demise was false they placed the floral tributes in cold storage. This is to inform the public that the editor has but three more years to serve before passing the half century mark as publisher of the Sentinel, and he expects to grow in grace and the knowledge of earthly things every minute of the time.

If he can keep on his feet during the spring ley period, and can successfully dodge the high explosive projectiles and gas bombs that are polluting the atmosphere, he will start in on the second half of the century as a close rival of Col. Henry Waterson, who is 76.

Just at this present writing the editor of this paper can repeat the multiplication table without a skip, or, figuratively speaking, lick his weight in skunks or wildcats, liped or quadruped.

DEATH OF CORNELIUS GALLAGHER

The deeply regretted death of Cornelius Gallagher at the age of 86 years, which occurred Saturday morning at 6:30, March 15, robs the Island of its oldest resident. He was born in Co. Donegal, Ireland, which he left for the U. S., first settling in Marsh Chunk, Penn., having there over fifty years ago, arriving at St. James. He has lived at St. James ever since, becoming one of the first settlers.

He is survived by one brother, C. H. Gallagher, of Juneau, Alaska; three sons and two daughters; C. C. Gallagher, of Escanaba, C. A. Gallagher, of Chicago, J. C. Gallagher, Beaver Island; Mrs. Thomas Bonner, Beaver Island; about twenty-five grand children and a great grand children.

He was greatly respected throughout the Island as was shown by what was the largest funeral held on Beaver Island. Was buried at 9 a. m., on Monday morning from Holy Cross church.

Great Clubbing Offer

We are glad to announce that we have made with the Grand Rapids Press a clubbing arrangement whereby we can furnish the Sentinel and the *Press* for one year for $3.00. R. F. D. only. The Evening Press is the best daily in the State, and we are sure our R. F. D. readers will appreciate the deal.

We are also yet offering the "Big Four" combination in connection with the Sentinel for $2.00. The "Big Four" embraces "Farm Home," "Today's," "The Housewife," and the "Reliable Poultry Journal." This combination for $2.00 is the greatest clubbing arrangement ever offered in Charlevoix.

Saturday, Bran $1.25 per hundred, sacks free, at S. ORLOWSKI & SON.

COMMON COUNCIL

At the Monday night meeting H. C. Cooper was appointed City Assessor.

Council voted to raise city engineer's salary from $1,000 to $1,200.

Bids on $9,131.30 to $8,600.00.

Deck at foot of Chicago avenue (Pine Lake) hoisted to Franklin Street at $19. for year.

Mich. Trust Co. designated to audit City accounts.

Light and water committee instructed to ascertain cost of line to connect with Rock Product Co electric plant.

Bridget O'Riley will run for moderator at the Suffragette town meeting.

Board of Education

March 21, 1916.

Regular meeting of the Board was called to order by President Hampton. Trustees present, Hampton, Norton, Briggs and Hiller.

Absent, Glassford.

The treasurer's report shows a balance on hand of $5658.31.

The following bills were presented and read:

General Fund Orders	
87 Herbert Taggart, office work	2.00
88 E. M. Jackson, janitor	50.00
89 Cecil Poole, janitor	2.50
90 Ed. Gaudette, janitor	2.50
91 Frank Sherman, janitor	2.50
92 Thos. S. Palmer Co, gen supp	9.00
93 Ginn & Company, Geo. Reader, Read a	1.12

Moved and supported that the bills as read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

The minutes were read and approved and on motion the board adjourned. E. J. HILLER, Sec'y.

SEVEN and one-half acres, close to city, will sell at a bargain; well located. Call on or telephone, H. S. HARSHA.

EMREY'S End Season Sale

OF

Men's Suits and Overcoats.

BOYS' SUITS Greatly Reduced!

All Overcoats and Suits, except Blue Serges at Remarkable Price Cuts.

Whether you need an overcoat or suit now or not, this is an opportunity for you to profit while we reduce our stock. You positively will get a better garment now than next year---with the rise in the price of wool advancing and a continuance in shortage of dye stuffs.

Notice!

[We print the following letter by request of a good democrat friend. Inasmuch as "our friends the enemy" have no place in this county, we comply with the request of our friend as an act of charity.]

A Signed Interview From Hon. Lawton T. Hemans, Who Carried Within 300 Votes of Being Elected Governor of Michigan in 1912.

The Name of Lawton T. Hemans is a Household Word in Every Democratic Home in Michigan.

To the Democrats of Michigan:

For twenty years, at least, it has been my privilege to have intimate acquaintance with the men who in the larger sense have contributed the energy and the means to further the interest of the Democratic party in Michigan, and of both energy and means no man in the state in that time has made as large a contribution as Edson O. Wood, of Flint.

Political parties are made potent thru their organizations, and organizations are perfected and kept intact through the liberality and sacrifice of their members. If the Democratic party in Michigan has been to any degree impotent, it has been because it has had too few men of the loyalty, energy and liberality of Mr. Wood, and too many men like the few who now constitute themselves his critics, who, during the same years, contributed nothing to make the party as potent as it has been.

Political disintegration either thru promoting factional differences or supporting candidates of the opposition has never been furthered by Edwin O. Wood; he has always supported loyally the candidates of his party.

Twice I have been honored by the party as its candidate for the governorship, and I have never been aware that there was factional division within the party in whom I served. In both campaigns, the first contributions to advance the work of the State Central Committee came in the form of remittance from Mr. Wood which aggregated from five hundred to a thousand dollars for each campaign and constituted from a fifth to a tenth of all the funds received by the Committee while the names of most of the gentlemen who now are asking that the direction of party affairs be given over to them, were not on the list at all.

If loyalty to party principles and candidates, the sacrifice of time, energy and money, and the promotion of party solidarity against factional divisions, entitle a man to consideration in the party organization, Edson O. Wood has demonstrated a fine election as a member of the Democratic National Committee.

LIES TO SHIELD HIS FOLKS AND IS JAILED

Pardon for Man Who Swore Falsely to Protect Wife and Children.

Topeka, Kan.—Is a man ever justified in telling a lie? That is the question just presented to Gov. Arthur Capper. The governor is inclined to believe that under most circumstances a man is not justified in lying, but, in the case he has under consideration, he is willing to justify the falsehood that he will grant a pardon to F. E. Williamson.

Williamson got into trouble with a neighbor one day and a fight followed, in which Williamson won. The other man then had Williamson arrested for "No." Williamson Replied.

assault and battery. Williamson proved he was not the aggressor and was freed.

During the cross-examination of Williamson the county attorney has asked:

"Were you ever in the penitentiary?"

"No," Williamson replied.

Some months afterward Williamson was arrested for perjury, and it was shown he had served a term in prison for theft. After he got out of prison Williamson had reformed. He came to Kansas, settled at Lincoln, minded his own business, and no one in the town knew of his prison term. His wife and children did not know of it. When he was confronted on the witness stand with the question of besmirching his own name he told a lie and was sent to prison for it.

FIRST CAR RIDE AT 82 YEARS

For Years McCubbin Thought He Could Drive Any Place Where He Liked, Now Is Convinced.

Kansas City.—Not until his six-year-old grandson took him in charge did Peter Franklin McCubbin of Virginia, eighty-two years old, ride on a railroad train. He passed through here the other day with the grandson, Morris Williamson, on the way to Salt Lake City, where he will live with his daughter, Morris' mother.

At the Union station Mr. McCubbin allowed a horse litter to be fitted around him and said he had enjoyed his journey very much.

"It wasn't because I was afraid of trains that I didn't ride on them," he said. "I just never had occasion to go anywhere I couldn't drive.

"I raised a family of eight children, and, although they all insisted, I never went to see any of them. They usually came home once a year and saved me the trouble. My wife traveled considerably, considering, and one of my daughters has been to Europe, but I always got along fine on the farm. When I got tired there I would hitch up and drive to Fincastle, and if the conversation there didn't suit me I would drive over to Eldredge, twenty miles away."

SPENDS $200 TO GET $40

Washington Litigant Then Loses the Suit and Is Forced to Pay Costs.

Everett.—To settle a difference of $40 a total of nearly $200 was expended in the superior court and the jury brought in a verdict which left affairs in their original state, except that the plaintiff was required to pay the costs in the suit of W. J. Williams against Mary Anne Evans O'Toole.

Williams contracted to clear twenty-five acres of land for Mrs. O'Toole at $20 an acre. When he completed his work he received $160. He brought suit in justice court and got judgment for $40. The case was appealed to the superior court. Mrs. O'Toole averred that Williams rightfully owed her $20, since he failed to complete the contract.

The jury was taken to the land, on Riley Island, and apparently found that Williams did not complete the contract.

Real "Movie Burglary."

Moonachie, Pa.—Carrying a movie camera and declaring they were staging a "movie burglary" three men in broad daylight, removed $3,000 worth of valuables from the home of Charles Freeman, theatrical man, who was away on business.

Norwood News

Mr. and Mrs. Ben Pearl visited in Atwood last week.

School closed all this week on account of the very bad roads.

The Ladies' Aid met this week with Mrs. Joe Holcebech.

Mr. and Mrs. C. H. Ferguson are in Charlevoix this week on business.

About twenty of the Norwood young people gathered at the town hall Friday evening for their weekly spread.

The Ladies' Aid will serve dinner in the Grangers' dining room on election day, Monday, April 3rd.

W. H. Superman is spending the week with his family here.

Earl Young, Chas. Novak and Monte Withers, of Charlevoix, were in Norwood on business last week.

Born, to Mr. and Mrs. Frank Kimball, of Chicago, on Wednesday, March 8th, a son. Mrs. Kimball was formerly Miss Leona Valentine, of Norwood.

Mr. and Mrs. Shriner having spent the winter in Bay City are now located on their ben farm south of Norwood.

Mr. and Mrs. Ted Pearl are visiting Mrs. Pearl's parents, A. A. Stafford and wife.

Miles Olmstead has been visiting here the past two weeks. He returned to his home in Charlevoix Saturday.

Mrs. S. S. Spaulding, formerly of Norwood, who is now living with her daughter, Mrs. E. Cooper, of Elk Rapids, is seriously ill.

Saturday, Bran $1.25 per hundred, sacks free, at S. ORLOWSKI & SON.

TEACHING MORALS IN SCHOOL

Lessons Not Known in America Given in Japanese Educational Institutions.

In the American Magazine Ray Stannard Baker gave the following account of a curious feature of Japanese school instruction.

"Visiting the Japanese schools in Hawaii several years ago I was impressed with one feature unknown to American schools. This was an interesting series of colored pictures with text in the Japanese language. Illustrating the model conduct expected of Japanese children upon a great variety of occasions. These were distributed about on the walls of the schoolrooms and frequently referred to. When I expressed my appreciation of this work one of the teachers said, 'How shall a child know how to act unless he is taught?' which seemed to be a sensibly sensible remark. And yet in America (until recently), while religious teaching has been barred from the public schools, no substitute involving thorough instruction in conduct or morals has yet been developed. The unbuilding of moral ideals, upon which, chaos would seem to be the sequel, is left to such incidental and indirect instruction as might come our way. Our number of American children—not only those whose home life is poor or whose church connections are weak, but thousands of children in school with only the haziest ideas of what is right and what is wrong."

SHOULD HE DEFEND GUILTY?

Attorney's Duty Has Been Made Plain by Some of the Highest British Authorities.

Ought a barrister to defend on a plea of not guilty a prisoner who has confessed to him privately that he has committed murder or some other offense with which he is charged?

The question was raised by the bar committee at Shanghai, and Sir Edward Carson, when attorney general, and Sir Robert Finlay, K. C. M. P., approved the reply which the general council of the bar sent, says the London Globe.

The reply lays down that if the confession has been made before the proceedings have been commenced it is most undesirable that an advocate to whom it was made should undertake the defense, but if afterward, or in circumstances that the advocate could not continue without seriously compromising the position of the accused, counsel's duty is to protect the client as far as possible.

The mere fact that the prisoner confessed to his counsel is no bar to that advocate continuing to appear in his defense, nor does the confession release the advocate from his imperative duty to do all that he honorably can for his client.

Proper Restriction.

Put this restriction upon our pleasures: Be cautious that they injure no being which has life.—Zimmermann.

Hay and Straw Wanted.
S. ORLOWSKI & SON.

Barnard Doings.

Miss Mae Smyde spent Sunday at her parents home.

Miss Georgia Scroggie has returned to her home in Hayes.

George Neale has secured a position in Flint and left Saturday to begin his duties Monday.

Mr. and Mrs. Chas. Townsend will entertain the Royal Oakes, Thursday evening.

Mr. William Ives, who has spent the winter in Lansing, arrived Monday at his mother's home. He has secured his former position with Ben Brown, of Charlevoix, and will take up his work April 1st.

Owing to the poor conditions of the roads it was deemed advisable to have no church or Sunday School. Next Sunday we will have a special program for Asbury Memorial Day. A combination service beginning at 2 p. m. We are working for a prize, and hope to receive a liberal offering.

Our school has again changed teachers owing to the continued poor health of Miss Scroggie's father, it was necessary that she be at home. The patrons and school board regret exceedingly this action as Miss Scroggie's work was very satisfactory, both in management and teaching. Miss Gertrude Shapton has been secured to fill out the term and began her work Monday morning.

Complimentary to Geo. Spade, who was about to leave for Flint, his class, The Royal Oaks, had a little surprise for him Friday evening at his home. Music and games helped to pass a very pleasant evening, after which he was presented with a fine pocket bible. Mr. Spade will be missed at the class parties and sessions of S. S. His interest in everything for the good of the class has been most helpful, and he takes with him the best wishes for success in his new home.

Elizabeth J. Parsons was born October 25, 1838, in Cornwall, England. She moved to Ontario with her parents in 1866 and lived there until 1871 when she moved to Michigan, settling in Antrim county. In 1873 she was married to Robert W. Tulloch and thirty years later moved to Charlevoix. She has been a member of the First Congregational church of Charlevoix since it was organized. She leaves one daughter, Mrs. A. J. Bishuis and two sisters and a brother, a number of grandchildren and nieces and nephews to mourn her loss. Mrs. Tulloch slept away quietly Tuesday evening, saying she has been in very feeble health for a long time, it was not thought the end was so near. Mrs. Tulloch was a woman of noble qualities tender, sweet, womanly. She was every inch a lady in her whole life, and her strong Christian faith made her ready to enter the mansions of her Father's house. Rev. Taggart, of Charlevoix, and Rev. Rood, of Barnard, officiated at the services held on Friday morning in the church. The very large number present spoke of the respect and esteem in which she was held. The sorrowing relatives have the sympathy of this community in the loss of this dear one, but the comforting thought that she has only "slipped away." The remains were laid to rest in Brookside Cemetery, Charlevoix.

Mrs. S. S. Spaulding, one of the pioneers of Elk Rapids, now living with her daughter, Mrs. Cooper, in Traverse City, suffered a stroke of paralysis on her eighty-fourth birthday. Mrs. Cooper was in Elk Rapids at the time, but returned home on the afternoon train with a birthday gift for her mother, purchased here in her old home town, and was planning a small party for her mother in the evening. Owing to Mrs. Spaulding's extreme age her case is most serious. [Mrs. Spalding is well known in this vicinity. She was for many years a resident of Bay View where she, with her husband, were pioneers.]—Eco.

Bellaire Independent: Judge Mayne was in town Thursday holding a special session of the circuit court for the injunction case of W. A. Hosmer et al vs. The Hydraulic Power and Light Co. After taking some testimony and the presentation of arguments by the attorneys, the whole matter was put over until the regular June term of court. In this case the plaintiffs seek to restrain the Hydraulic Power and Light Co. from lowering its dam here as ordered by Judge Lamb in the case of Sam'l Brockway against the Hydraulic Co.

Mrs. Manchester, the Duchess of Waterbury, will be present at the Town Meeting.

WANTED—To rent for season of 1916 Furnished Cottage with 5 or 6 bedrooms, 2 baths, furnace heat, on Michigan Ave. or some other desirable location. State all particulars and address, MRS. LOUIS FLORSHEIM, Congress Hotel, Chicago, Ill. 3-30-3

WILL SELL OR EXCHANGE for improved farm land, my house and lot on Bridge St. Inquire of Mrs. Frank Spencer or address, A. E. BOWMAN, at Van Hoe Implement Store, Harbor Springs, Mich. 3-30-4

DANGERS OF DRAFT

Drafts of air are dangerous to the overheated and perspiring, just when they are most liable to meet them. The result is Neuralgia, Stiff Neck, Sore Muscles or sometimes Lumbago or Rheumatism. In such cases apply Sloan's Liniment. It stimulates circulation to the sore and painful part. The blood flows freely and in a short time the stiffness and pain leaves. Those suffering from Neuralgia or Neuralgic Headache will find one or two applications of Sloan's Liniment will give grateful relief. The agonizing pain gives way to a tingling sensation of comfort and warmth and quiet rest and sleep is possible. Good for Neuritis too. Price 25c. at your Druggists.

School Commissioner's Column

May L. Stewart, Commissioner.

"THE AGENT MAN" — SECOND SCHOOL.

"Sure, and it's proud we are of our garden. Patrick, me own boy planted this tree the day his mother died. 'Twas just a dry bit of a root that me brother sent from the auld country.

"It's a beautiful tree, Mr. O'Milligan, and wondrous green about it. The view must be splendid from within. Splendid steps you have here too. A big improvement over the last school I visited. When I went to know what a community is I just look at its school house. It tells on them every time. You should be proud of this entry way and of this well kept hall-way. Oh, yes, you can see your garden from these windows, can't you? Did you say that your teacher planned this landscape, Mr. O'Milligan?"

"Sure, Man, and we all planned it. It's a fine teacher we have here and a fine school. This is our teacher at the desk here. Miss McGarry, am I want you to meet Mr. Brown. He's a fine young man, begorrah, and he aint married yet for all he's roaming the country with so many pretty girls around."

"But you see, Miss McGarry, I'm an agent and all but these sensible Irish seem to hold aloof from agent men."

"If you interest us Mr. Brown, you will find that we stand for a square deal. Mr. O'Milligan will be a very interested listener."

"Sure, Miss McGarry, and I told him too that we wouldn't trow no stones at him. Begorrah, man, and what have you got?"

"Something to help you to see more of your garden, something to make the indoors a part of the paradise you have without."

"Sure, man, and we're from Ireland but we speake English, if you please."

"And your will helps you to figure out every other language. I am taking contracts for relighting schools."

"And does it mean that I can have something better than the lamps man?"

"It's the daylight we're talking about, Mr. O'Milligan. Let me explain. Some of your boys and girls are wearing glasses. That shows that their eyes are wearing out. They are pretty young to be crippled this way. Miss McGarry will tell you that some of her pupils have headaches and that on dark days they can not do all of their work."

"And you don't promise to relight the weather, do you?"

"Certainly not, but we help you to make the best of the weather you have to have. The number of windows you have and where those windows are placed determine just how much good you can get from the daylight about you."

"Indade and why is that?"

"Because if you have the windows on the right side you will have on their desks whenever they are writing nothing but a shadow of the right should der. The east light is the best because you then have the sunlight to purify the air for a little while in the morning but the sun climbs up fast enough to that it doesn't continue to bother them. You want some sunshine for boys and girls, Mr. Brown, as some as you do for the flowers that I see you love."

"Sure, man, and it sounds fine—funny looking building on the outside, but of course it isn't that you're preaching. Begorrah man, I'll see you some other time, if you please. I told Patrick me boy I'd be in Flanigan's this very hour. Good day to you Mr. Brown. I'll leave you here with Miss McGarry, but mind your manners, mister, for we don't stand no fooling, begorrah."

Explaining "Tabby Cat."

Few people are aware that the name "Tabby cat" owes its origin to Atab, a famous street of Bagdad, elderly people used by the mercenaryers of the silken stuffs called Atabb, our taffeta. The wavy markings of the material silk, resemble tomby's coat, and this how "tabby" came into use as a common expression.

Solidifying Liquors.

A method by which all liquors can be solidified into tablet form has been invented by a French chemist.

World's Sunday Schools.

There are 297,866 Sunday schools in the world.

All to the Good.

He was sitting with someone and smitten by a recognition of some good quality in his companion. Perhaps, after all, he had been a bit hard upon her. So, with a touch of repentance, he said: "She wouldn't be so bad—if she had any education—and some breeding—and was better looking—and knew how to cross at all." It is, of course, these little touches that count.

Name That Will Live.

Isaac Walton founded no empire, established no new dynasty, built no city, originated no school of philosophy, or discovered no art, but he gives us the "Compleat Angler," and he earns—as did that his estimation forever live in the world's grateful remembrance.

Harmless.

"Will you have another cup of coffee, Mr. Smith?" asked the landlady. "Yes, thank you I will," said the new boarder. "My physician advises me to drink plenty of hot water for my indigestion."

Not Silenced Easily.

What I don't understand is why they call a big gun "size" when it can be silenced.—From Richmond (Va.) Public Service News.

The Old Violin

By
EVA MORRIS ROBERTSON

(Copyright, 1924, Western Newspaper Union.)

"Oh, Natalie, what do you think—you are an heiress!"

"Nonsense, Kate!"

"It's true," affirmed her married sister. "Here is an item in the Rossville paper, and it says that among the beneficiaries of Uncle Warren's will are several relatives outside of his direct family. See—your name: 'Miss Natalie Prescott.'"

Natalie's pulse fluttered a trifle. Her name was, indeed, mentioned. She lay down the violin on which she had been practicing and read the announcement.

"Maybe it's ten thousand dollars, maybe it's twenty!" cried Kate excitedly. "You know that Uncle Warren was a very rich man. My! If you should get a big lot of money, think what you could do for the children and for me, poor, overworked and a nervous wreck! I would go away for one grand stay at the seaside, and get some new clothes—oh, I hope your legacy is something substantial!"

"Kate, dear, do not count on it," advised Natalie with a sad smile. "Uncle Warren had near family relatives, and of course they will get the bulk of his estate. I fancy he has remembered me with some trifling memento."

"I'm going to find out. Trust me for that!" declared Kate determinedly.

They were of wide, diverging natures, those sisters. Natalie, patient, after that he came often to the quiet rendezvous. He was a member of a local orchestra, he told her. His life was devoted to one devouring theme—music. Their performances were identical, they grew to be friends. One day Victor Daicoll came to Natalie in a state of great trepidation.

"Oh, Miss Prescott," he said anxiously, "I have a great favor to ask! They have placed me on a program for a violin solo at the great symphony concert. The leader says it will sell his any admission to his circle at high commutation. Oh, if I had only the Carero for a single fifteen minutes—the great, glorious Carero—I know I should succeed!"

She regarded him with a tender light in her eyes.

"You will be very careful of the instrument?" she said.

"I will guard it with my life!" cried the delighted enthusiast. "Oh, how can I ever repay you? Also with your presence at the concert, I will bring you very good out of the violin!"

Natalie sat entranced when Victor, at the concert, began his solo number. All about her tense, strained faces told of the general effect of the beautiful music. The gifted player was given an ovation, and the pleased face of Victor was brought to mind that the fortune of the young violinist was assured.

Natalie had gone to the waiting room when the program was finished. Victor was there, her sister and accompanyer her home. Suddenly a thought startled her. The next instant, followed by excited members of the orchestra, the young musician rushed into the room with bloodless face and staring eyes.

"The Carero!" he shrieked. "It is stolen!" and fell senseless at her feet.

A doctor was summoned. He looked severe as he felt the pulse and opened the eyelid of the insensible young musician.

"Out him to a hospital at once!" he ordered. "If the strain he is under is not soon relieved he will lose his mind."

The little hound the others tell of how Victor had left the violin unguarded for a moment to find it gone five minutes later. She sat softly crying to herself. Natalie was about to proceed slowly home when the leader of the orchestra appeared hurriedly.

"You are the young lady to whom the Carero belongs," he said. "It is found. I gveaga that the caretaker looked it up for safety, has just returned and found it.

"Oh, I must return to the hospital at once!" fluttered Natalie. A nurse had been to a room near Victor's cot, muttering to him self incoherently.

"The Carero! The Carero!"

"Mr. Daicoll—Victor," spoke Natalie tremblingly, "we have found the Carero. See, it is here," but he never even looked up.

"May I try an experiment?" faltered Natalie, and the nurse assenting, she removed the violin from its case. Natalie began playing the masterpiece of the concert as best she could.

Victor stared at the fine melodious note. His eyes lost their misty expression. A rare ecstacy came into his face—reason was recalled by the marvelous magic.

The Carero brought distinction and wealth to Victor, and love, marriage and happiness to both these talented children of art.

Health Benefit of Yawning.

Yawning is said to have an exceedingly healthful function besides having a salutary effect in complaints of the pharynx and the eustachian tubes. According to Dr. Dercum, yawning is the most natural form of respiratory exercise, bringing into action all the respiratory muscles of the back and chest. It is recommended that yawning should be taken as a cure for with the stretching of the limbs morning and evening, and as a means of ventilating the lungs and testifying the respiratory muscles.

An eminent authority asserts that this form of gymnastics has a remarkable effect in relieving throat and lung troubles, and says that patients suffering from disorders of the throat have derived great benefit from it. He says he makes his patients yawn, by suggestion or imitation, or by a series of deep breaths with the lips partly closed.

The yawning is repeated six or seven times, and should be followed by a deep breath. It promotes the secretion and mucus in the eustachian tubes and sinuses.

Americans Good Match Users.

"Every man, woman and child in this country uses an average of ten matches each day," announces A. A. Hunter of New York, representative of a large match company, at Raleigh, says the Washington Post. "It is estimated that the match manufacturers of the United States turn out every day more than 1,700,000,000 matches. Of this output 1,000,000,000 are consumed in this country. Our people have come to be very exacting in the use of matches. A decade ago a pipe smoker might keep his smoke going by way of the kitchen fire and a paper lighter; today he wouldn't think of it. The greater use of cigarettes also has increased the consumption of matches, as have gas and gasoline stoves, which are continually turned off and relighted. There has been an increased demand for patent lighters and a new style of gas stove with pilot lighter attached, and these have helped to eat the sales of matches, but only to a small extent."

Valuable Japanese Plant.

A plant grown in Japan which furnishes a sort of vegetable leather. It is a pretty shrub called the mitsumata, and its inner bark, after going through certain processes, is converted into substance as tough as French kid, so it is claimed. It can be cut and sewed through it, and as pliable and soft as calfskin.

Not in Existence Then.

"That Kate of ?Don't Worry Club" is a wonderful thing."

"Yes," replied Miss Cayenne. "But I'm rather glad it didn't have much voguing when George Washington and his associates were discussing our foreign relations."

Varied Uses for Wide Ribbons

Would Draw Sweet Plaintive Melody From the Vibrant Strings.

Besides playing an important part in spring millinery and now lingerie, ribbons, in obedience to fashion's call, are making the most of an extended field of usefulness. Wide and narrow ribbons share honors equally in the great variety of uses to which they are put. The narrower widths are featured on street and sport hats for spring, while wider ribbons appear in high bows and ribbons on dressier millinery. They give the desired tall effects and are wired and plaited and ruffled and draped in no end of clever ways.

The narrower ribbons on street and outing hats are placed in prim, neat effects, and entire shapes are covered with them.

In beach pillows and bags, in borders and other embellishments, on parasols, ribbons shine down their vivid decorations. There is no part of the apparel of women and girls that does not borrow of their beauty this season.

Among the prettiest items that are made of wide ribbons, bonnets for the little miss of four or more years are calculated to captivate both her and her mother. It is a simple matter to make the most of an extended field of usefulness. Wide and narrow ribbons share honors equally in the great variety of uses to which they are put. The narrower widths are featured on street and sport hats for spring, while wider ribbons appear in high bows and ribbons on dressier millinery. They give the desired tall effects and are wired and plaited and ruffled and draped in no end of clever ways.

The narrower ribbons on street and outing hats are placed in prim, neat effects, and entire shapes are covered with them.

In beach pillows and bags, in borders and other embellishments, on parasols, ribbons shine down their vivid decorations. There is no part of the apparel of women and girls that does not borrow of their beauty this season.

New Models in Nightgowns

Two very pretty new models in nightgowns are patterned with the dainty combinations of val lace and the most of organdie embroidery in their makeup. They are both cut on surplice lines, with vaists made of alternating rows of val insertion and embroidered organdie insertions. The skirts are of nainsook, and in both models, the sleeves are made in one with the waists.

In the gown at the left the nainsook is laid in nine tucks in groups of three, and a sufficient number of groups to take up the width of the skirt and reduce it to that of the waist. The val and organdie embroidery are sewed together along the tinest of hems at the edges of the embroidery, and in the gowns pictured this work is done on the sewing machine. The effect is good, but even better when the val is whipped by hand to the smallest of a large hand company, at Raleigh, says the Washington Post. "It is estimated that the match manufacturers of the United States turn out every day more than 1,700,000,000 matches. Of this output 1,000,000,000 are consumed in this country. Our people have come to be very exacting in the use of matches. A decade ago a pipe smoker might keep his smoke going by way of the kitchen fire and a paper lighter; today he wouldn't think of it. The greater use of cigarettes also has increased the consumption of matches, as have gas and gasoline stoves, which are continually turned off and relighted. There has been an increased demand for patent lighters and a new style of gas stove with pilot lighter attached, and these have helped to eat the sales of matches, but only to a small extent."

Valuable Japanese Plant.

A plant grown in Japan which furnishes a sort of vegetable leather. It is a pretty shrub called the mitsumata, and its inner bark, after going through certain processes, is converted into substance as tough as French kid, so it is claimed. It can be cut and sewed through it, and as pliable and soft as calfskin.

Not in Existence Then.

"That Kate of ?Don't Worry Club" is a wonderful thing."

"Yes," replied Miss Cayenne. "But I'm rather glad it didn't have much voguing when George Washington and his associates were discussing our foreign relations."

The Sandman Story

By MRS. F. A. WALKER

(Copyright, 1924, Western Newspaper Union.)

PETER PAN.

Peter Pan was a little black kitten, and he lived with his mother, at Farmer Jones' farm.

Peter ran all over the house; no room was too sacred for him to enter, and he even slept on the bed in the spare room when the fancy took him to do so.

He chased the chickens and the little ducklings, and, although he had never harmed them, he had frightened them very much, and made their mother very angry.

"That Peter Pan is a spoiled kitten," said Mother Hen to Mother Duck; "what he needs to be punished, but his mother will never do it, and we will never get a chance, so I suppose we will have to put up with his pranks."

But fate delivered Peter Pan into Mother Duck's power in an unexpected way not long after the conversation between Mother Duck and Mother Hen.

Peter Pan saw the ducklings wandering about the yard one day not far from the pond, so he slyly crept toward them, hiding in the bushes until he was right beside them. Then he sprang out, and the poor, frightened ducklings waddled to the pond as fast as their legs would carry them. A piece of board lay partly on the pond, and Peter Pan ventured out on it to see what he could see.

His Eyes Staring With Fright.

bank and partly in the water, and one of the ducklings waddled on it before he plunged into the pond.

Peter Pan ventured too far this time, and when he stepped on the board it slipped from the bank and Peter Pan was in the water. He was a little that it kept afloat, and there he was sailing from land, his eyes staring with fright, and his loud moans could be heard over the barnyard.

Mrs. Tabby came running down to the pond, and when she saw her Peter Pan sailing away she almost fainted. "Save him! Save him!" she kept running as fast as she could, but there was no one to save him. The boss and the rooster ran to the edge of the pond and leaned, but they could not reach, and Mother Duck was too far out to swim with her children.

When the ducklings saw Peter Pan, they were frightened at first, for they thought he was chasing them even on the pond, and they ran to the bank for safe, but in a minute they saw that Peter Pan was in trouble, and at the time, and they gathered around him.

"Hello, Peter Pan!" they said. "How do you like our pond? We are out sailing very fast, so we will help you, and they gave the board a push with their bills, making Peter Pan away and nearly lose his balance.

"Oh, Mother Duck," he called to them, but they only quacked and quacked to see him frightened and gave the board another push. This time he lost his balance and his black eyes stared at the sky.

Peter Pan meowed loudly for help, and his mother ran down to the pond. Mother Duck to keep her ducklings from bothering her Peter Pan.

"Keep him out of our pond," called back Mother Duck; "he should not get in their way if he does not want to be bothered."

"But he can't get out of the pond," said Mrs. Tabby. "Do help him; he will be drowned if someone does not help him."

But Mother Duck was not ready to help him yet; she intended that Peter Pan should have a lesson he would not soon forget. So she went to the side of the board and slyly gave it a push, making small waves in the pond, which sent Peter's treacherous little craft sailing out into the middle of the pond with Peter meowing as loud as he could.

Mother Duck sailed after him, followed by her little ones, and after letting Peter get a few more frights by the tipping of the board, Mother Duck said to him: "If I take you back to the barnyard, will you promise to be a good kitten, and never make Mother Hen's hood, either?"

"Oh, yes," meowed Peter Pan, very meekly. "If you will only take me back to my mother I will not bother any of the chickens or ducks again."

"Very well," said Mother Duck, "then I will take you home, but before you ever bother my children again I will take you out here and let you stay. Now hop on my back and I will swim ashore with you."

"There is your Peter Pan," said Mother Duck when she reached shore. "I think we have put him in a lesson he will remember for a long time, and I advise you, Mrs. Tabby, to see to it that he behaves in the future, or the next time he may not get back so lucky."

Mrs. Tabby promised that he should never bother anyone again as she licked the water from Peter's coat and she also thanked Mother Duck for bringing back her child.

Peter Pan did not roam about the barnyard much after that. He no longer frightened anyone, and he felt very much ashamed when he remembered how frightened he had been on the water and how little courage he had displayed in the face of danger, which is very often the case with those who bully others.

WHAT HAPPENED IN FEBRUARY

Month in Which Many Great Movements Were Launched and Ended—Rich in Birthdays of Men.

Why the second month of the year, with its short, gloomy days, should be the month in which so many great movements began or were brought to a successful close, is more than I can tell, but so it is. On the second day of this month, 1811, the great Christian Endeavor society which now circles the world with blessings, had its humble beginning. On the same day of February, 1876, the great Blue Ribbon Temperance movement began in London. On February 13, 1689, the declaration of the English Bill of Rights called a civil struggle which had been going on for more than fifty years. February 14, 1691 saw the beginning of a work in which we are all interested, the Panama canal. On February 26, 1861, Victor Emmanuel was declared king, thus bringing all Italy under one crown, which had long been the dream of those who loved her best. I think I am safe in saying that all these movements were for the good of humanity.

February is especially rich in the birthdays of great men; there are two a week and several over. Of course you know the birthdays of George Washington and Abraham Lincoln, and Longfellow, almost our greatest American poet. Thomas A. Edison, Charles Dickens, the English novelist, who toppled down prisons with his clever pen, and Montaigne, a great French essayist, were all born in February. Among February's children are Meissonier, a great French painter, George Peabody, the American philanthropist, and Sir Edward Coke, an English lawyer, who lived in Queen Elizabeth's time, and whom you might call the father of English law.—Bertha Hart Nance in Boy's World.

STUDYING ART IN NEW YORK

Village Boys and Girls With Nothing but Youth's Optimism—Few Expectations Realized.

Geniuses are popularly supposed to be born or less independent of creature comforts, but few of the young persons who come from all over the United States every autumn to study art in New York are in the genius class. For the most part they are young men and women of average ability, seven-eighths of them are bent on becoming self-supporting as soon as possible, and the majority of these have hearty appetites and good digestion—when they arrive. After three or four months of study in New York it sometimes happens that their digestion is not so good, writes a correspondent of Pittsburgh Dispatch.

At one time students thought $5 a week quite a liberal sum to spend for room and board. $4 being offered the allowance. There are now plenty of young women students who spend $6 a week, exclusive of laundry and car fare. Some are responsible for the rise in room and board. $4 being offered the allowance. There are now plenty of young women students who spend $6 a week, exclusive of laundry and car fare. Some are responsible for the rise in room and board. $4 being offered the allowance. Everyone Should Drink Hot Water in the Morning

Wash away all the stomach, liver, and bowel poisons before breakfast.

To feel your best day in and day out, to feel clean inside; no sour bile to coat your tongue and sicken your breath or dull your head; no constipation, bilious attacks, sick headaches, colds, rheumatism or gassy, acid stomach, you must bathe on the inside like you bathe outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, while the bowel pores do, says a well-known physician.

To keep these poisons and toxins well flushed from the stomach, liver, kidneys and bowels, drink before breakfast each day, a glass of hot water with a teaspoonful of limestone phosphate in it. This will cleanse, purify and freshen the entire alimentary tract, before putting more food into the stomach.

Get a quarter pound of limestone phosphate from your druggist or at the store. It is inexpensive and almost tasteless, except a sparkling tingle which is not unpleasant. Drink phosphated hot water every morning to rid your system of these vile poisons and toxins; also to prevent their formation.

To feel like young folks feel; like you felt before your blood, nerves and muscles became saturated with accumulation of body poisons, begin this treatment and above all, keep it up! As soon as hot water set on the skin, cleansing, sweetening and purifying, so limestone phosphate and hot water before breakfast, act on the stomach, liver, kidneys and bowels.—Adv.

Defined.

"What is meant by peanut politics, father?"

"It's just a little shell game, my son."

"CASCARETS" FOR SLUGGISH BOWELS

No sick headache, sour stomach, biliousness or constipation by morning.

Get a 10-cent box now.

Wake up your liver—the headache, biliousness, indigestion, the sick, sour stomach and foul gases—turn them out to-night and keep them out with Cascarets.

Millions of men and women take a Cascaret now and then and never know the misery caused by a lazy liver, clogged bowels or an upset stomach.

Don't put in another day of distress. Let Cascarets cleanse your stomach; remove the source of misery. Don't take the excess bile from your liver and carry out all the constipated poisons from your intestines in the bowels. Then you will feel great.

A Cascaret tonight straightens you out by morning. They work while you sleep. A 10-cent box means more happiness than you have seen for months. Children love Cascarets because they never gripe or sicken.—Adv.

Heard in Court.

Plaintiff's Lawyer—I rest the case, your honor. Gentlemen of the jury, Gotto—You ought to; it's pretty weak.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it is in use for Over 30 Years.

Signature of Chas. H. Fletcher

In Use for Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

FATHERS AND PIG-CLUB BOYS

Remarkable Gain Made by Pig, Owned by Son in Comparison With That Raised by the Parents.

At a Kentucky fair two purebred Duroc Jersey litter mates were shown. One belonged to a pig-club boy, the other to his father. The pig-club boy had his mother buy the pig for him, and he fed it for 90 days, when it was sold at a fair. The boy's father had purchased a litter of pigs eight weeks old. Both started even.

The records of the boy show his pig weighed 27 pounds at that time. The boy's father had fed his pigs and gained 167 pounds at a cost of five cents a pound, or one and two-fifths pounds daily gain. He fed them corn, flour, shorts, and buttermilk. The father's pig unprovoked, shifted for herself. At the fair the boy's sow weighed 194 pounds and was a prize winner; the father's weighed 50½ pounds.

Another father selected a pig from the litter of his son's prize-winning sow. This pig was put in a pen and fed corn. The two pig-club boys followed instructions and fed properly balanced rations and used pasture. At the fair the father's pig weighed a little over 50 pounds; the prize-winning hogs of the boys averaged over 200 pounds each. The sons know it cost them 4½ cents a pound to produce their hogs, but the father does not know what his hog cost.

Small Pig Raised by Father, and Large One by Son.

Mr. F. C. Case.

A GRATEFUL ACKNOWLEDGMENT.

Mr. F. C. Case of Welcome Lake, Pa., writes: "I suffered with Back ache and Kidney Trouble. My head ached, my sleep was broken and unrefreshing. I felt heavy and sleepy after meals, was always nervous and tired, had a bitter taste in my mouth, was dizzy, had a rising spasm before my eyes when I arose, was always thirsty; had a dragging sensation across my loins. The kidneys had evidently lost their vitality and was troubled with shortness of breath. Dodds Kidney Pills have cured me of these complaints. You are at liberty to publish this letter for the benefit of any sufferer who doubts the merit of Dodds Kidney Pills."

Dodds Kidney Pills, 50c. per box at your dealer or Dodds Medicine Co., Buffalo, N. Y. Dodds Dyspepsia Tablets for indigestion have been proved. 50c. per box.—Adv.

Proof Positive.

OUR NAVY'S HEROISM RECORD

By EDWARD B. CLARK

SAME Spirit of Gallantry on the Seas that Moved the Ancient Sailor Moves His Brother Today—Some History

(COPYRIGHT, BY WESTERN NEWSPAPER UNION.)

THE OLD HARTFORD, BARRACKS FLAG-SHIP

THE CALIFORNIA, OUR NEWEST DREADNAUGHT

BRING the continuance of the present war there have been recorded scores of acts of gallantry and high heroism by the sailors of nearly all the nations engaged. The complete change that has been made in the vessels of war within the last thirty years has had no effect apparently upon the sailor. He is the same fearless and self-sacrificing fighter against man and the elements that ever he was.

In the North sea and in the Mediterranean we read almost daily of feats of conspicuous personal gallantry on the part of the modern seamen. Sailors are said to be much alike the world over. The United States is not engaged in war, but if it were it is believed that our dreadnaughts would be manned by the same persons who came from all over the United States every autumn to study art in New York. Many of these have hearty appetites and good digestion—when they arrive. After three or four months of study in New York it sometimes happens that their digestion is not so good, writes a correspondent of Pittsburgh Dispatch.

At one time students thought $5 a week quite a liberal sum to spend for room and board. $4 being offered the allowance. There are now plenty of young women students who spend $6 a week, exclusive of laundry and car fare. Some are responsible for the rise in room and board. $4 being offered the allowance. wreck and with them land of on a desert island, hundreds of miles distant from the nearest point of possible rescue, combined with the civilized world. The shipwrecked mariners were far out of the ordinary course of vessels and it seemed probable that only a bare chance could save them from ultimate starvation.

After a weeks stay on the bare reef Lieutenant Commander Sicard asked for five volunteers to man a small boat and undertake a perilous voyage of 1,500 miles over a trackless ocean to Honolulu. Nearly every man in the ship's company volunteered to attempt a journey of which there seemed but one chance in a hundred of successful accomplishment. The commanding officer chose Lieutenant Talbot to command the forlorn hope, and chose for secrecy under him Coxswain William Halford, James Peter Francis, James Mullen and John Andrews. One of the ship's boats was partly decked over with material from the wreck of the Saginaw. A small mast was stepped and provisions and a compass were put on board. Then the expedition started while the wrecked crew cheered from the coral reef.

The frail bark kept on its way day and night for a week, officer and men taking turn and turn about at the oars. The wind was with them and they, the sail helped wonderfully. At other times the wind was against them and they could not but creep along, working laboriously at the oars.

Storms at sea overtook them, and for two days and two nights they expected to be overwhelmed by the waves. Yet not one of the brave company, and rains two toiled at the oars to keep the craft's head up to the storm, the waves, the rain, a respite came, and by lot one man was selected to watch for an hour, while the others slept. Then another day for rest to recover from the effects of the exertion of the struggle with the elements. A large part of the provisions had been almost ruined by sea water and the supply of fresh water ran short. The food was salted and nauseous and created a burning thirst which the men did not dare to gratify, lest because of the shortness of the water supply. Strength was rapidly leaving them, and yet it was necessary to toil at the oars. Lieutenant Talbot was ill almost unto death, yet he kept a cheerful face and encouraged his men to renewed efforts. He worked with a will born of spirit rather than of strength.

One day, after a computation, Lieutenant Talbot came to the conclusion that he had made an instrument they had gone out of their course. The information came like a deathblow on the men. It was disheartening to be lost, but to change the vessel's head and go on once more. More days passed by and the exhaustion of two of the men was so great that they could not sit in their places at the oars. Their condition of all was desperate. Their food was all spoiled, little food they had.

Toward evening of that dreadful day land was sighted. Lieutenant Talbot and Coxswain Halford managed to make some headway with the oars, at the offering breeze helped. At daylight the next morning the shore lay before them but a little distant, a lower line of breakers intervening. Beyond the white wall of surf they saw men on the beach.

At that moment of supreme joy their boat struck a rock and in a moment was overturned. All the occupants of the boat were now compelled to struggle and all save one was drowned when the lieutenant was swept almost under their feet. Coxswain Halford managed to struggle for a few minutes with the waves, then he was caught by a breaker and thrown on to the sandy shore. He was resuscitated with difficulty, and then to rest and a half hours. Meanwhile the Hawaiian islands and that he was the only survivor of the wreck. He told his story, and within 24 hours two steamers were dispatched from Honolulu to the rescue of Lieutenant Commander Sicard and his men, who were found well and hearty, though living on somewhat short rations.

On the sands and reefs of Samoa 27 years ago occurred the wreck of the American warships Vandalia and Nipsic. Forty-seven American officers and men there lost their lives. The story of the loss of these vessels and lives has in it the recital of a showing of undaunted courage and of a struggle against the elements with the civilized world. The shipwrecked mariners were far out of the ordinary course of vessels and it seemed probable that only a bare chance could save them from ultimate starvation.

After a weeks stay on the bare reef Lieutenant Commander Sicard asked for five volunteers to man a small boat and undertake a perilous voyage of 1,500 miles over a trackless ocean to Honolulu. HANDICRAFT FOR BOYS AND GIRLS

By
A. NEELY HALL and DOROTHY PERKINS

(Copyright, by A. Neely Hall.)

A PEDALMOBILE.

Fig. 1 is about the most satisfactory pedalmobile that a boy can make.

The front axle of the pedalmobile is straight (A, Fig. 2); the rear axle has two drops in it (B, Fig. 3). Fig. 4 shows a large detail of the rear axle. You will probably have to secure help at a plumbing shop or machine shop in preparing this. If you have the axle that belongs to the rear wheels, the best portion of axle it should be made of a length of gas pipe just large enough to admit the threaded ends of the wheel axle. These ends should then be cut off and riveted in the gas pipe ends as indicated in Fig. 4. If you haven't been able to get this axle for the rear wheels, it will be cheapest to have the new one bent out of a piece of round iron, to the shape shown in Fig. 4, and then threaded on its ends for the axle nuts. The dimensions in Fig. 4 allow a space between the wheels of 22 inches.

Fig. 5 shows the framework of the pedalmobile. Make crosspieces C and D out of a 2 by 4 of the length of the dimensioned portion of the rear axle in (Fig. 4); and cut horizontal pieces E from a 2 by 4, and pieces F and G from a 2 by 2, each to fit

pile of books. Make yourself a regular press, or ask brother or father to make one for you. Figs. 3 and 4 show a practical press easy to construct, and Fig. 5 a working diagram. Make base board A 12 inches wide and 15 inches long, and nail on the three cross strips B to the under side, one at each end and one in the center; and make the upper board C 11 inches square. Cut the hinge blocks D 6 inches long, three-fourths inch thick, and one and one-fourth inches wide, and bore a screw hole through each one-half inch from each end. By means of these blocks, hinge board C to A, better careful to locate all four blocks in exactly the same relative positions on the two boards. Narrow strips of stems will help hold these edges.

The name, place of finding, and other data, may be written or printed in the corner of each sheet, as indicated in Fig. 2. Often leafer take the time to write a little story, in the same way that letter-file indexes are put on, on the back of the envelope or the back of the sheet.

Josh's Abilities.

"How is your boy Josh getting along with his books?" "First rate," replied Farmer Corntassel. "His teacher tells me he's lazy." "Knows more than you do, I bet." "I won't say that, but he kin tell me a lot of things I already know in language I can't understand."

Removing Marks.

To remove marks on the table caused by hot dishes spread a thin paste made of salad oil and salt on the spots, leave for an hour or so, and rub off with a soft cloth.

long. Spike pieces E, F and G to crossplaces C and D.

Make a tongue, H, to an axle block H (Figs. 2 and 6), and pivot the block H to the upper board with a carriage bolt (I, Fig. 5) long enough to extend through a hole bored through pieces E, C and D (Figs. 3, 5 and 6). Block H must be deep enough so when the wheels are mounted they can turn entirely under the wagon bed. Notch the under edge, as in Figs. 2 and 5, to provide for the bolt head. Spike blocks J, K and L to pieces E, F and G (Figs. 2 and 5),

GOOD THAT COMES OF WORK

Occupation Healthful to a Remarkable Degree if It Is Used in the Right Way.

Work is simply a means of making a living. It is that, of course, or ought to be. But it has other attributes that are quite as valuable, and maybe, in the ways of the spirit, more so.

The work you do is an equivalent to the world, for it gives you food, clothing, shelter, amusement, the material of this outer life. That's the debit side of work.

But work has other sides, and the creative part of work is its effect on the worker. If you are doing a getting mental training, intellectual development, and interesting occupation from your work, you are beginning to get out of it what it is really intended to give.

If you use your work to help build your character you are using it the right way.

Even in such minor things as punctuality, neatness, diligence, ease of intercourse with others, temper control, and good manners, work offers big training. And there are greater things than that in which it should teach and help you.

You will usually find that the man or woman who works is more sympathetic to the troubles of others than he or she who does nothing. The girl who works finds time to help her sisters, finds money to give to charity, finds the right word to say when the word is needed.

Honor and honesty are taught by work. The business woman is not apt to lease and wheedle for what she wants, she is not likely to cheat in small or big matters, she is not given to lying. It doesn't pay to work for one thing. And unconsciously this tends to character building.

Kitten Saves Girl's Life.

Out in California a kitten saved a little twelve-year-old girl from probable death. The girl and the kitten went for a walk. After a short time the kitten returned alone and kept walking up and down in front of the mother's sewing machine. It was trying to attract the attention of the mother, and every time it thought it succeeded it would walk off and, not seeing the mother follow, would return and try all the harder.

Finally the mother noticed the performance and decided to follow the little creature the next time it repeated the affair, as she thought it strange it should act so.

The kitten led the way to the end of a recreation pier, where the child was found hanging head downward from a large spike in a pile. She had fallen from the pier and her clothing had caught on the spike.

Her mother immediately reached her, but she was barely conscious. Had she remained in that position five minutes longer she would have been dead.—Our Dumb Animals.

Cousins and Economy.

"Should cousins marry?" was the object of an animated discussion at a ladies' debating club the other night. Some of the young women spokesmen had vigorously taken the negative side, a prepossessing young lady, who was known to back rounds of cousins her self, spoke up boldly in the affirmative, and there fresh life into the discussion by declaring that she always did her best to encourage her own cousins to marry one another, as such unions were far more economical than the ordinary kind.

"Economical! How, dear?" her chiminatic cried, in chorus.

"Well, you see," said the speaker, demurely, "one wedding present does for both then."

Then One Might Complain.

"You better stop yo' growlin' when you ain't got nuthin' tail for growl 'bout. Dos a'poso dat you was rich, an' had ter pay de income tax; or dat you couldn't sleep in no night cause fer thinkin' dat a yourthunke mought walk de hass wid all yo' money in it!—Uncle Williams in Atlanta Constitution.

Seems to Look Something.

"De man who claims dat money is his best friend," said Uncle Bob, "never looks like he has found very entertaining company."

MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage made by Hattie Bush to Lewis W. Hayward, dated the 19th day of September, A. D. 1912, and recorded in the Register's office of Charlevoix County, Michigan, on the 20th day of September, A. D. 1912, in Liber 70 of Mortgages, on page 49, on which mortgage there is claimed to be due at the date of this notice the principal sum of Three Hundred Ninety and 00-100 Dollars, and an attorney's fee of Twenty-five Dollars, and no proceedings have been instituted to recover the moneys secured by said mortgage or any part thereof;

NOTICE IS HEREBY GIVEN, that by virtue of the power of sale contained in said mortgage and pursuant to the statute in such case made and provided, on Saturday the first day of April, A. D. 1916, at one o'clock in the afternoon of said day, at the south door of the Court House in the City of Charlevoix, that being the place where the Circuit Court for the county of Charlevoix is held, will sell at public auction to the highest bidder the premises described in said mortgage, or so much thereof as may be necessary to pay the amount so aforesaid due on said mortgage, with six per cent interest and the legal costs and charges, with said attorney's fee, and the premises covered by said mortgage are described as follows: All that piece or parcel of land situate in the Township of Charlevoix, County of Charlevoix, State of Michigan, and described as follows: Lot Ten (10) in the Waters of Lake Michigan Subdivision of Section Two (2) in the Township of Charlevoix, County of Charlevoix, State of Michigan, according to the plat thereof as laid down by the waters of Lake Michigan, excepting along the waters of Lake Michigan a strip of land Twenty (20) feet in width, and the Lots Eleven (11) and 12, Block Twenty (20) in the Village of Charlevoix

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by RAY WALTERS

COPYRIGHT BY DODD MEAD AND COMPANY

SYNOPSIS.

Miles of Dallas lumber camp directs a stranger to the camp, Major Sandry Hawthorne himself, to John Dally, foreman, as the Dillingworth Lumber Co., or most of it, he makes acquaintance with Miss Ordway, who has come from the East to spend a month and prove successful. He writes to his father that he intends to get a large tract of timber land for himself. Sandry is expected to visit Black Bolt, the saddle horse, in a competition of his groves to the foreman that he does not like indigenous Billy Dally, and Miss Ordway. Mr. Hawthorne's son, Hampden, comes to Dally's to get material for a wager that he can bring from Hampden of the Yellow Pines a bride within a month. Sandry and Miss Ordway ride to Dally's and Sandry thinks he has bought as the East Boy Hampden, who is a tender-foot. Black Bolt and warns trespassers off. Sandry and Miss Ordway ride on and find Black Bolt, Sandry opposes Black and Poppy. Hampden, who has followed, is thrown and disgusted. Black Bolt "treed" Sandry in a pine and Hampden in the dog-house. Sandry and Miss Ordway ride to the camp and decides to get out his contract first and fight for the timber afterward.

CHAPTER XII.

Glimmerings of the Great Game.

The work went forward swiftly along the new line. By the end of the week the new cutting was in full swing, the long saws singing, the hookers breaking and binding the overtaxing green, the white inclined mass of drift working together.

"What do you think of our chances now, John?" asked the owner.

"Ah, Major, I don't know why we won't win. Th' Dillingworth," said John Dally, straightening his back and furnishin th' goods ever sense I can remember."

"True. But she was in pretty close straits for cash. You know she's worth, standing timber, land, options and equipment, something like a million a hundred and fifty-odd thousand dollars, at the pitch now I paid of fifty cents a thousand feet on the stump. At anything like her face value she'd easily double it. And of course you know she's mortgaged to her neck—the East Belt and all the northeast stumpage."

Dally stared his head. "I'm gettin' somewhat mussed up," he said.

"Well, you know. Her mortgage aggregated a half million—in three different places. About half of them I paid. The rest is hanging fire. Frazer, who should have been a mighty rich man, got out with a quarter of a million flat. I don't understand him."

"Neither do I, but I'd stake my head on old man Frazer. Why I've worked for him ten years! He bought in in eighty-nine."

"Well, there's a lot of mystery somewhere about, and as soon as I'm at liberty I intend unearthing things."

Miss Ordway was working feverishly these days. Her rose-leaf cheeks were burned, each nose-tip was the same from the little south room, and her sea-blue eyes were full of an inner excitement.

"She'll make good," Sandry told himself. "She's got the dreamer look, the pride, the joy, the mighty, arrogant egotism. And she's drink on the air, sunshine of the wilderness, the lone lness, the scent of world's end."

Young and of abundant health, abundant vitality, filled with the urge of ambition, abetted by an unusual clear stress, Miss Ordway was indeed in the way of great things and she knew it. Also with her clear vision she was beginning to see something else that added to the fresh bloom on her cheeks, something as great as her goal of fame, and she faced it with her high courage and confidence.

This was the meaning to her of Walter Sandry.

About this time she began to wider her range of vision, to look over the wild, green country, it seemed to her, and to catch glimmerings of things that sent her to Sandry, so full of vital presence that she was as a charged wire in her eagerness and her design.

"Mr. Sandry," she said one evening as they stood together on the footing and watched the brown tidewater go long down toward the distant sea, "I'm going to tell you something. I believe Hampden is crooked as bades, and I'm going after him."

"That's funny," said Sandry. "So you know I've had the same notion?"

She stretched out her hand.

"Let's go after him together. What do you say?"

"We-ell," Sandry took the hand, an exquisite thing, and held it in his own a moment, warmly, closely—"I am pleased and flattered by your offer, but I don't just fancy knocking this Hampden man. He's—he's coarse and bad. Miss Ordway."

"But isn't it worth a little risk? What big thing is ever accomplished without some risk? And think, Mr. Sandry—isn't Hampden trying to ruin the Dillingworth Company? In other words, to ruin you?"

There was a tingling, suggestive timbre in her voice, a subtle, flattering tone that thrilled the young owner strangely.

"Miss Ordway," he said admiringly, "as a man's friend you're simply great!"

"I may have to make frequent demands on Black Bolt," she said further; "for I cannot navigate in your delapod railway. I'm a poor marine."

"Sakes!" warned Sandry, "you don't want to speak about this offmain line to me. Why, haven't you noticed that the Oregon mist doesn't wet through?"

"Why laughed together after the fashion of youth and health, though at the last turn of words to felt a vague uneasiness. He remembered Billets' dark face between her braids and the tears falling on her cheeks.

"Poor little girl!" he said to himself. And on Thursday of that week he came into Toledo, where, she was a matter of wonder in her beauty and her smart clothes, to take the head center on the ranger bay but what Hampden met her—by the merest chance. She was a revelation to him. In his crude way he was soon at the point where he would have laid down his world for her little finger, and in the loose-fibered soul he swelled with self-approval beneath her notice.

What delicate flattery it was, only she herself knew. It was sufficient at least, for he unwound to her his somewhat resentful and picturesque life with the simplicity of a child. He made and talked, traversing the lonely ways, piercing the mist, threading trails where Hampden had ridden close at her side to keep the wet fog age out of her face, and she saw the passion growing in him to the point of idolatry—which filled her soul with triumphant joy.

She was leaning very near as she whispered this, and in the burst of mental light which followed her words Sandry put his hands on her shoulders.

"You are positively wonderful!" he breathed. "The most wonderful woman in the whole world. How on earth did you find these things out?"

"Hampden," said Poppy with a shrug of her shoulders under Sandry's hands; "he's furnishing data with a vengeance."

"But why? For the love of heaven, why are you doing all this? I can't just understand."

With a little soft motion, charming in the airy acceptance of its own daring, the woman of the world put up her hand and laid it with a caress over the one on her shoulder.

Her face, tilted upward in the darkness, shone like a flower and he could just barely see the curving lips, pale, dark against its light.

In the mist and the chill the subtle perfume that always seemed to strike one's senses only after she had passed, suddenly thickened and hung heavily on the instant lights and flowers, gay gowns and swoning dress of men—the thousand intimate things and accounts of home—flashed before him.

Under the touch of her velvet palm his own grip tightened and Poppy Ordway quick to feel her first real entrance into his inner consciousness, pushed the sudden attempt.

"Why?" she said softly, "why? Forrow. Do you think I, who am trained in investigation, who have dealt with a little catch of voice and breath—who have to dig into every promising situation because of my—work—could sit by and see the man I love walk into plunging into the breach? Indeed no. And we'll win, my—friend—we'll win."

With an indescribable sense of danger and hesitant, she lifted his hand from her shoulder, holding it as if unconsciously, across her cheek, held it a moment and turned away toward the camp.

CHAPTER XIII.

The Red Bar on the Waters.

A day later Miss Ordway packed an expensive bag of real alligator and made ready for a journey.

"I'm going to Salem, partner," she said. "If Hampden gets anxious enough to inquire openly, tell him I'm in—Portland."

She smiled to herself, thinking of those millions of trees. For its own sake, for all the holdings of the Dillingworth? How he got them?

"Why, no," said Sandry wonderingly. "I suppose he bought them, as any company would do."

"You do me far so good. You know that all this land was government land—that there are still claims living the back in the mountains open to filing. Not all this fine timber claim is—if that has a chance of being got at—has been taken—and have you noticed that all of it, or nearly all, belongs to either one or the other of these two great lumber companies?"

"By George!" said Sandry, "I hadn't thought of that!"

"And have you noticed that none of these claims seem to have been taken by good faith? That none of the lines have complied in spirit with the homestead law? I have secured these hills for Hampden—and the subtle implication pushed the advantage.

His face was flushed and he sat straight on his horse, his khaki-and-blue-flannel shirt figure making a not ungraceful picture against the background of vivid green. He whipped at his laced boots, went from the farm, and presently spoke out of a full heart. "You" he said caressingly, "it does take brains. A man has got to think to make money—as it takes money to buy the things of this life—pretty clothes, a woman's clothes, Miss Ordway."

He suddenly leaned over and laid his rough hand over hers on the pommel.

"Keep tree would buy a dozen trunks full—as! I own millions of trees."

Her heart was pounding and the sparkle was dancing in her eyes.

"Millions! Why, that means over a great deal of land! Millions of trees?"

"Yes—billions," promised Hampden rashly. He rose in his saddle and looked through a natural opening in the forest down over the dropping ridges.

"Why, look! All that—all that, as far as you can see, to that other ridge and over beyond it and down into the other valley—is mine. I'm a rich man, Miss Ordway, so I get lost by this—"

He tapped his forehead significantly and smiled.

"Truly I do admire you," lied Poppy with the naivete of sixteen. "Brains—brains—why, there are nine-tenths of the battle of success and a man with no brains never gets at the beginning."

"Partner," she whispered to Sandry as she passed him that night in the eating room. "I've been working. Poppy can we talk a little by ourselves?"

Sandry, looking at her swiftly, saw the excitement in her eyes, and rose fire instantly.

"Alone? Why—let's see. Are you afraid to come out to the forked stick by the road?"

In the darkness Miss Ordway laughed—a little, low ripple of mirth, soft and sudden.

"A trust!" she said, in that small intimate whisper that suggested tell mystery. "Are we out of earshot here?"

"Yes," said Sandry, lowering his voice to here.

"Do you happen to know where I've got all the holdings of the Dillingworth? How he got them?"

"Why, no," said Sandry wonderingly. "I suppose he bought them, as any company would do."

"You do me far so good. You know that all this land was government land—that there are still claims living the back in the mountains open to filing. Not all this fine timber claim is—if that has a chance of being got at—has been taken—and have you noticed that all of, or nearly all, belongs to either one or the other of these two great lumber companies?"

"The Man Who Built This Didn't Intend to Stay."

for seven miles every way—except for a strip of land, a very little more, barest hold of tenure—a windowless shack—just enough to call the law by its front door. Nowhere have it even cleared field, nor one sign of tillage. Mr. Sandry, I believe we have stumbled upon a huge government swindle, a case of land-fraud gigantic in its proportions."

Sandry was aghast. "Why, what do you mean? Miss Ordway, do you mean that the companies are crooked?"

"Not so fast. I believe Hampden is crooked, and that possibly Frazer was. For the latter—it is too late—and not in our scheme to nail him. But Hampden we'll hang high as Haman—and that before he can fling the least Belt with its store of wealth."

She was leaning very near as she whispered this, and in the burst of mental light which followed her words Sandry put his hands on her shoulders.

"You are positively wonderful!" he breathed. "The most wonderful woman in the whole world. How on earth did you find these things out?"

"Hampden," said Poppy with a shrug of her shoulders under Sandry's hands; "he's furnishing data with a vengeance."

"But why? For the love of heaven, why are you doing all this? I can't just understand."

With a little soft motion, charming in the airy acceptance of its own daring, the woman of the world put up her hand and laid it with a caress over the one on her shoulder.

Her face, tilted upward in the darkness, shone like a flower and he could just barely see the curving lips, pale, dark against its light.

BIG DUST CLOUD IN ALASKA

Volcanic Ashes From Katmai Delayed Progress of Government Expedition.

Meard After.

As we approach Kodiak, strange dark clouds were seen obscuring the horizon at several points and one so heavy and black that it resembled smoke from a great forest fire. Captain Jensen started us by explaining that this was but lately been by the stiff breeze from the lofty hills all about us. These hills seemed covered with snow, but the whitish deposits proved to be ashes, rained down several feet deep upon all this section during the eruption of Mount Katmai in June, 1912. Katmai is still smoking.

The sun looked like a dull silver dollar as it shone through the ashy mist. The dust cloud was so thick that it held our steamer up for four hours until the ship was clear. Passing your hand over the rail of the boat you found your fingers strewed with the impalpable gray powder. When we landed at Kodiak we found piles of soft gray ashes and large and small pieces of light, friable stone, like pumice stone, which had been thrown out by the eruption.

United States Marshal F. H. Breuerman of Valdez, who was a fellow passenger with me, says the explosion of the volcano was heard at that place, 150 miles away from Kodiak, and sounded like a cannonading. It was followed by a deposit of fine ashes in Valdez.—John A. Sleicher in Leslie's Weekly.

Dear With Glass Eye.

Abelardo Cooper of Salinas, Cal., while hunting in the fastness of the San Lucia range, killed a four-point buck that had a green glass eye in one of its sockets.

Besides, the ears had been swallow tailed, a common practice in marking the ears of cattle, and its tail had been cut off in some manner so that only a stub an inch long stuck out.

It is thought possibly the deer was a pet of one of the ranches down in the Salinas valley, and when the "running" season started the deer answered the call of its mates and started for the wilds.

Stars and Bars.

"Stars and Bars" was the name of the flag recommended by the committee for the Confederate States. The official description from the report of the provisional congress, March 4, 1861, is as follows: "That the flag of the Confederate States of America shall consist of a red field with a white space extending horizontally through the center, and equal in width to one-third the width of the flag, the red spaces above and below to be of the same width as the white. The union shall consist of blue ground, the white space and stopping at the lower red space. In the center of the union a circle of white stars corresponding in number with the number of states in the Confederacy. The flags to be plain like the Stars and Stripes, with three bars or stripes instead of the 13 stripes, red on top and bottom and white in the middle. The union of blue has a circle of seven five-pointed white stars.

HUNT HELPS MAKE SOLDIERS

Preparedness for Military Emergency is Undoubtedly Aided by Outdoor Sport.

While not every one of the three million registered citizens who secured hunters' licenses last year could qualify as a sharpshooter, Dr. Nathan Kellogg, president of the state game commission, is not wholly imaginative in suggesting that the increase of the game preserves and in the encouragement of the sport the state is contributing to its preparedness for military emergency, says the Philadelphia Bulletin.

An essential of a soldier's equipment is to know how to shoot, and training for marksmanship in the pursuit of bird or rabbit is preliminary of value. But even more essential is the soldier's health, the ruggedness of constitution and physical condition to stand the stress of march and work, and outdoor training is the sine qua non. Anything that the state does to get its young men out of doors and to interest them in health-building, muscle-strengthening, nerve-resting sport, goes far in preparing citizens for service, and the physical condition there is added the practical training in the handling of gun and rifle.

All Lessons of Life.

The sense of relief and of trouble and sorrow should only teach us the lesson of a wider sympathy and love. We should never allow ourselves to be overcome by pain but should feel that only intensifies them. Let us shut them out of our minds as much as possible.

By letting no day pass without doing some kindness or only a word of cheer we may forow off than we are, the trouble, which at first seemed so great, will gradually sink to Lilliputian dimensions. By thinking sunny thoughts and shutting out the hurtful ets of vine maple, to war with the high song of the dominant piano.

"Hey!" said Billets at last, softly, "hear it! Hear it! Hear it singing with a thousand tongues! Ho!—Ho!"

Sandry looked swiftly back, an old excitement taking him at the note in her voice—an alien note, beyond the experience of this life. He paused up and was sitting erect, her head up, her lips parted, her eyes fixed on the gleaming to glow with a hidden fire. He knew that somewhere in the recesses of her nature a great tide of emotion was banking in full flow.

They did not strike Yaquina bay, for the trail led straight west from Dallyn and he saw how they would come on the great cliffs below the lighthouse at Cape Foulweather. Here the land reared itself in a great wall against the sea, palisaded against the inland mass behind it, the trail mounted the lifting rise of the cliffs, and stood at the edge of a thin fringe of crested trees, where Sandry tied the horses. Billets had stepped down at once, and he noticed that she was trembling in every limb.

She pushed ahead strongly and hasty followed, his eyes on her face lest he lose one expression, one small scene of the stirring of this lovely soul. Without warning, it burst upon her around a hummock—the great, heaving ocean under a dull sky—and it was gray as her own mist indeed, the long combers ever and forever moving in its place, fringed with the rolling surf that broke white upon its sands a hundred feet below.

"Hey!" she cried shrilly, "I knew it! A floor under the feet of God!"

To the left a steep path, cut by steps in the sandy earth, led in perilous way down to the beach.

Twenty men dropped into it between its walls and began leaping down.

"Hey!" cried Sandry sharply, "be careful!"

(TO BE CONTINUED.)

Sandry Sat Down for the First Time With the Girl at the Table.

before the subtle fineness of the thought, sensed to find it in this simple child of the logging country.

"And why now? he asked curiously. "Why do you go now?"

"You go," said Billets as simply as Rokanda would speak in his government claim at the reservation in the north.

"You're a great dreamer, Cloth," said Sandry.

She nodded.

The horses having taken their recalled rest, stared forward of their own will after the manner of hill-bred horses, and silence prevailed, save for the swish and slip of the iron-shod hoofs. It took an hour to reach the foot of the range.

Billets had fallen adreaming, away from consciousness of her surroundings. Black Bolt, one hand swinging onward as encouragement to the dog whose anxious eyes were raised from time to time toward it.

Her traveled steadily, and presently the long roll of the surf began to sound insidiously through the thickets of vine maple, to war with the high song of the dominant piano.

"Hey!" said Billets at last, softly, "hear it! Hear it! Hear it singing with a thousand tongues! Ho!—Ho!"

Sandry looked swiftly back, an old excitement taking him at the note in her voice—an alien note, beyond the experience of this life. He paused up and was sitting erect, her head up, her lips parted, her eyes fixed on the gleaming to glow with a hidden fire. He knew that somewhere in the recesses of her nature a great tide of emotion was banking in full flow.

They did not strike Yaquina bay, for the trail led straight west from Dallyn and he saw how they would come on the great cliffs below the lighthouse at Cape Foulweather. Here the land reared itself in a great wall against the sea, palisaded against the inland mass behind it, the trail mounted the lifting rise of the cliffs, and stood at the edge of a thin fringe of crested trees, where Sandry tied the horses. Billets had stepped down at once, and he noticed that she was trembling in every limb.

She pushed ahead strongly and hasty followed, his eyes on her face lest he lose one expression, one small scene of the stirring of this lovely soul. Without warning, it burst upon her around a hummock—the great, heaving ocean under a dull sky—and it was gray as her own mist indeed, the long combers ever and forever moving in its place, fringed with the rolling surf that broke white upon its sands a hundred feet below.

"Hey!" she cried shrilly, "I knew it! A floor under the feet of God!"

To the left a steep path, cut by steps in the sandy earth, led in perilous way down to the beach.

Twenty men dropped into it between its walls and began leaping down.

"Hey!" cried Sandry sharply, "be careful!"

(TO BE CONTINUED.)

The Gift of God

By REV. W. W. KETCHUM
Teacher of Bible, Moody Bible Institute of Chicago

TEXT—The gift of God is eternal life through Jesus Christ our Lord—Romans 6:23.

A gift is something for which we do not work. It is something that is not naturally our own. It is something that a someone gratuitous gives us because he or she is interested in us. This text in the N. T. speaks of this gift as the free gift of God. Now there are many things we expect to pay our way into heaven by, such as baptism, church membership, good works, etc., but the gift of God is eternal life. Eternal life—what is it? It is the opposite of eternal death. Not eternal death does not mean nonexistence any more than eternal life means existence. God's word teaches that the soul never dies, in the sense of going out of existence. It does say that "The soul that sinneth, it shall die," but we must interpret the word of the Bible by the Bible. The Bible, you know, is not only a book but it is also the truth, but it defines the truth that it gives, and when it talks about eternal death it does not mean the annihilation of the soul. It is a death that whatever exists always exists, as the scientists tell us, and the Bible says that the human soul lives forever. Well, what is eternal life then, and what is eternal death? Perhaps we might say that eternal life means being born of God, having the life of God. It is not our natural life acquired into endless duration. It is the divine life imparted to us, the very life of God himself communicated to a human soul. To put it in another way, we might say that eternal life is risk' existence, while eternal death is wrong existence, or, to put it in still another way, eternal life is living in the presence of God, while eternal death is having the wrath of God abiding on one.

Now, God's gift is eternal life. Our text says that he offers us this life through Jesus Christ our Lord, that is, Christ is the mediator through whom eternal life comes. What a wonderful thing it is to know that God has planned to give the human race, dead in trespasses and in sins, eternal life through his son. What is involved in that truth? A great deal, my friends.

First of all that on the cross Christ died for our sins.

Secondly, that there upon the cross God laid upon Christ all our sins.

Thirdly, that all our sins will be forgiven us on condition of our simple acceptance by faith of the Christ, the one who thus receives his Son, we are told, has the Son of God, not of the will of the flesh, nor of the will of man, but of God. I have met many people who are striving to get eternal life. I have even met Christians who have spoken to me about their hope of being saved, not through faith, but by works of righteousness which they do.

I shall never forget preaching in a little church in the Catskills, and talking about the way of salvation, when a man came to me and exclaimed, "Why, I said about the simple way of having eternal life through the acceptance by faith of Jesus Christ as one's Savior. Another brother, who was with me then, I shall never forget, which was very troublous just then, told about two of his friends who were drifting down a stream. One of the theologians was arguing very learnedly and skillfully the other that salvation was by faith, when the oarsman, listening to the argument, turned to the man with one oar, and the boat went round and round when they said, "What are you doing?" and he replied, "Don't you see, that my boat will not go unless I pull it?" Well, I can't get anywhere," and then he took the other oar and pulled with all his strength and round found in the other direction, and he said, "Now, you see, I can't get anywhere. I row along with that we do not get across the stream. To reach the other shore we must row with both oars." That was a good story, but a poor illustration, for, while it sounds very plausible, the trouble is it is not scriptural. The Bible tells us that it is not "by works of righteousness that we have done, but according to his mercy he saved us." Change the illustration and have it true to the Scriptures. Jesus Christ is the oarsman and is rowing the boat of salvation from earth to heaven, and if we would reach the other shore what we must do is to get into the boat by faith and be by him rowed across the river. Jesus is the ferry man. Jesus is the ferry man. He is the ferryman. Jesus is the ferry man. He is the ferryman. Jesus is the ferry man. He is the ferryman

THEY FAIRLY BEAM WITH STYLE---

The new Sunshine coats and suits for spring are winsome, charming, different!

Every garment is authoritively correct in each smart detail.

You don't have to buy simply because you come to look, but we know the distinctive styles and really attractive values will appeal to you.

Come in while the assortment is complete.

SYSTEM

TITLE ABSTRACT DEPARTMENT--

Our methods of furnishing abstracts of title of Charlevoix County Real Estate, together with plats and sectional maps, should be of interest to every real estate owner.

REAL ESTATE & RENTAL DEPT--

The Efficiency of System in the handling of Real Estate and Rentals has long since proven itself. List your property with us.

ENGINEERING DEPARTMENT--

If you have a troublesome drainage problem, or boundary lines not established or in dispute, let us work it out for you.

Charlevoix Abstract & Engineering Co.

Cabbage and Strong Dish.

Cabbage is believed to be a cure for drunkenness. The Egyptians ate boiled cabbage before their other food if they intended to dispose of a large quantity of wine at dinner. In many of the wine growing districts of France the vineyard keepers will not plant cabbages near the grapes, believing that if they did so the grapes for wine-making would inevitably be much deteriorated.

Perspiration Stains.

Perspiration stains may be removed from white linens without any trouble if they are soaked before washing in cold water, to which a little carbonate of soda has been added.

Knots in Willow Plums.

There are more than 3,000 knots in an average willow plume.

Real Living.

Life is what we are alive to. It is not length but breath. To be alive only to appetite, pleasure, profit, money-making, and not to goodness, and kindness, purity and love, history, poetry, music, flowers, stars, God and eternal hopes, is to be all but dead.—Multible Baloeoca.

Motti Preventive.

Pour a little turpentine in the corners of your wardrobe, chiffonier or trunk if you wish to be rid of moths.

WANTED—To rent for season of 1916 Furnished Cottage with 5 or 6 bedrooms. 2 baths, furnace heat, on Michigan Ave. or some other desirable location. State all particulars and address, Mrs. LOUIS FLORSHEIM, Congress Hotel, Chicago, Ill. 3-30-p

LOCAL NEWS.

At the home of Mr. and Mrs. Harold Bedford, a daughter.

Carl Hines, who spent the winter in Flint, is home again.

Frank F. Geisen, of Pellston, was in the city over Sunday.

Mrs. Woods, of St. Louis, is here visiting her sister, Miss Carrie Miller.

Born, at Akron, Ohio, to Mr. and Mrs. Louis Bedwin, a daughter.

C. Danto & Son have two fine auto delivery vehicles out doing business.

Mr. Edward Ferguson, of Alma, is the guest of his sister, Mrs. E. G. Thitlotson.

Capt. G. C. Gelken, who has been seriously ill with pneumonia, is still in danger.

Master Raymond Faulkner arrived from Chicago Saturday to visit his grandparents.

C. H. Bennett, of Williamston, will be in Charlevoix Saturday April 15th with a carload of horses.

The council Monday night instructed the chief of police to warn all junk dealers against buying junk from boys.

Alex. Reinhart and wife left Tuesday for a month's visit with friends in Detroit and Carson City.

The Ladies' M. E. Aid Society will give their annual Easter supper at the church on Tuesday evening, April 18th. Plan to be there.

Capt. James Sanford leaves this week for Muskegon to fit out the steamer S. M. Stephenson. His first charter is for lumber, East Jordan to Erie.

Hugh Brady, who has been in Detroit the past winter, has returned here and will resume the fishing business with the "Red Devil" outfit.

Mrs. John Kelly, who spent the winter in Grand Haven, has arrived home. Mr. Kelly goes with Capt. Peter McCafferty as engineer of a Chicago tug.

Will Finucan arrived home from Chicago Monday. On the opening of navigation he goes to Cheboygan to have charge of the Booth Fisheries Co. interests for the season.

On Friday night, April 7th, at the Majestic Theatre, will appear on the screen, Marlyn Arbuckle in "It's No Laughing Matter." This is a picture that you all should see.

The re-decorating and re-carpeting of Odd Fellows' hall has been completed, together with other improvements, and the Three-Link boys have a society home of which they may justly feel a pride.

Mrs. Jane Grandy, widow of the late W. C. Grandy, of Hayes township, died at Petoskey Thursday. The funeral was from the Methodist church, this city, Sunday afternoon. Interment at Brookside.

Ralph D. Tompkins, the champion one-legged dancer of the world, assisted by Miss Marion Drew, novelty girl, will appear in vaudeville at the Charlevoix Theatre, April 6th and 7th.

Commissioner Hammond has resumed work on the unfinished Boyne City road. Wednesday morning the tractor with three wagon trailers loaded with coal went out to the camp.

The Charlevoix Rod and Gun Club having secured an appropriation of fifty thousand young brook trout, the goods arrived here Saturday in the State Fish Commission car, and were at once placed in Stover Creek.

Chicago special: William Finucan, manager A. Booth & Co., dreaming in home of Ray Faulkner, 621 Case street, that he was being held up. Awoke to find masked man in room. Robbers took watch, stickpin and $25 and told Finucan to go back to sleep.

Spring, with its flowing gutters, its dead cats, ash piles and dirty alleys, is here. Ice in Lake Michigan is still banging on, but is beginning to change color. Round Lake is practically clear and Pine Lake ice begins to look "groggy."

Marie Doro, the prominent star who has endowed the American stage with a distinctly new personality, is introduced to the motion picture public in an elaborate film version of her greatest stage success, "The Morals of Marcus," by William J. Locke, a Famous Player Film Company production, appearing on the Paramount Program at Majestic Theatre, Tuesday evening, April 11th.

A NECK OF A TIME IN CHARLEVOIX TOWNSHIP

On Monday in Charlevoix township the count when the polls were closed, 17 ballots were shown to be thrown out for irregularity, the legal ballots showing a safe majority for Geo. Durance. The ballot box was sealed and returned duly signed by the election board. Durance qualified at once.

Now it is charged that the following morning the seal was broken, the ballot box opened and Wm. Cook declared elected on a "recount."

It is up to the board of supervisors at the June session to decide the question.

School Commissioner's Column

May L. Stewart, Commissioner

We always leave the agent outside when we are too busy to admit him. He cannot enter now so will have to make a later engagement.

Seventh grade students may write on geography and physiology in the eighth grade examination May 11-12. If successful they will not need to repeat these subjects next year.

In advocating ventilating and lighting the commissioner has had no particular agent and no particular company in mind. All we want is improvement. It doesn't matter how we make it, or where we buy it.

Now is the time for school boards to hire their teachers for next year. If you have a good teacher who is capable in discipline and progressive, it will be cheaper for you to raise her wages than to experiment with a new teacher. If your teacher has made good it is only courtesy for you to issue an invitation at this time so that your teacher may frankly talk over next year's plans with you and know what to depend on for next year. If your school is difficult your teacher may express a desire for a smaller school for next year and you may look now for an experienced and strong teacher for the coming year. If your school has more than fifteen pupils enrolled, an experienced teacher should as a rule be hired. The commissioner wishes to be of all possible service to school boards in this work.

Arbor Day is coming. Several nurseries and normal schools are giving trees to school districts for the annual tree planting.

Drinking fountains are not a necessity to a "Standard School." They were required but they are very strongly recommended.

See notice of teachers' examination in another column of this paper.

The commissioner will be in Boyne City for office hours April 9-10-12 a. m. at the school house. Regular office hours outside of East Jordan will then be discontinued until the opening of the new school year. During the spring rush and summer months there are cases that can not be cared for by correspondence will be arranged for in an appointment agreeable to both parties.

The following circular letter was sent by the state department to all county boards of school examiners. Every county board of school examiners shall have the right to remove without cause the certificate of any persons who shall have previously attained an average standing of at least 75 percent in all studies covered in two or more previous examinations, and who shall have been since such last named examination continuously and successfully teaching in the public schools. "County normal certificates subject to one renewal are granted upon the completion of thirty-six weeks of normal training. A second renewal may be granted to holders of county normal certificates who have received four additional weeks (twelve weeks work in each subject) at a state normal or other approved school. This usually requires two six weeks' terms or one twelve weeks' term at a state normal or other school giving similar work. "To diplomas granted on final training and to encourage a more adequate preparation of teachers the department of Public Instruction recommends that candidates for renewals of county certificates shall file for each renewal four advanced credits (twelve weeks' work in each subject) from a state normal or other approved school. This usually requires two six weeks' terms or one twelve weeks' term at a state normal or other school giving similar work. "It is further recommended that for those whose certificates expire during the year 1917 two credits (twelve weeks' work in each subject) be substituted for the above requirement. This usually requires one six weeks' term at a state normal or other school giving similar work. These recommendations are made to take effect July 1, 1917.

Fred L. Keeler, Supt.

Your request for renewal? Former certificate sent in and institute fee for term of renewal?

Watch the Star school! Its getting there!

The agent man is knocking at the door for his later engagement. Would you grant an interview?

THE TOWNSHIP SUPERVISORS

In the several townships in this end of the county the following supervisors were elected Monday:

Charlevoix—Geo. Durance.
Eveline—McDonald.
Norwood—W. Totten.
Marion—Jay Adams.
Hayes—Frank Barnett.
St. James—Frank Soppe.
Peaine—John Green.

Unreasonable Baby.

Four-year-old Ora was trying to quiet the little new sister crying in the crib. After several unsuccessful attempts, which tended only to increase the crisis, she shook her finger in the tiny face and said reproachfully, "Why, baby, don't you know your own folks?"

EMREY'S

CLOTHERS AND FURNISHERS.

Norwood News

Ralph Stafford, who has been attending the Ferris Institute at Big Rapids, is home for the spring vacation.

Will Richardson, of Charlevoix, is visiting friends and relatives in Norwood.

Miss Faye Wagner spent the week-end with her aunt, Mrs. Frank Richardson.

Ted Pearl made a business trip to Charlevoix Friday.

Mrs. Reed Genett visited relatives in Dwight a few days last week.

Mr. and Mrs. Hull, of Inwood, are visiting Mrs. Hull's parents, Mr. and Mrs. Joe Holechek.

Mrs. Wm. F. Pearl who has been in Central Lake the past two months, returned to her home Friday.

Salaries in Ancient Days.

According to an account book of the Bonsall parish in Falmouth, Me., dating back to 1755, which is in the possession of Henry S. Thrasher of Portland, the minister received $31.33 for preaching seven Sundays. His salary for the year 1756 was $400, and the salary of widow Elwell, the same year, for taking care of the meeting house, was $6.66.

Birthday Present.

For birthdays the latest gift is a motor ribbon bracelet with the initials or even the whole name scrawled across it. Ten ribbon is tied in a neat little bow on the inside of the wrist and fixed with a tiny gold clasp.

PILLS BEST FOR LIVER

Because they contain the best liver medicines, no mixer how bitter, or nauseating for the sweet sugar coating hides the taste. Dr. King's New Life Pills contain ingredients that put the liver working, move the bowels freely. No gripe, no nausea, but digestion. Just try a bottle of Dr. King's New Life Pills and notice how much better you feel. 25c. at your druggist.

LIP READERS TO BE DREADED

Don't Tell Your Secret in Any Public Place, for a Very Good and Sufficient Reason.

"Don't tell your secrets on the street car or in the theater between acts or in any other public place, not even to your most trusted friend," said the man.

"I never do tell my secrets in public," she returned. "But why this advice?" asked the woman opposite.

"Because somebody is likely to see them."

"See them?"

"Yes. Don't you remember a newspaper story a few months ago to the effect that deaf mutes who attend moving pictures shows complained that the people on the screen did not follow the text of the play, but used coarse, vulgar and often indecent and profane language? These deaf-mutes had learned lip language and knew what those photographed players were saying.

"Well, since then, I hear the film companies have shut down on the bad language, but the story caught the attention of a good many readers and halftone movie patrons have taken to the way of watching the lip movements and some of them have developed astonishing skill in reading what is said by the silent actors. Of course, they can read the lips of all people just as well, hence my warning."

"Oh, I can't believe there are many such persons."

"Isn't take any chances. You'd probably be surprised to know how many people not deaf-mutes have that little accomplishment more or less developed. It seems with some to be a natural gift. I heard a woman tell the other day of a conversation she saw' between two friends sitting at the other end of a street car. Now you suppose those friends had been indulging in uncomplimentary remarks about her?"

"If isn't pleasant to think of," she said, "is there to be no privacy except inside of soundproof walls with no electrical connections? I read somewhere the other day that a man is working on a machine that will catch our thoughts examinine even when we don't speak. Isn't it awful! And yet if messages can be sent across the world by wireless, is such an invention impossible? You know, one of the objections I have to heaven is that we can't have our thoughts to ourselves up there."

"Well, let's be glad that we can have them to ourselves here for awhile—if we watch out," said the man.—Indianapolis News.

Show Knightly Descent.

According to a French scientist, birthmarks in families are now of good social position indicate that they are of knightly descent, the marks being due to the fact that their possessors ancestors wore armor.

FOR SALE—Resort cottages well located. House and lots in any part of the city, also 14 acres close to city. Apply to H. S. Harsha.

FOR SALE— at less than first cost, three 1½ Fiats late in Circuit Addition. Parties interested, apply to H. S. HARSHA.

Barnard Doings.

Mrs. Robert Matchett Jr. has returned from a two weeks visit with relatives in Grand Rapids.

Sim Baker has returned home having spent the winter in Pontiac with her daughter.

Barnard not only raises fine lambs, but poultry also. Mrs. W. N. Lewis has a small flock of pure blooded Barred Rocks of which she is justly proud. She has 54 hens that have layed since Jan. 17, 650 eggs. Sunday, April 2, received 36 eggs. Settings of the eggs may be had at 50c. Also three fine 1st year Cockerels for sale.

Mr. and Mrs. Edmund Shepston, Mr. and Mrs. Wm. Shepston and Mr. and Mrs. Will Burns attended a surprise party for Mrs. Geo. Anderson, of Charlevoix Friday evening. The surprise was planned in honor of Mrs. Anderson's birthday anniversary. A pot-luck supper was served and many pretty gifts, and lost wishes, for a happy return of the day, bestowed upon the honored one.

The Asbury Memorial Day was observed by the church and Sunday School April 2nd. A very pleasing and well arranged program was carried out by the various classes and members of the S. S. Such programs are of educational value to our young people and give added offerings according to enrollment of members.

Mr. and Mrs. Chas. Townsend delightfully entertained the Royal Oaks last Thursday evening. Although the roads were in a nearly impassable condition, there were a large number of the class present and several guests. Arrangements were made for a poverty social to be given April 14th in the church. A general discussion in regard to fixing the basement followed. Mrs. J. Block will entertain the class April 21 with a "Pig Party." A very pleasant and unexpected treat was the ice cream and cake served by the hostess, and those members not present are still "kicking themselves"—as we've been told.

How to Cure Colds.

Avoid Exposure and Drafts, Eat Right. Take Dr. King's New Discovery.

Your Cough and Cold begin to get better as soon as you take Dr. King's New Discovery. It is prepared from Pine Tar, healing balsams and mild laxatives. Dr. King's New Discovery kills and expels the cold germs, soothes the irritated throat and allays inflammation. It heals the mucous membrane. - Search as you will, you cannot find a better cough and cold remedy than Dr. King's New Discovery. In use over 45 years is a guarantee of satisfaction.

"From exposure I had a cough and cold combined that nearly put a finish to me. While looking for something to ease the tickling that bothered my throat and lungs, a friend advised "Dr. King's New Discovery." As I bought a bottle, the first dose helped and before the first bottle was used my cold was well."—G. E. Spears, Smithville, Ark. At all Druggists.

Northern Michigan

East Jordan Enterprise: Capt. H. L. Winters received the following "Bouquet for our Company I, in a letter from Capt. W. H. Martin, of Co. F, 33rd Mich., of Saginaw. He writes, "Allow me at this time to congratulate you on the magnificent showing made at the recent inspection. There was considerable hesitancy on the part of the Military Board to accept this company on account of its location in so small a community, but I am sure you have dispelled any doubts on that score."

Boyne City Journal: Mrs. Anna T. Myers, of Boyne Fall passed away Friday night at the home of her sister, Mrs. LaClair, between this city and Boyne Falls. Deceased was sixty years of age and had suffered with paralysis. Funeral services were conducted from the home by Rev. Gleason today. Interment being made in Boyne Falls cemetery. Mrs. Myers came from Van Buren county in 1878 and resided for many years near Deer Lake. She was wedded to Frank Myers who passed away nineteen years ago.

Boyne City Journal: At a meeting of the common council Monday night the office of city assessor was filled by appointment of the mayor and endorsement of the councilmen. E. A. Robinson, city surveyor, was appointed to the position, succeeding Geo. W. Bailey. Mr. Bailey has held the office for years, being reappointed without opposition. He is an old soldier and one of the most popular old residents of the city. It is felt that the city would be benefited by the services of a younger and more active man in the office. The council men acted against their personal feelings in the matter for not one among them but has the highest esteem for Mr. Bailey and familiarly call him "Uncle George."

Boyne City, for the time being, is forgetting all about preparedness, gun and armor plate and are viewing the munitions factories to the Mississippi Valley. There is now a much greater issue occupying the minds of the Boyne City patriots, in fact it is a paramount issue—one of the kind that sounds so well during a political campaign. It is after a $75,000 postoffice, or a $40,000 one or a $30,000 one, if they can't get a fat slice from the pork barrel they are perfectly willing to take a little of the lean meat. Boyne City has 5,218 population, including the northwestern high school foot ball team, and the postal receipts for last year were $12,000. The franked speeches of the congressman of course added nothing to the receipts, but the dear voters have hopes and faith that their representative can get enough votes to put through his bill for a postoffice. Under the schedule adopted by the U. S. Treasury department, a town of 5,000 should not pay for anything more than a 50,000 building, and Boyne City at the outside should not set its pettitions at anything more than a $40,000 building. The latter figure, the Boyne City people say, would put up an edifice of which they would "be justly proud" and they are proud that within four years they may be able to mail their picture postcards from a nifty structure which did not cost anybody anything, because Uncle Sam paid for it.

Equal Suffrage Notes

JENNIE M. HINES

Kansas Republicans at their state convention in Topeka, March 21, endorsed national woman suffrage. They passed a strong resolution recording the beneficial results of equal suffrage in Kansas. An ounce of practice is worth a pound of theory.

Julia Ward Howe said in one of her earnest appeals to the Massachusetts legislature in behalf of equal suffrage: "God forbid that in this country chivalry and legislation should be set one against the other. I ask you, gentlemen, to put your chivalry into your legislation."

The Essanay Company has filmed the "clean-up" of Alton, Ill., showing the results of the work of women voters. Alton is a factory town and a railroad center and municipal conditions were very bad under the management of the city fathers alone. Saloons and slums have been banished with the help of the mothers.

A letter from a girl in Alberta, Can. "Dear Molly—You know I am living in Strathcona on a little visit to cousin Anne. Well, I think I'll stay. Women have just been admitted to the human race in Alberta. The equal suffrage bill has passed both houses and will become a law as soon as the Lieutenant Governor signs it. Uncle Ed says there won't be any difficulty about that as the bill is a government measure. You've no idea how delightful it is to be counted as a real person. Oh, of course, girls are sometimes called angels in Charlevoix but I think I'd rather be just human. Nell sent me a newspaper clipping telling of the work of the Woman's Civic Club in Boyne City. Did you know they were planning an Anti-Fly campaign. I think the idea is grand. I wonder whether the Charlevoix women are interested in such things,—a cleaner city, I mean."

County Normal Notes

The normal class had a holiday Monday because an extra day was granted to the teachers and pupils.

Mary Jones, Rena Cooley, and Ethel Harbour spent the week end at their respective homes in Central Lake; Ruth Chellis in Ellsworth; Florence Maclaugh and Catherine LaLonde in East Jordan, and Frances Price in Bellaire.

Mrs. Joe Cosper visited the normal room Friday afternoon.

The normal class have been studying the buds of the different trees, and are much interested in seeing the birds coming north.

Miss Ruby Hooker, a graduate of last year's class, visited the normal room last Wednesday and gave an interesting talk about her work at the normal in Ypsilanti.

Historical Society

The annual business meeting of the Charlevoix Historical Society will be held at the home of Dr. Frank Wilkinson, Friday evening, April 7th.

Following is the program:

Music, Vocal Solo.....Miss Ronona Bartlett
Reading, Portuguese Sonnets, Elizabeth Barrett Browning. Mrs. J. L. Crane
Intermission—
Paper, "Our relation with South America," Past, Present, Future.....Mrs. R. W. Kane
Music, Mixed Quartette.

DOMO

Is the name of the CREAM SEPARATOR we sell and guarantee.

It is well known to our customers that anything purchased from the BLANCHARD HARDWARE COMPANY is sold with the understanding that the article must be satisfactory or money will be refunded and this applies to the DOMO CREAM SEPARATOR which will be demonstrated in our show window

Saturday, April 8,

at which time A COW WILL BE MILKED and the cream separated in the window at 10:00 A. M. and 5:00 P. M.

DO NOT FAIL TO SEE THIS INTERESTING DEMONSTRATION.

BLANCHARD HARDWARE CO.

209-211 Bridge St. - Phone 45 - Charlevoix, Michigan

Religious Notes

Congregational Church

At CHARLEVOIX OPERA HOUSE. Admission 10c and 15c.

RURAL SCHOOL CHILDREN SCIENTIFIC FARMERS

"IN the Cook County," Illinois, schools they learn arithmetic, marketing, household chemistry, darying and other important studies by working out practical problems in everyday life. Opportunity for our children.

By Robert H. Moulton

(COPYRIGHT BY BUDGETT PRESS-CHICAGO UNION)

WHEN little Johnnie Jones of Niles Center, Cook county, Illinois, reaches the little red schoolhouse some fine mornings he does not place a big red apple on the desk of our teacher. Instead, Johnnie takes a couple of fresh eggs from each pocket of his coat.

Behind a table at the front of the schoolroom the secretary of the boy's egg club is waiting. On each egg as it is brought in, is written the number of its owner and the date it was laid. And during each school day the eggs are packed and sent by parcel post to one of the chain customers in Chicago.

The arithmetic lesson in several of the Cook county rural schools now consists in keeping books on the receipts and sales of fresh eggs by members of the egg clubs.

Once a week, instead of the old-fashioned review of lessons, in which the pupils had no the slightest interest, the weekly remittance for egg shipments is received and divided by the boys among themselves in proportion to it's number of eggs each has contributed. To them the study of arithmetic has become a very real, important and interesting matter. All through the 150 rural schools of Cook county the same new spirit of life has been put into the dry bones of study.

Boys and girls are studying botany, for instance, by testing the seed corn which their fathers are planning to plant next spring; that brings in again the study of percentage. And when father is shown that, on the average, only 65 per cent of his proposed seed corn will actually germinate, he is likely to get a new idea of and a new interest in the country school.

There are few things of which Johnnie has a greater right to be proud than that the rural schools of the county in which it is located are probably the most advanced in the country schools in the United States. The division of three schools into five districts, with a trained teacher, who is also a graduate of an agricultural college, at the head of each as director of rural life and of schools, has proved a tremendous step in advance.

County Superintendent of Schools Tobin, who presided the county board to make an appropriation of $10,000 to cover the salaries of the five rural life directors for the year, has just received the reports of these directors covering the work done during the fall and early winter months. To read them is to wish that one might be again a country school boy going down the lane to the little red schoolhouse.

Almost every schoolhouse has been a social center for the rural community of which it is the center. Gas and water have been installed in many Schools and the girl pupils prepare hot lunches every day for all the members, demonstrating their skill in household chemistry, also, by preparing and serving on special days dinners at which their parents are the guests of honor.

Day after day the boys and girls bring samples of milk to school and test them with a milk tester for richness in butterfat. In many cases the results of such tests they are able to help their fathers decide which cows are worth keeping and which are only comfortable "soarders."

In many neighborhoods the parents of the pupils have been interested into attending meetings and have begun to take an active and eager interest in all the work of the school. On the long winter evenings the parents and youth have frequently met in one of the schoolhouses to take part in a test match at old-fashioned spelling bee, based on lists of 500 common words sent out at the beginning of the year by the county superintendent.

Especially interesting and important to the man to know the schools—or at least the school activities—is evidence all through the summer months. With that end in view, a large number of corn clubs were organized a year ago, on a basis which would keep the children interested, enable them to apply their newly acquired knowledge, and put a more or less definite financial reward up for them to strive for.

Each member of one of the country school garden clubs rented from his parents half an acre, the regular rate prevailing in the neighborhood, a small piece of land for cultivation of which he was to be entirely responsible. All the money resulting from the sale of garden produce grown on that piece of land was to belong to him.

By way of adding additional zest to the competition among the schools and among the individual pupils, a series of prizes were awarded repeat also keep an exact account of his expenses, including rent for the land occupied, and, after selling his product, figured his gross receipts and net profits.

The twenty-nine pupils of this school, whose ages range between ten and fourteen years, earned between them a net profit of $1,185.25, with total expenses of $191. The largest amounts earned by individuals were $101.16 and $102.16, and it is noteworthy that in each case the successful pupil was a girl.

Little Alma Kutz, thirteen years of age, the first prize winner made her money from the sale of tomatoes and asters grown on one-eighth of an acre. All the work of planting and harvesting the crops she did herself, with the exception of the first plowing of the land early in the spring. She prepared hotbeds for her tomato plants and made a covering of window glass for them. Most of the tomato plants were small flowerpots, and when the tomato plants were well up transplanted them into the pots.

While the plants were growing she marked off the plot into rows thirty inches apart, and at short time she transplanted the tomato plants from the pots to the plot. The next few weeks she was busy cultivating the plants, keeping the rows, nurture free of weeds. When the plants had spread out so much that she could not walk between the rows and pulled out the weeds with her hands.

After the vines had spread out and had set the tomatoes on the vines and she mulched her first row, which she sold for $1.25 a bushel. The tomatoes ripened she picked them and packed them carefully into crates, each crate containing about fifty pounds. In the Chicago market she sold her product from her own truck, getting 10-cent retail prices for her tomatoes, which brought her $113.

On a part of the plot she planted asters late in the season and from the sale of these she realized $5, finding a ready market for all she could offer to the florist shops of Chicago. The flowers were shipped in fresh by parcel post each morning. Here is another Yankee thrift for the girl. Her total receipts were $118.25, and, after deducting the cost of her seed, fertilizer, etc., she had a net profit of $106.16. This money she has loaned to her father, who promises to return it next season to double the amount of her land and her income.

$1,185 NET GROSS RAISED BEANS, RADISHES AND ONIONS EARNING $97

MORE OR LESS TRUE

A man has sight; a woman insight.

From the buckwheat cake has to await its turn.

It's awfully hard to marry the right girl for her money.

When pleasure becomes a habit it ceases to be a pleasure.

The lucky man usually misses the boat on the sea of matrimony.

It's a poor memory that doesn't allow a man to forget what he owes.

When a woman can't get a servant to do her work there is no help for her.

Marriage will change a man's views about women quicker than anything else.

Every time a rich man dies someone who hasn't a dollar to sure to remind you that strounds have no pockets.

After a woman has been in the matrimonial game long enough to require a three-seated carrier she is usually large enough to fill the entire back seat.

ONCE-OVERS

Don't encourage your children to tell stories on your neighbors at the home of your friend or neighbor.

It gets to be a bad habit. It starts them on the road of "the gossip."

Naturally, when you quit them, they feel that you have thrown them out of the ordinary—something that will interest you.

When they find that the ordinary things count do this they are quite likely to connect stories which will cause you to listen.

This is a most damaging lesson in the use of lies.

Before long they realize that, to claim attention, the commonplace is a failure, so they cultivate their imagination.

Once this idea is inculcated it is most difficult to uproot.

Lying becomes easier than telling the truth.

The habit is formed and, with age, comes second nature.

The mind of a child is very sensitive, and it requires little to make an impression, deep and lasting.

The sort of impressions to be made in childhood are those of right, purity, helpfulness and honesty, and to mind their own business and not know too much about their neighbors.

ANSWERS TO THE ANXIOUS

Student—Yes, bookkeeping may be learned at home. Don't lend them.

Sentiment—The lily is recognized as the symbol of purity because man has not been able to adulterate it.

Vote—Congress is an assemblage of men who prevent each other from doing anything except the poor taxpayer.

Professor—You might improve your memory by lending small sums of money to your friends. The experiment is costly, however.

HASHHOUSE HAPPENINGS

Some men are born cranks and some live in boarding houses.

A pure food menu never looks like 25 cents in a swell cafe.

But few men who get three square meals a day pose as pessimists.

No doubt some boarding house landladies would welcome a lumber famine as an excuse for putting up the price of board.

FACTS AND FINANCES

Fools rush in where angels fear to wed.

But it is better to have a war tax than a battle cry.

But the worm seldom turns quick enough to dodge the early bird.

QUIET THOUGHTS

Do all spinsters secretly hate old bachelors?

Truth is all right in its way, but flattery is generally jollier.

Hot the man who shines in society seldom shines in his business.

A man must acknowledge that he's a chump before he can begin to acquire wisdom.

It takes a powerful magnifying glass to see anything good in some men—or women.

Sometimes the world thinks a man wise simply because he doesn't make the mistake of talking when he has nothing to say.

DRINK HOT WATER AND RID JOINTS OF RHEUMATIC RUST

Why rheumatism and lumbago sufferers should drink phosphated hot water each morning before breakfast

Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated each day, becomes food for the millions of bacteria which infest the bowels. From this mass of leftover waste material, toxins and ptomainelike poisons, called uric acid, is formed and then sucked into the blood where it continues to circulate, collecting grit from by grain in the joints of the body much like rust collects on the hinge as shown above.

Men and women who suffer from lumbago, rheumatism or any form of aching joints should begin drinking phosphated hot water, not as a means to magic relief from pain, but to prevent more uric acid forming in the system. Before eating breakfast each morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This will first neutralize and then wash out of the stomach, liver, kidneys and bowels the poisonous day's accumulation of toxins and poisons; thus, cleansing, sweetening, and freshening the entire alimentary canal, each morning, before putting more food into the stomach.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to make any rheumatic or lumbago sufferer an enthusiast on this morning inside bath.

Millions of people keep their joints free from those rheumatic acids by practicing this daily internal sanitation. A glass of hot water with a teaspoonful of limestone phosphate, drunk before breakfast, is wonderfully invigorating; besides, it is an excellent health measure because it cleanses the alimentary organs of all the waste, gases and sour fermentations, making one look and feel clean, sweet and fresh all day.

Those who try this for one week may find themselves free from sick headaches, constipation, bad attacks, sallowness, nasty breath and stomach acidity.

BLACK LEG LOSSES SURELY PREVENTED
Vaccinated Calves Will Not Take Black Leg. Only One Injection Necessary. Immune from Other Diseases. Vaccine Sold Everywhere. 10-dose size, Blackleg Pills $1.25. Regular size, 25 doses, $2.50. W. N. U., CHICAGO, NO. 13—1916.

Women Showed Their Skill.
The skill with which women can do even the heavy work on a farm was shown in a recent plowing match at Aspull, Preston, Lancashire, England. The wife of a farmer and her twenty-one-year-old servant managed to beat all but one man competitor. The woman had only practiced plowing a week before the match. It is said that the night before the match some person had removed the shares and points of all the competitors' plows, rendering them useless. The women went round the district in the morning borrowed rusty shares and fitted them, and got them ready for the match.

Trouble makers are as plentiful as peacemakers are scarce.

And a miss may be better than a male.

FIERY RED PIMPLES
Soothed and Healed by Cuticura Soap and Ointment. Trial Free.
Smear the affected skin with Cuticura Ointment on end of finger. Let it remain five to ten minutes. Then wash off with plenty of Cuticura Soap and hot water. Dry without irritation. Nothing like Cuticura for all skin troubles from infancy to age.
Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

He Cut 'Em.

American Patience Tried

The friendships of the United States is one of the greatest assets of the British, according to Sir Gilbert Parker, who in the course of a recent interview had much praise for the American government and the policy it has adopted in the present war. He said in part:

"There has never been a war in modern times when a neutral nation did not challenge a belligerent nation because of its interference with neutral rights. The United States has certainly been greatly tried by our orders-in-council. There has been, indeed, a series of difficulties in this business of neutral rights are. American people have been called the pedants. There may be pedants among them, but beneath all is a deep-seated respect for international law, for the keeping of treaties, for a perfect observance of the rules of civilization.

"From the beginning I have thought that the United States took a course almost inevitable in her position. Here is a complomeata people who were a European business. What did we do in 1870 when France, our close friend, was set upon by Germany? The American people loathe war; so far they have stood out; only an overpowering sense of duty would drive them to war.

"We have sensationalized our own shortcomings; we have overemphasized our own stolidity; we have bar our family fyts in public; we have, to paraphrase a mordant epigram, whacked our cracked table into the street apparently indifferent to the fact that neutral nations like the United States were being influenced against us by evidence provided by ourselves.

"Yet, in the end, I agree that government bringing pressure to bear upon Great Britain in regard to the blockade and all the questions involved in it; but war against Great Britain has never been in their minds, while at the same time there were circumstances which might very really have drawn them into war with Germany after the sinking of the Lusitania. They have not forgotten Manila and what the British fleet did there, in aid of Admiral Dewey, to defeat German purposes against the United States.

"I think the governments of the United States have reserved the very highest traditions of diplomacy. Never has diplomatic correspondence been maintained on a higher level, and never the firm thing said with greater good feeling on both sides.

"We have tried our friends in the United States greatly; we have tested their confidence in us to the full.

"We also will be found to remember that the people of the United States made a great gift to us, a vast controlling factor in the destinies of modern nations. There is the population, there is the wealth, there is the character. The Civil war showed what that character is; when an occasion again arises, the time, it will come, I think, to the supreme advantage of the world. It will be well for us, while preserving principle, to remember that friendship with the United States is one of the greatest assets in this time of our trouble and poignant endeavor."

War Medal Halts Calumny

A recent copy of the Paris Journal Official contained the name of Vetrinus, the scamper, in a list of men awarded the military medal, which ranks as high in France as the Victoria Cross in England. The nomination was said that Julien Vedrines had volunteered for seven special missions which involved "the most absolute contempt of danger and remarkable coolness and skill."

Vedrines for some reason has been the victim of calumny on two occasions during the war. Rumors declared that he had been a "traitor" to some unspecified way, and it was also stated that he had been shot. These reports were revived later, and were believed by many. His military medal will dispose of them forever.

An evening paper having printed his citation and added a few lines of sympathy for one who had been so basely maligned, Vedrines wrote a few words of thanks to the editor:

"Thank you sincerely for the honor of my four children. For the love of my country and mine, I have always done my duty. I do it as others do it, and shall always do it when and how I am wanted. You may be sure that those who are pleased to tarnish me have never faced danger."

Although his domain, which consists of two separate portions, being 35 miles apart in northern Germany, and having an area of only 430 square miles, Prince Frederic of Waldeck-Pyrmont rules with all the pomp and ceremony which characterizes the courts of the great powers.

The king of Italy always carries his crown with him wherever he goes and frequently dons it when he reviews his troops on ceremonial parades.

"Weary Jimmy"

By Verda Rossiter

(Copyright, 1916, by W. G. Chapman.)

He was ragged, hungry, in sore need of a place to sleep, yet Weary Jim took it all philosophically. He had become inured to the law of average as to the liberalmindedness of the casual passing crowd. The benevolent-faced old men were the favorite subjects of his mendicancy, but it was late afternoon and that class of lenders are had long since gone homeward bound.

"I'll wait till dark and tackle the theater crowds," decided Jim, and picking up a flying scrap of newspaper, selected some steps leading to an unused basement and dirty ran his eyes over the columns of the torn and creased stray fragment.

"Hello!" exclaimed Jim suddenly, and his eyes goggled and his hand shook, and he read again the brief but thrilling advertisement:

"Reward: A liberal reward will be paid for information that will lead to the discovery of James Newton, sometimes known as 'Weary Jim,' and formerly of the Little Jim Pisk restaurant. Apply to Adam Hiram, Attorney, 13 Court Building, or residence, 1194 Derry avenue.

"That's me!" gurgled in the throat of Weary Jim. "Wanted—Reward. And once I did work at that restaurant and disgraced myself with the crowd for it, and drifted into the wide world. Poor old Adam, bless ass—are there any black marks against me that I'd be wanted for? No, it's not that. I never touched a cent that wasn't my own—and never

"To Do as I Like With?"

will. I'll look up this advertisement right away."

One hour later Weary Jim sat in a mean, but well-ventilated room in the Derry avenue, to be rebuffed by the servant, to be bowed and scraped to, to be ushered by Lawyer Adam Sharp. The latter ushered Jim into his elegantly appointed office, and though he were some prince. He unfolded an astonishing story.

A distant relative, a half uncle, whom Jim, the last of the family, had not had four years, had left to Jim his entire fortune, viz.: $20,000 in cash, a sumptuous residence, and a goodly share of all incumbrance.

"You mean—you mean," gasped Jim, "that all—that—is—mine?"

"Unquestionably," assented the suave attorney.

"To do as I like with?"

"Without let or hindrance."

"Now—right now, as an advance, a slight advance," pressed Jim in his anxiety.

"Well, the banks are closed," explained Sharp, "but if you will have to go into court as a formality, but in the meantime, if you will accept my own personal legal representative in the matter of the estate, I will advance you whatever you want."

"Then gimme a dollar," said Jim eagerly.

"A dollar! My friend, you need a great deal more than that and I'll give them! rehabilitate yourself. I will give you $100," and he produced the crisp bank note and handed it into Jim's mouth water. "I would suggest a bath, a becoming suit of clothes, a suite at a good hotel and I will meet you at my office at the proper hour tomorrow morning, so you can start and pace the estate cash of thirty thousand dollars to your account at the bank. Ah, my dear," he interrupted himself as an angelic, vision-faced lady entered the room, "let me have the pleasure of introducing Mr. Newton—my daughter, Hyacinth."

"Oh, dear," piped the spinster handsomely, "has you found the genuine man of last? How sweet! how romantic!" and she shook a delicate hand, expected—victim!

Weary Jim felt, the house like one in a dream. One thing his more conspicuous senses aimed for and landed. This was at a restaurant. The great Jim abs astounded the waiter, its volume so surprised the proprietor that he approached before it was finished and intimated the group amount involved. Contains and full-mouthed, Jim pulled out a five-dollar bill.

"Give the change to this waiter," he directed grandiloquently.

One week later Weary Jim came out of the mansion as had inherited, by way of the rear door and with a scared look on his face. He almost ran until he reached a point some squares distant.

"Whew!" he panted. "I'm out of that for good—I've escaped!"

What Jim had "escaped" from was misery. For him wealth had brought torment. A bath had made him tender and the flannels irritated him. Rich food gave him the toothache, with consequent loss of appetite. He missed the dozy atmosphere of the backlot and the cheap lodging house, lying in his luxurious feather bed. But the crowning terror of his life had become Hyacinth—Hyacinth Sharp, the attorney's daughter. Like a shadow she pursued him. She was bound to marry him—or rather his money. At the thought of that tremendous responsibility Jim had resolved to sacrifice all. He thought of the happy-go-lucky life of old, and then of her, and shuddered and—decamped.

Jim had his plan. Long and diligently he searched for an old partner of the road—Crippled Joe. He found his friend in a poor lodging house. He astonished the nauseous hobo comrade with a proffer of home, fortune, friends. He took Joe to a lawyer and transferred to him legally all of his uncle's bequest except $10,000 in cash.

"Poor fellow! I've put it over on Joe!" murmured Jim, "but maybe he'll enjoy it, poor cripple."

Then Weary Jim plunged back into the old life. For a time, although the frowstest of them all, he ran a free hotel for his compatriots, and expended $5,000 in this philanthropic venture. The result was a riotous household, increased infections on the part of his patrons, and the police closed the place.

One day Jim saw Cripple Joe and the peerless Hyacinth flash by in an auto. The man and woman were man and wife from the pained, furtive expression on the face of Joe.

"Sold into slavery!" chuckled Jim, and rioted in his rags and freedom.

The remaining $5,000 was a burden to Jim. Its possession hurt his pride as a dissolute. One day he took a long tramp. It was to a place he had never forgotten and loved dearly his pilgrimage landed him at the door of a quaint, rural cottage. The place looked poor, and the lovely young girl who came to the door was nearly his plaster. Dressed. A young man, her lover, just leaving her was evidently a workman.

"I wanter to see Doctor Adams," explained Jim, and his face fell as he learned that the physician had been dead for several years, leaving his family very poor.

"Such good men die," said Jim sorrowfully, and then he told how, a year before, the doctor had nursed him through a two weeks' sickness—he, a poor, homeless wretch of Jim had never forgotten it.

He told a great lie as he placed $5,000 into the hands of the young lady. He had made a fortune in a game and wore poor clothes so he would not be robbed. And then he fitted away, leaving those Adams fairly astounded.

The time came when Weary Jim felt he was "all in." "His uselessness was over," as he comically put it. He was a tramp and dying alone. Somehow, an indefinable longing sent him tramping to the cottage home of his dead benefactor's daughter.

It was dusk when he approached the open window. Within the room were husband and wife and a sweet little girl of about eight. She was saying her prayers, and they ended with:

"And, dear God, bless Mr. Newton, who brought mamma and papa the blessing of their life."

At the sweet cherub in pure white the old tramp gazed, then at his own satire.

"I won't spoil the pretty picture," he said, and he went around the house and turned corner of the garden and lay down and slept—and died.

Then they found him, and tenderly cared for the poor shell of a great soul. And in the little village graveyard there is a tombstone reading simply: "Weary Jim—Tramp, at Rest."

What Becomes of Lead?

Lead was unquestionably known to the Egyptians, but its chemistry was not understood its desilverization, yet we are apparently already entering on the era of the end of lead production. The world's accumulated stocks of 2,000 years seem inadequate to keep it. D. M. Liddell writes in Engineering Magazine. How can lead be made to last? Paint from the lead becomes into the ground in a form too dissemination for any economical recovery. Lead bumper fires away a portion of the world's stock; when almost every car carries a lead lining; white lead pipes or lead joints in iron pipe corrode in the ground, and when every plumber's apprentice throws away lead drops, and tin is packed in lead foil! In the meantime the increasing use of lead in storage batteries adds another possibility of loss. The sludge from these batteries will usually be thrown away when the cells are cleaned. And so the new discoveries of science help to add new methods of waste.

The Modern Way.

"What is your diagnosis, doctor?"

"Well, I find that you have a little inflammation in the ears; your thinker is slightly affected; your digestive organs are not functioning properly, and there is evidence of bronchitis."

"But can you fix me up?"

"Well, I advise that you go to Dr. Tappem for your ears; across the street you will find a specialist who is a throat specialist, and Dr. Trypsin will understand your digestive difficulties. As for your bronchitis, you should see a good lung expert at once."

"But isn't there anything the matter with me that you can cure?"

"Yes, you have a $10 bill in your wallet; I'll relieve you of that."

The Dear Things.

"This is the kind of stuff you base on the front porch.

"Why, George, how dare you! Now you can just go right home, and don't you ever, ever speak to me again!"

"Why, gosh—a bear with a big bow!

"Let me come back, please. I'll be good; honest, I will."

"If you're going to be good, there isn't any reason for coming back."

"Oh, you little angel!"

"George, dear, I can't forgive—"

"The cherpole."

Rather than stand up for their principles some men will sit down on a cushion and let their money talk.

Frock for Nearly Grown Miss

Spring gowns for afternoon wear, for miss or matron, are addicted to crepes, voile, marquisette, and other fabrics that are sheer. Crepe de chine and crepe georgette are favored for the miss, made up in ways calculated to set off the girlish figure or with an eye to concealing its too angular outlines. Touches of bright color appear in bits of embroidery that attract the eye, on the quietest gowns, and colored organdie takes the place of lace or white organdie in the collars, where color is needed at the neck.

One of the plainest models in an afternoon frock for the nearly grown miss is shown above. A dark gray or mouse-colored crepe de chine was chosen for making it, with skirt and bodice in one.

The bodice is cut with a yoke and the lower part of it is shirred, with four parallel rows of shirring, and set to the yoke with a plying of the crepe. Long, moderately full sleeves, are set into the armscye in the same way and finished with a deep cuff outlined with a piping.

The plain skirt is cut shortcut length and shirred in at the waist. A wide, slightly stiffened band about the bottom gives opportunity for more the piping effect, where it is set on. A bit of the crepe fastens at one side of the front, with a panel of cabochery in red, blue, and gold brightening it across the front.

A lace collar and cuffs may be replaced with a similar set in colored or white organdie, which are even better style for the young girl than laces.

Soft sorge and supple silks are combined in one-piece frocks for the miss. In an unusually pretty model the serge skirt is shirred to a short yoke of silk and finished at the bottom with a wide band of it. The silk yoke is extended above the waist line, forming through a cable in the aerial on the roof, whence they are discharged into the air.

The waves are caught by the various receiving stations and conveyed by wires to reflectors each of which is fitted with a small megaphone, in several instances bend appliances with a pair of receivers were used. In others a single megaphone was sufficient for a group of persons.

Zinc in War Time.

Zinc is so essential to war time that it has risen enormously in price. Coating originally only two-fifths as much as copper, it now costs decidedly more than copper, in spite of the fact that copper itself has sharply increased in value. Zinc is a constituent of cartridge brass and shell fuses, and is used also as a covering for iron barbed-wire fencing. In 1913 the United States, Germany and Belgium were the leading producers of zinc.

Of the three, only the United States smelted domestic ores. Belgium and Germany relied mainly on zinc concentrates that they imported from the broken Hill mines in New South Wales, where, for one reason and another, it does not pay to do the smelting. France, Spain and Great Britain also produce substantial quantities, but not enough to supply their own needs. Austria and Germany have considerable deposits of ore in Silesia, Hungary, Carinthia and the Tyrol. As the smelting furnaces of Great Britain are not well adapted for dealing with the Broken Hill concentrates, it is says the bulletin of the geological survey of the United States.

Animals Fed Pinch of War.

Rats are being bred for the Hindu pest so in order to save the scant ration of horse flesh for the lions and tigers, whose cousins roaring above the extent they suffer from the grim and abortage of food. Engine, vultures and the wild birds are fed exclusively on rats. At times, when horse meat has been unobtainable, goats and the less valuable animals have been sacrificed to save the lives of the beasts that once ruled the jungle.

But the herbivorous animals have also gone through hard times, as wild cheetahs have been substituted for expensive hay. They have small liking for cheetahs. A lord, in consequence, is said to have offered a reward of $50 for the honor.

Sweat Drop Caused Explosion.

A single drop of sweat from the brow of a workingman, dropping into a tank containing twenty-four gallons of nitric acid, caused a loud explosion at the Atlas Powder company's plant at Mount Hope, Pa.

Workmen nearly narrowly escaped injury when the explosion came and immense rolling clouds of smoke passed through the building.

A drop of water on this preparation will cause it to explode, and sweat-drops may explain many recent mysterious plant explosions.

The plant makes large shipments every week of high explosives for the French army.

War's Effect on Education.

At the annual meeting of the Incorporated Association of Assistant Masters to be held at the Merchant Taylors' school in London, Mr. A. A. Somerville (Eton college) who presided, said that there were 7,000 teachers serving with the forces at present. One of the results of the war upon education would be that the practical side of the scientific side of education would be very much emphasized. Resolutions were adopted affirming that "any reduction in state grants for education would be false economy, and gravely prejudicial to the welfare of the nation, and that reductions in the expenditure on administration, inspection, and material should precede economies more directly affecting the immediate needs of the children.

Other Sufferers.

"Soon the birds will be making love and getting married," says a paragrapher. Likewise will the meek and lowly angleworm wish he had never been born.—Springfield (O.) News.

NEED FOR DAYS OF STORM

Sage Reflections on the Impossibility of Life Being Always a Bed of Roses.

Every woman, young and old, knows what it is to have cross days; days when, from causes still unknown, every normal thing seems to go wrong, no matter how hard one tries to have them go right. For that matter, one always does try harder on such days than on the happy-go-lucky ones when life flows on smoothly and harmoniously, like "a grand, sweet song." Goodness knows, there is enough conscientious effort wasted on a single cross day to balance half a year of ordinary days.

Why is this? Is crossness a disordered state of the mind, or an overwrought condition of the nerves, or simply the reflection of an inscrutable but unanimous "crossedness" on the part of things in general? And if it be any or all of these, is there any way of overcoming it?

Crossness, like most other conditions of life, is the inevitable effect of a perfectly natural cause. Good humor, like fine weather, cannot possibly last forever. It would, it would inevitably become an intolerable bore, being eternally pleasant and agreeable in all right theoretically, but it is a terrific strain on the nerves.

It is dreadfully wearing, too, on other people. Did you ever have to live in the same house with someone who was always placid, always even-tempered, no matter who she was married and disgraced? And were you not sometimes seized with an odd yearning to do something perfectly awful and foolish, that you might for once startle that tiresful be out of his or her maddening imperturbability?

Music by Wireless.

A young California inventor has designed an apparatus whereby selections played on a phonograph have been transmitted to several neighboring homes equipped with special receiving instruments. Popular Mechanics Magazine states. In some instances the instruments have been installed in the dining room and by this arrangement the neighbors have been entertained at mealtime. A wireless telephone apparatus upon which the inventor has been working for several years is used at his central station. A phonograph, in which the tone is an integral part of the body of the instrument, is used in producing the selections. The slats are removed from the mouth of the horn and with it is placed two ordinary telephone transmitters, from which the sounds are carried by wires to the wireless telephone outfit which, after serving as an amplifier, sends the waves through a cable in the aerial on the roof, whence they are discharged into the air.

The waves are caught by the various receiving stations and conveyed by wires to reflectors each of which is fitted with a small megaphone, in several instances bend appliances with a pair of receivers were used. In others a single megaphone was sufficient for a group of persons.

Animals Fed Pinch of War.

Engine, vultures and the wild birds are fed exclusively on rats. At times, when horse meat has been unobtainable, goats and the less valuable animals have been sacrificed to save the lives of the beasts that once ruled the jungle.

But the herbivorous animals have also gone through hard times, as wild cheetahs have been substituted for expensive hay. They have small liking for cheetahs. A lord, in consequence, is said to have offered a reward of $50 for the honor.

Sweat Drop Caused Explosion.

A single drop of sweat from the brow of a workingman, dropping into a tank containing twenty-four gallons of nitric acid, caused a loud explosion at the Atlas Powder company's plant at Mount Hope, Pa.

Workmen nearly narrowly escaped injury when the explosion came and immense rolling clouds of smoke passed through the building.

A drop of water on this preparation will cause it to explode, and sweat-drops may explain many recent mysterious plant explosions.

The plant makes large shipments every week of high explosives for the French army.

Fine Effects in Spring Neckwear

Combinations of two colors and two materials in frocks and suits have established themselves as an accepted style feature of the new season, and now all sorts of dress accessories show the influence of the same idea. In neckwear and footwear it is conspicuous. Among the new neckwear there are pretty capes-collar made of white and colored organdie (sets with cuffs to match), and collars of white organdie finished with colored bands. The favorite combinations are white with pink, white with tan, and white with blue.

One of the capes-collars in which white and light pink are used together is illustrated here. A little cape of white organdie is finished about the edge with hemstitching, and over it a smaller cape in fresh pink is cut in the same shape and fitted in the same way. Both are set into a narrow band of organdie that turns in at the neck. A row of small pearl buttons is set on the pink cape on each side of the front. The very tiniest of buttons, by the way, are among the favorite exquisite finishes to match well with organdie or net or fine lace. The cuffs are made in the same way as the cape.

Women much fashion may welcome the cape as is unwilling to bandon the big collar with all its

Women Once Invalids

Now in Good Health Through Use of Lydia E. Pinkham's Vegetable Compound. Say it is Household Necessity. Doctor Called it a Miracle.

All women ought to know the wonderful effects of taking Lydia E. Pinkham's Vegetable Compound even on those who seem hopelessly discouraged. Here are three actual cases:

Harrisburg, Penn.—"When I was single I suffered with Female trouble from female weakness because my work compelled me to stand all day. I took Lydia E. Pinkham's Vegetable Compound for that and it was made stronger by its use. After I was married I took the Compound again for a female trouble and after three months I passed what the doctor called a growth. He said it was a miracle that it came away as one piece so easily and under the knife to have them removed. I never want to be without your Compound in the house."—Mrs. Frank Kunes, 1942 Fulton St., Harrisburg, Penn.

Hardly Able to Move.

Albert Lea, Minn.—"For about a year I had sharp pains across my back and limps and was hardly able to move about the house. My head would ache and I was dizzy and had no appetite. After taking Lydia E. Pinkham's Vegetable Compound and Liver Pills, I am feeling stronger than for years. I have a little boy eight months old and am doing my work all alone. I would only be too glad to recommend your remedies in the house as there are none like them."—Mrs. F. E. York, 611 Water St., Albert Lea, Minn.

Three Doctors Gave Her Up.

Pittsburg, Penn.—"Your medicine has helped me wonderfully. When I was a little 13 years old I was always sickly and delicate and suffered from irregularities. Three doctors gave up my case and I would go into consumption. I took Lydia E. Pinkham's Vegetable Compound and with the use of both began to feel better. I soon became regular and I got strong and shortly after I was married. Now I have two nice stout healthy children and am able to work hard every day."—Mrs. Clementina Dunkinson, 34 Gardner St., Troy Hill, Pittsburg, Penn.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice—it will be confidential.

COLT DISTEMPER
You can prevent this contagious disease from spreading right through your stable or entire herd by using SPOHN'S COLT DISTEMPER. Spohn's Distemper Compound is sold to use on any colt. It is wonderful how it prevents and controls this disease. Spohn's Distemper is a preventive and a cure. Distemper is not to be trifled with. Spohn's Distemper Compound will prevent and cure it. Spohn's is not a cure-all, but a specific for Distemper. 50c and $1.00 a bottle, $5 and $10 a dozen. Spohn Medical Co., Chemists and Bacteriologists, Goshen, Ind. U. S. A.

Good Sign.
"I suspect there is something in this rumor about a peace movement in Europe."
"Why?"
"Everybody is denying it."

KIDNEYS CLOG UP FROM EATING TOO MUCH MEAT
Take Tablespoonful of Salts If Back Hurts or Bladder Bothers—Meat Forms Uric Acid.
We are a nation of meat eaters and our kidneys do their utmost to free the blood from the poisonous acid formed in the blood to pass off in the urine. When the kidneys do their utmost to free the blood from the poisonous acid, but become weak from the overwork; they get sluggish, the urine becomes cloudy and thus the waste is retained in the blood to poison the entire system.
When your kidneys ache and feel like lumps in back and you have sharp pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, causing you to seek relief during the night; when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach or rheumatism—get together, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful a dozen days and your kidneys will act fine morning and in a few days your kidneys will not bother you. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in the urine so it is no longer a source of irritation, thus ending urinary and bladder disorders.
Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.—Adv.

Two Deluded Souls.
Bill—I wonder if Doctor Cook really thought he discovered the North pole?
Jim—Possibly. He all unknowing.
Bill—Why, when I meeted my wife I thought I had discovered paradise.

"If" and "but" are among the little things that count.

Only a true Christian can pray for the right things.

To Build Up After Grippe, Colds Bad Blood
Take a blood cleanser and alterative that starts the liver and stomach into vigorous action, called the "Golden Medical Discovery" because it is one of its principal ingredients—the Golden Seal plant. It assists the body to manufacture rich red blood which feeds the heart—nerve—brain and organs of the body. The organs work smoothly like machinery

VARIETIES OF STOVES

NATIONS HAVE DIFFERENT METHODS OF KEEPING WARM.

Russian Sleeps Over Brick Contrivance in Which Slow Fire Burns—Holland's Heating Arrangement Perhaps Most Economical.

The stove is, comparatively speaking, a new invention. So late as the time of Queen Elizabeth people did not have chimneys; they built their fires in a round hearth in the middle of the room, and when chimneys were introduced, the old-fashioned folk all grumbled, because, they said, smoke enough to make your eyes water, and yet the cold air was good for colds. But to the eastward stoves of brick and porcelain were commonly used.

A stove made of brick is used in Russia, and in it a slow fire burns all night long. On top of it, when night comes, the peasant and his whole family, in their sheepskins, lie down and go to sleep. It is nice and warm, rubby like a window sill, but not all over a radiator, and sometimes there is a second shelf overhead for any stranger who may be staying overnight.

The brick stove of the Russian peasant, in all probability, came over land from China too long ago to talk about, for the Chinese have stoves of brick and clay shaped something like it.

In Japan there is not much need of keeping warm, but whatever stoves there are in a Japanese home are low, for the life here is all carried on sitting or kneeling on the floor. There is a rough clay stove, made especially for the great rice kettle, that costs only a few cents, and when broken the poorest can buy another. There is a dainty little charcoal stove on which the cooking is done, and beside it stands a pretty basket filled with the softest and finest charcoal. There is also a small stove or furnace to heat the water for the bath. And still more odd is the little earthen bed-stove, used as we use a hot-water bottle, shaped like a curled-up cat, and it is called "neko" (the kitten).

The German stove of porcelain, with its curious decorations, has figured in many a story of German life. A porcelain stove still hold the heat a long time and keep a room warm with but little attention.

In Holland, where the working people are often at home (or a little while at noon, they have the most thrifty arrangement of all—what might be called a portable stove, a stove in an iron bucket. When the children come home from school and the older people from work at noon, instead of lighting the kitchen fire, one of the children takes the fire bucket and runs around the corner to the firewoman's. The bucket is just large enough to hold a piece of burning peat or some live coals, and a teakettle sits on top. The old woman who sells fire and hot water fills the bucket and kettle for a tiny sum, and the child goes home with just enough fire and water enough for the family dinner.

Charcoal is commonly used for cooking in France, Italy and Spain, because it makes, in a small, but Italian keeps warm (or says he does) over a small fire of what we would call an earthen hand-warmer with coals in it, called scaldino. Only within the last few years has it been possible to find rooms that were heated on the American plan anywhere in Europe. The people keep warmer in this country than in any other spot on the surface of the globe in the temperate or frigid zone.

Mourned His Seven Cents.

There is a story running about Cleveland of a man who lost his pocketbook containing over a thousand dollars. When he discovered his loss he hurried back to the place where he had stood while removing a bill from the wallet, thinking he might have dropped it there. And as he crossed the corner and came in sight of the spot he saw a newsboy stoop over and lift the heavy purse out of the gutter. "That's mine," he cried, running up. "that's mine! Look at the initials, boy—they're stamped on the leather. X. Y. Z. Dye find them there?"

"Guess it's yours all right," said the boy, handing it over.

The man gave the boy a dime, and departed, and as he went he went muttering: "A street car ticket would have done just as well, just as well! He hasn't looked in it—didn't know what was in it! Out seven cents! Out seven cents!"

Why Jupiter is Wearing Belts.

It has been suggested by Lau that the reason Jupiter has belts instead of zones of spots is to be found in its rapid rotation, the material forced upward from the lower strata of the planet, bringing with it a similar linear velocity than that of the surface, streams eastward, assuming the look of elongated streaks.

If the centers of eruption are sufficiently numerous, belts are formed, and it is suggested that, were the sun's rotation much more rapid than it is, the solar surface at spot maximum would also present dark streaks

Have You Tried Acorn Bread?

Although the Germans are making war bread out of almost all kinds of materials, they will have to go a long way before they invent an entirely new kind of bread. Bean meal, maize and other substances have been mixed with wheat or rye in the past.

Mashed potatoes, mixed with wheat or maize flour, were used by poor people on the continent years before the war broke out. Rice flour makes fine yellow bread, while the chestnut bread that forms the chief food of the Corsican mountaineers is very digestible, agreeable to taste, and keeps fresh over a fortnight.

Bread has been made from acorns, especially by the peasants of France. Mosses, dried and powdered, are still used for bread by Norwegians, and other substances that have been used, most of them yielding little nutrition without the addition of cereal flour, include the roots of colchicum, iris, mandragora and hellebore.

Activities of Women.

Dr. Hazel Edison has been made a deputy coroner at Toll, Wash.

Pennsylvania's only woman deputy sheriff, Miss Frances W. Crawford of Adams, has resigned her position to become a bride.

The Cambridge Law School for Women will be as nearly a replica of the Harvard Law school as it is possible to make it.

Mrs. Louise K. Thiere of Milwaukee, Wis., who recently celebrated her one hundred and first birthday, is a real Daughter of the American Revolution, her father having been on the military staff of George Washington.

In Persia, a girl who is learning to weave Persian rugs serves her apprenticeship by tying 30,000 knots a year, for which she is paid 91 cents.

A new cooksfarms for the state of Massachusetts has been completed by Mrs. Amelia Fowler, said to be the most expert needleswoman in the United States.

Must Be Well Fed.

The phrase "The shortest road to a man's heart is through his stomach" is by no means a modern saying. It has been true throughout the history of civilization. Hunger, cold, fatigue, I be a joke, it is in reality no reflection on human nature. A man with a poorly fed stomach can rarely be found to have a generous disposition or to entertain kind thoughts, much less to love.

Eva K. Bishop,
Plaintiff,
vs.
Lewis Ray Bishop,
Defendant.

In this action it appearing that defendant, Lewis Ray Bishop, is a resident of the State of Michigan, and that a copy of the bill of complaint herein, and the notice that the same would be served by publication, have been duly given to the said Lewis Ray Bishop, defendant, by the service of Lisle Shanahan, attorney for plaintiff, of said notice, and a copy of said bill of complaint, on said defendant, by leaving the same at the place of his abode and usual place of business, in the Charlevoix County, State of Michigan, on the 22nd day of March, A. D. 1916, and that said defendant has not appeared in said cause, nor made any answer to said bill of complaint, or any other pleading, and that the same is now due and payable, and that the same is now due and payable, and that the same is now due and payable

Would You Spy for Your Country?

THERE is another class of heroes in this war besides those in the actual fighting zone, of whom the public knows nothing unless an official announcement is made of the execution of some man or woman "convicted of espionage." Thousands of men and women, on both sides, are risking their lives every hour, every minute of the day, in the secret service. And they are doing it for their country. There is no reward for them in the shape of decorations or public commendation. Their stern duty is laid out before them. It is for them to fulfill it. That is all. They can hope for no reward except the satisfaction of doing their duty. At the best they live through the conflict. At the worst they are captured by the enemy and meet an ignominious death.

It takes as much courage to perform a duty like this as to lie in the trenches day after day and participate in charges against the enemy or defend the trench from the enemy's assault; and to be at all times subject to a terrific artillery bombardment or the more dreaded assault with asphyxiating gases.

The man who meets his death in the trenches has at least the consolation of dying amid his comrades and friends—of dying a glorious death. But the spy has not this consolation. Every secret-service agent feels that his death is certain, and that when it comes it will not be a glorious one. For he will die alone, with none of his friends about him. His people back home will know how he met his fate. He will die alone in a foreign country, not as a hero, not as a spy.

And yet if the annals of the secret service by reason of the various countries were made public, it would tell of wonderful deeds of daring, of strength, fearlessness and of physical and mental heroism.

When the arrival of the first German submarines in Constantinople, after the inauguration of the British Dardanelles campaign, there became known a story of the heroism of one of these secret-service agents. His name was not given, and the exact locality where he performed his final act of duty was not told, but an officer of the German U boat related the story to a personal friend.

We will call the secret-service agent Johann. He was a youngster, hardly twenty years old, who a university met a student in Heidelberg. He always had been weak and delicate, and at the beginning of the war he was not allowed to go to the front. He belonged to a wealthy family, had traveled extensively through Europe, and was an accomplished linguist. He made application to the secret-service bureau and his application was accepted.

He was sent to England. There he passed as an American. He had in his possession passports and papers connected with the English branch of an American concern. How did he do it?

The people in the German secret-service will never be written, and not more than a dozen living persons will ever know its extraordinary props. The passport proposition and the connection with the London branch of the American concern were mere matters of detail with which Johann had nothing to do. It was after he was established in London that his real work began. He spoke perfect English, but he used an American accent and affected American clothes and mannerisms, for he knew both well enough to affect either successfully.

But at any rate he had worked in the French capital several months, still posing as an American, when he received a new order. It was, although he was thoroughly familiar with the French language, which he spoke perfectly, to go to a little French fishing village and deliver them to the commander of a submarine that would be there about a certain date on its way to the Dardanelles.

The submarine commander had orders to wait off the coast for two nights for the messenger, and if no sign came to proceed on his way to the Dardanelles.

How the secret-service agent did it is not known, but early one morning he was found on the beach tied to a deck chair, and apparently half dead from exposure and exhaustion. Two aged fisherman found him and carried him into a hut.

When partially revived, he murmured a few words in English and then in broken French, from one which his captors gathered that he had been in some accident at sea. Also that he was an American and had come from Naples to the United States.

As soon as the village was isolated, the nearest city was Marseilles, and it would take several days for news to travel between the two points, nothing was done.

Johann remained in bed the greater part of the day, tended by a fisherman and his aged wife. Toward dusk he insisted on arising and walking out on a deserted part of the beach. He was still partially stunned, but he explained in his broken French that he thought the fresh air would help to clear his mind.

"You are too weak to walk," exclaimed the old woman. "You must not exert yourself. Tomorrow, perhaps, yes, but not now."

And she gently took him by the arm to lead him back to the cottage.

"Sacre bleu!" suddenly exclaimed her husband and rushed out to sea.

A trail of sparks rose from the black surface of the water, and descending high into the air, burst into a white glare. Then darkness. Men cries and excitement were heard, for other fisermen had seen the rocket. Then silence, while everyone waited. In a few moments rose another trail of fire, and a brilliant green rocket exploded high in the air.

"Quick! The boats of the fleet are nigh," cried a woman. "It is a part of the war. It has reached us now."

Hour after hour passed. The secret-service agent lay, tossed and tried, with his ear to a window in the thin partition between his room and that of his hosts. After a while he heard them both snoring. Then very gently he rose, dressed himself, and opened a door, which let him out into the open at the rear of the house.

It was a rather dark night, but there were some stars shining, and after standing in the night a few moments, his eyes became accustomed to the gloom. Then he started toward the little harbor at the foot of the cliffs.

Skirting about the fleet, he reached a small skiff, with its oars in it, tied to a stake. Quickly the lad untied the rope, and, shoving the boat far out, sprang into it. He waited until the force of the shove had spent itself, then, cautiously, began rowing along the beach. He was not strong, however, and it was an effort. But he kept it up for a quarter of a mile. His eyes had grown accustomed to the darkness by now, and he narrowly watched the shore. At a certain point he rowed inshore and pulled his boat after him up on the sandy beach. Then he approached the cliff, and after a search found what he was looking for—a bundle containing a precious rocket. Farther on, in a cleave of a rock, hidden under a large stone, he found his packet of instructions. He had left both bundles hidden there early in the morning after he had been landed by a fishing smack from Spain.

He planted the rocket in the sand and touched a match to it. Instantly there was a flash of fire and a trail of sparks as the rocket soared upward and burst into a white light.

Johann, with his precious packet in the bosom of his shirt, sprang into the boat just as an answering signal, a white rocket, burst upward from the surface of the water, nearly a half mile away.

The tide had gone out and was almost on the turn, but there was a heavy swell and it was hard work rowing. Johann was dazed for the first groans a hundred yards from the shore when there was a flash of light from the cliffs near the village. It crept out over the water and close to the shore, sweeping and reaching out over the expanse of sea. For ca. 1 minute it seemed hesitant and held it a moment. Then it swept closer to shore and in a few moments was focused on the tiny boat beating its way out to sea. Shots were fired from the shore, but the lad, in the midst of its glare, held fast to his oars, straining every effort of his feeble body to fulfill his vows.

Somewhere, farther along the coast, the signals of the alarm had been transmitted to the coast patrol had been sent to investigate.

From the top of the cliff came the sputter of a machine gun. Johann, now on the lad, rowing desperately, saw the bullets drop.

The sputtering ceased, and Johann continued turning his head, he saw several men with rifles on the top of the cliff. Suddenly the sputter of the gun was another sputter and suddenly a searchlight struck him in the right breast and he felt the hot fire of lead. But it appeared to give him more strength and with apparently no effort he drove his boat through the water. There were answering shots from the submarine. They were firing at the searchlight on the cliff, and at the sputts of flame.

But the dark red spot on the front of the lad's shirt was growing larger. And there were holes in the bottom of the boat, through which the water was leaping. In one, the lad, another bullet struck him in the right arm and he gasped, then continued his rowing.

A hail from behind him and he suddenly stopped rowing. He had reached the submarine. Ropes were thrown to him and the staff pulled up close to the undersea craft. Kindly hands helped him aboard while the machine gun continued its sputtering and a hail of bullets struck the water near by. The whole thing had scarcely taken five minutes.

The secret was quickly taken below and he handled the officer in command.

The boat was slowly submerged and disappeared beneath the dark waters.

My work is done," gasped the lad, trying to choke back the blood that welled up from his lungs.

We did not care rise to the surface until the next night," continued the officer, in relating the story. "And then we hurled him in the sea, where thousands of other heroes have found their resting place in the last few months."

BITS OF INFORMATION

An Icelander, visiting in Utah, recently said that probably a third of the countrymen had come to this country, most of them settling in Washington. And ended with the startling assertion that "such a milder climate, more like Iceland—the East and central states are too cold for them."

A $-$ 6,000-mile coal basin is being opened up by a 500-mile extension to the Siberian railway.

The intensity of the tone obtained from a phonograph can be varied by a recently patented needle mounting provided with a counter-weight to regulate its pressure.

Judge Henry Hudson of Oklahoma handed his bench the New Year's gift of 3,228 new citizens by ruling that all Osage Indians are full citizens of the United States and entitled to all the privileges of such. The decision was incidental to his ruling out a divorce of an Osage chieftain's wife by tribal custom.

Jose Valle-Riestra, a Peruvian composer, who was in this country with the Pan-American Scientific congress delegates, has devoted his life to studying melodies of the Incas, and two operas he has composed, "Ollanta" and "Atahualpa," are based entirely on the musical themes of the aboriginal and supposedly rare.

Horseshoes filled with rope, which picks up small stones and sand and forms a rough surface, have been invented by a German to help horses on slippery pavements.

INTERESTING FACTS

Copenhagen has prohibited the wearing of unprotected hatpins by women in street cars.

German cities have hit on a new scheme for advertising themselves in it is the form of a brief description of the city on the back of a regular mailing envelope. Harry G. Seltzer, American consul at Breslau, Germany, recently sent a sample to the Bureau of Foreign and domestic commerce at Washington.

THE SANDMAN STORY

By Mac F. A. Walker

BELLA'S CARELESSNESS.

"I don't want to take him out this morning," said Bella. "I want to go skating with the other girls, and they don't have to take care of babies."

"Perhaps they haven't any little brothers to care for," said her father; "you can skate this afternoon, but I want you to take brother out this morning so I can get my baking done."

Bella pouted, but she knew she must obey her mother, and when a few minutes later her mother put the baby in his carriage she wheeled him down the street. "Come along to the pond," said one of Bella's playmates; "you can watch us skate away."

"Take this carriage a minute," said Bella. "I want to get something in the house."

Bella ran back, and when she returned she had something under her coat which she slipped into the carriage under the baby's feet.

"I don't see why I cannot skate and take care of him, too," she said. "Mother was upstairs, so I got my skates from the back hall; what she does not know won't hurt her, and I can have some fun skating."

That is so," said the playmate, and off they went to the pond.

The baby was delighted to be wheeled to the pond among the skaters, and he crowed and screamed as the carriage glided over the smooth ice.

By and by he fell asleep, and Bella wheeled the carriage off the pond and placed it by a fence by some bushes.

"He will be all right there," she said, "and now I can have some fun skating."

So the baby slept and Bella skated, and after awhile it was time to go home, and no one thought of the baby.

Bella took off her skates and ran with the other girls to the lot to the road that led to the village.

Just as she entered the yard she thought of the baby; her mother saw her and ran to the door; but Bella did not stop, she ran down the lane to the road that led to the pond. She ran on and on across the lot to the fence where she had left the carriage, but the baby and carriage had disappeared.

Bella looked all around, but there was no carriage to be seen. Her first thought of the gypsies that were camped at the other side of the village and began to cry; what if they had stolen her baby brother and she would never see him again.

There was nothing to do but go home and tell her mother, and Bella went with a sad heart and hurrying feet, crying as though her heart would break.

She ran into the house, and there sat her mother with the baby on her right in her arms.

Bella ran up to him but her mother turning his head, he saw several men with rifles on the top of the cliff. Suddenly the sputter of the gun was another sputter and suddenly a searchlight struck him in the right breast and he felt the hot fire of lead. But it appeared to give him more strength and with apparently no effort he drove his boat through the water. There were answering shots from the submarine. They were firing at the searchlight on the cliff, and at the sputts of flame.

But the dark red spot on the front of the lad's shirt was growing larger. And there were holes in the bottom of the boat, through which the water was leaping. In one, the lad, another bullet struck him in the right arm and he gasped, then continued his rowing.

A hail from behind him and he suddenly stopped rowing. He had reached the submarine. Ropes were thrown to him and the staff pulled up close to the undersea craft. Kindly hands helped him aboard while the machine gun continued its sputtering and a hail of bullets struck the water near by. The whole thing had scarcely taken five minutes.

DEMAND FOR LITTLE CAVIES

Wanted for Use in Laboratory Work—Physicians Uses on Average 3,000 Every Week.

Boys often indulge in raising pigeons or rabbits for sale, but did you ever try guinea pigs, boys? There is a ready sale for the little cavies, as they are called. The demand is now so great for these that the supply is short of the demand. Cavies are used in laboratory work. One of these in Philadelphia uses on an average of 3,000 of these cavies a week, and tries to keep a dozen times that many thousand on hand. About that city are many people breeding guinea pigs for sale.

Germany used to supply the experiment market with these. There are guides to the raising of guinea pigs advertised. The price runs from $1 to more than 50 cents apiece, according to the size. Some sell as low as five ounces in weight and some as high as twelve or fourteen ounces.

GAME IS MOST INTERESTING

"My Lady Wants Her Whole Toilette" Causes Bedlam and Wild Scramble for Seats.

In this game the players are all seated in a ring, and each takes for a name some article of toilette, such as brush, glove, or something of the kind. In one of their number stands in the center of the room and twists a small tray or hand-board quickly round, at the same time calling out the name of one of the articles. She must run forward quickly and catch the tray before it falls. If she fails to do this she must take a turn in the ring, but if she catches it she takes the place of the loiterer.

Sometimes the cry is "My lady wants her whole toilette," and at these words everyone jumps up and makes a rush for the chairs, including the turner, and the one left without a seat must take her place in the center, and the game then goes on as before.

OBTAIN TOP MARKET PRICES

Pig-Club Members Make Their Hog Feeding a Business Enterprise, and Not a Venture.

It is the aim of every live-stock farmer to have the buyer say to them, "The top of the market to you." Experienced feeders achieve it, but rarely beginners.

Pig-club members have topped the market on the first load of pigs they raised. These members followed the instructions given them by the pig-club agent, and made their start right. They fed balanced rations, kept the pigs from the time they were born, and made their hog feeding a business enterprise, and not a venture.

In Oklahoma a boy and a girl sold their pigs to the two Oklahoma City packing houses at top prices, going 325 cents above the market price of the day. These hogs averaged 10 months of age and 244 pounds in weight. They were the most judged as perfect market type by the buyers, and only one sound below 90. The average dress out was 82 per cent unchilled.

The champion hog from Kingfisher county weighed 1,410 pounds on the hoof and dressed out 77 per cent unchilled. This eleven-months-old hog was on strict rations the first four months of his life, and then was fed tankage, corn, kitchen wastes, alcoa, and alfalfa the next seven months. He cost 6 cents per pound to raise, including purchase price, feed, and labor, and give the boy a profit of $1.90 in addition to the prized ribbon.

In Kentucky 15 pig-club boys, with an average age of little over 18 years, topped the Louisville market for the day by 25 cents a hundred-weight.

Something Bored.

Bobby was rehearsing the patriotic lines he was to spout at the school celebration.

"It—it—oh, yes—it pinnated well for our great and glorious—"

"Gimletted? Gimletted? Why, bobby!" his mother interrupted. "Augured, Bobby, Augured."

"Oh, you augured! I knew it was something they bored with."

Stomach Was Troubling Him.

"Mamma," queried little Tommy one day, "may I go to a picture show?"

"No, dear," replied his mother, "I'm afraid you might get lost."

"Well, I know where the dentist lives," said Tommy. "May I go and get a tooth pulled?"

Has Made Study of Buddha.

Dr. David Brainard Spooner, who proposes the theory that Buddha was not a Hindu, as is the prevailing belief, is an American, a native of New England, and for some time has been in the employ of the archeology department of the government of India. It is his belief that Buddha was a Persian and a renegade from Zoroastrianism, rather than a renegade from Hindu teaching, which also explains a reference to Buddha in the ancient Parsee scriptures as a heretic, a term which could not have been used had he not been connected originally with Zoroastrianism, believes Doctor Spooner. Among this explorer's achievements is the unearthing of Buddha's house from a mound near Peshawur in northwestern India.

Hurt Her Pride.

Two fair maids met in a shop, and after some gushing, in spite of the fact that they were hindering other customers:

"Oh, you have heard about Phyllis?" exclaimed the one in the white-lapped bodice suddenly.

"No," replied she of the pink plumes.

"What has she done now?"

"My dear"—in tones of horror—"she broke off her engagement."

"What ever for?" in tones of still greater horror.

"She went with her fiance to a basketball game, and now she says he got far more enthusiastic over the game than he has ever been about her."

Classifying Them.

"The orchestra leader last night had sound views."

"Exactly as 'mostly sound.'"

Very Much So.

"Could you select something breezy for the decorations of the party?"

"Why not, if it blows?—Adv.

And Falling Hair Use Cuticura Soap and Ointment. Trial Free.

When the scalp is itching because of dandruff, scrub with a shampoo with Cuticura Soap and hot water will be found most soothing and healing, especially if shampoo is preceded by a gentle application of Cuticura Ointment to the scalp skin.

Free sample each by mail with Book. Address Cuticura Laboratories, Dept. L, Boston. Sold everywhere.—Adv.

FAIR SEX IN THE MAJORITY

Preacher's Offer to Marry Persons Brought an Altogether Unlooked-For Response.

Some of the visiting ministers have told some good stories about one another during the Laymen's Missionary movement convention here, says the San Diego Union. This is one that was "handed" to Rev. Hugh L. Burleson.

A young couple came into his rooms just as he was going to begin service in the church and asked him to marry them. He said if they would wait until after the service he would give them a public wedding.

After the benediction he announced: "Now, will those persons wishing to be married please come forward." It is recorded in the story that eleven women and one man answered to the call.

An offset to that story is one told by Dr. Alonzo B. Petty of a woman who was before a judge asking for a divorce. The judge leaned over the desk and said to the woman:

"Madam, how long did you know this man before you were married?"

"Your honor," she said, "I was acquainted with him for eighteen months, but I never really knew him until I asked him for a dollar."

A Just Tribute.

"Why did Wombat leave his money to female seminary girls?"

"Well, you know he was a manufacturer of lye chips. And he always said the girls did a lot for his business."

Indignant Denial.

"My poor fellow, I fear you are suffering from a bad cold."

"Nothing of the kind, madam. I'm not a drug fiend."

Most people have lost more by crowding than they would by waiting their turn.

If a man has money his funny stories will always get a laugh.

Hogs Raised by a Member of Pig Club.

Ever Eat Grape-Nuts?

There's a vast army of physical and mental workers who do.

One reason—its delicious nut-like flavour.

Another—it is easily and quickly digested—generally in about one hour.

But the big reason is—Grape-Nuts, besides having delicious with cream or good milk is a well balanced ration—the utmost in sound nourishment.

Destiny Versus th' Rules o' Success

"Too Thin."

"Too thin" was given currency by Hon. Alexander Stephens of Georgia, in the United States congress of 1870. Some members had made a reply to Mr. Hagehens, and the latter had his chair wheeled out into the aisle and said in that shrill, piping voice, which always commanded attention: "Mr. Speaker, the gentleman's arguments are gratuitous assertions made up of whole cloth. And cloth, sir, so gauzy and thin that it will not hold water. It is entirely too thin, sir."

Top Price for Serial.

The largest price ever paid by an American magazine for serial rights in a book was $50,000, given by the Century company to Nicolay and Hay for their famous "Life of Lincoln." It is said that the editor of the Century, who first offered $10,000 and then doubled the bid, probably misread the exchange of glances between the authors when the first offer was made, they being surprised at the bigness of the first sum, which he in his eagerness immediately doubled.

"Th' fellow who don't take a vacation leaves town."

"It's th' feller who's alius in that girls th' opportunities."

"Do it yourself an' git th' pelf."

"Ever thing comes t' him who waits."

"There's never any quarrel over th' fact that a dollar's worth a dozen cents."

"Gray haired dancers are numbered among th' failures."

"Th' only time a feather is in th' lead it's time t' take th' course."

"Work with a will."

"Keep everlastingly at a thing till it becomes easy."

"An then what? Weak from monotony fer th' remainder o' yer little feller, round-shouldered by competition, pinched an' wan from loss o' sleep, bald, thin' worry, wasted thru lack o' nourishment, sour thru lack o' pleasant companionship, nervous thru fear o' a decliningr market you lay on th' shelf, a sensitive, bitter man, like a body cracker an' chuckle foolsy t' th' failures o' others, while a quarter of a million superfluous men outside your door an' give you up.

"There many fer pleasanter routes t' eternity than by the way o' th' road t' success."

(Protected by Adams Newspaper Service.)

An Authority.

"Know anything about shooting tigers?" asked the first traveler.

"I should say so!" answered the second traveler, who was chiefly conspicuous for his large diamond stickpin. "I managed one in vaudeville for seven years. Why, I'd have an woman on took her rifle and played 'The Star-Spangled Banner' on a musical saw, if it never failed to bring down the house."

His Deduction.

"What conclusion did you draw from your study of that ancient Egyptian mummy?" asked the professor of archeology. "Why," replied the superficial student, "I decided that the old Egyptians had their comic artists, the same as we have."

The KITCHEN CABINET

Life and success depend upon attention to, but mastery of environment.—Alden.

Wise men solve all skills and benefit their lives, but chiefly seek how to refine their souls.—Emerson.

MORE ABOUT FIRELESS COOKER.

For long, slow cooking the cooker is unsurpassed. Meats that are tough and need long cooking will be tender and delicious cooked the fireless way. One of the things to remember in fireless cooking is that little water is needed when steaming as there is little evaporation. When using the radiators, as is best in nearly all cooking, heat them until they scorch a piece of paper at once when laid upon them. Have the pot roast in a tight vessel and boiling hot when it is placed on the radiator, then cover and let cook until tender. Another radiator placed on top will hasten the cooking but need not be used for a stew.

For steaming puddings and brown bread, the cooking of rice, oatmeal and other cereals, for baking fruit cakes which are often so hard to bake in the oven, the cooker is an ideal saver of fuel and time.

The country housewife, as well as the city one, may prepare her Sunday dinner, go to church and enjoy the afternoon and a chat with her friends without hurrying home to cook dinner, for it will be all ready, never over cooked, boiled dry or undercooke in the fireless cooker. By careful preparation the cook knows to a minute how long certain foods need to cook and results never vary.

The flavors of meats, fish or fowl must be saved as when stewing, farmers with other ways of cooking, for by the slow process flavors are developed and brought out, the juices and natural flavors preserved.

Chicken a la Fireless.—Prepare the chicken as for frying, brown it in a little butter until all sides are evenly browned, in the dish in which it is to be cooked, season well. Place a hot stone in the cooker, put in the pot tightly covered. Put down the cooker lid and fasten tightly. Cook three hours for a five-pound chicken. When ready to serve place the pieces on the platter and make a gravy with thickened cream or top milk. This may be poured over the chicken or served in a gravy.

Every man is ready to give in a long catalogue of things he wants to do to find in the person of a friend, but very few of us are ready to confer even them in incredulous generosity.

SOME GOOD DRIED FRUITS.

When meeting an empty fruit closet remember the delicious dishes to be prepared from the dried fruits always at our command. Prunes are not half appreciated. Some people complain in agreement called them the "boarding house sauce." Let it be hard to get away from the idea that prunes are the last in sort.

Prunes washed and soaked over night and stewed in the water in which they were soaked without a bit of sugar make an extremely wholesome and most appetizing as a breakfast dish or in combination with other materials in various dishes.

Combined with apples in the proportion of one quarter of a dozen apples to one-half cupful of stoned stewed prunes makes a top dressing to pork chops, baked in the oven after seasoning with salt and pepper in a dish which can be served with the meat.

I hopped apple combined with raisins and used in pastry as a pie or pudding is a most tempting dish.

Dried apples used with molasses, soaked over night in the molasses and spices baked in little pots, make a rich dessy chopped for shortening.

Fig Marmalade.—Cut into pieces one pound of figs and three pounds of rhubarb. Add three pounds of sugar and the juice and grated rind of a lemon, mix and stand over night. In the morning simmer for a half hour until it looks clear, then seal.

Apricot Marmalade.—Wash five pounds of dried apricots. Cook slowly in water to cover until the stones may be easily removed after they have been soaked over night. Next morning cook and drain off and four pounds of sugar and a quarter of the juice in which they were stewed. Cook slowly until reduced to a marmalade.

IRONING MADE EASY.

The majority of women who do their own laundry work if asked which they prefer to do with choose the washing, for there is more variety in movement and they do not get so tired as they do standing for hours, usually on a hard, unelastic floor. There is something about ironing, however, which is most satisfactory for the nicely ironed clothes on the rack even growing more and more is a constant inspiration. You have something to show for your work.

Today the woman who is her own laundress eliminates all the work that is possible, wearing crepe underwear and dresses, thus cutting down the washing. At best ironing is a tiresome is tiring work, but by planning and forethought it may be made much easier. Before beginning see that all things needed are at hand, a fresh, clean cover on the ironing board, water for the irons and, if it is possible, an electric iron, for it saves much fatigue walking back and forth getting fresh irons, and a bowl of water and a clean cloth to dampen too if one wishes to remove a soiled spot.

Set up and cover all on while ironing is a great strength saver, the foot may rest on a chair round and the small pieces, such as handkerchiefs and towels and pillow cases, ironed quite as well as when standing.

When ironing the larger pieces fold a thick rug in several folds and place under the foot.

An electric mangle is a wonderful aid in the household that has much laundry, for all the flat pieces can be quickly ironed and much better than by hand work.

Have the ironing board of the right height so that the work may be done with the least possible fatigue. A room well ventilated is another essential in making ironing more comfortable, and few minutes in a darkened room on a comfortable couch will rest one so that the work may be resumed and finished without exhausting fatigue.

I wish, I can, I will, are the three trumpet blows to victory.

Happiness is a fair, not an attainment, it comes from within, not from possession without.

CHEESE COMBINATIONS.

The wholesome cheese is a food in itself and when combined with vegetables makes a nutritious dish. Baked Cabbage With Cheese.—Remove the heart and outer leaves of a firm head of cabbage. Cook until tender in boiling, salted water, unquartered. Drain and cut down the sides, fill with the cheese, sprinkle with buttered crumbs and brown in the oven.

Cheese Sauce.—Add a tablespoonful of butter to two of flour and cook until smooth, then add a cupful of milk, a dash of cayenne, a teaspoonful each of salt and a cupful of dry grated cheese. Pour at once into and around the dish in which it is to be served. The cheese is added or it will become stringy.

A cheese to be right for cooking, such as rarebits and fondues, should have some punch and bite, not tame.

Horse-Radish Sauce.—Take a half cupful of grated horse-radish root, one and a half cupfuls of milk, two teaspoonfuls of sugar and a third of a cupful of soft bread crumbs; cook together twenty minutes in a double boiler, then add three tablespoonfuls of vinegar and a teaspoonful each of salt and cinnamon. Serve hot.

Cheese With Rice.—Take a cupful of cooked rice, add a half teaspoonful of salt, and a cupful and a third of grated cheese, a half cupful of hot milk then add four egg yolks beaten thick and fold in the stiffly-beaten whites. Pour into a buttered baking dish and bake in a moderate oven. Serve as soon as firm.

Nellie Maxwell

Acts as a Shield.

"I don't like to have my husband pop up before me with the breakfast tabig. 'Do you?'

"Oh, I don't know. It keeps the grapefruit from spattering as far as it otherwise might."

Combination Spoiled.

He—She married a fool with barrels of money.

She—Then why isn't she happy?

He—Marriage brought blue to his sense.—Boston Evening Transcript.

Mere Coincidence.

Little Sister—Ma, Willie kept the largest piece of the apple for himself.

Willie—No, I didn't, ma.

Little Sister—But I see the largest half in your hand.

Willie—Excuse me, ma. There being but two halves to an apple, there can't be any "largest."

Not by a Long Way.

"Do man dat goes lookin' fuh trouble," said Uncle Ebon, "doesn't most always get de easy kind he had made his mis'ake in."

Selfish and Unselfish.

The selfish man rarely offers the world of human kindness until he has skimmed the cream for himself, while the unselfish man, who is rare, often gives the very cream to others and keeps for himself what is left.

Doubtful.

When a man's picture appears in print now the public has to stop and read to find out whether he is a candidate or merely was cured of something.

Imitation.

The Tall Girl—They are very effectionate in public.

The Short Girl—But they say it's all affectionat' at home.

The Tall Girl—Strange. I thought they were a pair of turtle doves.

The Short Girl—No; merely mock turtle doves.

Business Change.

Business is not nearly as sociable as it was when the value of a sale was estimated principally by his quality to tell funny stories.

Dressy Suit in Taffeta Silk

The nearly-grown miss this year shares with her elders the charm that lies in dressy suits of taffeta silk. As ladies the modes for youthful wearers, suits made for her are less elaborate than those designed for her older sisters, but they have decorations enough to be interesting.

Coats in three silk models are made in a great diversity of styles, but all of them may be classed as short. Skirts are not as full as those made for indoor wear, and depend for embellishment upon bands of tucks rather than draperies. Colors are attractive, with fairly light shades of green and blue, as well as lighter tans and grays, much in evidence.

An old fashion which has been revived appears in the full quillings of box-plaited silk with "picked" edges used as bands for trimming both skirts and coats. These quillings help out in achieving the popular dare at the bottom of coats and in supplying the hooded effects and horizontal lines that place the otherwise plain skirts in the mode.

A very pretty example of the taffeta suit, as developed for a miss in the nutchborhood of seventeen years, is shown here. It is simple enough to be made at home, and an ambitious girl may even undertake it for herself, by the aid of a pattern. The skirt is plain except for three tucks between the waist and knees, and is cut to flare with most of its fullness at the sides and in the back. It is shoe-top length and has a three-inch hem. There is a girdle of taffeta made of a wide bias piece at the waist, to be worn over the plain narrow belt that supports the skirt.

The straight little coat is set on to a small yoke. It is ornamented with a group of four tucks, near the bottom, also. The sleeves are cut to widen toward the hands. In many suits the widened sleeve is finished with a border of velvet, but in this model the fullness of the sleeves is confined near the hand by rows of shirrings. The shirrings form a cuff, which is heated by a band of velvet.

The neck is finished with a flaring collar and a tie of the silk. A collar of scalloped organdie overlays the silk one, both of them opening in a small V at the front and wired to stand up at the back.

Group of Modish Black Hats

Among tailored hats the always popular black has more than usual favor this season than it can usually claim. It takes high art and fine materials as a rule, to save the black hat from being commonplace. But the present season has developed a fad for lustrous surfaces, almost everything in millinery is shiny, and black is the deemed from its somberness by its brilliance.

In hats, and in many of their trimmings, a black lacquer or varnish contributes the shine, and black velvet and white striped satin. It is trimmed with a folded roller of stovepipe ribbon and a bead ornament in black and white applied to the crown.

Julia Bottomley

Princess Model.

In some of the most fashionable models the princess effect is adhered to. It is gained in different ways. Some hats are made full in the back, with tucks by means of many small tucks. Sometimes the whole frock is cut in long shaped gores.

The spring turbans are not worn straight on the head, but tipped slightly to one side.

Rose-Colored Lamp Shades.

Green may be a good color for the eyes.

Violet may be an esthetic color.

Yellow may be a cheerful color.

But rose color is the most becoming color for a lampshade.

Fortunately, most people realize this fact. At hotels and restaurants and in private homes where the decorations are planned to emphasize the best in the persons who live among them, rose colored lampshades are much in vogue. Any woman knows that her color glows more under a rose light than under any other, that wrinkles are minimized, that skin is softened and that every vestige of prettiness she possesses is emphasized by this soft color.

Black Dessert Sets.

Jet black glass with a fine line of white just at the edge of each dish is the latest idea for a dessert set. It is unique, and one should add to it the brilliancy of oriental fruits and rose and orange colored bonbons.

"YOU TOLD ME THE TRUTH AND I WANT THE PEOPLE TO KNOW IT"

The following unsolicited letter has been received from Mr. J. F. Ward of Donalda, Alberta. It is a plain statement of conditions as Mr. Ward has found them:

A Settlier's Plain Letter.

"It is with pleasure I drop a line to you. We had a good year. Off of 65 acres, oats and wheat, I got over 2,000 bushels of wheat and oats. Oats went here from 50 to 100 bushels per acre, and wheat from 35 to 52 per acre. Just see threshing here one year and have over 700 bushels of wheat. It is now over $1.00 per bushel. Oats is 42 cents, and going up. You told me the truth, and I want the people of Toledo to know it. Hogs are 8¾ cents; cattle are high. Canada is good enough for me. I have 8 good horses. I sold 2 good colts, 2 cows and 18 head of hogs and killed 2. I have 6 hogs left. I get 400 bushels of potatoes off an acre and a good garden last summer, fine celery and good onions. One neighbor had over 1,200 bushels of wheat, and sold over 1700 of hogs and 2,000 bushels of oats. This is a great country. If you should tell the people of Toledo of this it would get some of them thinking. The soil is a rich black loam, and a pleasure to work it.

"We have a good farm. We have a flowing well with soft water. It is the best water in the country. Some people think they got to go to war when they come out here. They need not be afraid of war. There is no war tax on land; only school tax, $12.00 on 160 acres, and road tax of two days with your team. I tell you the truth, there is no land to go around Toledo as good as our land here in Alberta. If anybody wants to write us, give them our address.

"We have had nice weather. We have had 8 quite good for one week, but no rain and sleet, and the sun shines nearly every day, and it is hot in the sun. Coal is $8.25 per ton. The people are very nice and good here. We are well enjoying the West. The horses and cows are feeding on the prairies all the winter. We just have two horses in the stable to go to town with. Yours truly, (Sgd.) J. F. WARD, Donalda, Alberta, Feb. 9, 1916."

Statement of Steve Schweitzberger

"I was born in Wisconsin, but moved with my parents when a boy to Stephen Co., Iowa. I was there farming for 50 years. I sold my land there for over $200 an acre. I moved to Saskatchewan, and located near Bethcrest in the spring of 1912. I bought a half section of land. I have good neighbors. I feel quite at home here the same as in Iowa. We have perfect safety and no trouble in frying up to the laws in force. My taxes are about $65 a year on the half section for everything. I have had splendid crops. Wheat in 1915 yiel

The Young American Style

Hart Schaffner & Marx

VARSITY Fifty Five

Copyright Hart Schaffner & Marx

There's more than just good lines to these suit designs— the fabrics carry out the Varsity Fifty Five idea; many of them are woven exclusively for Hart Schaffner & Marx; new stripes, checks, overplaids, rich mixtures, tweeds, cassimeres, crashes, homespuns, and worsteds.

Weaves and patterns that are new to you.

$20.00

And up.

SPRING IS HERE

And With it comes Spring Housecleaning.

No doubt you have a room or two which need re-decorating. If it is Wall Paper, we can supply your wants with the very latest designs and colorings at very moderate prices. Or perhaps you wish to Kalsomine your walls, if so you cannot find anything better than Hygienic. It looks better, flows more freely showing no laps and will not rub off and will cover more surface than any other Kalsomine made.

Or you may want a Flat Wall Paint. If so there is nothing to equal Velumina. It is a sanitary flat paint producing a beautiful egg shell finish and of the softest tones obtainable. It has a varnishy capacity, marked by none—and is washable.

We can do it and get color cards.

Abstract & Engineering Co.

Slim Baker is back home again from Florida.

Sam Beaubien, of Holly, was in the city over Sunday.

Art Van Allsburg has bought the Jess Smith draping outfit.

A. H. Thompson, who spent the past winter at Alma, is home again.

Wm. Cook, supervisor of Charlevoix township, is out with a new Overland car.

Mrs. R. N. Faulkner is quite ill of pleuro-pneumonia at her home in this city.

Chas. Graves and his men have just finished a fine job of re-decorating at the State Savings bank.

Roy Swinton, an instructor in the civil engineering department is here on a visit to his parents and brother.

W. J. Rachow, cashier of the Charlevoix State Savings Bank, was at Grand Rapids on business the first of the week.

Go to the Majestic Theatre Friday night, this week, and see Edith Taliaferro in "Young Romance. Friday the 14th.

Palm Sunday will be observed at the Congregational church next Sunday morning. Appropriate music will be sung by the men's choir.

George Durance has resigned the office of Supervisor of Charlevoix township, and Wm. Cook has been appointed by the township board.

The SENTINEL office is fully stocked with anything you want in the line of job printing, and our work will bear the closest inspection.

Frank Glassford is building a bungalow for Harvey Campbell on his lot on the corner of Mason street and Park avenue, to be occupied this summer.

Chas. Henricksen's new 42 foot motor fishing boat Josephine is completed and about ready for her baptism. She is one of the prettiest of the local fleet.

Mr. and Mrs. John Baker and daughter Dorris returned home from Florida last week. After a short rest they will begin the work of putting the Beach Hotel in shape for the summer business.

Fred Thomas took 18 mechanics to begin work on his up-lake contract. He has established a camp on the premises. The work embraces three cottages, a garage and other buildings, and a dock. There will be three months work.

Quality Arbor Nor. 1391 will hold a pic nic social at Marion Town Hall on Friday, April 28th. A good entertainment is being provided, the principle feature being a farce, "Borrowing Trouble." Everybody invited. Ladies each bring a pie, gentlemen their pocket books.

The local fish hatchery has completed the hatching of nine millions of lake trout eggs, which will be planted on the fishing grounds of this vicinity as soon as the boats can get out. A little later thirty millions of whitefish eggs will be hatched and planted.

What might have been a bad fire if it had occurred three hours later in the day, was promptly extinguished by the firemen at five o'clock Saturday evening, when a spark from the furnace chimney ignited the roof of H. S. Harsha's residence. The fire did not get below the shingles.

C. N. Briggs, a single weaver of this city, died very suddenly in a rooming house at Traverse City last Thursday night, probably of heart disease. He was a member of Petoskey Lodge L. O. O. F. and the Moose of that city. The funeral took place here Monday morning under the auspices of Round Lake Lodge of Odd Fellows. Both the lodges were present. Deceased leaves a wife and son.

Invitations were extended to the parents of the second grade pupils who are being instructed by Miss Audrey Correll, at the central school, to listen to a reading exhibition last Friday afternoon. A new reader, "Stories to Act," was read. The children entered into the spirit of the stories, and read and acted their parts with enjoyment. Miss Correll is to be congratulated that her pupils do such creditable work.

A series of housebreaking episodes by boys between the ages of twelve and sixteen have aroused Boyne City authorities to action in a determined effort to stop the depredations. The drag net brought in six boys who confessed to breaking and entering three different homes one night. Their loot ranging from money and jewelry to guns, false pieces of brass, etc. At the hearing the lads implicated several other boys, three of whom attempt to run away but were apprehended at Boyne Falls when they sought to board a southbound G. R. & I. train. Three Boyne City dealers in junk have been arrested charged with purchasing junk from children under the age of sixteen without a written order from their parents. Pleas of guilty are anticipated.

Capt. G. Geiken is yet quite ill at his home.

Henry Richardt, of Bellaire, was in the city Friday.

Miss Olive Eckinger is visiting friends in Boyne City this week.

Come to the Easter supper at the Congregational church Friday, April 14.

The application for a $15,000 Carnegie library for Boyne City has been approved.

Sickness in our office force has considerably impaired the quality of this issue.

Mrs. R. B. Armstrong left Monday for Chicago and Saginaw to visit her daughters.

J. J. Gaskin Jr., who spent the winter in California is home again for the summer.

Harvey Campbell left Monday to join his boat, the Simons, of which he is chief engineer.

Geo. Gladon "Sugar Bowl" has been improved by installing an entirely new outfit of interior furnishings.

Marguerite Clark in "The Goose Girl" at the Majestic Theatre next Tuesday night, April 18th. Don't miss it.

Sacred Cantata, "The Seven Last Words," by Berwald, at the Congregational church Good Friday evening, 8:15.

Miss Carrie Geiken, head nurse in a leading St. Louis hospital, arrived here Friday on account of the illness of her father.

Frank Sears is putting the finishing touches on a speed motor boat that he positively asserts will clean up on the rest of the bunch.

John Fred Fisk, who conducted a well known and popular summer resort near Central Lake, died suddenly at his resort home Monday.

Monday night, April 17, at the Majestic Theatre, David Higgins will be seen on the screen in his original role in the famous racing play "His Last Dollar."

The celebrated Rush-Horn lawsuit is being threshed out at the court house before Judge Sullivan, of Muskegon. It will last all this week, and perhaps longer.

On Tuesday, April 18th, will occur the annual Easter supper given under the auspices of the Ladies' M. E. Aid. Supper will be served from 5:30 to 7. Tickets 25c.

Prosecutor Lewis has received word from Lansing that the automovile license must be paid on or before April 15th. All owners failing to comply are subject to arrest.

Big Maccabee rally Friday night. Great Commander Thompson, of Grand Rapids, will be present. Supper will be served at close of meeting. Every member urged to attend.

There is every probability that a fish hatchery for Charlevoix is a certainty. News from Washington seems to cinch the proposition. And it will be one of the best on fresh water.

It has been decided that this season the steamer City of Boyne, on the Beaver Island run, will take in Petoskey and Harbor Springs both ways, on Tuesdays and Fridays.

Paul Harsha, a U. of M. student in electrical engineering, and Harry Allcock, who is taking a business course in the same school, have arrived home on a ten days vacation.

Board of Education

April 4, 1916.

Regular meeting of the Board was called to order by President Hampton. Trustees present. Hampton, Norcross, Bridge and Hiller.

Absent, Glassford.

The treasurer's report shows a balance on hand of $6,697.06.

The following bills were presented and read:

General Fund Orders.

201 Mich. State Tel. Co. rent	1.50
202 A. E. Mason, janitor supplies	2.25
203 Jess Smith, freight and drayage	1.75
204 C. N. Briggs, janitor	50.00
205 Cecil Pooley, janitor	50.00
206 Wm. A. O. Allison, janitor	50.00
207 Mrs. Ella Bennett, janitor	50.00
208 Mrs. Lucia Blanchard, janitor	50.00
209 Sodder Photos, cleaning	1.50
210 Dawson Jobbs, cleaning	4.50
211 Irving Hallett, cleaning	4.50
212 J. L. Crane, hdw. and drayage	2.50
213 E. G. Hines & Co. supplies	2.50
214 Sanitary Specialty Mfg. Co. supplies	2.50
215 Superior Sanitary Products Co. supplies	1.75
216 Turner Brass Works, kitchenettes	1.75
217 Herbert Sandell, janitor	50.00

Library Fund.

218 P. F. Hoe, frieght and drayage	17.25
219 State Tele. Co. rent	1.50
220 Mich. State Tel. Co. rent	1.50
221 Junior Mag. Service, magazines	3.00

Teachers' Fund.

222 O. Sandell, teacher's pay roll	440.28

Moved and supported that the bills as read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

Moved and supported that during the ensuing year we dispense with a musical supervision, and that music be taught in the grades. Motion carried.

Moved and supported that in the future no more requests for an extra day at spring vacation be granted the teachers. Motion carried.

These minutes were read and approved and on motion the board adjourned. E. J. HILLER, Sec'y.

FOR SALE—Resort cottages well located. Houses and lots in any part of the city, also 14 acres close to city. Apply to H. S. Harsha.

KEITH HATS and VARSITY CAPS

JUST ARRIVED.

Barnard Doings.

You are asked to a poverty social, that is folks of the Royal Oaken is a goin to hev in ye old meeting house, April 14. All possess must ware close suitable for the occasion. All women that comes must ware calicer or plane gowns, or be subject to fines. All men must ware old clothes and outin shirts or be fined. Grumbin at fines 5c. Everybody must come or be fined. A speshul program for them that cum.

Easter exercises are being arranged by the Sunday school. The different classes are practicing and are looking forward to a fine service on April 23.

Mr. and Mrs. A. B. Clarke were the Barnard representatives at the quarterly conference at Atwood April 5.

Mrs. James Black entertained the Ladies Aid Tuesday. A goodly number were present and the usual business disposed of after a most sumptuous dinner was served by the hostess.

Much interest was shown in the S. S. service, Sunday. A very large attendance and an offering of $2.50. We lacked 13 of a hundred. Figure out if you helped to make the desired number.

Miss Lucile Lewis returned Tuesday from a two weeks visit at Boyne City and near Twinsky.

Mrs. Harold Jacobs was a guest over Sunday at her father's home.

William N. Lewis, of Boyne, spent several days at his Marion farm home last week.

Mrs. Reid Genett visited her sister, Mrs. A. B. Clark, over Sunday, driving back to Norwood in the evening to resume her duties as teacher.

Jesse Gregory was the lucky winner of a set of fine harness trimmings recently. Last November he purchased a ticket in Petoskey from a business firm.

The I. T. Class more than enjoyed their dancing practice Friday night at the church. Geo. Ager and Louie Shapton furnished the maple syrup, and the girls brought the biscuits. We have heard that there wasn't much of a chair practice.

Cora Crampton, of Detroit, spent several days at the home of Wm. Shapton.

Louie Shapton left Monday for Detroit where he will be employed at the Chancer auto works.

ACHES OF HOUSE CLEANING

The pains and aches caused by bruises, over-exertion and straining during house cleaning time are soothed away by Sloan's Liniment. No need to suffer this agony. Just apply Sloan's Liniment to the sore spots, rub gently a little. In a short time the pain leaves, you rest comfortably and enjoy a refreshing sleep. One grateful user writes: "Sloan's Liniment is worth its weight in gold." Keep a bottle on hand, use it against all soreness, Neuralgia and bruises. Kills pain. 25c. at your druggist.

Tommy Poses for the Films.

The human side of Tommy is delightfully manifested when he is under the fire of the cinema camera—and knows it. Occasionally a man loudly will announce that "my face will not be in the picture," but when the film is displayed it usually happens that he is one of the most prominent details of the incident. Generally the men love the idea of being shown on the screen in what they call "movie shows."

The officer and war office operators who are organizing the pictorial history of the war have had some quaint experiences. The soldiers no sooner catch sight of the operators at work than they begin to pose for the part. As a rule the first thing is to light a cigarette, to set the cap at a saucy tilt and to adopt a general air of extreme nonchalance. Others hastile their rifle with a demeanor of heroic ferocity, while a few affect the "Charlie Chaplin" style, as though the whole thing were a joke.—London Chronicle.

Consume Much Cocoa.

This country is the world's largest consumer of cocoa.

PILLS BEST FOR LIVER

Because they contain the best liver medicines, no matter how bitter or nauseating for the sweet sugar coating hides the taste. Dr. King's New Life Pills contain ingredients that put the liver working, move the bowels freely. No grips, no nausea, sold digestion. Just try a bottle of Dr. King's New Life Pills and notice how much better you feel. 25c. at your druggist.

ANNA CASE

THE MIRACLE GIRL

IN NEW YORK there are two phrases always used in conjunction in describing Anna Case: "A wonderful voice and a raving beauty." She is of surpassing physical charm--and she has a voice--such a voice, fresh and silvery; a soft caress, and yet youth's virilness in every note.

Hear Anna Case

Whenever the opportunity offers.

Miss no chance to hear this miraculously endowed American girl. The story of her life reads like a romance. She is the miracle girl of music.

It was Anna Case who first sang in comparison with Edison's Re-Creation of her voice to test his new art—to determine whether the Wizard had in fact achieved his ambition to Re-Create the human voice so perfectly that a singer's performance could not be distinguished from his record of it. Anna Case was the first to prove this to the world. Today over one hundred thousand of the most critical and cultured music lovers in America have heard similar tests. The musical critics of more than one hundred of the leading newspapers in this country have confessed that their trained ears cannot distinguish, *by actual or direct comparison*, an artist's performance from Edison's Re-Creation of it. Booklet of Critiques will be furnished on application.

Ask For

The New Edison

Forget the various trade names of the various talking machines. All talking machines are now like last year's fashions. Edison has developed a new art in music. It can be heard only in his new invention, the New Edison Diamond Disc Phonograph. If anyone claims to have a talking machine that equals the New Edison, ask them if it has ever been publicly tested in direct comparison with living artists, and if so, where—*and ask them also to let you see what the newspapers had to say about the test.*

ANNA CASE

of the Metropolitan singing in direct comparison with Edison's Re-creation of her glorious voice

Come to Us and Hear

Edison's actual Re-Creation of the world's greatest vocalists and instrumentalists. Ask for every kind of music. No form of music is beyond Edison's new art.

Berry Bros. Wagon Contest

We have four (4) Berry Brothers Wagons, like ones shown in our window which will be given to two Girls and two Boys on Monday, May 15th.

The contest for these wagons will be in the nature of a composition written by school children under 12 years and 8 years of age respectively, on the subject of: "BERRY BROTHERS PRODUCTS."

The four wagons to be awarded are as follows:

One (1) Wagon to the girl under 8 years of age
One (1) Wagon to the boy under 8 years of age
One (1) Wagon to the girl under 12 years of age
One (1) Wagon to the boy under 12 years of age

handing in to THE BLANCHARD HARDWARE STORE on or before Saturday, May 6th, the best composition on the above subject written to conform with the following rules.

Rule 1. Each composition limited to one hundred and fifty words.
Rule 2. Tell who Berry Brothers are, and what they manufacture.
Rule 3. Name five of their products, being careful about spelling and capitalization.
Rule 4. Name a few tests that Liquid Granite will stand.
Rule 5. Name two distinct uses Liquid Granite is intended for.

Neatness, grammar, capitalization and completeness will be taken into consideration in this contest, of which Mr. Lee C. Moore, representing Berry Brothers, will be judge.

BLANCHARD HARDWARE CO.

Try it just once, you will be happily surprised.

OUR PUBLIC FORUM

George M. Reynolds

ON COMPETITION AND COOPERATION.

The future growth of the United States and its ability to continue as one of the leading countries of the world depends upon cooperation of all lines of industries and of government in promoting business progress, for the prosperity of one industry reacts into and benefits other lines of business. Mr. George M. Reynolds, a leading Chicago banker, when asked to discuss business cooperation, said in part:

"Twenty-five years ago competition was the dominant spirit. The natural outcome was rate and price cutting followed by a series of railroad receiverships and mercantile failures, not money, and a disastrous ending number closed. The rolling passion seems to have been to keep a competitor down, regardless of consequences. Prices fell, employment was general and everybody suffered. The farmer could not get satisfactory prices for his crops to pay interest, to say nothing of lifting the mortgages. There were other contributing causes, but ruinous competition, the ceaseless scramble to build up a big volume of business, was responsible for a large part of the troubles.

"We have learned better. We have found that as a permanent aid to prosperity helpful cooperation ranks above destructive competition. The railroad official, manufacturer, merchant, farmer and laborer, have reached the very same conclusion, that in satisfying each other in the work of developing a nation they are doing those things that help themselves.

"During recent years we have all been busy studying costs, overhead charges and efficiency. If any of us operate at a loss it is bad for the community, the state and the nation. This economic truth has been brought out by our studies. We are now in a position to seek the best methods for our own business, and then see if our experience offers something for the advancement of others. The business man, transportation manager and farmer are drawing ever closer together today than ever before. There has always been a community of interest, but it was not discovered until we had gone through many periods of depression in which difficulties were multiplied by previous harmful competition. Now we are all trying to help the former increase the production of his farm, and he is helping the rest of us in the tremendous task of maintaining normal conditions.

"The spirit of cooperation is becoming more universal every day. Public officials are seeking the light and are beginning to realize that this political party that attends the most help to the various interests of the community, that devotes itself to encouraging harmony and keeping confidence alive instead of hampering business by too much restrictive legislation—will be the party likely to remain in power the longest. We must all pull together, our laws must not cripple any industry; we must ever keep in mind that the prosperity of one industry or line of business reaches into and benefits other lines of business."

School Commissioner's Column

May L. Stewart, Commissioner.

Spring visits begun. Ten schools visited on this second round. Part of these visited for the third time.

A new rotary attachment for manifolding has been ordered for the commissioner's office. This is the duplicator which the supervisors authorized the purchase of to accompany the Underwood typewriter of last fall. One thing at a time. The duplicator will be a second lesson.

Spring promotion tests sent out this week.

Blanks for director's triplicate reports are on their way from Lansing.

Corn clubs in East Jordan and vicinity will be organized this week.

The large diplomas of honor for one year of perfect attendance are in demand now for the schools closing at the end of seven months. Pupils should be careful not to let spring fever or the blue bird interfere with the attendance record at the last of the year.

Several school boards have issued invitations to the state inspector for standard schools to meet with them this spring. This does not bind them in any way. They merely wish to know where they stand.

Norwood News

Miss Jessie Stafford went to East Jordan Friday.

Miss Drusilla Richardson who has spent the past three months in Charlevoix, with her sister Mrs. John McCall, returned to her home Friday.

James Chase and Mr. Jones attended the K. P. play at the Charlevoix theatre Wednesday evening.

The Misses Faye Wagner and Nell Carmen visited at Frank Richardson's the latter part of the week.

Best everyone is busy these days making maple syrup.

School opened again Monday after one week vacation.

Mr. and Mrs. Ferguson returned to their home Saturday after spending the past two weeks in Charlevoix.

The National Guard had their regular meeting at the town hall Saturday eve.

Mr. and Mrs. M. Richardson have moved into the Wm. Hoer farm near Atwood.

The Kingsley boys of Atwood visited at H. Wagner's Sunday.

Mr. and Mrs. Ted Pearl have returned to their home in Charlevoix.

The Santoos Family have returned from Detroit and are now located on their farm north of Norwood.

Will Alward bought a horse at the Mrs. Brown's sale.

Mrs. Thompson of Barnard visited at Rev. Good's Monday, April 3rd.

About twenty friends of Russel Spears met at his home Saturday to help celebrate his birthday.

The first auto seen in Norwood this spring was a Ford going through town Saturday.

Mr. and Mrs. Henry Superaw spent Sunday with Mrs. Will Superaw and family.

When East Meets West.

An amusing situation of the modesty of the Chinese in matters of dress is given by Elizabeth Cooper in her new book, "The Harim and the Purdah."

"When one of the imperial princes was on route to England," she writes, "he attended his first foreign dinner in Shanghai. About twenty-five of the guests were English and American ladies, dressed in their most elaborate gowns, which means extreme decolete.

"The attaches of the prince had tried to request his highness for the sight he was to witness, but they had evidently underestimated its startling qualities, because when the prince arrived and gave one amazed look at his hostess and the line of wading ladies he was nonplused.

"He bowed politely for his interpreter, and not receiving aid from him, put down his head, shut his eyes, and bravely stumbled around the room, groping blindly for each lady's hand, as he had been informed that he should shake hands with them."

Meant Well, But—

Viscount French of Ypres often tells an amusing story about a French reviewer that he attended a good many years ago.

General French—as he then was—attended the men's dinner in camp one day, and as he puffed on his cigar he noticed that 300 young Frenchmen had nothing to smoke whatever.

Accordingly, he sent to his tent for three boxes of Havanas and these were quickly distributed among the troops. A rare treat, truly.

To show their gratitude the soldiers, without consulting with their sergeants, lined up in two files, marched toward the English general, and, raising their right hands to their caps and holding their lighted cigars in their left hands, they shouted as with one voice:

"Vive la Russie!"

They had mistaken the uniform.—Washington Star.

Minces Are Ripe.

Jay was spending the day with his grandmother. Being only three and one-half he was not allowed the variety of food that the grownups had. When dessert came and he was served with a diminutive piece of mince pie, his joy and surprise almost overcame him. With an air of ingratiating interest and dignity, he said: "Why, mamma, I didn't know minces were ripe."—Exchange.

Butter Statistics.

The receipts of butter in 1915 were 281,650,000 pounds, and in 1914 264,400,000 in the five cities, Boston, Chicago, Milwaukee, St. Louis and San Francisco. New York received 2,124,000 packages in 1915 and 2,013,000 in 1914.

How to Cure Coughs and Colds.

Keep out of Drafts. Avoid Exposure. Eat and Live Right and Take Dr. King's New Discovery.

You catch cold because your system is below normal and finds itself unable to throw off the cold germs. To recover you should first take a remedy to kill the germs. Then be careful of your eating. Avoid exposure. Go to bed early and save your strength in every possible way. To kill the germs take Dr. King's New Discovery.

Just the tonic Dr. King's New Discovery is also is an excellent cough and cold remedy. Don't endure the annoyance of coughs and colds. Don't keep on suffering. Don't take the risk of more serious illness. Take Dr. King's New Discovery. Watch your eating and habits. You will find your cough and cold under easy and natural control and be assured of a speedy recovery. At all druggists.

BEFORE THE TROUBLES COME

Why It Is Easy for Housekeeper to Be Pleasant in the Early Morning Hours.

It was the first thing I noticed in the office of the busy man—a little square of pasteboard with this statement: "Be pleasant until ten o'clock in the morning and the rest of the day will take care of itself." Probably the thing that made it strike in at my first glance was the fact that it was after ten, and I had come to ask a favor of a busy man, a writer in the Indianapolis News says. I, for stayed pleasant only till ten o'clock I wasn't certain of the successful outcome of my venture, but when he entered the little room I saw at a glance that his early morning attitude toward life had not yet worn off. He was kind, courteous, gentlemanly, and I shall remember him as living up to his motto.

Has would it work under all conditions? I'd hate to say that it isn't true—the statement that it you're pleasant until ten o'clock the rest of the day will take care of itself—because the man who said it is gone, and can't argue the question with me, but I can say that maybe he hasn't tried it out in all trades. Take housekeeping, for instance! Nearly any housekeeper can be pleasant until ten o'clock, for it is after that time when things begin to happen. Who ever heard of dinner burning before 10 a. m.? Agents don't usually begin to ring the doorbell until about that time. Usually the telephone calls begin to come in after ten, notifying you that you must make your number of church calls immediately, get someone to help with your table at the next church supper, be sure to attend an important committee meeting, be at the next club meeting without fail, etc.

If unexpected friends or relatives are going to drop in for dinner it will be after ten o'clock. The postman brings all your bad news after ten. The afternoon bring more agents, and callers, welcome and unwelcome. The baby has the colic in the afternoon, if he's going to have it at all, and the next aged one is cross if he fails to get his nap, and the older ones come tramping in from school with muddy feet, noisy voices and empty stomachs. Then the man of the house may put in a call for a hurry-up supper so he can get to an important lodge meeting on time. In fact, it seems that all the aggravating, brain-fag ging, back-breaking hours in the business of being a housemaker come after ten o'clock in the morning.

Maybe some day we will get started being so very, very pleasant early in the morning that it will be like sitting down a steep hill, impossible for us to stop—but some of us will have to have a right smart push to get us started.

Prison Frankness.

It was the dinner hour, and the prison inspectors were hurrying over the official round. They asked several questions quickly.

"I am here, gentlemen," explained the pickpocket, when the warden turned his back, "as the result of a moment of abstraction."

"And I," observed the incendiary, "because of an unfortunate habit of making light of things."

"The reason I am here," chimed in the forger, "is simply on account of a natural desire to make a name for myself."

"And I," added the burglar, "through neglect, but taking advantage of an opening which was offered in a large mercantile establishment."

Kept on Ironing.

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by RAY WALTERS

COPYRIGHT BY DODD, MEAD AND COMPANY

SYNOPSIS.

Billets of Dalby's lumber camp directs a stranger to the place of Sandry, the lumberjack himself. Young Jim Dalby, son of the owner, is in the camp, ostensibly with the camp and the work. He gives Billets a position in the camp. Jim and Sandry are in love with Mamie Ordway, to the despair of Sal, he does not love Jim, and Mamie, who loves Sandry, cares for Jim because he is the boss's son. Sandry is a giant in strength, but a timid man in the presence of a woman. Sandy, a musician without a job, is in the camp. Sandy and Billets are friends. Sandy's mandolin is the inspiration of the camp. Sandy and Billets are in the Yellow Pines region. Magnificent stands of timber. Sandy and Billets are ready to go to work. Jim is expected to arrive. Jim is an effete young man

BANKS THEIR VICTIMS

NEAT SWINDLE PRACTICED BY PAIR OF ROGUES.

Man With Certified Check, and Fat "Detective," Make a Handsome Sum Easily and Run Small Risk of Detection.

A tall, well-dressed young man strode vigorously into a large bank. He walked to one of the glass-covered desks, took from his pocket a piece of paper, scribbled something upon it and went to the paying teller's window.

"I would be obliged if you will give me that in new fifties," said the young man with a certain air of positiveness.

It was a certified check for $850. The paying teller examined it, recounted the slip after of the bank and counted out 17 new $50 bills and slipped a little rubber band around them.

Just as the tall man started from the window with his money in his overcoat pocket a shorter, older and fatter man edged up alongside of him.

"If you move a step or say a word I'll shoot you for the crook you are," said the stout one.

At the same time he shoved a pistol against the side of the younger man and handed a card through the window to the paying teller. "Pinkerton," was there in big type and below a man's name as special detective.

"This fellow," said the man with the gun, "is a counterfeiter wanted in Cincinnati. Now hand back that money," he said to the captured criminal. The little sheaf of new fifties was returned.

"If you will let me take that check I'll do the rest," added the detective, and the obliging teller returned it.

There had been no noise, no excitement and no observers to this odd transaction. When the pair left the bank they didn't go to a police station, but to another bank not 200 feet away.

There they went through exactly the same performance—cost 17 new $50 bills, handed the little bundle back and also got their alleged bogus check.

And from this second bank they went to six others in the space of less than an hour. Later in the day when counting up their cash eight bank tellers made a remarkable discovery.

Each one was shy, as the poker players say, exactly $150.

What happened was this: While the stout confederate posing as a detective went through his role, the other slipped three of the $50 bills from the rubber-bound sheaf and returned not 17, but only 14.

Unless you stop to count them, 14 new bills feel and look as much like 17 as one gallon pig looks like another. It was done so quickly the tellers didn't seem to think it necessary to count the returned cash.

As for the check for $850. It was really genuine and the swindlers got back that money before leaving town with their $1,200 in those nice new fifties.—Philadelphia Ledger.

Didn't Have to Pawn Her Ring.

A woman called at the loan agency of the board of public welfare and offered a diamond ring as security for a small loan.

"I pawned my ring here last summer; I wonder whether you still have it?" she asked the clerk.

"How much was lent on it?" the clerk asked.

"Five hundred dollars. I simply couldn't get the money together to redeem it."

"We sold your ring at auction the other day for $125. You have $25 coming."

Ralph Jerry, attorney for the agency, paid the woman the balance due her. She didn't pawn the cheap ring and went away surprised and happy.

About two hundred other patrons of the agency have balances due them, ranging in size from five cents to $150. This last amount was left last Monday and Tuesday. All unredeemed pledges were sold, and in cases where the sale brought less than the amount loaned, the agency stands the loss.—Kansas City Star.

British Savings Are Large.

In a written answer to a parliamentary question, Mr. Pease says that the amount of deposits in the post office savings banks in England and Wales, according to the last return, dated December 31, 1914, was $815,772,000. The total for the whole of the United Kingdom was $952,666,000.

It is estimated that the total at the present time is not much less than this figure.

Deposits have stroaded withdrawals during many months of the current year, but some twenty million have been diverted to the war loan.

VOLUME 47 — Charlevoix, Michigan, Thursday, April 20, 1916. — NUMBER 1

Spring Seeds--

To be sure that you are going to get results, all seeds planted should be tested and then you will know what to expect.

We have just received a large quantity of Seed Testers and are issuing them for testing corn and beans right now. If you would like to test your seeds come in and we will be glad to hand you the Testers and you can use them yourself.

On the other hand, if you will bring in 100 seeds of any variety, we will test it for you and hand you report. For anything in the way of Seed Testing, come in and see us and we will do it for you free of charge or give you a seed tester and you can do it at home.

We have money to loan on first class real estate security or secured notes at the usual rates.

ROOSEVELT OUT FOR PRESIDENT

NAME WILL BE PLACED BEFORE THE CONVENTION JUNE 7, IN CHICAGO

Theodore Roosevelt is again out in the open as a candidate for the republican nomination for president of the United States. The fight which had been made by his followers to have him named when the convention meets in Chicago June 7 will be carried on with redoubled vigor from this time, ahead of all quibble and protest.

The colonel's position, summed in a few words, is this: He is in a receptive mood, ready to head the fight against Wilsonism and for adequate preparedness and Americanism if the country wants him, and that desire is reflected in the action of the republican convention.

The colonel made known his attitude in a conversation with a visitor from a nearby state who has been mentioned for concurrence and expects to go to the republican convention as a delegate.

He told this candidate, among other things, not to expect him to the colonel's "puny four" on a single issue he had raised if he was nominated. He was not for war, he said, in fact, he abhorred war, but felt that preparedness was the only guarantee of peace.

LAKE FLEETS ARE WAITING FOR OPENING

"When will the ice go out of the straits?" is the big question in every port on the Great Lakes. Hiding at anchor in parts along the lakes are hundreds of steamers, loaded to the gunwales with ore, coal and grain waiting for word that "the straits are open."

An early start means millions of gain ahead of competitors. Some times the straits have opened as early as April 10; in other years not until May 1. Shipping men aren't going to waste any time setting started this year on account of the great rivalry for ore and grain.

The mining companies in Upper Michigan are anxious for coal—their winter supply being nearly exhausted—and they are offering big money to the vessel men who will bring the first cargoes into port.

The heaviest traffic in the history of the Great Lakes is predicted for this season by Assistant Secretary of Commerce Sweet. He has just returned from a visit to the lakes region and he expects 60,000,000 net tons of ore, thirty-three million tons of coal and fourteen million tons of grain. He said that vessels out of commission for two or three years are being fitted up. The largest previous season was 1913, with 100,000,000 net tons compared with 107,000,000 estimated for this season.

So great is the volume of freight to be moved that every day lost is an important consideration and the lake fleet will put out as soon as ice crushers can break a channel through St. Mary's river and Whitefish bay. An effort will be made to force navigation into Keewatin by April 15th if the condition of the ice allows it. Never before have the lakes lined up such an enormous tonnage to be moved. The prosperity of the country is so free, that both merchant furnaces and steel plants are in need of ore. In fact lake vessels have booked all the ore that they can possibly deliver during 1916 and with an unprecedented volume of coal and grain also to be transported lake vessels will have to move with the utmost dispatch to fulfill their contract requirements.

There will not be an idle ship anywhere on the lakes during the coming season and any competent man can get a job aboard ship by merely applying for it. Wages moreover have been sharply advanced all along the line. Deckhands without any previous experience are being paid $35 per month, wheelsmen, and watchmen $40 per month, second mates $100 per month, first mates $140 per month, and captains $2,400 per annum.

Had No Relief in Balloons.

Dr. Samuel Johnson heard so much talk about balloons in the last year of his life (1784) that he became unspeakably bored, and cautioned his friends about bringing up that subject of conversation when in his company. He was confident that the balloon could serve no good purpose but that of furnishing a rather foolish and decidedly dangerous amusement to the wealthy few.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HARSHA.

CHARLEVOIX COMMERCIAL ASSOCIATION

ORGANIZATION EFFECTED TO PROMOTE GROWTH AND BUSINESS PROSPERITY OF CHARLEVOIX

A "Greater Charlevoix" is the avowed purpose of the organized business men of Charlevoix. The "Charlevoix Commercial Association" succeeds the "Committee of Twenty-One." It starts out upon its mission of betterment of local business activity with the injection of new blood into the somewhat stagnant veins of our business anatomy. The following officers and committees took hold of the task last Friday night, and the names cannot fail to inspire new and greater hopes of the future:

President—J. L. Crane.
Vice President—A. A. Swinton.
Secretary-Treasurer—E. L. Dawson.
Board of Directors—A. A. Swinton, H. K. Allen, Ben Brown.

COMMITTEES:

Membership—H. R. Fowler, A. E. Mason, Walter Taylor.
Finance—M. A. Levinson, Earl Miller, E. L. Dawson.
Publicity—H. K. Allen, A. A. Swinton, Ben Brown.
Credits—Chas. E. See, A. Bergeon.
New Industries—Frank Metcalf, C. Dianto, Lawrence McCann.

Now, knockers and croakers to the rear! "New industries" should constitute the chief purpose of the association, as it doubtless will, as the summer resort business is so firmly established, backed by every favorable condition, that it will augment itself by the force of its own momentum. Charlevoix has reached a point in this phase of its prosperity that it cannot be checked. As a summer resort it is the "Queen of the North," and of itself constitutes an industry, smokeless and noiseless, yet potent in its contribution to the general good.

But, as we have from time to time pointed out, we have permitted ourselves to slumber winters on what we gain summers. The paper has contended that we should reach out after fruits that ripen when the frosts come. We have deplored the fact, generally conceded, that the area of our trade has been and is being reduced by outside competition, and we do not confine this proposition to mail order trade. We have pointed out that our market relations with the farmers was not what they should be, largely by reason of our own errors.

To every feasible project for the improvement of these conditions this paper pledges its loyal co-operation. The SENTINEL has always rejected advertising propositions from outside establishments in competition with our own dealers, and it will continue to do so under its present management. In pursuing this policy we have been solely prompted by a spirit of loyalty to Charlevoix and its business interests.

But harmony of effort and energy of movement are the factors required to a successful campaign in the direction indicated, and there is ample evidence, already that the new organization has the personal elements that foretelle effective work.

Now, let's go after the winter dinner pails.

EASTER GREETINGS

FROM THE EDITOR A. A. SMITH

Across the frozen ways we greet you friend
Through the long years we have loved you
May smile alone, middle uplift,
Sweet flowers cover your way!

May incense from some holy fane
Rise with your prayer and song
And may your pathway smell sweet fane
Amid the passing throng!

Could so many sweets to attain
With charms of this earth
Of thought of us and bring a smile
Mid all the good cheer.

We shall be happy in your joy
And from you we pray
Join in glad hallelujah song
"Christ is risen today!"

—CHARLOTTE M. SHELDON

Chicago, Easter 1916.

THE EVENING GROSBEAK

The Evening Grosbeak, a bird that is rarely seen east of the Mississippi river, has been quite abundant in the vicinity of Charlevoix since early in February. The county normal class wrote to Professor Barrows, of M. A. C., giving a report of the presence of these birds in flocks, of their feeding habits, etc. He asked that a further report be sent noting particularly whether the birds feed on the buds of trees and, if so, whether damage is done to the trees. Their ordinary food is maple and box elder seeds and mountain ash berries.

The normal students would be glad to have the children and towns-people aid them in this report.

NORTH DAKOTA POLITICS INTERESTS CHARLEVOIX

Charlevoix and Hoople, North Dakota, are a good ways apart, but they have, indirectly, political interests for governor is the republican primaries of Lynn J. Frazier, of Hoople, N. D. Aside from having a strong following in his own party, Mr. Frazier is endorsed by the Dakota Farmers Non-Partisan League.

The Non-Partisan Leader, of Fargo, the official organ of the League, in a recent issue, prints a full page picture of Mr. Frazier. Inasmuch as Dakota is distinctively an agricultural state, it looks good for Frazier.

The feature of the contest that is of interest in Charlevoix is that Lynn J. Frazier is the only brother of H. E. Frazier, the Charlevoix show merchant. To be frank about the matter, the Dakota chap is the best looking of the two, but the Sentinel is for Lynn for governor of North Dakota.

SCOTT TALKS IN MEETING

"Cisterns, sinkhole and subterranean are some of the terms Congressman Frank D. Scott applies to one-third of the propositions in the rivers and harbors bill recently passed by the house. "I refused to be sandbagged into voting for such a proposition even though there was about $1,000,000 worth of worthy projects included in my district," said Mr. Scott.

"In northern Michigan we are entitled to a larger expenditure in the St. Mary's river, the Soo locks, Menominee harbor, Alpena harbor and several other places. But we were unable to get it because someone wanted to deepen Trinity river which one congressman said was so shallow when he was a boy he could not find enough water in it to swim.

"Another similar proposition is the St. Francis river which you can cross without wetting your feet. Think of tying up such propositions with the Soo locks and St. Mary's river where the annual commerce is 80,000,000 tons."

HARRY POWERS IN CHARLEVOIX

NOTED TRAVERSE CITY FUGITIVE WITH A COMPANION, ROUNDED UP HERE BUT ESCAPES

The most sensational jail delivery on record in Northern Michigan was last week when Harry Powers and two companions made a hole through the side of the jail and escaped. Powers was being held as the chief witness in the German arson case. The other two were serving jail sentences for minor offenses. One of them was named Lavalley.

All officers in Northern Michigan were notified and have been on the watch for the fugitives. Powers had acquaintances in Charlevoix, having spent a part of last summer here. He is known as an all-around tough character.

Monday night Powers and Lavalley were in Charlevoix. They went to the houses on the south terrace and asked for food but were refused. At one place the lady of the house telephoned Sheriff Novak who immediately got busy with a deputy to assist. The fugitives were traced to the residence of Rudy Korth, on south State street, where they were at the table eating. Sheriff Novak posted the deputy at the front door while he went to the back door and entered, pistol in hand. Not finding them as he expected, he began a search. The door to the pantry and that to the cellar were side-and-side, Novak went down cellar. Had he entered the other door he would have found them in the pantry, from which they emerged, passing out at the front door, the deputy, for some unknown reason, having followed Novak to the back door, thus affording the men a free avenue of escape.

It is said upon good authority that the men were harbored at the Korth home from 11 p. m. until 3 a. m.—the hour at which the sheriff arrived, being fed meantime.

The sheriff captured their coats, which had carelessly been left behind. He then telephoned for the famous blood-hound, which arrived with its keeper on the 8:30 train Tuesday morning, and the chase began. But the dog failed to pick up the trail, and the ordinary methods of chase were resumed.

Although Sheriff Novak cried in not taking a larger force with him, considering the desperate character of Powers, he is to be commended for the remarkable courage he displayed in entering the house alone, when he knew two desperate men were there.

Valuable Japanese Plant.

A plant grown in Japan which furnishes a sort of vegetable leather. It is a pretty shrub called the mitsumata, and its inner bark, after going through certain processes, is converted into a substance as tough as French kid, so translucent that one can almost see through it, and as pliable and soft as cambrun.

Robbing Your Own Pay Envelope

—The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.

—"I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.

—When the pinch of want comes the lesson of thrift comes too late. Once down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.

Young man—young woman, are you robbing your pay envelope for pleasure and pastimes which in later years will deprive you of the comfort and necessities of life?

—Take $1.00 from your pay envelope this week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every payday thereafter.

ORIGIN OF THE "TANKER"

Thirty Years Ago the First Iron Oil Carrier Was Built by a Prussian.

About 1880 Wilhelm Riedemann, a Prussian shipowner, withdrew from the East Indian and American trade for use in transporting petroleum two sailing vessels which had amidships two iron tanks of the same depth as the distance between deck and keel, the Wall Street Journal states. Originally these tanks contained drinking water for the sailors, but it was found out that the water could not be kept free of iron rust and this use was abandon d. Riedemann utilized these tanks as petroleum containers and found that his transportation expenses were reduced four marks a barrel in this way.

Continuing the experiment on a larger scale, Riedemann transformed the Andromeda, a 3,200 ton vessel, into a petroleum carrier by installing in each of her three decks twenty-four iron tanks connected with pine lines. The big disadvantage on this arrangement was that in the event of a leaky bolt made on the ship, which was of wood, the tanks had to be removed at great expense and risk of damage. Riedemann finally concluded that the ideal tanker must be of iron and the entire hull of the vessel used as a container. Accordingly he planned a ship with the engine aft, protected by a water-filled cofferdam, and the remaining space separated by bulkheads into eight compartments.

Riedemann tried in vain to get a German shipbuilding firm to construct a vessel after his design. He went to England and finally persuaded a Newcastle concern to undertake it. The result was the first modern tanker, the Glueckauf, which was launched in 1886.

The arrival of the Glueckauf in New York in August of the same year created consternation among petroleum shippers. An indignation meeting was held, and it was proposed to pass a congress to prohibit the exportation of petroleum in bulk on the ground that the oil gases would endanger the lives of all on board the tanker. A committee was appointed to request the Standard Oil company to refuse petroleum to the Glueckauf.

But progress triumphed as usual. Today there are 600 vessels of substantially the Glueckauf type transporting petroleum and 58 more are in course of construction in American shipyards.

Novel Gas Holders.

The floating bell form of gas holder, with its telescoping sections, water tank seal for the lower edge and elaborate framing for guiding the cylinder, is a very expensive structure, and it has not been evident how it could be improved. A new principle has, however, been devised that greatly simplifies the construction and reduces the cost. Instead of being movable, the tank is fixed, and its roof is movable, sliding up and down within. This roof is mined as cheaply as possible, and to prevent the gas escaping water is pumped on to it, thus forming a water seal. Of course, some water passes through the joint, but this is withdrawn and returned to the roof by a pump contained to compensate for the leakage.

SUPERVISORS TO COLLECT DOG TAX

The last session of the legislature made a radical change in the manner in which the dog tax is collected, although the amount of the tax remains the same as in former years. Under the new law the supervisor will collect the dog tax at the time he makes the assessment in the spring. The text of the law is as follows:

Sec. 2. The assessor of every township or ward shall, or on or before the Tuesday next following the third Monday in June in each year, make out a duplicate of the lists made by him as provided in the preceding section, and file the same under oath with the township or city clerk of his respective township or city.

The collector shall give to each person paying a tax on any dog, a receipt for the amount paid which shall also bear the date, payment is made, shall describe the dog and be numbered with a serial number and the year. He shall also give to such person a metal label to be fastened to a dog collar and this metal label must bear the same serial number and year as does the receipt given.

The collector shall also furnish the sheriff with a list of all dogs on which the tax has not been paid. The collector is allowed ten per cent of the amount of the dog tax collected.

Prehistoric Ivory in Piano Keys.

Few people know that a great deal of the ivory from which our piano keys, billiard balls, knife handles and combs are made is collected in Siberia from the fossil remains of the giant mammoth, the great ancestor of the elephant. Many of these tusks are a number of a million years old, having been preserved in frozen soil or ancient ice recently brought to the surface.

WATCH CHILD'S COUGH

Colds, running of nose, continued irritation of the bronchial membranes if neglected may mean Catarrh later. Don't take the chance—do something for your child! Children will not take every medicine, but they will take Dr. King's New Discovery and without trouble or coaxing. It is a very pleasant Tar Syrup and so effective. Just massive enough to eliminate the waste poisons. Almost the first dose helps. Always prepared, no mixing or fussing. Just ask your druggist for Dr. King's New Discovery. It will safeguard your child against serious sickness resulting from colds.

SAFEGUARD YOUR ESTATE

You would probably hesitate to entrust your fortune to an individual, but would you entrust your ESTATE to one however good his intentions? The wise course would be to appoint this company your executor. It has had 25 years experience and being a corporation never dies.

Spreading the Gospel of Farm Beauty

By Wilhelm Miller

The University of Illinois is telling Rural People why trees and flowers and fine views add value to property.

"BOSTON IVY AS A BEAUTIFIER"

NOBODY can afford to have bare and dreary home grounds. It is bad business. Of course we do not commonly think a business view of our homes; we think of home in terms of sentiment. For we all want the best there is in life and we know we can make better children if they have beautiful surroundings.

But, granting that we all have the best sentiment in the world, we cannot escape the business side. For instance, we all have to consider the cost of making a lawn, of fertilizing and watering.

Now, there are two ways of handling these practical matters, one of which gives little or no profit while the other gives very great profits. Of course you do not expect to make money out of your home—you expect to live in it—but the day will come when you or your children will sell part or all of your property. And the land will look at [illegible] you in that hour. Some land could impatiently tiptoe out of a bargain. The man of wealth who indulges every personal whim, and makes an eccentric place, will sell at a loss of income. On the other hand, there is one place bare. It may be absolutely unsalable when the time of sale comes, or you will get less than it is worth. But, if your farm is sensibly planted, you can get a bigger profit for the money you put into trees and shrubs than for the same money spent on house, barn, or hogs. Then, old trees, that cost you nothing to plant, may bring you a millionaire buyer. Ten dollars spent on shrubs and vines and trees may be the foundation of your house may add give to its cash selling value.

If you spend $10 in the ordinary ways of beautifying the farm, you will get back not one single cent. If you spend it in the "illinois way," you cannot help increasing the cash value or salability of your farm, because permanent trees are worth, for hundreds of years, $1 a square inch in those inches of trunk three feet above the ground, and they increase in value every year.

The common way of planting is to scatter flower beds over the lawn, it aims to make the biggest show for the money and get immediate results. That is why beginners are fancy beds or conspicuous clumps and fill them with flowers which give a great massess of strikings colors three months or more. But next winter those beds are vacant and ugly, and next spring the same work must be done, and every year there is from the constant repetition of the same thing. Moreover, and next we realize that the effect is gaudy, for our standards are continually raising, and what we admired five years ago now seem in bad taste. It dawns on us that our business can put flower beds in the middle of the lawn, and that every business will try to make each dollar stand up on edge where everyone can see it. Thus, we come to take show, and to care more for privacy, permanent dignity, peace, restfulness, outdoor living, winter comfort, views, a playground for the children, old trees, sunflowers in the house all the time, and low cost of maintenance. Why lose money by planting now what you will tear out five years hence, when you know better? Why not anticipate the growth of your own and every other farm, and so that you will waste no precious years, and your place will grow twelve or more valuable years?

The right way is to use permanent plants, instead of temporary ones, and to place them where they will cost every practical need of the family, instead of scattering them for show. And the "Illinois way" is to meet all the outdoor needs of the family by having 90 per cent of the plant the component of trees and shrubs that grew wild in Illinois. Why Illinois trees? Because they are hardy, and therefore economical to maintain. We do not have to feed their hardiness, since nature has adapted them to our conditions by experiments covering tens of thousands of years. Moreover, we want Illinois to look different from all the rest of the world, and to have a noble character of our own! The highest ideal that any farmer can realize is to have a profitable farm with permanent buildings and permanent plantings, both of which are utterly different from those of Europe, and as full as possible of American and even of state character.

European farm houses are so different that you can usually tell simply from a picture whether they are German, French, Dutch, Italian, or Spanish. The English farmer often lives in a house of brick or stone which has sheltered his family for generations. In front of it stands a pair of oaks that have defied the storms of 300 to 500 years. The house is covered with ivy or with roses, which climb to the top of the red-tiled roof. The yard is surrounded by a hedge of hawthorn or of holly. The Englishman boasts that he loves his home more than any other man living, and points to the fact that the English language is the only one that has separate words for "house" and "home."

Every old state in America tends to have its own style of building and planting. Massachusetts is famous for her colonial, or Georgian houses, like the one in which Longfellow lived, with century-old elms sheltering the stately roof like gigantic umbrellas. Virginia is celebrated for the farmhouses built by Washington, Jefferson, Madison, and Lee, with their hospitable roofs shaded by towering tulip trees or ancient live-oaks living with them. Pennsylvania is noted for the homes of its cauliflower growers, with every room open to the morning sunrise, and the white, wide-shingled walls set off by feathery locust trees, loaded in June with waterfalls clusters of fragrant white flowers. Georgia is renowned for her houses in the Greek style, which are gorgeously adopted to a hot climate by reason of their "galleries," or second-story porches, where the family can enjoy every passing breeze and feast their eyes upon the grandest subtropical tree in the world, magnolia grandiflora. Connecticut has many a clapboarded farmhouse, shaded by white oaks that were here when the first white man came, while on the lawn stand, or a rhododendron or mountain laurel, planted by the great-grandfathers of the present generation. Pennsylvania can often tell what county you are in by a single tree or clump of trees that stands alone, or where massive farmhouses of local stone, laid up in Germanic style, it is a fair wager that you are in Bucks, Chester, or Delaware county. If your eye meets ancient brick houses, with porches extending the full length of each house, a diamond-shaped stone bearing the date of its erection, and odd little projections on the side roof, to keep the snow from falling off in great chunks that may bury a person, it is a safe guess that you are in Lancaster or some adjacent county. The great variety of majestic oaks that have flourished for a century or more over these venerable houses proclaims that eastern Pennsylvania is a paradise for trees designed by nature to last through the centuries. Even in the new state of Oregon, the big-cone spruce grower of Hood river are laying the foundations of a state style of architecture and gardening with their low houses, screened porches and baths lined with great double garden roses blooming in a profusion that is impossible in the East. Every state will eventually have its own style of farm architecture and gardening. Instead of stop it, we can profit by building and planting in the style that will become dominant as the centuries roll by.

It is natural that we should like to have near us the trees we love best but nearly all the most popular trees are unfit for planting close to the home. Take, for instance, those that have showy flowers, like the horsechestnut, the locust, and the empress tree or paulownia, they are forever making a litter and should be at a distance from the home. So, too, with the quick-growers, like the box elder, the silver maple, and the Carolina or Lombardy poplar; they go to wreck in storms and their branches fall on the house. Perhaps the most inappropriate is the Norway spruce. Many a house has suffered a depreciation of hundreds of dollars owing to dismal Norway spruces, for they often hasten the decay of a roof by giving too much shade and moisture, to say nothing of making a home look melancholy, instead of joyous. The sugar and Norway maples are fine trees, but, like all round-headed trees, they tend to hide the view of a house more quickly than is commonly realized.

The ideal tree for framing the view of your house is one that will give enough sunlight and enough shade, enough shelter and enough color to make to keep a family healthy. The only trees that does all these things to perfection is the American elm—not the European. Moreover, a pair of elms will make a colonial or Gothic arch, suggesting high-noted cathedrals and God's first temples. Unfortunately, the enemies of the elm are multiplying, and if you plant elms you must be willing to stand the expense of yearly spraying when the time comes. Be sure to specify tree-form elms. They are the only ones that make the Gothic arch, and are more valuable than the other types or straggling kinds.

A pair of oaks will last longer than elms and cost less to maintain. The oaks excel all other trees in uniting close to house and making it look snug and comfortable. The common idea that oaks are slow growers and hard to transplant is true only of the white oak. The pin, the scarlet, and the red oaks are easily moved, and will soon overtake maples and other trees that are quicker at the start. They will last for centuries after the quick-growers are dead. Plant the trees that you know will make your property more valuable every year.

Soldiers Noisy Dreamers.

Landladies of London lodging houses near by the railroad terminals such as Victoria and Waterloo are becoming difficult about taking in soldiers just back from the front, particularly those who have participated in the fighting around Loos.

The landladies say the poor soldiers fight the terrible battles over again in their sleep and the shrieks and hysteria are enough to shake the strongest nerves.

Many of the men who took part in the engagement are afflicted with the most horrible of dreams and somnambulistically slash and kill, to the terror of all the other guests.

Figures are unobtainable, but the cases of nervous breakdowns during the last few weeks have reached a high figure.

Even officers have been affected, and men who have stood up under the strain since the early days of the war say that the sights during the recent offensive are too terrible for mention.

Souvenir Grenade Killed Boy.

A soldier had a truck-load of souvenirs at Boulogne-sur-Seine, France, recently. His grandson, five years old, was examining some souvenirs of the trenches which he had brought with him, when a loud explosion occurred. The boy was killed and his grandmother sustained severe injuries. The explosion was caused by a German grenade.

Degrees of Insanity.

"What's the difference between a futurist painter and a pod-impressionist?"

"Not being an expert alienist, I can't answer that question."

How Can He?

Social Worker—Do you obey the Bible injunction to love your neighbor?

Freshman—I try to, but she won't let me.—Cornell Widow.

Eye to Utility.

"I want a pair of pants."

"Something to keep you cool or smooth?"

"Rough, I reckon. I find it handier to scratch mattches on."

Isn't Maud Marooney?

Maud—Would you marry for money?

Ethel—Not I. I want brains.

Maud—You certainly do if you wouldn't marry for money.

Here Is New Aid to Mariners

Finding the true bearing of objects at sea, as well as the position of a ship with reference to a coast line, without resort to computation or plotting, says Popular Mechanics Magazine, is made possible by a new attachment designed to be mounted on the binnacle hood and connected with the ship's compass.

The instrument consists of a light tube carried on a revolving standard, to the lower end of which is fixed a curved arm terminating in a pointer. The standard must be mounted accurately over the center of the compass. The pointer hangs close to the compass card, and since it swings with the sight tube it shows instantly the bearing of any object on which a sight is taken.

The instrument is also provided with two graduated scales by which the distance to any fixed object, such as a lighthouse, may be quickly and accurately found. This is accomplished by taking two bearings and noting the exact time that elapses between the two sights. The distance traveled by the ship during the interval is then estimated from its known speed.

Emperor Franz Josef possesses an opal for which he once refused an offer of $250,000. It weighs 17 ounces.

The first poultry show ever held in America was run by the late P. T. Barnum, the great showman.

Gas meters are now being installed by women in Berlin.

Most of the world's quinine comes from the East Indies.

THE SANDMAN IN STORY

By Mrs. F. A. WALKER

TWO WAYS OF SEEING THINGS.

A robin and a sparrow sat on the limb of a tree, sheltered from the rain which was falling in torrents. Long every thing green and sweet.

"I never saw such weather," said the sparrow; "everything will be wet and the grounds muddy."

"I think it is nice," said the robin; "everything will be clean and the whole country will look fresh."

"This weather is too hot," said the sparrow; "I do not like it."

"Oh! I like it," said the robin; "the corn will grow and the cherries, too. Do you like the cold weather?" he asked the sparrow.

"No," replied the sparrow; "that is the trouble with this world; it is all wrong; it is either too cold or too hot."

"Why do you not go South, as I do, when the cold days come?" asked the robin.

"It is too far to travel," replied the sparrow. "Now look at that sun shining," he said. "I do not see why the rain did not keep on falling, as long as it had started."

"We can find plenty of worms now."

"They will all be big ones," said the sparrow. "I like the little ones best; besides, it is too muddy. I shall stay here in the shelter and wait."

"Yes, it is nice and cool after the shower," said the robin; "the flowers will soon dry the trees."

"And will all get cold, I suppose," said the sparrow; "the idea of a breeze like this blowing after a shower! Yes, I am sorry I shall get cold."

"There is the maid throwing us crumbs, and the cats frisking; "let us fly down and eat them."

"She is probably putting them there so the cats may get a drink, pick them up," said the sparrow.

"Oh, no," said the robin; "she is a kind-hearted girl and often throws them out for the birds."

So the sparrow flew down with the robin.

"They are nice crumbs," remarked the robin as he hopped about.

"They are too big," said the sparrow. "I wish she had broken them to smaller pieces, and she scattered them so we would have to hunt for them I suppose."

"Here is some water," said the robin, hopping to a basin that had been put out for the hens.

"These hens have everything where they can find it," said the sparrow.

"We have the best of it also," said the robin.

"That may be," said the sparrow, "but no one ever put out a basin of water for us. It is a hard world. This morning my nest was almost destroyed by a careless woman who attempted to open a wind-bound window I had my nest, but I flew about and made such a fuss that she fastened the blind again and saved my home."

"I think she was a very kind woman to do that," said the robin. "for no doubt she wished to shut out the hot sun and keep her room cool."

"She should look first," replied the sparrow, "and have some thought for others. She might have known that there was a nest behind that blind."

"I should build in the trees," said the robin, "where there are no blinds to close."

"And have the cat get me," said the sparrow. "No, I thank you, I'll build behind blinds and if people are so kind enough to disturb us we must bear for our rights."

"It is raining again," said the robin; "let us fly back to the tree."

"Did you ever see such luck?" said the sparrow. "I had just finished dressing my feathers. Oh, this world is all wrong! The days will soon be short again, and we shall have to go to bed early and get up late. Why can't we have days all the same length, I should like to know?"

"I cannot explain that," replied the robin, "but I feel sure that the world is all right. Don't you think that your view of it may be wrong?"

"Wrong!" exclaimed the sparrow, with indignation in his voice. "No, indeed! It is the world that is wrong, not I. Good-night," he said, as he flew away.

The robin looked after the sparrow for a moment. "I am glad I do not feel the way the sparrow does," he said to himself. "He is unhappy, and I am happy. I think I'll fly back to my home and not with the world. I think it is a beautiful, glorious world to live in."

Tongue Twister.

Try to pronounce the sentence which runs, "The sea shell is not sufficient us," without stumbling. One man made a wager that no one would repeat the sentence 150 times right off without either missing a word or stumbling. He won at the seventy-seventh repetition, when his opponent was almost speechless.

HOW TO TRANSFER PICTURES

Solution of Common Soap, Water and Turpentine Is Employed—Apply With Brush or Finger.

Printed pictures from magazines, newspapers, folders, etc., may be transferred to paper, cloth, cardboard, glass or china with the following solution:

One bar of common soap is dissolved in a gallon of hot water, to which enough pint of turpentine is added. After it has stood for a day or two, stir well and bottle. The solution is applied to the print with a soft brush or even a finger, and the material to which it is to be transferred is placed upside down on it. The back of the material is then rubbed and the design is transferred.

A picture may be transferred to glass for the purpose of a lantern slide. In such a case the glass must be varnished with a perfectly transparent varnish before transferring; then proceed as before. Pictures are transferred to china in the same way.—Popular Science Monthly.

FOSTER PIG CLUB MOVEMENT

Boys Encouraged to Raise Corn to Feed Hogs—Various Organizations Are Contributing.

About a dozen counties in Florida have organized pig club. It is probable that many others will follow the example of Dade county. Dr. Harrington, state club agent for the Uni-

Pigs Raised by Member of Pig Club.

versity of Florida extension division, has written corn club boys who are the work. They will have feed from their acre of corn on which to raise the pigs. Various organizations, such as bankers, boards of trade and school boards, are contributing the pig club work. Mr. Harrington advises that care be used in selection the membership, some pigs being unfit for the adequate provision for feeding and pasturing the pig is made.

In those counties where the bankers are loaning money for purchasing animals, extra precautions should be made for their care.

"The debt to be canceled from the sale of the increase of the pig and litters will be jeopardized unless proper facilities are provided.

WHERE NAMES CAME FROM

Student of Language Traces Beginning in Old Dialects—Nicknames Were Uncomplimentary.

Once upon a time given names were the only names in use. Cain was a farmer, Abel, or Harry, and that was all there was about it. Our present surnames arose from nicknames. Thus, John the Tailor became in time Tom Taylor and Hugh Smith became Hugh the Smith, the family name. The most familiar of our surnames were taken from the occupations of our forefathers, as Smiths, Bakers, Brewers, etc. Many more, moving to new towns, had the name of the place from which they had come fastened upon them. Others took names like Pope, King and Bishop, from playing those parts in plays. Much as they may be disliked, they developed from poureel, meaning little girl, cist and ops are old dialect words of the same meaning. Tod meant Fox, Pitchs was poisonous, and so on. Students of language traces the beginnings of our names in the old dialects, which at that time were more originally distinctly uncomplimentary as a rule. Nicknames, for crooked nose, and Kennedy for ugly head. Grace developed from gras or fat.—The American Boy.

A Boy's Reason.

A Boston man has a son who has just entered school. He was supposed to be enjoying it, but one morning he walked into the dining room, where his father was having breakfast, and remarked:

"I'm tired of going to school, pa. I think I'll stop."

"Why?" asked the father. "What is your objection to going to school?"

"Oh," answered the boy, "it breaks up the day so."—Boston Record.

A Problem.

Little Elizabeth and her mother were having luncheon together and the mother was always tried to impress facts upon her young daughter, said:

"These little sardines, Elizabeth, are sometimes eaten by the large fish."

Elizabeth gazed at the sardines in wonder and then asked:

"But, mother, how do the large fish get the sardines?"

Home Supply Advanced.

"Papa," said little Elsie, "I want us to get a cow and keep it in the back yard."

"Why, my dear, I thought you were afraid of cows."

"That don't matter, because its ownership" declared the small efficiency expert, "then we can have our milk and beefsteak all the time."

Powerful Language.

Caller—I suppose you can spell all the short words, Bobbie?

Bobbie—Yes, and spell a lot of big ones, too. I can even spell words of four cylinders.

Doing His Best.

Mother—Tommy! William is the worst boy in school, Arthur, and I want you to keep as far from him as possible.

Arthur—I do, ma—he stays at the head of our class all the time!

Glass of Hot Water Before Breakfast a Splendid Habit

Open sluices of the system each morning and wash away the poisonous, stagnant matter.

Those of us who are accustomed to feel dull and heavy when we arise; splitting headache, study from a coated tongue, nasty breath, acid stomach, lame back, can, instead, both look and feel as fresh as a daisy always by washing the poisons and toxins from the body with phosphated hot water each morning.

We should drink, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to flush from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

The action of limestone phosphate and hot water on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, smells and acidity and gives one a splendid appetite for breakfast and it is said to be but a little while until the roses begin to appear in the cheeks. A quarter pound of limestone phosphate will cost very little at your druggist or from the store, but it is sufficient to make anyone who is bothered with biliousness, constipation, stomach trouble or rheumatism feel enthusiastic on the subject of internal sanitation. Try it and you are assured that you will look better and feel better in every way shortly.—Adv.

Trying Position.

"How does your congressman stand on preparedness?"

"He seems to stand at all."

"Not?"

"In fact, the conflicting views of his constituents keep him so busy sidestepping that he hasn't had time to formulate an opinion of his own."

PROSPERITY IN WESTERN CANADA

900 Million Dollars in New Wealth Added in 1915.

Canada as a whole has enjoyed wonderful prosperity in 1915, from the products of the farm, the orchard and the centres of industry. No country owes a brighter page of history in agricultural and industrial development during 1915 than Canada. Nearly a billion bushels of grain produced in Canada in 1915 will average $24 and will net exceed $35 per quarter section, which includes all taxes. No taxes on improvements.

When Western Canada was faced with her severest crisis, she faced the military authorities decided that soldiers in Canada could give the Empire no better service for the time being than to assist in harvesting the crops. The response from the ranks of absence was given to soldiers who worked hard and long in the fields, and their labor was an important factor in harvesting the big crops successfully.

The necessity for increasing the agricultural production in Canada being even more attention in 1916, and it is now announced that soldiers in Canada may obtain leave of absence from their military duties in the spring for the purpose of being able to assist them to plant the seed for the crops in every Province of the Dominion.

The fact that the Government recognizes the seeding and harvesting of Canada's crops as being of the first importance is perhaps the best evidence that Canada's crop for any increase of taxes which would reduce the financial activity of Canada will never be considered by the authorities.

Owing to the number who have enlisted for overseas service it has been found necessary to secure farm labor in the United States. It is hoped that fifty thousand can be secured.—Advertisement.

Dampening Her Ardor.

"Henry," said Mrs. Twobble, "I feel that I ought to go abroad and nurse the wounded."

"Forget it, my dear," answered Mr. Twobble, who is an eminently practical man. "You have no idea how many nurses there are who never get their names in the papers."

SAVED MINISTER'S LIFE

Rev. W. H. Warner, Route 3, Myersville, Md., writes: My trouble was sciatica. My back was affected and took the form of lumbago. I also had neuralgia, cramps in my muscles, present a sharp pain on the top of my head, and nervous disorders. I had other symptoms which made my life a burden. Doan's Kidney Pills, the well known kidney remedy, cured me of my troubles. They were the means of saving my life. On Feb. 16th, 1916, I write to say that Doan's Kidney Pills have restored me to perfect health.

Doan's Kidney Pills, 50c per box at all dealers or Doan's Medicine Co., Buffalo, N. Y. Doan's Dyspepsia Tablets for the stomach have been proved. 50c per box.—Adv.

Admirable Combination.

First Patriot—What this country needs is more red blood!

Second Patriot—Yes, and more gray matter.

Not Much.

Bill—Is he a good loser?

Jill—Indeed, he just lost his job, but I can't say he took very good about it.

Kin Hubbard Essays

SEX ANTAGONISM

By KIN HUBBARD.

"Next t' a Persian Not Sundae Thar Main't Nothin' That Appeals Less t' a Red-blooded Man Than a Militant Woman."

With th' passin' o' th' sole fashioned home with its family circle, women an' girls have become a most important factor in our professional an' business life. As th' earnin' ability o' th' modern father is no longer sufficient to keep filled with full blown daughters, an' is said to be but a little while until the roses begin to appear in the cheeks. A quarter pound of limestone phosphate will cost very little at your druggist or from the store, but it is sufficient to make anyone who is bothered with biliousness, constipation, stomach trouble or rheumatism feel enthusiastic on the subject of internal sanitation. Try it and you are assured that you will look better and feel better in every way shortly.—Adv.

"Tho' th' modern girl is a marvel in her business, th' old days a brave band was a social organization. T'day it's a cold blooded business proposition. T'wasn't bar roots are a thing o' th' past an' women are now a permanent part o' th' union. Th' one 39-pound red felt uniform, with helmet an' plume, too, has passed away forever!

"You've had many years' experience as a band player, haw you not?" I ventured, at th' same time plachin' a pale grocery sugar in th' tremblin' band o' th' ole bandmaster.

"Forty-three years th' last time Tryan allowed him t' blow th' horn, an' I reckon that's th' business. I'd been thrown in daily contact with a valter clarinet when a child an' at th age o' fourteen, after I had it about two thirds mastered, I run away with a circus as a cornetta band. One night durin a performance, th' band was playin 'In th' Sweet Bye an' Bye' th' clarinetist dropped a sour note closely resemblin' th' 'tertiflyin' cry o' a panther, an' th audience snapped an' nine people were killed. Th' cornet player was discharged an' I took his place. I played twenty years with circuses with varyin' success. Once I walked home from Tombstone, Arizony, at another time I was poisoned an canned corn at Hurley, Wisconsin, an carried t' th hospital while settlin' stone t' th' partitest girl in town. Epaulets an a plume were great bean catchers an' when they were backed up by th soft mellow notes o' a rosy horn or a second alto thar was well worth th' price o' admission. But times change, an' th' band o' th' ole days was lonin' around th' country, an' th' 39-pound red felt uniform, with helmet an' plume, too, has passed away forever!

"Today th' band is a social institution, an' th' ladies are th' principal part, and that is the last enumeration a population of twenty of which a large percentage is Chinese. The city of Hanskok is situated on both sides of the River Menchan Chao Pipas, about twenty-five miles upstream from the bar I de mouth. This bar forms a great obstacle to shipping, allowing only vessels to come in on high tide drawing from 12 feet 6 inches to 14 feet 6 inches according to the season of the year. Vessels of greater depth, however, find a safe anchorage at Kobnichang, an island about twenty-five miles from the mouth of the river.

Naturally Not.

The man who raises the price of coal has no desire to know what the people of this country are saying at their Studebaker—Atlanta Constitution.

"Swiss Are Superstitious.

There are many superstitious conditions in the Alpine nation that make the development of a national militia a much simpler proposition than, for example, would be the case in the United States. In the first place, the Swiss are a nation of patriots. Reference again to my dictionary brings out the fact that a patriot is a lover of his country. Not to make any invidious comparisons about the quality of patriotism in this or any other land, if I were chief of the world's bureau of statistics and had to compile statistics of the patriotic qualities of the peoples of the earth, I would place with the Swiss and work down. A lover of his country! The phrase does not half convey how the Swiss feels toward his home and mountains. Why, he regards them with pagan idolatry adoration! The Swiss is a so persistent.—Granville Fortescue, in Saturday Evening Post.

Absolutely pure water is not to be found in nature.

WORRY CALLED A SIN

MINISTER STRONG IN CONDEMNATION OF BAD HABIT.

Really Amounts to Disease When One Has Long Allowed Himself to Indulge It—Religious Belief Pointed Out as Cure.

"No more fatal habit ever attacked the human family than worry," said Rt. Rev. Bishop Charles F. Woodcock during a recent sermon, according to the Minneapolis Journal. "I can think of no more deadly drug. I can think of no suicide more real, and, perhaps, when we consider its effects, there are very few sins which are greater."

Bishop Woodcock gave a vivid word picture of the unhappiness and evil effects of worry, diagnosing it as a disease and concluding by prescribing a remedy. The remedy he found in his text, "Casting all your care upon him, for he careth for thee." He spoke in part as follows:

"Some people continually get their life out of focus. They bother themselves almost to death about ephemeral things. They put their troubles between God and themselves, instead of putting God between themselves and their troubles.

"Not only is worry a sin—it is a disease. The sufferer worries about anything and everything until he worries because he has nothing to worry about. There is no personal weakness which is greater than the constitutional habit of worrying. There is a great distinction between worry and care and proper anxiety. Worry is something that you add to care and anxiety until you haven't time to do anything else. People who really are doing something haven't time to worry.

"Worry poisons the blood, hardens the arteries, impairs digestion and stirs bodily poisons every blessing, assassinates every hope, dims every epitaph and prolonges every bright prospect. No one ever heard of a single thing that worry ever helped. It never inspired a single hope or created a single success. It is nonsolitus yet mulcusset and yet mulcusset for the nervously broken down.

"Most worries are by anticipation. It is a sin because it means a waste of life. It is just as controllable as the drink and drug habit; it has the same effect on life and character that dissipation has. It is no more sinful to drink yourself into the gutter than to worry yourself into the grave. You won't be asked how you wasted your life, but why you wasted your life.

"There is a cure for worry, and the remedy is absolutely sure and simple. It is that. Every day has its cares from below and its help from above. You join the care from below with the help from above and there is no limit to human history that you cannot take up and bear and finish. Bunch up your quarters quarters cramped, breaking over and your cares. You can't care upon him, for he cares for you."

DISHES OF CORNMEAL.

Cornmeal is rich in fat and mineral matter, and being comparatively cheap it should be used more than other grain products is a food that can be used profitably in attractive dishes with them for variety, as well as to cut down expenses.

Steamed Corn Bread.—There are few people who do not enjoy this delicious steamed bread, and this may be varied by adding different fruits or nuts to it so that it never becomes monotonous. Take four cupfuls of cornmeal, two cupfuls of rye flour, one cupful finely chopped suet, milk well, then add a cupful of molasses and half a cup of molasses, two teaspoonfuls of salt, three cupfuls of sour milk and a teaspoonful of soda. The soda may be mixed with the molasses. Add a cupful of raisins and currants, or a cupful of raisins, and steam in well greased molds for four hours.

Cornmeal Mush.—A good old New Englander will not ask for a more tasty dish than a good bowl of well cooked cornmeal mush and rich milk, with perhaps a slice of toast toasted for an appetizer. To prepare the mush add a cupful of cornmeal very slowly to a quart of boiling water and two teaspoonfuls of salt. Let it cook slowly for an hour. The mush that is left may be poured into a mold and when it is cold cut into thin slices.

Scrapple is made by putting the pork scrapple into the hot mush, stirring until well mixed, then pouring into a mold to cool. This is cut in slices and fried and is a great delicacy.

Fried mush with cheese sauce is another well-liked dish. Prepare the sauce by using a tablespoonful of butter, one tablespoonful of flour, a half teaspoonful of salt, a half teaspoonful of mustard and two cupfuls of milk. When smooth and thick add a cupful and a half of finely grated cheese; a rich American cheese is best, and when melted serve on the mush.

Grated maple sugar or maple sirup is good on fried mush or small fresh fruits such as strawberries served with sugar and cream makes a most tasty dessert.

A woman who can laugh outside when she is crying inside has a great accomplishment.

It's the songs we sing and the smiles we wear
That make the sunshine everywhere.
—Gilley.

JUST COMMON THINGS.

The ordinary vegetable may be a little monotonous, and combining with other foods, make a dish quite out of the ordinary. Here is one worth trying:

Pumpkin Scrapple.—Take a cupful of pumpkin pulp, stir it into a quart of boiling water with a half cupful each of cornmeal and boiling, well mixed, and a half teaspoonful of salt. Cook about one hour, stirring frequently, then add a cupful of broken blackeyeed beans, put into a shallow pan, making the scrapple about two inches thick. When cool and firm, cut into half-inch slices and fry in hot fat. Serve with maple sirup.

Turnip Soup.—Mix together a pint each of hot mashed turnips and potatoes, add a quart of scalded milk, a tablespoonful of butter, salt and pepper, and sprinkle with fine parsley. Serve with toasted crackers.

Cornmeal Griddle Cakes.—Take a cupful of cornmeal, two cupfuls of milk, one cupful of seeded raisins, one egg, two teaspoonfuls of baking powder, two tablespoonfuls of butter melted, a teaspoonful of salt. Mix the cornmeal and milk together and the well-beaten egg and melted butter, add the salt, baking powder and raisins which have been well cleaned and put through the meat grinder. Mix all together and pour into a well-greased pan. Bake in a hot oven.

An egg broken into a pan with a little hot butter stirred until thick and well cooked, then seasoned and spread on buttered bread makes a most tasty sandwich filling.

Let your standard be high—and mend your mistakes as you go, for hardly fail to rise higher then if you aimed at some inferior excellence.

SALAD MAKING.

The making of salad is an art. Often the simplest combinations, if properly put together, will make an otherwise commonplace meal an artistic creation. Lemon juice is preferred to vinegar when using fruit and heavy, rich salad dressings are not appropriate for strong green salads.

The materials to be used for salad should be free from water. Carefully dry all lettuce and fruit after washing and let nuts soak in warm water. French dressing is the general favorite for heavy vegetables, as it is quickly prepared. A vinegar that has been used on pickled beets, or cucumbers should always be saved to use in salad dressings. When making the boiled variety the spoon vinegar makes an unusual flavor which is well liked.

If a color contrast is to be carried out a little vegetable coloring may be added to the dressing. A pretty combination is chopped beets with a dressing colored a light pink. Garnish the salad with white leaves of lettuce.

A salad may not only fill an ornamental place on the table, but it is also recognized as having a distinct food value as well as a pleasure to the eye.

Nellie Maxwell

The KITCHEN CABINET

Contentment is the true philosopher's stone. The poor are rich who have the rich are poor who possess it not.—Bulwer.

Contentment comes not from outward possessions, but from the inward life.

GOOD THINGS TO KNOW.

When making cake a good plan is to add the soda or baking powder a little of the flour the very last thing, stirring it in well before adding the whites of the eggs.

Keep absorbent paper in the kitchen on which to drain fried cakes, croquettes and any fried food.

A little beefsteak chopped fine and mixed with cooked rice, salt, pepper, and a little milk, then made into small cakes and used as filling for peppers makes a tasty dish.

A common carrycomb will clean the brush of the carpet sweeper of threads and lacers.

Spareribs With Sauerkraut.—Trim off the edges of two sets of spareribs, break the bones across the middle, rub well with salt, pepper, and sprinkle with flour. Fill with sauerkraut which has been parboiled 20 minutes. Save the water in which the kraut was cooked, sew the ribs tightly, place on the rack in a roaster, pour the sauerkraut liquor around it. Cook slowly. Turn once, and when tender serve with mashed potatoes.

Cornmeal Griddle Cakes.—Take a cupful of yellow cornmeal, add a cupful of boiling milk, a half teaspoonful of salt, teaspoonful of baking powder, one tablespoonful of melted butter and a tablespoonful of molasses with a well-beaten egg. Mix well and bake on a hot griddle.

Cornmeal With Raisins.—Take a cupful of cornmeal, two cupfuls of milk, one cupful of seeded raisins, one egg, two teaspoonfuls of baking powder, two tablespoonfuls of butter melted, one teaspoonful of salt. Mix the cornmeal and milk together and the well-beaten egg and melted butter, add the salt, baking powder and raisins which have been well cleaned and put through the meat grinder. Mix all together and pour into a well-greased pan. Bake in a hot oven.

An egg broken into a pan with a little hot butter stirred until thick and well cooked, then seasoned and spread on buttered bread makes a most tasty sandwich filling.

Valuable Asset.

There is no more valuable asset in business than politeness, and this is one in almost every position of society. We prefer to trade with a courteous person, we remember a friend a fellow traveler or a shove from a conductor; we choose our friends from those who "can do kindnesses" displeased toward us; we judge a man by his conduct toward those who serve him. Nevertheless, this reaction is almost involuntary.—Christian Register.

Daily Thought.

Don't waste your life in doubts and fears. Spend yourself on the work before you, well assured that the right performance of this hour's duties will be the best preparation for the hours or ages that follow.—Emerson.

Her Castle.

Flute was naughty, and her mother was driven to box her ears soundly in the very presence of a couple of visiting saints. Through her tears she sobbed, "And this is the sort of a thing one must endure in one's own house."

Like Many Grown-Ups.

A mother asked her little son why his chum, Donald, wasn't also in class A. He replied, "He tell you, mother, Donald when asked a question thinks, and thinks, and thinks, and then he says what it ain't."

Advance Dope.

"What's the news from the spring training camps?"

"As near as I can find out, eight teams are going to be tied for first place in each of the leagues."

Toothbrush Case.

Art tickling is very appropriate for making toothbrush cases. They should be lined with gum tissue and finished with seam binding around the edges with loops to hang by. Always place the bristle end inside to protect from dust germs.

Pessimist's Viewpoint.

"Father," said the small boy, "what's an optimist?" "An optimist, my son, is a man who tries so hard to be above full that you feel sorry to see him over working himself."—Washington Star.

You catch cold because your system is below normal and finds itself unable to throw off the cold germs. To recover you must absorb first take a remedy to kill the germs. Then be careful of your eating. Avoid exposure. Go to bed early and save your strength. The best way To kill the germs take Dr. King's New Discovery.

Just the minute Dr. King's New Discovery reaches the seat of the cold germs in throat and air ducts. Your irritation ceases. The cough ceases and you begin to get better. Dr. King's New Discovery is pure laxative enough to expel the dead germs and poisonous secretions.

The ingredients in Dr. King's New Discovery make it an excellent cough and cold remedy. Don't endure the annoyance of coughs and colds. Don't keep on suffering. Don't take the risk of more serious illness. Take Dr. King's New Discovery. Watch your eating and habits. You will feel your cough and cold undoubtedly and natural control and be assured of a speedy recovery. At all druggists.

LOCAL AND PERSONAL

Read our clubbing arrangement on eighth page. It cannot be beaten.

Miss Etta O'Neill left Tuesday morning for a week's visit with friends in Detroit.

Mrs. M. Lamphear, of Flint, is at the home of her son, in this city, for a few weeks' stay.

Attorney J. E. Converse, of Bay City, was in the city Friday on business.

Edward Abeles in "After Five" a modern comedy, at the Majestic Theatre Friday April 21.

The Charlevoix Ice Cream Co. has opened its factory and is ready for your Easter orders.

The Ladies Guild will serve supper at the Episcopal church Tuesday April 25. Supper starts 5:30.

The steamer Columbia yesterday made the first planting of young trout on the fishing grounds.

"The Prodigal Son" by Rev. Harris, at the Episcopal church Thursday eve., services starting at 7:30.

Don't fail to see Mary Pickford as "Mistress Nell" Tuesday evening, April 25, at the Majestic Theatre.

Grant Harrison and wife, of Petoskey, came over in their car Sunday and visited Mr. and Mrs. Harry Nicholls.

Thomas Shawley, of Grand Rapids is here for a stay of several weeks. Mr. Shawley is much improved in health.

Capt. Peter McCafferty left today for Chicago to fit out the harbor tug which he is to command this season again.

A delegation of Charlevoix Pythians went to Traverse City Tuesday to attend a degree work contest between Northern Michigan lodges.

The Easter exercises of the Congregational Sunday school will be held at the church at 7 p. m. The offering will be for missions.

The bridge was turned for the first time Tuesday morning when the steamer Columbia started out for Beaver Island on her first trip, which was made successfully.

Miss Anna McHugh leaves today for Kalamazoo to attend the golden wedding of her parents, on the 24th. Miss McHugh is accompanied by Mrs. Robert Squires and Harry McHugh.

Mrs. Judson Harmon, wife of the former governor of Ohio, and a well known celebrat at the Chicago Club this city, died at her home in Cincinnati recently.

Just by way of suggestion, we remind our delinquent subscribers that this is our usual time for collections of this nature. Please save us time and postage by liquidating.

Elk Rapids Progress: It is reported at Old Mission that the Mulcahys have bought the little steamer Petosego, now lying in the Boardman river at Traverse City, and will put her in our inland lakes.

If you want to see a business office with an artistic interior finish, call at the office of the Charlevoix Lumber Co. The walls and ceiling are paneled beaver board with cypress trimmings, cold effect, buff-stone and cream. It is one of the prettiest business offices in town.

Through an unaccountable mixup on the railroad ready print bundle that was due last week was lost and has just turned up. Under the circumstances we were compelled to print the bundle that would be due next week. Next week we shall print the issue that was missing. Readers of the serial story please bear this in mind.

Look over your yard and see what shrubbery you need; then go to Babcock & Son and select just what you want. They have just received a large supply of hardy nursery stock grown specially for them, and for this northern climate. They also have a fine lot of apple trees, standard varieties, and prices are very reasonable. 4-29-3

Asmus Peterson, George S. Dancer, Morgan Curtis, Duncan Walsh, O. C. Gregory and Jacob Sobiegard of Petoskey have purchased the stock of the Petoskey Wholesale Grocery company, held by eastern capitalists, and transferred the head office of the company from Clarksburg, W. Va., to Petoskey. The capital stock is increased from $100,000 to $150,000. The deal was completed and the stock transferred Saturday. The officers are: Jacob Sobiegard, president; Asmus Peterson, vice president; George S. Dancer, Secretary-treasurer.

NAVIGATION OPEN

THE FISHERMEN OF THIS PORT ALL SET THEIR NETS ON THURSDAY

Navigation may be said to have opened with a rush last Thursday when the tugs Parmelee and Carolina, with a number of gasoline craft went out and set nets.

If the ice from the bays and straits is not driven to this shore by high winds, barring a permanently released here for the season.

Pine Lake is still full of ice but is fast breaking up.

Charlevoix contractors are anticipating considerable activity in the building line this summer and fall. Several new cottages are contemplated.

In referring to election matters in Charlevoix township last week we labored under a misapprehension of facts. William Cook's title to the office was based upon the resignation of Mr. Furness but upon the certificate of the election board.

John Curtis has the contract for the erection of a $4,000 cottage for Mrs. G. W. Crouter on the Crouter addition. Mr. Curtis will also build a summer cottage for himself on the site of the house recently burned.

Ben Yettaw has opened his ice cream parlor. The place has been thoroughly renovated, refurnished and redecorated, and presents a fine appearance. A new ice cream plant has been installed and arrangements made for wholesaling.

Voters in Mackinac county seem to have found the right way to secure good roads and in the election April 6 voted to bond for $750,000 to complete the county road system recently started in that county. Work on the roads has already been started.

The newspapers will be compelled to charge more for advertising and job printing as the price of paper is soaring. In ruled paper and flats the prices have advanced from ten to one hundred per cent, and colored paper is hard to get at any price.

Ira A. Campbell, who arrived here from his home in Ludington Saturday, was finding his father much improved in health, proceeded to New York on business. He returned Sunday and after a short stay will return to his home in San Francisco. We are sorry to learn that Capt. Campbell is not so well.

The funeral of Mrs. Priscilla Cousens, aged sixty-five, who passed away at Traverse City, April 12, occurred here Thursday. Services were conducted by Rev. Quinton Walker, pastor of the Methodist church. Deceased is survived by two daughters, Mrs. Lawrence Livingston and Mrs. Ann Agerl, both of Charlevoix.

W. D. C. Germaine, ex-mayor of Traverse City, who has been confined in jail since February 20, charged with arson, has succeeded in securing his release on the $15,000 bond required by the court. It required a lot of transfers of property by Germaine and members of the co-operative family to accomplish it. His mother and Peter Peterson of Garfield township are the signers.

Agent George Breckway, of the Northern Michigan Transportation company, reports the line of boats will be operated out of Chicago and that the D. & C. and other lines from Detroit and Lake Erie ports will be operated as the earliest possible moment. Just as soon as the ice rots sufficiently the most serviceable of those heavy boats will be loaded in the iron with freight and sent to the lake ports. The shortage of freight cars means more business for the boat lines and an exception ally good season in this department is anticipated.

A runaway occurred on Clinton street Thursday afternoon that came near being disastrous. The double wagon of A. C. Bird, containing Mr. Bird and his brother, William Bird, with the latter's wife and two children, was going down the street when the whiffletrees were detached and fell upon the horses' heels. Badly frightened they started at a terrific pace down the street. Fortunately no great damage, Mr. William Bird, with one of the children in his arms, jumped. Strange to say neither were seriously hurt. The team turned about, crazy with fear, and in the turn the buggy turned over, with A. C. Bird and Mrs. William Bird and a child underneath. Barring a big shaking up nobody was injured, which fact may be called a miracle.

EASTER GREETINGS BY TELEGRAPH

The Western Union Telegraph Company has made arrangements to deliver messages containing Easter greetings on special blanks of an attractive design appropriate to the occasion. The employment of similar blanks last year met with considerable favor. With the growing recognition of the effectiveness of the telegram in its modern form, such as the day letter and night letter, as a vehicle for family and social messages, there has been a large increase in its use for communications of a personal character, particularly for conveying words of seasonal greetings. The telegraph company is responding to this development by making provision for specially designed message forms in keeping with the spirit of the occasion.

VOLUME 47

You will notice that with this issue the SENTINEL begins its 47th volume.

That means that the first issue of the paper was printed forty-seven years ago this week, as the numbers run. Every issue of the SENTINEL during these 47 years has been under the management, as publisher, of the present proprietor.

We cannot divorce ourself from the thought that, in its relation to Charlevoix, it is "bone of its bone, and flesh of its flesh," because Charlevoix and

THE EDITOR, FORTY YEARS AGO.

the SENTINEL were born the same day, the first Monday in April, 1869—; that being the date on which Charlevoix county came into being as an integral part of the State of Michigan.

We shall not at this time review the history of the SENTINEL. Its friends know what it is and what it has been all these nearly five decades. Its founder and publisher is proud of its record, and submits the record to face the future, with firm confidence that he has not labored in vain.

THAT MAN POWERS

Powers was in Charlevoix the most of last summer, and associated with some of our best families, and succeeded in convincing them that he was a nice gentleman. He is wanted in Chicago and other places for burglary and other offenses, rewards of over $1,000 being offered for his apprehension.

Missionary Society

The following program will be given by the Congregational Woman's Missionary Society Friday, April 21st.

Hostess.....Mrs. Hughes
Leader.....Mrs. Widdifield
Roll Call from Missionary Items.
Devotions.....Mrs. Golken
Reading, "Opportunity in China," .....Mrs. Frazier
Paper, Robert Morison... Mrs. F. Hull
Song.....Mrs. Curtis
Reading, a review of Kuroki. Mrs Clark
Reading, A letter from a missionary friend.....Miss Swinton

Notice of Teachers' Examination

The regular spring examination for the teachers of Charlevoix county will be held in the Charlevoix High School building April 27-28th. Certificates of all grades issued. Reading test on "Man Without a Country." All applicants not having the required six weeks normal training may write at this time conditional to final their normal credits at the close of the summer session at which time they may receive their certificates. All requests for renewals should be in at this time with the necessary institute fee.

Sincerely yours,
MAY L. STEWART.

PILLS BEST FOR LIVER

Because they contain the best liver medicines, no matter how bitter or nauseating for the sweet sugar coating hides the taste. Barnard Doings.

Minnie Wiseman of Charlevoix visited in Barnard last week.

Mr. Edward Shagton returned home from Flint Monday afternoon.

Miss Lucile Lewis will entertain the I. T.'s in honor of Miss Anna Willis, Tuesday evening.

Mrs. George Agee will give a miscellaneous shower for her sister, Miss Willis, Tuesday afternoon.

Horn to Mr. and Mrs. Henry Petter Friday morning a son. "Herman" and the mother are both doing well.

At the Easter exercises next Sunday, the Sunday school lesson will be at two p. m. and the program at two-thirty.

Mrs. Archie Brown will leave this week for Detroit, to join her husband, who has secured employment in that city.

Sim Baker on Saturday celebrated his 70th birthday, and Sunday walked to Charlevoix to attend church services, a distance of five miles. Mr. Baker is to be congratulated that he is 70 years young.

Edward Shagton and Mrs. Geo. Anderson were called to Flint, on Wednesday by the illness of their brother Thomas. At first it was thought necessary to operate, but later further treatment was advised. His many friends will be glad to hear of his speedy recovery.

On Thursday afternoon of this week will occur the marriage of Miss Anna Willis and Clifford Mayhew, at the home of the bride by Rev. D. A. Rood. They will leave immediately for their new home near East Jordan. Miss Willis will be missed in the church and social life of our community and will carry with her the united good wishes of her friends for many years of wedded bliss.

On Saturday evening at the home of the bride's parents, in Charlevoix, Mr. Henry Ager of Barnard and Miss Elma Hull were united in marriage, by the Rev. Vingard, in the presence of about forty relatives and near friends. Mr. Ager is employed at the Chicago Club and will make his new home at the resort. A host of friends here, join in congratulations and best wishes.

The Royal Oakes were royally entertained Tuesday evening at the home of Mr. and Mrs. James Block. Nearly all the members were present and the pig party was a success, large quantities of Clyde Smith received a prize pig for clear thinking, and Henry Walker was awarded a prize for the best model of a pig moulded out of gum. At the business meeting that followed the social hour it was voted to raise money to paint the church in the near future.

The poverty social at the Friday Friday evening was well attended, and very much enjoyed. A short program of readings and music was given and the usual amount of good fellowship was in evidence. Refreshments consisted of a sweet morsel, a tight squeeze, a coveted relish, lover's delight, Adam's ale, nectar and pole explorers. Over $11.00 was realized.

Beaver Island News

Oscar Martin went to Charlevoix on business.

George Williams made a trip to Charlevoix Tuesday.

Superintendent John Green went to Charlevoix on business.

Martin McDonough and William H. Green went to Cadillac for the summer.

Gus Milkie went to Charlevoix Tuesday.

Joe Donley went to Chicago for the summer.

Ed. Wydkel, of the Toledo Coffee Co. called on the trade Tuesday.

Patsy Flanagan, of Charlevoix, made a business trip here Tuesday.

John C. Gallagher made a business trip to Charlevoix Tuesday.

James Mooney and Charles Almsbury returned home Tuesday after spending the winter at Escanaba.

Mr. Peterson of the Petoskey Grocery house called on the Island trade Tuesday.

Ed. Seaman, of Charlevoix, was at the Island Tuesday.

Wm. Ward Bennett, wife of Capt. Bennett of Coast Guard Station, came on the Tuesday boat.

Tom Nowland, of Charlevoix, is engineer on the tug Elliott.

J. Fricks, of Wilmont went to Chicago on business Tuesday.

Pat Malloy is home from Manistique where he spent the winter.

Horn, to Mr. and Mrs. Peter O. Gallagher Monday evening, a daughter, mother and child doing well.

Mrs. Ella Steud, of St. Louis, Mo., who has been staying with Mrs. J. Donley all winter, went to Chicago on the Tuesday boat.

Wm. J. Gallagher went to Charlevoix Tuesday on business.

Born, to Mr. and Mrs. Chas. Bissell Monday, a girl.

All the tugs and gasoline boats have their nets set.

We have had no mail since March 29, as Charlevoix harbor was blocked in with ice and the mail boat could not get out.

FURTHER DETAILS OF BRIGGS DEATH

The following additional particulars of the death of C. N. Briggs are from the Traverse City Record:

C. N. Briggs, of Charlevoix, died suddenly at the rooms above Sam's Cafe this morning at about 3 o'clock, heart trouble causing his death.

Mr. and Mrs. Briggs had spent the winter in Lansing and were on their way to their home in Charlevoix. They arrived in Traverse City on the 6:12 Pere Marquette train yesterday morning and intended to complete their journey this morning. They registered at Sam's Cafe and were assigned rooms. At about 2:45 this morning Mrs. Briggs was awakened by the labored breathing of her husband, she called for assistance and the night man and other guest responded, summoned a physician and also awoke the proprietors, Mr. and Mrs Farrow, but before the latter arrived at the room, Mr. Briggs was dead.

County Normal Notes

[LAST WEEK'S NEWS]

Word has been received from Professor Barrows, who is in charge of the department of zoology and geology at the Michigan Agricultural College, that he received our letter pertaining to the appearance of the evening Grosbeak in this vicinity. He asked all interested to take special notice of their food and as to whether they ate large quantities of buds.

Miss Lillian Akins, a member of last year's class, called last week Monday, but on account of the holiday granted on there was no one present. Miss Akins left a note saying she is teaching near Manistee in Manistee county.

Miss Whiting has been giving the class instructions in the teaching of primary numbers.

The class had a good opportunity to show their artistic ability last Friday morning when Mrs. Coulter brought us a blue hyacinth to paint in water colors. The results were displayed for inspection by the class.

Tuesday morning the normal class and the sixth grade in the training room visited the Telegraph Office to hear the report come from Washington, D. C., concerning the correct time. It was twelve o'clock in Washington and eleven here.

Mrs. E. J. Chellis, of Ellsworth, was a visitor in the normal room Thursday morning.

Mary Boice spent the week end with her sister in Petoskey.

The members of the normal class enjoyed painting pussy-willows last Friday.

Florence Maclaugh substituted in the primary room Friday and Wednesday while Mr. Pierce was out of town on business.

Thursday morning the normal class had the pleasure of going to the high school room and listening to a talk by President Coulter of Alma College.

Catherine LaLonde and Hazel Richardson gave the dialogue "Who is to Blame" at the meeting of the Woman's Christian Temperance Union held at the Methodist church Friday afternoon.

Norwood News

Mr. and Mrs. Ben Pearl spent Sunday in Eastport.

The mill is running every day now cutting thirty thousand shingles daily.

Mr. W. French of East Jordan visited at Henry Superneau's last week.

J. VanDusen is visiting his daughters Mrs. Myrne and Mrs. Will Alward.

There will be an Easter program at the church Sunday evening.

Ted Pearl was to Norwood Thursday and Friday on business.

Mrs. Henry Superneau is confined to her home on account of illness.

Mr. and Mrs. Geo. Parsons and child are visited at A. B. Stafford's Sunday.

Ben Pearl is busy this week remodeling and decorating his home.

Mr. and Mrs. Amos Richardson and Mrs. Cameron came from Detroit to Charlevoix Friday, and are expected home soon.

Grand Traverse Bay is mostly free from ice and Cat Head lighthouse is "back on the job."

Marie Lammerman has finished her term of school at Griffin and returned to her home in Charlevoix Thursday.

Mrs. Joseph Spirck is visiting her daughter Mrs. Will Poole, of Detroit. Mrs. Spirck will visit other relatives in Chicago, Holland and Muskegon before returning home.

Wanted Boat, 50 to 60 Over All

Gasoline or steam, not over 6 years old, standard motor, must be a sacrifice IN PRICE for CASH. Send photo and full details in first letter.

J. M. LYONS, 336 Holcomb Ave. Detroit, Michigan.

Optimistic Thought.

It is not possible to found a lasting power upon injustice.

WANTED—To rent for season of 1916 Furnished Cottage with 5 or 6 bedrooms, 2 baths, furnace heat, on Michigan Ave. or some other attractive location. State all particulars and address, MRS. LOUIS FLORSHEIM, Congress Hotel, Chicago, Ill. 4-29-2

LIBRARY NOTES

Have you read the last issue of the Canadian Magazine? There is a splendid illustrated article on the Parliament Buildings fire at Ottawa in February.

Save your magazines for the Library. We want old and recent numbers of all magazines except those which have stories only. Telephone 157 to make arrangements for their delivery.

Every business man in Charlevoix should read the "System" magazine. He will find it at the Library.

Of the 307 people who spent some time the past week reading in the Library 101 were men. If they find it worth while to visit the Library with some regularity don't you think you would?

If the women who find it difficult to plan meals at this "in-between season" will call at the Library they will receive valuable help. We have a good collection of recipes, menus, etc.

CITY REAL ESTATE CHANGE

On Monday Harry L. Oldham sold the residence property where he lives, 216 Park avenue, to Isaac Goldberg, of Detroit, who will occupy it as a summer home.

Mr. Oldham will move to the residence next door east, 214 Park avenue, recently purchased from the Nicholls estate but plans to rebuild, enlarge and improve that house this summer.

School Commissioner's Column

May L. Stewart, Commissioner

Fifteen schools visited last week.

The Heart Lake school house in Hudson is being painted.

The Harmon school plans new shades to prevent cross lights. They will reset their seats with only one size in a row and the correct number of inches apart.

Forty-one boys and girls in the new Corn Clubs organized in Afton, Milton and Rock Elm last week. Prizes to be given by the East Jordan Board of Trade.

The Hollands school of Hudson township have two new chemical toilets ready to install.

The Woodward school has a very active Mothers' Club. This week they discuss sanitary conditions in school buildings.

Star school has a "Standard Plate" day April 21st.

Twenty schools today wishing the state standard school inspector to study with them their school room conditions.

The Rock Elm school gets black walnut trees from the Mt. Pleasant Agriculture Department. They put in windows for the unnatural lighting plan for school rooms.

See "Winding the May Pole" in the back of the Course of Study. It's a splendid game for the spring days. Supervised play will prove an effective step toward providing a correct moral atmosphere for our country schools.

The little men and women of Boyne Falls tip their caps and shake hands easily without embarrassment. In the primary room they are performing these little courtesies in the daily school curriculum.

The Wildwood school is driving a new well.

A cunning demonstration for this county June 21st. Remember the date and find out details later.

The boys and girls are bringing flowers to school these days. What is the message of the flowers to them? Ta-you!

LOST A Blue Serge Suit, taken from John S. Ackert's clothes line Thursday evening. Liberal reward offered.

Easter at the Congregational Church

Friday evening at 7:30 the choir will sing the sacred cantata, "The Seven Last Words."

Sunday morning there will be an Easter service, with appropriate music. The Sunday School will study the Easter lesson; and at the o'clock will present an Easter program. To all these services the public is cordially invited.

FOR SALE—Resort cottages well located. Houses and lots in any part of the city, also 14-rm close to city. Apply to H. S. Harsha.

REPUBLICAN CO. CONVENTION

HARMONIOUS GATHERING AT BOYNE CITY NAMES DELEGATES TO STATE AND CONGRESSIONAL CONVENTION

Charlevoix county was well represented at the republican county convention at Boyne City Tuesday. The proceedings were attended by the utmost harmony and enthusiasm. Rousing speeches were made, and confidence expressed by all in a glorious republican victory in State and Union. Following delegates were elected:

STATE CONVENTION AT LANSING.

W. J. Pearson, J. M. Harris, R. W. Paddock, P. D. Campbell Jr., H. I. McMillan, D. H. Fitch, W. J. Elston, A. G. Urquhart, E. W. Abbott, L. E. Benton.

CONGRESSIONAL AT ST. IGNACE.

J. M. Harris, R. A. Emrey, H. D. Wood, Lisle Shanahan, Jacob Grail, A. E. Cross, F. H. Thompson, M. E. Silverstein, Ned Fox, W. J. Pearson.

Chas. Emrey was elected secretary of republican county committee to fill vacancy.

Strong resolution adopted endorsing Judge Mayne for Justice of Supreme Court.

RURAL CARRIER EXAMINATION

The United States Civil Service Commission has announced an examination for the County of Charlevoix, Mich., to be held at Boyne City, Charlevoix and Petoskey on May 13 1916 to fill the position of rural carrier at Clarion and vacancies that may later occur on rural routes from other post offices in the above-mentioned county. The examination will be open only to male citizens who are actually domiciled in the territory of a post office in the county and who meet the other requirements set forth in Form No. 1977. This form and application blanks may be obtained from Mason Ross, local secretary, or from the United States Civil Service Commission at Washington, D. C. Applications should be forwarded to the Commission at Washington at the earliest practicable date.

HURRAH FOR STATE WIDE

On Tuesday evening, April 25th at 7:30 o'clock, in the Congregational church, Mrs. Emma Lamb Barnes, of Petoskey, will give an address on State Wide Prohibition.

Every friend of temperance and all who are interested, men, women and children, are urged to be present at this meeting.

ROYAL BAKING POWDER

Absolutely Pure

Made from Cream of Tartar

NO ALUM—NO PHOSPHATE

First publication April 22.

ORDER FOR PUBLICATION

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

At a session of said court held at the Probate office in the City of Charlevoix in said county on the 19th day of April A. D. 1916.

Present: Hon. SILVESTER A. CORNELL, Judge of Probate.

In the matter of the estate of Alfred L. White, deceased.

It appearing having died in said county, his petition praying that the administration of said estate be granted to Ella M. White or some other suitable person, it is ordered that it be ordered that the 8th day of May A. D. 1916 at ten o'clock in the forenoon at said probate office be and is hereby appointed for hearing said petition.

And it is further ordered that notice of the time of the hearing of said petition be given by publication of a copy of this order for three successive weeks previous to said time of hearing in the Charlevoix Sentinel a newspaper printed and circulating in said county.

SILVESTER A. CORNELL, Judge of Probate.

A true copy. 4-29-3 ALICE M. CORNELL, Probate Clerk, Acting Judge of Probate.

ACHES OF HOUSE CLEANING

The pain and soreness caused by bruises, overexertion and straining during house cleaning time are soothed away by Sloan's Liniment. No need to suffer this agony. Just apply Sloan's Liniment to the sore spots, rub only a little. In a short time the pain leaves, you rest comfortably and enjoy a refreshing sleep. One grateful user writes: "Sloan's Liniment is worth its weight in gold." Keep a bottle on hand, use it against all soreness, Neuralgia and bruises. Kills pain. 25c. at your druggist.

ANNOUNCEMENT TO OUR TRADE

We have arranged with the manufacturers of B. P. S. Products to give you the service of a Paint and Varnish expert for

SATURDAY, APRIL 22, 1916.

As paint dealers we feel an obligation to our trade to carry a reliable brand of goods, also to give hints and suggestions, if desired, on their use and application. Just at this season, when everyone has some painting or finishing to be done we thought you would appreciate talking with a special paint man who understands the subject thoroughly.

Mr. W. H. Butler will be glad to show you the best methods of finishing and decorating a new home, or refinishing old floors, woodwork and furniture, to help select suitable color combinations in house paint, or to suggest remedies for paint and varnish troubles of any kind. We urge you to make the most of this opportunity, the service being at our expense and free to all of our patrons. Remember the day.

YOU WILL NOT BE ASKED TO BUY.

BLANCHARD HARDWARE CO.

Wheel Does Much Work.

The balance wheel of a clock vibrates 300 times a minute, 432,000 times a day, or 157,680,000 times a year. As each vibration covers about 1½ revolutions, the shaft on which the balance wheel is mounted makes 236,520,000,000 revolutions in its bearings each year.

Refreshing Drink.

Add a teaspoonful to a half glass of sour cream and a half glass of rich milk, and best will astonishment until it gets and smooth. Pour into a tall glass, and over the top put a thin coating of powdered nutmeg, and a scant grating of nutmeg. Serve cold with crackers.

ECZEMA CURED OR MONEY REFUNDED

This guarantee goes with every box of Dr. Hobson's Eczema Ointment. Makes no difference whether it is baby, child or aged. No matter how long standing the case this guarantee holds good. Cut out this strip, go to your druggist, get a box of Dr. Hobson's Eczema Ointment, use it as directed and if you are not fully satisfied, the druggist or maker will refund your money. Try it just once, you will be happily surprised.

What Scenario Writers Are Paid.

In the American Magazine Walter Prichard Eaton has an article on the moving picture industry in which he says:

"No more than three years ago many scenario writers were paid $25 a week, and they were expected to turn out a picture every seven days. Pictures purchased from outside were paid for correspondingly, or at even lesser rates. Bear in mind, also, that no royalties were (or are) paid. Do you suppose for a moment that any man with a real talent, for story telling would give a second thought to motion picture writing under such conditions?

"Times are better now because the room competition has forced up prices, but the returns to the authors are still in ridiculous disproportion to the salaries of the actors and the total cost of the production. An average scenario writer may now get from $100 to $200 a week. At such a wage young men of talent may possibly be secured."

OUR PUBLIC FORUM

Peter Radford

ON ADVERTISE IT IN AMERICA.

As a citizen of this nation and one intensely interested in its material development, I want to set up a proval to the "Buy it in America" movement. Commercial patriotism and business pride are the foundation stones of success in industry and no country can become supreme in commerce and trade unless it fosters a spirit of friendship and partiality for its own products and institutions. It is the spirit of the hive that makes the whole of industry turn and each community should be a progressive unit in our industrial universe. All things being equal the farmer should patronize the local merchant, who is always a good citizen, a heavy taxpayer and friend of the farmer. The farmer sends shiploads of raw material to foreign markets and factories that must be very vessels laden with finished and further grown products coming to America. Any effort to minimize this economic wave ought to be encouraged.

But as a farmer and friend of the manufacturer and merchant I want to advertise it in America" movement. The manufacturer and jobber may have local biases on the home or patriotism but if they will put an "ad" in the newspapers in their trade territory, making a business presentation of their goods, they will find it far more effective than waving the Star-spangled Banner. The farmer is as much interested in the price of the things he has to buy as in the price of the things he has for sale and the advertising column of his newspaper are his price list. The price to the thing and the farmer wants the figures on cold type. The politicians give him all the patriotic buncombe he cares for. Business enterprise is a far more successful salesman than business patriotism.

There are many most worthy organizations working to promote commerce and trade but we seldom find organized effort to promote the press, yet it is recognized as the most powerful agency for progress the world has ever produced. We have all sorts of days calculated to promote business and honor industry such as Trades Days, Bargain Days, Labor Days, etc.; why not have a press day and all business concerns advertise the things they have to sell and everybody subscribe for the local paper and all delinquents pay a year in advance? There is nothing so elevating to civilization as the smile of an editor and nothing will contribute more toward the welfare of a community than the prosperity of the press.

The farmer is a friend and patron of the newspapers. He subscribe for them and pays for them. He is a good pay man. He is the best investment he can make. There is no news so valuable as store news; no information so interesting as market demands; no tragedy so entertaining as the rise and fall of prices and no page more closely studied by the farmer than the advertising columns of the press.

The bills in the New York Assembly, known as the "Underworld Bill" and, according to Police Commissioner Arthur Woods, introduced "in the interest of no part of the public except the Vice Trust" are being backed by avowed anti-suffrage men. The "Vice Trust" and the "Liquor Interests" are opposed to suffrage because if women had the ballot the homes would be neglected, men would take to drink, only bad women would vote, and such conditions the aforesaid noble defenders of the home could not endure.

Corrupt politicians who do not want to be disturbed in their dealings, always express tender solicitude for fear women should be corrupted by politics. They dread women's ballots as spiders do a breeze. When the women of Manitoba took a suffrage petition to the Parliament, the Premier, sir Rodmond Roblin, told the dear gentlewomen, in most emphatic language, to fly to their homes and not pollute their lives with dirty politics. A few months later the Conservative Party, then in power, got licked to a frazzle and resigned from office amid disgraceful political stunts which involved the Premier. Sir Rodmond, like Liberal Party soon after came into power and gave the women full franchise.—Woman's Journal.

SYNOPSIS.

Billets of Dalby's lumber camp discovers a stranger in the camp, who later introduces himself to John Dalby, Sandy's father, as Hampden Cullins, "one most of it." He makes himself at home with the camp and the work. In an encounter he proves the superior man, he does not lack judgment. Sandy, the young giant, is jealous. He discovers that Billets knows the ear of the Billets tribe of Indians and wonders what his surname is. In the meantime Billets has written to Miss Ordway, of Ordway, a magazine writer from New York, comes to Canada to get material for a romance of the lumber region, and asks her to join him. Sandy discovers that Billets, who claims title to and thereby has bought at the Land Office, Homestead entry on a claim on the Lost Bell and proves up on it, discovers that Billets is not what he seems, that he is a man of education and Poppy, Sandy's and Hampden's mess fight over the Indian girl, Billets leaves the camp, the Lost Bell has never been found, Sandy and Billets have a contract fray and fight for the stronger afterward. Hampden and Sandy make friends. Billets tells Sandy that Hampden is crossed with a girl and that he has taken eyes in Sandy to search of evidence against Hampden. Sandy meets Hampden and falls desperately in love with him for the first time. Sandy's mess down in the Hampden. Sandy's mother, money, Billets goes to her friends, the Ordways, and Hampden goes to the woods for Sandy to make a confession. Sandy tells Sandy that she has found Hampden's Indian girl and that she is Hampden's wife. Sandy goes home to his mother, finding Billets, who

SECOND PHANTOM SHIP

"FLYING DUTCHMAN" SAID TO HAVE A RIVAL.

Both French and Yankee Fishermen Shun Cove Where They Believe the Ghostly Vessel Seeks Refuge.

It is said that the French fishermen from the Magdalen islands and the matter-of-fact Yankee skippers of Bangor alike shun the shores of Bay Chaleur after dark and refuse to put in at Dead Man's cove, under any circumstances, preferring to run the risk of foundering in a hurricane in the open sea to sharing the shelter of the cove with the "phantom ship."

This famous specter of the sea is said to appear only in the calm preceding a great storm with every stitch of canvas drawing and her decks swarming with men, all running to and fro as if in a panic. Ahead of her the water is like glass, behind her the gale comes tearing along, beating up the sea into froth and driving her straight on through everything in her way. She is an ancient model, full-rigged and gray all over—hull, upper works, sails and spars—as if formed of fog. Gray, too, is her ghastly crew.

The inhabitants of St. Pierre tell of a smack on a herring trip that found herself right in the track of the "phantom ship." Captain and crew had heard of the ghostly vessel, but scoffed at it, and when they saw her loom up in the twilight straight ahead they thought a collision imminent and the startled steersman put the helm over. The sea wraith swept down upon them, and in the space of a breath had passed right through them and was racing madly astern in the direction of Dead Man's cove. A fishing schooner from Magdalen island, warned by the thickening sky of an approaching storm, put in at the cove to ride out the gale. Before it had reached an anchorage a ship was seen coming rapidly behind, also heading for the cove. As it drew near the captain got out his glass to see if he knew the stranger. Suddenly he dropped to his knees and commenced to pray. "Boys," he yelled, "it's a ghost. I saw a sea gull fly right through her mainsail!" Every man threw himself on his face in an agony of terror, afraid to look. The first to raise his head and look over the rail was the cabin boy. "Oh, get up; get up, all of you," he shouted, "she's gone." The crew lost no time in making sail out of the cove in the teeth of a black squall.

Another story is that of a smack from St. Pierre which saw the phantom anchored just inside the cove at sunset. A small boat filled with men was making trips between the gray ship and the beach, at each trip unloading boxes and barrels which other men waiting ashore buried in the sand. The captain did not wait to see whether they were interring dead men or chests of treasure, but got away from the place as fast as he could. Old sailors along the Maine coast firmly believe that the "phantom ship" is a merchantman that went down with all on board trying to reach the cove in a great storm in 1784; but at St. Pierre the fishermen believe it is a pirate haunting the spot where the buccaneer crew hid the treasure for which they lost their souls.

Activities of Women.

Over 20,000 women are employed in the canneries of California.

Mrs. Winston Churchill is a designer of curtains.

French women are now cleaning the streets, currying the horses, cleaning motors cars and acting as miners.

Miss Margaret Kennedy, a musically inclined girl of Skomakawa, Cal., is paying for her education by crawfishing.

Miss Caroline K. Kenworthy of Philadelphia, is licensed to practice law in the Federal courts of the United States.

A census taken of the women who attend theaters in New York city show that they predominate in the gallery seats.

Russia and Serbia, also Austria, may allow young women to fight in their armies, but Canada will not, although, according to a recruiting officer in Winnipeg, several have applied and two could hardly be kept from joining by force in response to a call for stenographers for the secondary service.

British Doctors Get Gasoline Rebate.

Gasoline is far more expensive in Great Britain than in the United States, and in order not to inflict a too heavy outlay on physicians using light cars in their professional work, the British government is now granting a rebate of 3d. per gallon to all doctors making application for it before their local collector of taxes.

Wants Equal Rights.

"If I had 5 cents and gave you 2, how many would I have left?" asked brother, whose hobby was arithmetic.

"I wouldn't take 2 cents," said the sister, "'cause then you would have more than I would have."

To The Woman Who Cannot Afford to Make a Mistake---

Quality is very important to the woman whose new coat is to be worn a whole season, and possibly two or more.

Not only is the wearing quality of the fabrics important, but expert workmanship in the tailoring. Naturally designers and tailors who are the most careful as to quality may also be depended upon for charming and correct styles.

The Wooltex Label is a mark of dependable style and quality values

It assures correct style design. The Wooltex designing staff is in daily touch with the leading fashion centers of the world.

It assures pure wool and pure silk fabrics. Every garment is custom-tailor basted and seams stitched with silk.

Linings and outer materials are cut and fitted separately—as all good custom tailors make their high-priced garments.

These are all points of great importance to the woman who cannot afford to make a mistake.

You'll pay no more for Wooltex now than six or eight weeks later. And whatever Wooltex garment you choose, you'll find the price moderate.

Wooltex Coats $10 to $17.

HARRY POWERS AND HIS PAL CAPTURED

Fugitives Found Under a Bed at Vacant Hotel Michigan in This City

STORY OF THE WANDERINGS OF THE PAIR AFTER THEIR JAIL ESCAPE

Harry Powers and his under-study—Lavalley—were captured in this city at four o'clock Thursday afternoon, and were taken to Traverse City Friday morning by the Sheriff of Grand Traverse county who was here a week assisting Sheriff Novak in the search.

In an interview Thursday evening Powers told our reporter that from Monday night of last week up to the hour of their capture they were about town, generally along the docks and in the alleys; once among the apple trees near the Sears garage, and heard people on the sidewalk talking about them, recognizing many acquaintances made during his last summer's sojourn.

The fugitives were discovered Thursday afternoon in the vacant Hotel Michigan, entrance to which they gained through an open window. The owner, Mrs. Biossat, entered the house late Thursday afternoon after some needed article. As soon as she entered she smelled tobacco smoke strongly. She passed along the hall leading from the lobby and entered a bed-room, where she discovered boots under the bed. She at once concluded that the boots were worn by the much-wanted runaways. She screamed and vacated the premises, the men, meanwhile, escaping by a rear window. Chief of Police Chas. Jefferies found Powers in the alley near Jos. Cooper's place. When discovered Powers said:

"Well, Charley, I have no gun."

"Neither have I," replied Charley.

Whereupon they shook hands and took a walk to the jail. Lavalley, secreted under a barn across the street saw the capture, and surrendered. Following is the history of the travels of the two men from the hour of their escape from the Traverse City jail April 13th:

From Traverse City they walked the beach until they came to six-mile hill, (near Hilton's) leaving the beach there they followed the road, arriving at Mrs. Moffit's about mid-night, going from there to Korth's and begging for something to eat, which Korth gave them. When they left Korth's they crossed the road and circled around the block to Francis Gallagher's barn, staying there until about 4:30 a. m., then going along the bank to Sam Hamilton's ship yard, where they hid themselves in a yacht, staying there all day Tuesday until about eight o'clock. Leaving there they came up Belvedere avenue taking the dock at the rear of the Creamery and following along until they reached the laundry, where they saw Chief Jefferies and many other people on the street that that they recognized. From there they returned to Belvedere Ave., and went up into Dr. Armstrong's yard from where they saw and heard the people talking about them. Wednesday morning about three o'clock they went into the Hotel Michigan, occupying room No. 7. Powers says that at the time they discovered him and his pal, he had been smoking. They were under the bed when Mrs. Biossat saw his legs, and she screamed, then they got up and went out, Powers going up the hill into Armstrong's yard and Lavalley went under the barn. Powers says that he has not had a gun, neither has Lavalley, nothing but a pen knife. They were captured at about four o'clock. Sheriff Campbell left Friday morning, with the two men, for Traverse City.

The two were secreted in the Hotel Michigan for thirty-six hours, during which they enjoyed all the comforts and conveniences that would fall to the lot of a traveling man as a guest. They were probably supplied with food and tobacco and undoubtedly were the recipients, while "dwelling in our midst" of other courtesies.

But Powers says that it was their purpose to reach the straits and cross if possible, but when he saw Sheriff Campbell here he knew that the straits would be blocked to them, and that they were on the point of surrendering.

Powers is a smooth proposition, of polite and pleasing address, and a good-looker. He has every appearance, now that the screen is raised, of a man who can do a big job. He is wanted in Illinois for burglary, and was mixed up last fall in the robbery of the Wayne Hotel in Detroit. He was twice arrested here last summer for jumping board bills, expressing great indignation at the "outrage." In both cases he settled by paying the bills. He has several *alaises*, and it is said that Powers is not his right name.

(Traverse City Record, Saturday.)

Powers and LaValley, again detained in Dave Campbell's year-around hostlery, seemed to have easily dropped back into the regular routine of the institution, though it can hardly be said that the rules are laid out along the theory of the "consent of the governed." Both men have put in full time making up for lost sleep. The officers, too, have stuck to the feathers, Frank Lahym hanging up a record of twelve hours and ten minutes of slumber, which is about two hours better than the sheriff's.

Powers still professes to have no high regard for the jail and claims that the iron sheeting, because of old age, is practically rotten and that the piece torn off when he escaped separated as easily as tough card or binder board. He offered to give a demonstration before a committee to be named by the supervisors. This was not accepted, the sheriff evidently thinking that the hole made in the wall last week is proof enough of what he can do.

Powers claims that he and LaValley walked all the way to Charlevoix, following the East Bay shore for a long stretch. His feet were badly chafed and blistered from his tramping LaValley shows no marks of hardships, but Powers has been in the habit of putting up at the best hotels and enjoying the best in the land and has not been compelled to rough it out in the open. He is still fastidious about his appearance and, when approached by Sheriff Campbell after the capture, apologized for his worn shoes and the day's growth of beard. One of the first requests when brought back to the Grand Traverse jail was for a chance to clean up and put on a change of clothes.

During the time that Powers was detained in jail here, every person who served sentence has had to submit to a thorough search of his clothing so that no message could be smuggled to his pals outside. Some time ago a man was sentenced for being intoxicated. Shortly afterward Powers indignantly told the sheriff that this man was brought in to gain his confidence and get information from him. He claimed the alleged drunk was not a bum, because his underclothing and stockings were of good quality while his suit of clothes was very dilapidated. But when this man was released and submitted to the customary search, he had a note from Powers addressed to Rudy Korth, of Charlevoix, and demanding that the latter send fifty dollars. This caused the sheriff to become suspicious of the Korth place and prompted his visit to Lansing to look up Karl Korth, who reached his brother's home on the day that Powers applied there for something to eat.

CAPTAIN PETER D. CAMPBELL

WELL KNOWN AND POPULAR SHIP-MASTER CLOSES A USEFUL AND HONORABLE CAREER

Capt. Peter D. Campbell, one of the best known of Lake Michigan's master mariners, died at his home in this city on Thursday afternoon, after a lingering illness of nearly a year.

Capt. Campbell's infirmity began by an affection of the optic nerve which gradually destroyed his eyesight and which developed into a cerebral decline that advanced skill and tender care did not avail to check.

Deceased was born at St. Charles, Ill., July 30th, 1850. He was the son of John G. and Catherine M. Campbell. As a boy he removed to Stony Creek, Mich., where his father was engaged in the milling business. During the civil war, while yet a boy, he lived in Canada, returning to Michigan at the age of 16, where he began his career as a sailor.

He was associated with his brother Alex Campbell in the tug business in Chicago at the time of the Chicago fire. In 1874 he married Lois E. Allen, at Hampshire, Ill., and moved to Muskegon, where he was in the towing business until 1879, when he purchased the tug Avery and moved to Whitehall. In 1880, in co-partnership with the Covell Brothers, of Whitehall, he purchased the steamer E. C. Brittain and sailed her as a lumber and passenger vessel between Whitehall and Chicago until 1887, when, with the same business associates, he built, at Manitowoc, the steamer A. D. Hayward, which was destroyed by fire soon after going into commission. In 1888 he built at the same place, the steamer M. B. Covell, now P. M. No. 6, sold to Gus Kitzinger in 1891. In 1890 he bought the barge J. H. Pauly, subsequently selling her to Milwaukee parties.

In 1882 he purchased the small steamer Hackley, operating her out of Whitehall until 1896, when he brought her to Charlevoix and put her on the Beaver Island run. A few years later he sold the Hackley, buying and rebuilding into a passenger boat the large tug Oval Agitator, renaming her the Beaver. This boat was destroyed by fire just one year ago.

Deceased is survived by his wife and four children—Ira A. Campbell, of San Francisco; J. Harvey and F. D. Jr. and Mrs. Arba Cameron, of Chicago. The funeral was from the residence Sunday afternoon, and the fact that a community mourns was attested by the large attendance.

Peter D. Campbell was a typical old school master mariner; bluff and sometimes blunt in his speech, but easily moved to a tenderness that always dispelled resentment. There was not a suggestion of hypocricy or deceit in his nature; he called "a spade a spade." If he had good reason to entertain an unfavorable opinion of a man, that particular man was generally the first to find it out, in speech that was lucid.

His friendship was something to be prized, because of its unvarying sincerity—friendship as strong as a deep-rooted oak. Only on his deck or bridge was he "captain" to his friends; ashore he was "Pete." In his days of health and strength he was always the embodiment of good nature. He delighted in a practical joke on a friend, and he "suffered" many of them on himself with equal enjoyment. In the "S.S." articles of bygone days he was generally the favorite victim of the writer, and many is the time that he has entered this office in apparently riotous resentment, which his genial smile belied, the exhibition generally ending with a smoke and a chat, with "Pete's" boots high or the editorial desk.

Big-hearted, true, generous-souled skipper! He had not a fault that was not smothered in a virtue, and his virtues marked the MAN! His loss leaves a void in the hearts of many a friend.

Robbing Your Own Pay Envelope

—The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.

—"I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.

—When the pinch of want comes the lesson of thrift comes too late. Once down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.

—Young man—young woman, are you robbing your pay envelope for pleasure and pastimes which in later years will deprive you of the comforts and necessities of life?

—Take $1.00 from your pay envelope this week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every pay-day thereafter.

Membership Conference Chicago Association of Commerce Parts With Its "Grand Old Man."

From Chicago Commerce Weekly:

"American business is indifferent; it must wake up," said W. R. Boyd, Jr., field secretary of the Chamber of Commerce of the United States of America, stationed in the Chicago office, in his talk last night to the Membership conference.

When theroutine work of the evening had been finished Chairman Bone announced that he had received the resignation of "Uncle George" Van Pelt from the Membership committee and expressed regret and sorrow over his decision, and asked "Uncle George" to say a few words of farewell. Business Manager Miller paid a warm tribute to "Uncle George."

Happy things in honor of a veteran association member and membership builder were said when one and another declared that they were mighty sorry that "Uncle George" was going. Following the chair's announcement of the latter's expected departure the popular deserter said a word or two about his plans and thinings that were in his heart. He said:

"I have always made it a point in approaching a man never to give him a chance to say no, I don't want to belong to the association. But I tell him what I find in it and in its men. He knows it's good and he knows he ought to be a member. Then I follow that thing along. And one time last year, in order to prove that I was on the right track, I went to see a man thirty-two times before I got his application.

"When you call me "Uncle George," and speak to me as lovingly as you do, and knowing the love I have for you people here, I want to tell you it is a hard thing for me to feel that I am not going to be with you."

Then he explained how plans taking him to Michigan, Massachusetts and South Carolina were the cause of the regretted separation.

Said H. F. Miller in tribute to this unusually efficient membership worker: "Uncle George' is one man we could always call on for an application. I would like to say now when he is here that he has always been an inspiration to me. He is not the youngest man present and yet in his heart and work there is no younger man. He is afraid of nothing when it comes to a promotional proposition. I think he is one of the best salesmen in Chicago. He is one of the biggest men the Association of Commerce ever had. He represents the right ideas—a genuine association man—one that is not in it for any selfish purpose, the personification of good fellowship and association spirit, civic pride and local patriotism. If you can find a better man in the association than the one we are losing in this pleasant fashion I would like to know where to look for him. Who, among us, deserves a better time than "Uncle George,' a man who has worked all his life and has worked hard, not alone for himself and his family, but for his town. We are sincere in everything we say to this one Grand Old Man of the membership work."

WILL SELL OR EXCHANGE for improved farm land, my house and lot at Bay Shore, Mich. For particulars see or address, A. E. BOWMAN, at Voorheis Implement Store, Harbor Springs Mich. 3-30-3

SAY BILL; WHAT DO YOU KNOW ABOUT THAT?

In this issue will be found the official canvas of votes for the recent Presidential Primary Election, for the county of Charlevoix. Wm. Alden Smith led Henry Ford a plurality of twenty-two votes, while simpson received 112, a testimonial to the intelligence of 112 voters.

The vote shows the county overwhelmingly republican, registering 1,384 votes for republican member of national committee against 290 for democratic member of national committee. Of the latter O. E. Wood received a majority of 48 over W. A. Comstock of Alpena.

Willard A. Smith, dean of Michigan newspaper men, was tendered the vote of one man for presidential nomination of the republican ticket and William Pearson, the "big republican of the county" was tendered one vote for democratic presidential nomination.—Boyne Citizen.

Study for Geologists.

The United States geological survey is studying the lavas of the Hawaiian volcanos. The work is particularly pertinent because all the islands of that group have been built up gradually by volcanic discharges of lava, from a beginning deep down in the sea.

Give Credit to Chinese.

The earliest designs used for china at Worcester, England, are believed to have been copied from the Chinese.

WATCH CHILD'S COUGH

Colds, running of nose, continued irritation of the mucous membrane if neglected may mean Catarrh later. Don't take the chances—do something for your child! Children will not take every medicine, but they will take Dr. King's New Discovery and without bribing or teasing. Its a sweet pleasant Tar Syrup and so effective. Just laxative enough to eliminate the waste poisons. Almost the first dose helps. Always prepared, no mixing or fussing. Just ask your druggist for Dr. King's New Discovery. It will safeguard your child against serious ailments resulting from colds.

HOW IS THIS, WILLIAM ALDEN

The white robed angel of peace, guardian of the "mollycoddles," worshipped by Bryan and Ford, has evidently fluttered his wings over the couch of our spread-eagle, warlike William. William Alden voted against the army increase bill in the senate.

This sudden meekness of one whose eloquence has so often reverberated through the atmosphere in advocacy of all that is militant and heroic looks like a change of heart superinduced by recent events.

What will Michigan do now for a first class Fourth of July orator?

Discontented Man.

Man is never quite content. If he has a corn he wishes it were a chilblain, and if he has a chilblain he imagines he would be happier with a corn.

Many Kinds of Bananas.

No fewer than 176 different kinds of bananas are grown in various parts of the world.

ANTI-PROHIBITION CAMPAIGN

The SENTINEL has received a communication from the Erwin & Wasey Co., an advertising agency of Chicago and Detroit, saying:

"An organization opposed to state-wide prohibition is contemplating an extensive advertising campaign for the purpose of setting certain facts and figures before the people of the State.

"We desire to know whether you would accept this advertising for your publication.

"We can assure you in advance that there would be nothing objectionable in the copy which would be devoted entirely to setting forth proven facts relative to prohibition.

"Kindly let us hear from you at once on this matter and also send us rate card indicating agency commission and cash discount."

Our answer was a copy of this issue of the SENTINEL. Erwin & Wasey do not possess money enough to secure one inch of advertising space in this paper in defence of the liquor interests.

We want money, but we want to get it honestly.

NEAR THE BRINK OF WAR

On Thursday the President transmitted to Ambassador Girard at Berlin the ultimatum of this government in the matter at issue between the two governments. This "last word" of the American government conveys to Germany the purpose of this government to sever diplomatic relations unless the ruthless and barbarous methods of submarine warfare are stopped and assurances given for the future.

A severance of diplomatic relations is equivalent to a declaration of war. Congress, immediately following the president's action, passed bills that authorize a first line and reserve army of a million men, including an increase of the regular army to 250,000 men.

In Mexico the situation is problematical. Villa is said to be yet alive and Gen. Pershing advises that Carranzista opposition is developing rapidly. Mexican government has demanded the withdrawal of American troops. Instead of complying, more troops are being sent.

It looks very much like another Mexican war.

SAFEGUARD YOUR ESTATE

You would probably hesitate to entrust your fortune to an individual. Is it wise to entrust your ESTATE to one however good his intentions? The wise course would be to appoint this company your executor. It has had 25 years experience and being a corporation never dies.

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by FRANK WALTERS

COPYRIGHT BY BOBBS-MERRILL AND CO. 1917

SYNOPSIS.

Billets of Daily's logging camp directs a practical joke against Sandry, the cook, who is also the Indian agent. Sandry is known as the Dillingworth Lumber Co.'s agent for the Indians, and has trouble with the camp and the work. He gives Billets a beating and is fired by Daily. Little Sandry is a great favorite among the Indians. That he does not belong to Indigenous Sandry. He thinks that night bears the raw, bright lumber he was marking. Sandry's Indian name is Ka-ka-ta-ka, Hawk of a feeble mission he calls his "Yellow Plum." Sandry's nearest neighbor is Pete Pappy Ordway, a cooperage with a reputation for "Indian whisky." Ordway's reputation is a cloud on Sandry's reputation

JOHN PONT

FISK'S DEATH

Central Lake Torch: John Pont Fisk, son of Mr. and Mrs. Monroe Fisk, was born in Lawrence, Nov. 29, 1860, and passed away at the Hotel Dyckman, Paw Paw, after a two weeks illness Monday morning, April 15, at two o'clock, at the age of nearly 52 years. He had gone to Paw Paw on legal business, and while there suffered an attack of heart trouble and his wife was summoned to his bedside. All that medical skill and careful nursing could do could save him and death relieved his intense suffering.

His younger days were all spent in and around Lawrence. He later became traveling salesman for several large tobacco concerns and was one of the most successful salesmen in this business. He had always said that he would retire from active work at 50. This resolution he carried out, and fifteen years ago he came to Central Lake and built a beautiful log cabin known as "Fisk's Lodge" on the bank of the lake where he could live and enjoy life as he desired. This resort is famous the country over and hundreds have enjoyed the hospitality of the Fisks there.

Mr. Fisk was liked by all who knew him, was kind hearted and generous and was happy when doing something for some member of his family.

On May 16, 1906 he was married to Miss Charity Babcock, who was a graduate nurse from the Johns Hopkins hospital in Baltimore.

The only scene ever taken by moonlight, without the aid of artificial lights is shown in "Buckshot John," a photoplay now being presented by Bosworth. It was photographed by George W. Hill during a scene showing the hero's escape from prison. At the Majestic Theatre, Friday, April 29th.

A law, now effective, designed for the purpose of eliminating the avoidance of paying dog taxes, provides that supervisors shall collect dog taxes at the time of assessment. He certifies to the sheriff a list of the dogs and it becomes the duty of the sheriff to kill the animals on which the tax has not been paid. For service the sheriff receives $1.00 and must also bury the body. The lists are made out and sworn to, making the fate of the outlaws, on the Tuesday following the third Monday in June.

LOCAL AND PERSONAL

Albert Holmes is another Florida arrival.

Mrs. P. D. Campbell accompanied her son Ira to Chicago Tuesday.

The St. James tug McCann came over Thursday with a load of fish.

Read the Argo Milling Co's ad. concerning Majestic Theatre tickets.

The St. James tug Two Sisters is fishing out of this port this season.

Perry, brother of Capt. Ava Smith, is here from far west Washington on a visit.

G. V. Nash, of Arkansas, is in the city as the guest of Fred J. Meech for a few days.

Work has been commenced in repairing Park avenue, which was torn up by sewer work last fall.

Alonzo Hanshaw, city treasurer, is very seriously ill, at his home, with but faint hopes of recovery.

Mrs. Sarah Emrey has a nephew in the Canadian army contingent now in England—Sergeant Claude McMullen.

Ned B. Fox, republican primary candidate for register of deeds, was in the city Thursday looking up his interests.

The lighthouse tender Sumac arrived Monday and at once proceeded to the planting of buoys in the straits and islands.

Deputy Harry Coblentz, April 17th, organized Gleaner Arbor at Advance known as the Eveline Arbor with forty charter members.

The Independent Order of Oddfellows will attend worship at the Congregational church next Sunday morning. The men's choir will sing.

Capt. A. G. Aldrich and daughter Lizzie, who spent the winter in southern Michigan, have returned to their south State street home.

Miss Margaret Dutlesse, who has been spending a week here visiting her uncle, Olaf Nordrum, returned to her home in Petoskey Saturday.

F. G. Hines and wife are home again from Florida until the robins nest again. Carpenter and Stockman will leave Florida in about a week.

Robt. Bonthron, the plumber, has leased the south store in the Charlevoix Theatre building, and will occupy it with a full stock of plumber's supplies.

Olaf Nordrum on Tuesday bought the residence known as the Dr. Montague house, on Park avenue, and will occupy it as soon as Dr. Montague removes his effects.

Douglas Nettleton, who took the examination before the State Board of Pharmacy last March, received notice Monday that he has successfully passed as a registered druggist.

Dr. A. M. Wilkinson went to Chicago yesterday to accompany Mrs. Campbell to the hospital and will go from there to Saratoga Springs for general conference and expects to take post-graduate course at New York.

Round Lake Lodge, No. 293 I. O. O. F. will meet at their hall and march to the Congregational church, Sunday, April 30, to observe their anniversary. Members wishing to attend will meet at the hall at 9:30 a. m.

A congestion of automobiles for Charlevoix is the prospect. The local increase of cars has nearly doubled over last year, and when the summer arrival of outside cars is added, there will be something doing in Charlevoix. Look out for the traffic cop.

Gray's Reef and Lanning Shoal lightships, on their way to proper station from Sturgeon Bay canal, Wis., tied up here over night Monday on account of fog. During the winter the Gray's Reef ship was thoroughly rebuilt and the other overhauled for minor repairs.

On Thursday night of this week Grand Master Newville and Grand Secretary Fred Rogers, of the Grand Lodge of Odd Fellows, will hold a school of instruction at Odd Fellows' Hall, this city. Thursday night of this week. East Jordan and Horton's Bay lodges will attend.

Mr. J. I. Gibson, secretary and manager of West Michigan Development Bureau, and secretary of the West Michigan Pike Association, was in the city Tuesday, looking up business for the forthcoming pike book. The annual pike tour will be at Charlevoix this year at 12:45 p. m. July 13th.

Mrs. Sarah Emrey has arrived home from Florida.

Mr. and Mrs. Kellner write that they will arrive here sometime next week.

E. A. Burnett and wife, of Harbor Springs, were in the city yesterday.

Wm. Scroggie Sr., and wife who spent the winter in Detroit, is here on a visit.

"Bud" Nordrum, of the Detroit Booth offices, spent Sunday with his parents here.

J. W. Wyers, who now resides in Detroit, spent last week here on account of the serious illness of his father.

Dallas Boudeman, of Kalamazoo, was here last week to arrange for improvements on his cottage on the Belvedere grounds.

Beatrice Gallagher, of St. James, was one of a class of 16 who took the veil in the Dominican Sisters order at Grand Rapids last Sunday.

Lee Smith, in the recent Pythian contest at Traverse City, was the winner, as "Ninth Senator," of an individual prize, a beautiful silver cup.

Mr. and Mrs. Blackman and daughter, of Traverse City, were visitors at the home of Mrs. Blackman's niece, Mrs. Robt. Bonthron, over Sunday.

The nine millions of young lake trout born at the local hatchery are being planted on the fishing grounds about every trip of the steamer Columbia.

Marriot, at Petoskey Monday, Mr. Everett Nordrum, of Detroit, to Miss Lila Campbell, of this city. Mr. and Mrs. Nordrum will reside in Detroit.

Next meeting of Quality Arbor No. 1201 will be held Saturday evening, April 29. Remember the Pie Social to be held Friday, April 28, at Marion Town Hall.

The past week has given us cold wet weather up to this writing, Tuesday noon, if anybody has had a glimpse of the sun will he please go before a notary and make the necessary affidavit.

Two fine cottages are being built for Receiver King, of the Pere Marquette R. R., in the orchard near the Inn. E. B. Ward has the contract for excavating and building the basement walls. Major R. C. Vandercook was here Friday looking after the work.

The first cargo steamer to enter this port was the Cicos, which passed thru Saturday evening from Cleveland for Boyne City with coal. The Cicos is commanded by James Gallagher, a son of Neill Gallagher, formerly a prominent resident of Beaver Island.

There is not a town north of Traverse City in this peninsula that has fewer vacant houses, and none of them show as great activity in general public improvements and the building and rebuilding of residences. Moreover, in none of them is the territory named is any residence frontage as high as in Charlevoix. When a 66-foot vacant lot sells for $1,500 it means something, and that is what the records show.

DEATH OF MRS. McCARTNEY

THE PASSING OF A MOST ESTIMABLE CHRISTIAN LADY—WAS A PIONEER

Mrs. Harriet A. McCartney, widow of the late W. H. McCartney, died sometime during Tuesday night. Although feeble in health for some time she had been as well as usual during Tuesday, and spent a short time on the porch. She retired with no indication of immediately approaching dissolution. On entering her room at seven o'clock Wednesday morning she was found in her last eternal rest.

Deceased was 76 years of age. With her husband she came to Michigan from the State of New York in the late 70s, locating on a farm near Atwood. In the middle 80s they sold the farm, removing to Charlevoix where her husband served for several years as Methodist pastor.

Mrs. McCartney was distinguished in every quality that constitutes ideal Christian character. As a helpmeet to her husband in the duties of the pastorate she was zealous and devoted, self-sacrificing and efficient.

She leaves two sons and two daughters—Geo. A., of Munising; Hugh, of Vinal Mo. M. J. Fox, of Iron Mountain, and Mrs. Frank Metcalf, of this city. We regret that the time of our going to press prevents an extended review of the life and work of this good woman.

WANTED—For summer months, furnished cottage on East side of lake, Charlevoix preferred. In answering please give full particulars.

J. L. FREIMAN, 207 South Wabash Avenue, Chicago.

ECZEMA CURED OR MONEY REFUNDED

This guarantee goes with every box of Dr. Hobson's Eczema Ointment. Makes no difference whether it is today, child or aged. No matter how long standing the case the guarantee holds good. Cut out this strip, go to your druggist, get a box of Dr. Hobson's Eczema Ointment, use it as directed and if you are not fully satisfied, the druggist or maker will return your money. Try it just once, you will be happily surprised.

Art Exhibit Here Next Month to Buy Pictures for Charlevoix Schools.

Preparations are rapidly nearing completion for an exhibition in Charlevoix of pictures, consisting of carbon photographs, photogravures and prints in full color loaned by Elson Art Publication Co. Inc. of Belmont, Mass. It will be held under the auspices of the public schools of this city. The object of the exhibition is to raise funds with which to purchase pictures to place in the public schools.

Recognizing the educational advantages to be derived from opportunities to see good art Supt. Craig has arranged this exhibition, which will be held at the high school on May 1, 2, 3, 4, 5 from 3 to 9 p. m., each day. The exhibition will comprise over two hundred pictures, all of them copies of great masterpieces.

The price of tickets has been made low enough for anyone, children and adults alike, to be able to attend. The object is a good one, and the exhibition itself will be worth viewing. Catalogues will be obtainable.

The pictures which will be exhibited will not be for sale, but it will be possible, through the art section, to purchase exact duplicates, and the money raised through private sales of this character will also go toward the fund for purchasing pictures for the public schools.

It is now generally recognized among educational authorities that education in culture and refinement can easily be aided through the wholesome influence of pictures of the right sort on the school walls. The larger the attendance at the exhibition, the greater the number of pictures that can be secured for the schools.

This collection consists in large part of carbon photographs, photogravures and prints in full color made direct from the original masterpieces, and is selected by art experts.

One of the leading art critics, John C. Van Dyke, says:

"You must look at pictures attentively, earnestly, honestly. It will take years before you can come to a full appreciation of it. Look at the best you have, you will be possessed of one of the purest, loftiest and most ennobling pleasures that the world can offer you."

These pictures are of interest to all, both young and old, and they are expected to attract and instruct large numbers of people.

Beginning Tuesday afternoon special programs of a versatile nature will be another attraction of the exhibit.

NORTHERN GROWN ALFALFA—Nodogon free. S. Orlowski & Son.

Board of Education

April 19, 1916.

Regular adjourned meeting of the Board was called to order by Vice-President Bridge.

Trustees present, Bridge, Nordrum, Glassford and Hiller.

Absent, Haughton.

The treasurer's report shows a balance on hand of $625.86.

The following bills were presented and read:

General Fund Orders

605	Electric & Gas Co., lab. supplies	2.40
606	A. M. Wilkinson, janitor	30.00
607	A. G. Allison, janitor	30.00
608	Cecil Doyle, janitor	3.00
609	Henry Maier, floor	2.50
610	Herbert Tangney, office work	2.50
611	Frank Novotney, repairs	1.00
612	Adams Express Co., express	.35
613	Albert Powers, repairs	2.00
614	Charlevoix Pub. Co., supp. reading	12.00
615	Ginn & Co., textbooks and supplies	2.00
616	C. Dennison, supplies	2.00

Teachers' Fund

1516	Nordrum, teachers' pay roll	768.75

Moved and supported that the bills as read be allowed and the secretary be instructed to drew orders on the various funds for the amount of each respective bill. Motion carried.

FOR SALE—at less than first cost: three (3) Pine Lots in Crouter's Addition. Parties interested, apply to H. S. HARSHA.

Barnard Doings.

The Ladies Aid Society will meet with Mrs. A. Bothun on May 3.

Miss Jennie Smith, of Charlevoix, spent Sunday in Barnard.

Dr. David Outland will give an address at the church Sunday at three p. m.

Mr. Will Burns has a new Overland car and Mr. Edmund Shapton a new Ford.

Mr. Chas. Graham moved his family to Charlevoix last week, where he expects to have employment.

Mr. and Mrs. Fremont Cole arrived Monday from Boyne City. Mr. Cole will be employed on the W. N. Lewis farm.

Mr. and Mrs. Elmer Seymour and family of Atwood and Miss Anna Fitzgerald of Charlevoix were guests of Mr. and Mrs. Edd Agee Sunday.

We have attained our goal—the S. S. had over 100 present Sunday and an offering of $3.01. We are proud of this record. Let us make a big effort to do it again.

The Easter exercises at the church were enjoyed by a large congregation. The platform was prettily decorated in white, yellow and green, with potted plants and wild flowers, the effect was most pleasing. The junior choir made their initial appearance, and many favorable comments were made. To Mr. George Block as director much praise is due for his interest and management. Miss Cooper and Frank Dole of Charlevoix favored us with a duett, Miss Crandell accompanied them. The remarks by the pastor and the music and various numbers impressed the Easter spirit and uplift felt at this season.

Miss Lucili Lewis entertained Tuesday evening, the I. T's in honor of Miss Annie Willis, whose marriage to Clifford Mayhew took place Thursday afternoon. Miss Willis was presented with a pretty mixed dish by the class president, Mrs. Howard Bennett. Each guest present gave the guest of honor a favorite recipe for housekeeping. The favorite were Easter chickens, Miss Isabelle Smith received first prize in a "Bride's Journey." A lunch was served by the hostess, after which the good-byes were paid to their fellow class-mate and best wishes extended for a long life of wedded bliss.

Beaver Island News

May Gallagher, of Petoskey hospital is home for a visit.

Joseph and Ike Allord, of Charlevoix, spent Sunday on the Island visiting friends.

A. T. Stewart, of the U. S. fish hatcheries, planted fish around the Island all last week.

Mrs. Wade Jensen went to Charlevoix Monday.

Mrs. Mary Iasts went to the Petoskey hospital Monday

Joe Gallagher and Berney Pratt went to Chicago Monday.

Mrs. Miller, of Charlevoix, is visiting her parents, Mr. and Mrs. Francis Donlevy.

G. Maple, of the Marshfield Co. of Chicago, called on the trade last week.

H. Hoffman, Mayor Shoe Man, called on James Donlevy last Friday.

Archie Jordan, agent for Hibbard Spencer Hartlett & Co., spent several days here last week.

J. Hunter, of the Johnston Cracker Co., called on our merchants last Saturday.

Fred Hunt from the State Fish Hatcheries was here last week after live perch for Comstock Park Hatcheries, he took about 20 live perch with him.

Frank D. and James O'Donnell and Glen McCafferty arrived home Friday after spending the winter in Manistique.

Walter Berthmite went to Chicago Saturday after spending the winter visiting friends.

Fred Beckham, the fruit tree man is here. Mr. Beckham raises his own stock.

County Normal Notes

Francis Price was absent Thursday morning on account of illness.

Marie Lamiman who has been teaching at Antrim City the past school year visited the Normal Thursday afternoon.

Rena Carroll substituted in Miss Beryl Niles' room in the Washington school last Tuesday afternoon. Miss Niles was doing observation work.

The normal class observed the chart class work in Miss Jean McColl's room Wednesday afternoon.

Mrs. Alvin Smith sent the normal class a cotton ball and seeds which were very interesting.

Rena Carroll, Ethel Barbour, Ruth Chellis, Mary Boice, Catherine LaLonde and Florence Maddaugh spent Easter at their homes.

Sadie Blanchard spent the week end with Catherine LaLonde and Florence Maddaugh.

NORTHERN GROWN ALFALFA—Nodogon free. S. Orlowski & Son.

Look over your yard and see what shrubbery you need, then go to Babcock & Son and select just what you want. They have just received a large supply of hardy nursery stock grown specially for them, and for this northern climate. They also have a fine lot of apple trees, standard varieties, and prices are very reasonable. 4-29-3

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HARSHA.

BUCKSHOT JOHN AT MAJESTIC

THRILLING WESTERN COMEDY TO BE SHOWN HERE ON FRIDAY, APRIL 28

"Buckshot John" is the leading member of Jake Kennedy's gang, and after the attack in Clayton, is the one chance the express companies have of learning the location of the cache where the rich treasure of the gang is hidden. But he refuses to tell, and after having served 18 years of his 30 year sentence his denial is still unshaken. Nor does he tell after he "gets religion," but prays for a chance to restore the money to its rightful owners.

Meantime, Dr. J. Buchanan Gilmore, a charlatan, glimpses of whose career the audience has seen, is much the fashion, and seeks to win Ruth, daughter of a high state official. His rival is Jimmy Dacey, a reporter, whom Ruth really loves. It is through Jimmy that Buckshot hears of Gilmore's psychic powers, sends for him, and tells him of the cache; and Jimmy tells Buckshot that Gilmore is tricking him. The scenes in which Buckshot pursues Gilmore, gets the money from him and restores it to the proper persons, and in which Jimmy uncloaks Gilmore and uses his knowledge to win own happiness and to do a great service to Buckshot, are exceptionally strong and tense.

The barge Susie Chipman arrived in port Tuesday morning and proceeded up the lake for cargo.

Pastor Vinyard Writes Letter of Thanks

Dear Friends: Our revival meetings have closed, and I take this means of thanking each one who in any way assisted in this great work. The Lord has abundantly blessed—1st souls were saved and all Christians who had part in this work were lifted to a higher plain.

The meetings were free from excitement or sympathetic straining and the hearts of the people were reached by preaching the Word of God, which is the sword of the spirit. More than 100 of these converts have united with the church and many more will soon.

Our big choir under efficient direction will sing at the mid-week prayer meeting and in both morning and evening services Sundays. If you wish a seat you had better be on time as the capacity of our auditorium and gallery is being taxed to the limit. We shall be glad to see you—come.

The Lord bless everybody.

Baptist Pastor.

SEEDS OF QUALITY. S. Orlowski & Son.

PERE MARQUETTE

An Anniversary

On the fifth day of April this year, the seventh Receivership of the Pere Marquette Railroad and its predecessors, was four years old.

Despite the earnest efforts of the Court, the Receivers, the owners of the Road and the officers and employes it has not been possible to get the road out of bankruptcy.

The task is a tremendous one, and while progress has been made and is being made, success is not yet assured.

Sixteen million dollars of new money must be raised. Investors whose money has gone into the property have evinced a willingness to make sacrifices. But this vast amount of new money and these voluntary sacrifices are not of themselves enough.

There must be a reasonable prospect of keeping out of bankruptcy after getting out. There is little use of making the effort to reorganize the Railroad if it is going back into a Receivership again in the course of a year or so.

And this is where the question of rates comes in. It is safe to say that if a reasonable increase in passenger fare could have been granted at the last session of the legislature a reorganization could have been brought about before this time. Why? Not because of the increased revenue so much, although that would have helped, but because it would have been an indication that Michigan was adopting a new policy—one less repressive, less restrictive, than the old. It would have been an encouragement to the man who must go down into his pocket for his part of the sixteen millions.

For why should a man invest good money in railroad securities under conditions existing in Michigan today? He can secure a greater and safer return in almost everything else. As a matter of fact he is not investing in Michigan railroads today. Last year in the whole state of Michigan, but twenty-one and one-half miles of new main track were built. A very small development representing a very small investment, in a great and growing state.

The chief hope for a reorganization of the Pere Marquette rests on a change in public sentiment already manifest in many other ways, if not yet thoroughly organized. The People of Michigan are beginning to realize that the state needs the Pere Marquette; that when the State refuses to let the Road earn enough to pay its way, it refuses the people the right to the service they need in their every day life; that bankruptcy and service fully satisfactory, cannot go together; and that the state cannot force the Road continuously and permanently to operate its passenger trains at a loss and expect to get as good service as though running at a fair profit.

There is hope in this awakening public sentiment as the forerunner of a new policy on the part of Michigan—even a generous policy, and the Road must be so conducted as to merit it. The State and the Railroad must work together for the common good. "Co-operation" is the keynote of the future. Railroad Receiverships so long the rule in Michigan will then be a thing of the past and we will all wonder how Michigan tolerated even for a moment the existence of such a shortsighted policy as that of the present time.

Operating Receiver,
Pere Marquette Railroad

BAD WRECK ON G. R. & I.

An open or "split" switch at Clarion wrecked the G. R. & I. south bound passenger train Monday afternoon. The engineer was scalded to death and the fireman was so badly injured that he will probably die.

The smoker turned completely over, injuring several of the passengers. The only car that was not ditched was the Pullman at the rear of the train.

The Grand Rapids Press states, on authority from Traverse City, that Chief of Police Charles Jefferies, of this city, will receive the reward offered for the capture of Harry Powers.

ELMER MAYNE DEAD

Elmer Mayne, of Belaire, for several years superintendent of the Richard power plant in that place, died of cancer Monday at St. Louis, Mo. where he went for treatment.

He was a brother of Judge F. W. Mayne. The remains will be brought here.

Library Notes

The May number of the Century Magazine has an article by George Creel, "Military Training for Our Youth."

The April number of the System Magazine has much of interest to merchants.

Saturday, April 22, was the busiest day of last week. One hundred and ten books were loaned.

Anyone who does kodak work should read the magazine "Camera Craft" to be found at the library.

Mothers who are at a loss to find something to keep the small members of the family busy should read the magazine "Something-to-do." It is full of helpful suggestions for the entertainment and play of children.

SEEDS OF QUALITY. S. Orlowski & Son.

Sympathetic Ink.

Take some pure lime or lemon juice and write with it on paper. Then heat the paper over an alcohol lamp and the writing will come out brown.

ORDER FOR PUBLICATION

STATE OF MICHIGAN, The Probate Court for the County of Emmet.

At a session of said court held at the Probate Office in the City of Petoskey in said County on the 14th day of April, A. D. 1916.

Present: Hon. STANTON J. CORNELL, Judge of Probate.

In the matter of the estate of Peter Cummings, deceased.

Cummings, deceased.

It is ordered, that the 22nd day of May, A. D. 1916, at ten o'clock in the forenoon, at said Probate Office, be assigned for hearing said petition.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Sentinel, a newspaper printed and circulated in said county.

STANTON J. CORNELL, Judge of Probate.

A true copy.

STANTON J. CORNELL, Judge of Probate.

JERUSALEM at EASTER TIME

Resurrection Day Celebrated There with Gorgeous Magnificence by the Latin, Greek, Armenian and Coptic Branches of the Christian Church.

JERUSALEM is the true Easter city. Not only is Easter celebrated there with gorgeous magnificence by the Christian churches—Latin, Greek, Armenian, Coptic—but the large and ever-growing Jewish population of Jerusalem keeps the passover with all the charm of its cosmopolitanism, and even the Mohammedans have their Easter pilgrimage to the grave of Moses.

The throng of Easter pilgrims from the whole Christian world is a very remarkable sight. To the westerner it is a revelation of oriental Christianity in all its picturesque devotion. Greeks, from all over the Levant; Armenians from Turkey, Persia and the Caucasus; Nestorians from Mesopotamia and Persia; Syrians from Aleppo, Damascus and Beirout; Abyssinians from the hermit land of northeast Africa; Copts from Egypt, and men from the ancient churches of southern India, and, above all, Russians, who one days form by far the largest contingent of pilgrims—all these races mingle with Latins from western Europe, with Germans, English, Americans, Scandinavians.

In the midst of all, and presenting an individuality perhaps more distinct than all the others, you see the Mohammedan master of ceremonies—the Arab in his solemn garb and majestic bearing, and the Turkish official and soldier bearing in the exercise of his duty to keep the Christian pilgrims in check and to preserve order.

Elaborate processions and ceremonies make holy week in Jerusalem a gorgeous event, where the minutest note of the resurrection is not conspicuous. Especially does it bring out the division of Christendom, so strikingly shown in the way in which Latins, Greeks, Armenians and Copts share the Church of the Holy Sepulchre.

Particularly at Easter the marvelous service of the Greek orthodox church convey the priority of this church in the Holy Land. And of these ceremonies, none, perhaps, is more impressive than that of the washing of feet on the Thursday before Easter.

On that day a platform is erected in the court of the church, which is occupied by the Greek bishop of Jerusalem and 12 high church dignitaries. Court, stairs, roofs and every corner is crowded by the natives to witness the enactment of the scene when Jesus washed the feet of his disciples. The parts of Jesus, John Peter and Judas are each given to an ecclesiastic, and are vested with fine simplicity, though the story is told with a certain freedom from gospel accuracy.

At the end the patriarch washes the feet of the 12 clerics, and, repeating Jesus' words, "Let no go, for that will bring me to sigh," gives the signal to arise, and they all withdraw to the church. Then an olive branch, hanging over the chancel of the platform, is pulled up to the roof of the church amid shouts of joy.

Next day, Good Friday, all the lights in the Holy Sepulcher church are extinguished. This is symbolical of the sorrow and death of our Lord and of his descent to hell, when the light of the world was taken away for a brief space. Then, on Saturday the lights are rekindled—by a supernatural agency, as the tradition goes, as the church dignitaries pray in the chapel of the sepulcher, draped in deep mourning, the stone gathers a peculiar moisture which rises as a vapor and, suddenly bursting into a divine flame, kindles the lights. It is the custom of the people to light candles from one another, and the faithful believe that the first of these candles is kindled from that supernatural fire.

The dawn of Easter Sunday is celebrated by a magnificent processional ceremony, in impressively dramatic fashion, the events of the resurrection morn, when the women found the grave open and empty. Then the Easter greeting resounds, "Christ is risen!" and the response, "He is truly risen!" The Greek mass, celebrated by 40 priests, ends the ceremony.

Although the Easter of the orthodox church does not coincide with that of the western churches, holy week in Jerusalem is celebrated predominantly according to the Greek rites, the services of the other churches being repeated on their own dates.

In all the Greek orthodox countries—Russia, Roumania, Greece, Bulgaria, Servia, Montenegro, and a large part of Austria-Hungary—Easter is celebrated with great fervor and devotion. The Easter kiss is a well-known incident of these celebrations.

Jerusalem is naturally full of churches, monasteries, hospices and hospitals of the various creeds, and every one of them at Easter brings out its own peculiar individuality. The Latin church, for instance, whose establishment in Jerusalem dates back to Godfrey de Bouillon and his crusaders, has a number of oriental rites, which are known as the Uniate Catholic church. Thus there are the United Greeks, the United Syrians, the United Nestorians, the United Armenians, the United Copts, all of whom celebrate mass in their own tongue and so add in their worship and dress a picturesque distinctiveness to the whole.

Then there are the Copts, the Armenians, the Syrian Jacobites, the Abyssinians, the Russians, besides Greeks and Protestants. The relative standing of the various churches is in a measure expressed in the way they share the 15 lamps that burn in the Holy Sepulcher chapel, which is in the center of the stone that was rolled away from Jesus' grave by the angels. Five of these lamps belong to the Latins, five to the Greeks, four to the Armenians and one to the Copts.

Away from the sentimental ceremonial the pilgrim in Easter time seeks the traditional places where our Lord spent his last days and nights. Of these Golgotha is the principal goal, and here the difference in creed among the many visitors is obliterated in the common and quiet devotion which is unexpectedly free from the sentimental.

Another figure has a prominent place in Easter celebrations in Jerusalem; that of Moses, whose liberation of the Jewish slaves from the yoke of Egypt is commemorated in the ancient Hebrew nuptial feast.

There is a very little known Mohammedan celebration which, though no longer so general as formerly, is still a most interesting one. To the Mohammedan, it must be remembered, Jerusalem is the holy city, like Mecca and Medina, and there is a saying among Arabs, "Syria is the blessed country; Palestine, the holy land, and Jerusalem, the holy city, is the holy of holies."

Native Mohammedans and pilgrims make up a procession and hasten to the Latin Gate, they are joined by throngs of their brethren from the neighboring villages, red, and the wildest enthusiasm, with standards being borne aloft and to the typical Arab music of drum and fife, the pilgrims proceed in the direction of the Dead sea.

At the Arabs claim common descent with the Jews from Abraham, the Holy Land holds traditions equally sacred to them. Jerusalem is second only to Mecca in sanctity because it contains, according to tradition, the rock of Abraham's sacrifice, over which the famed mosque of Omar is built. The Arab pilgrimage to the burial place of Moses recalls the similar one to the tomb of Noah, near the ruins of Baalbek, a short distance from Damascus.

In cosmopolitan charm Easter in Constantinople almost equals that found in Jerusalem. The capital of the Turkish empire is, of course, in the highest cosmopolitan; and there is no other city in the world where so many languages are heard in the streets, not by foreigners, but by the variegated native population. The hundred and more in not Jewish and Mohammedan, as in Jerusalem, but Mohammedan and Christian, with a strong tinge of Spanish Jewry.

Tales of GOTHAM and other CITIES

New York Claims Honor of "First" Convention City

NEW YORK—Little old New York is now the "first" convention city in the country, outstripping Chicago, which for the last ten years has been in first place. Before the end of the present year more than 500 conventions will be held in New York city. Last year Chicago had 470 to New York's 447, but through the activity of John H. Young, manager of the convention bureau of the Merchants' association of New York, Chicago has been pushed to second place.

And what conventions! We're going to have the Scottish Deerhound club, the Lumbermen's Protective Association of America, and the American Bison society here before the summer is over. And the American Association for the Advancement of Science will hold its annual convention here during the Christmas holidays.

The biggest convention of the year will be the National Education convention, which will be held here in June. Fifty 40,000 people from beyond the metropolitan zone will be in attendance, it is announced. Next in size will be the General Federation of Women's Clubs, which is scheduled for the latter part of May.

What has made New York the greatest of all convention cities—regretted John H. Young in the office of the convention bureau at the Merchants' association.

"Well, first of all, New York is the only city in the country which has never raised its hotel rates. This is a great point. When it comes to location, we're beaten by almost every other town, but once we get the people here we can take care of them better than any city in America.

"Of course, we have a great convention hall, but Madison Square Garden has a seating capacity of twenty-five thousand. The National Education convention will be held here its seating capacity will be taxed to its utmost.

"And, of course, these conventions are a great thing for the city. They bring new money to town. A large proportion of those who attend the conventions bring their wives and children with them on their numerous excursions. A Buffalo man attending a convention in Pittsburgh isn't apt to buy much there, but the same man coming to New York is almost certain to make a few purchases.

"When I lived in Chicago I used to think the Windy City was the greatest convention city in the country—and it was. But since I lived here three years, I'm proud to know that we have left Chicago behind."

Efficient Sexton Is Now Looking for New Job

CHICAGO—German efficiency has been tried out in Lake Forest, with the result that it is now looking for a new job. The office of chief exponent on the north shore, Henry Herman. And in the meantime the congregation of the First Presbyterian church in Chicago's wealthiest suburb sings its hymns and absorbs its sermons in peace, secure in the knowledge that it won't have to stumble over the pews amid the blackness of night when it gets ready to go home.

It was years ago, in the German army, that Henry neared the meaning and the practice of efficiency. Later he came to America and eventually drifted into Lake Forest, leaving a trail of efficiency from New York to Chicago. In Lake Forest he got a job as janitor of the church in question. There he started in to perform his work so well that the church members fairly gasped in amazement. All would have gone well probably had it not been for the Wednesday night prayer meetings. The meetings were scheduled to close at nine o'clock, but often it was much later.

That, to the methodic Henry, was like giving efficiency a smack on the eyebrow.

So Henry resolved to introduce German army standards into his sexton age. The result was that at nine o'clock on Wednesday evening two weeks ago the congregation, which was just forming form into the opening strains of "Lead, Kindly Light," suddenly found itself in total darkness.

Skidding into the sharp corners of pews, the church members finally managed to get out of the coffee. Then they hurried down the aisles to the exit amid the sound of the last hymn, which had been sung by

Morgan's Valuable Library.

Experts attached to the American Art association have completed their nine months' task of appraising the Morgan library, and have submitted their report to the comptroller's office. No official figures have been made public, but it is known that the value of the rare books, manuscripts and engravings has been placed at about $7,500,000. Of this amount the books represent about $5,000,000.

The Morgan library is housed in the marble building built for it at 33 East Thirty-sixth street by the late J. Pierpont Morgan, a New York correspondent of the Philadelphia Ledger says. The library is especially rich in the collection of Bibles, which extend back through the era of printing to the manuscript Bibles that preceded it. Especially noticeable, also, are the Chaucer, Shakespeare and Burns collections. Among the manuscripts in the Morgan collection which have greatly increased in value are the thirteen manuscripts, including that of "A Christmas Carol," which experts believe now would bring about $50,000 to $100,000. There also is the manuscript of "Thackeray's "Vanity Fair" and of Milton's "Paradise Lost," in the handwriting of the blind poet's daughter. The manuscripts of all the more important Burns poems are in the collection.

Activities of Women.

Great Britain has 17 women who are peeresses in their own rights.

One hour for lunch each day must be allowed all women workers in New York state.

Barnard college girls have taken up Jiu Jitsu, the ancient sport and defense used in Japan.

An army school of cookery, at which women instruct, has been inaugurated for the training of military cooks who will serve at the front with the British army, and already 13 women are engaged in this work.

Miss Hoyt Skinner of Georgia has been appointed by the department of agriculture to demonstrate farming to women of the South.

Sophie L. Burke of Detroit has given $25,000 for the establishment of a home for the reclamation of children with criminal tendencies.

Ella Todd,
Plaintiff,
vs.
Ira Todd,
Defendant.

In the cause it appearing that defendant, Ira Todd, does not reside in the state of Michigan and that he is a resident of the state of Illinois, and that the ground of the action herein is fraud and that the suit herein is for the purpose of her recovering the interest of said Ira Todd in the property of said Ira Todd, Plaintiff, herein, and that the defendant, Ira Todd, is a necessary and proper party to the suit herein

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by FRANK WALTERS

COPYRIGHT BY DODD, MEAD AND COMPANY

SYNOPSIS.

—16—

Miss of Dalby's lumber camp directs a stranger to the camp foreman. Sandry introduces himself to Jane Dalby, fore man, as the "disinguerin Lumber Co. or most of it." He makes acquaintance with Miss Dalby's little brother, Ned, and signals his person to the foreman that he does not like judgment. Miss Dalby tells of the Frenchman Blondeau who Sandry hears the sign of the Sioux tribe of Indians. Sandry tells Blondeau that he is in the Sioux of a leader of the Sioux, her "the Night Wind in the Pines, and Blondeau and Sandry are left alone. The writer from New York, sister to Dalby, Mrs. Blondeau, Sandry and Ned, Miss Dalby, Gilbert little to the East Bill, and Miss Dalby, Sandry and Ned, Miss Dalby, Sandry and Ned, Miss Dalby, Sandry and Blondeau's men fall over the dog, Lord Algernon Percy. Lord Algernon Sandry finds that the dog is his. Ned Dalby, Sandry and Blondeau, Sandry and Ned, Miss Dalby, Sandry and Ned, Sandry decides. Miss Dalby tells Sandry that Blondeau is engaged to Miss Dalby's sister, Mrs. Blondeau goes to Dalby in search of evidence against Sandry. Sandry and Blondeau, Sandry and Ned, Miss Dalby, Sandry and Ned, Sandry goes to her Friends the Indians, Sandry and Ned, Sandry and Ned, Sandry and Ned, Sandry and Ned, Sandry's notes of his Sandry and Ned, Sandry and Ned, Sandry and Ned, Sandry and Ned,

THE SUNSHINE GARMENTS OF QUALITY

Style Reliability

THE Sunshine label here reproduced, is a positive assurance of style reliability.

This label sewn in the yoke of a garment has all the force of an emphatic guarantee, and corresponds to the written signature attached to a contract.

It means that the manufacturer agrees to deliver satisfaction and service to the wearer of the garment.

Be sure to see the Sunshine Coats and Suits, even if you have no present intention of buying.

Oakland and Studebaker cars

The car season will soon be here and an early order will insure having your car here when you want it.

WE DO REPAIR WORK AND WE DO IT RIGHT.

A. L. HART & SON.

LOCAL AND PERSONAL

Dr. Armstrong is in Ann Arbor this week.

Mrs. J. S. Ackert was called to Petoskey Tuesday by the illness of her mother.

Mr. and Mrs. J. H. Hatch, of Lansing are the guests of their daughter, Mrs. Fred Slaght.

Don Campbell has been appointed as second mate of the steamship Missouri this season.

R. F. Sloan was at the head of Beaver Island Monday and Tuesday surveying for the new hotel.

M. J. Stockman and wife and Eybert Carpenter arrived home from Florida Tuesday afternoon.

Mrs. Dr. Greensfelder, child and nurse, of Chicago, have arrived at their Park avenue summer home.

The trout hatch has all been planted. The whitefish eggs are hatching, and the young fish are being planted.

Miss Addie Holly is back from her winter sojourn in Florida, and has resumed her duties at the telephone office.

Mrs. N. P. Munyon, of Kalkaska, visiting her son Charles on State street the last two weeks, returned home Monday.

Lee Howland, now living at Caro, was in the city two days last week on his way to Boyne City where he is bidding on a paving job.

Do not fail to hear about "The Prodigal Son" at the Episcopal church Thursday, May 4th. Service starts at 7:30 p. m. Everybody come.

The Charlevoix Shakespeare Study Club pulled off a banquet at the home of Mrs. R. W. Paddock last Thursday evening, as a tri-centenary event.

A. T. Stewart, having completed his work at the local government fish hatchery, left Tuesday for his home at Northville, after a very successful campaign.

A delegation of Charlevoix Masonic Royal and Select Masters, attended a school of instruction and banquet at Petoskey last Friday night, and report a very enjoyable gathering.

Two more tastefully finished and equipped business offices are those of the Abstract and Engineering Co., and the Argo Milling Co. The latter has been enlarged, thereby furnishing a private office for the manager.

The annual Men's Banquet is to occur at the Congregational church dining hall on Wednesday evening, May 10th. The ladies of the church will serve. Tickets 50 cents. Applications to Frank Hull, not later than Friday, May 5th.

John Parsons, of Banks township, made the SENTINEL a pleasant call Saturday. Notwithstanding his eighty-two years, our old pioneer friend is hale and hearty, and recently returned from visiting relatives in Iowa.

The remains of Chris Neilsen, who died March 15th at the home of his daughter, Mrs. Mads Jensen, on Garden island, were brought here Monday for interment in Brookside cemetery. Deceased was aged 75 years.

Mrs. Blodgett leaves Friday of this week to visit friends in southern Michigan and Canada. She then goes to Chicago to remain with Mrs. P. D. Campbell until her return home. Mrs. Campbell, according to late information is still doing well.

A change occurred this week in the R. F. D. routes from the Charlevoix office. C. H. Miller, of Clarion, who comes from a civil service examination, is appointed to the No. 2 route in place of Sharrow who is transferred to the No. 3 route.

Mrs. P. D. Campbell, of this city, last Thursday, submitted to a somewhat hazardous surgical operation at the Presbyterian hospital, Chicago. She is reported as doing well and out of danger. She will remain in the hospital for two months.

Grand Master Newville and Fred A. Rogers, grand secretary, of the grand lodge of Odd Fellows, was in the city Thursday, holding a school of instruction in the evening, which was attended by delegations from neighboring lodges. A banquet was served, and the gathering keenly enjoyed by all.

The annual supper given by the ladies of the Woman's Christian Temperance Union will be served in the basement of the Baptist church on Friday evening, May 5th, from 5:30 o'clock until all are served. The menu has been carefully prepared and your patronage will be appreciated.

Park avenue claims the arrival of the first summer people for this season. Mrs. Louis Greensfelder and daughter Marion, of Chicago, arrived last week and have taken up their residence in their beautiful new home which was formerly the Shawley property. Dr. Greensfelder will arrive about the middle of this month.

Married at the Congregational Parsonage on Wednesday, April 26, by Rev. C. E. Taggart, Mr. Ernest Howell and Miss Gladys Brewster, both of East Jordan. They were attended by Frank Hengy and Kathryn Carpenter, also of East Jordan. Mr. and Mrs. Howell will continue to reside in East Jordan where they have many friends, who unite in wishing them much happiness.

Invitations are out for the annual Men's Banquet at the Congregational church on the evening of May 10. The splendid success of the banquet last year arouses high anticipations for this year's event. Rev. Dr. Bartlett, the speaker for the occasion, comes highly recommended as a man and an orator. His home is at the "Soo," where he is greatly esteemed.

Again we call your attention to the fact that the SENTINEL gives you more than double the reading matter of any other paper in the county. We also refer to our superior clubbing arrangement. We will send you the SENTINEL and the Grand Rapids Press, both for $3.00 per year. For $2.00 we will send the SENTINEL and the "Big Four," which are fully described on another page. Call in and see us.

With the planting season but a few weeks away, Michigan farmers are confronted by one of the most serious conditions they have ever felt in this state. The situation is such, according to farm crop authorities of the Michigan Agricultural college, that losses which may run into hundreds of thousands of dollars are seen if extraordinary precautions are not exercised by farmers in the selection of seed for the coming season's crop. In view of conditions as they have been found to prevail throughout the state, the college is issuing a "first aid" bulletin to advise agriculturists as to measures most likely to be of value in minimizing the seed corn danger.

DEATH OF A. A. HANSHEW

Alonzo A. Hanshew died at his home in this city Monday night.

Mr. Hanshew has been ill for a year with that most insidious malady—creeping paralysis. Day by day his vitality was weakened until the spark of life left his body.

He was for several years a mail carrier on one of the R. F. D. routes, but surrendered the position last summer owing to the state of his health, but he still nurtured the hope of recovery.

At the recent city election he was elected city treasurer, but was compelled to turn the work over to his son Clarence. He was a member of the local lodge of Odd Fellows and of the Maccabees.

Besides a wife he leaves four children—Clarence and Justin, Mrs. W. W. Bennett and Miss Jessie.

THREE HUNDRED YEARS AFTER

If he had known three centuries ago, How, when life ended, he would live again, Then Time's Phoenix would have risen to the sky—
If he had known his ashes would still be hoped, Could he have dreamed one laurel would be left, Shakespeare would have lived three hundred years—
If he had known his ashes would still be hoped, Could he have dreamed one laurel would be left, Shakespeare would have lived three hundred years—
If he had known—(love constrains me)—
How, when life ended, he would live again,
Then Time's Phoenix would have risen to the sky—
(Forever is, the adverb, to come and go).
Dreamed he would live in the hearts of his people,
Could he have uttered one undying word, if he had known—
Had known—

The Shakespeare Study Club held another of their many enjoyable social affairs Thursday evening at the home of Mr. and Mrs. R. W. Paddock, when the executive committee, Mesdames Paddock, Crane and Crozier entertained the members and their husbands with a six o'clock dinner. The table was beautifully set, decorated in all suggestive of Spring. The place cards were unique, being hand painted characters from Shakespeare, with quotations suited to the guests. After the dinner the President invited all to adjourn to meet at the Majestic to see "The Merchant of Venice" which the committee had arranged to have given to commemorate this occasion of the 300th anniversary of Shakespeare's death.

The characters and interweaving of the many plots were well shown; and it was a fitting close to a happy gathering.

SOME GOOD WORDS

A Chicago subscriber who summers in Charlevoix, writes us, in part, as follows:

"I cannot refrain from sending you a word of sincere praise for your determined stand on the liquor question. I read with much interest from time to time expressions of your sentiment on this question, but the last issue of your paper contained the article regarding the advertising of the liquor interest. Such a stand as you take is of tremendous force in forming public opinion in the right way. I do not think you realize how much permanent good you are doing along this line! Such things are of everlasting benefit and I am glad that you are one of those who are really doing them."

JOHN COOK APPOINTED CITY TREASURER

At a special meeting of the common council Tuesday night John Cook, former treasurer, was appointed and confirmed city treasurer to fill the vacancy caused by the death of Alonzo Hanshew.

This action was made necessary by the failure of Mr. Hanshew to appoint a deputy.

TO RID CHILD OF WORMS

Don't scold the fretful, nervous child. Often its due to worms. Get rid of these by giving one-half to one lozenge Kickapoo Worm Killer, a laxative worm candy. Give only plain nourishing food, lots of out-door exercise and put to bed early. Watch stools and continue giving Kickapoo Worm Lozenges, they will positively remove the worms. 25c at Druggists.

Common Council

At the council meeting Monday night, the matter of securing bardheads for street work was referred to the street committee with power to act.

May 10th was designated as clean-up day.

Park avenue paving was referred to the street committee.

Following officers were appointed and confirmed:

City Attorney—Lisle Shanahan.
City Engineer—R. S. Sloan.
Chief of Police—Chas. Jefferies.
Assistant Chief—Chas. W. Howard.
Street Commr.—Chas. W. Lamb.
Health Officer—Dr. Armstrong.
Dog Warden—F. S. Brown.
Harbor Master—Sam Hamilton.
Fire Wardon and Chief—H. Marshall.
Special Assessor—D. F. Meech.
Special Assessor—Chas. J. Zeitler.
Board of Public Works, 5 years—H. Nicholls.
Cemetery Board, 5 years—A. Buttars.
Supt. Light and Water Plant—A. J. Hamilton.
Building Inspector—F. H. Thomas.

Notice!

Notice is hereby given that bids will be received by the Board of County Road Commissioners, of the County of Charlevoix, on or before 12 o'clock noon, of the 16th day of May, A. D., 1916 at the county clerk's office, in the City of Charlevoix, County of Charlevoix, Michigan, for the building of a trunk line road, commencing one mile west of the west limits of the Village of Boyne Falls, or at the end of the stone road now built, on what is known as the Boyne Falls and Boyne City Road, running thence in a northwesterly direction on said road a distance of one mile, the bids to be made for both gravel and crushed stone road.

Road to be built according to plans and specifications on file at the office of the county clerk.

The Board of County Road Commissioners reserves the right to reject any and all bids.

Dated at Charlevoix, May 3, 1916.

Board of County Road Commissioners, of Charlevoix County, Michigan.
By RICHARD LEWIS, Clerk.

RHEUMATIC PAIN STOPPED

The drawing of muscles, the soreness, stiffness and agonizing pain of Rheumatism quickly yield to Sloan's Liniment. It stimulates circulation to the painful part. Just apply as directed to the sore spots. In a short time the pain gives way to a tingling sensation of comfort and warmth. Here's proof:—"I have had wonderful relief since I used your liniment on my knee. To think one application gave me relief. Sorry I haven't space to tell you the history. Thanking you for what your money has done for me."—James S. Ferguson, Philadelphia. Sloan's Liniment kills pain. 25c at your Druggist.

Mayor's Proclamation

I, Andrew Ross, Mayor of the City of Charlevoix, do hereby set aside Wednesday, May 10th, 1916, as "Clean Up and Fire Prevention Day" in accordance with the Governor's Proclamation. And I urgently request every resident to observe the day.

On Thursday, May 11, 1916, the City of Charlevoix will collect and cart away all rubbish and refuse except ashes and tree limbs that has been collected in convenient piles in all streets and alleys within the City, free of charge. Kindly "clean up" and pile your rubbish in the streets convenient for the city to cart away.

Approved by the Common Council.

CHAS. H. EMREY, City Clerk. ANDREW ROSS, Mayor.

Northern Michigan

Hoyne Citizen: W. H. White Co. steamer Reynolds which is at Pentiburg where she had her old boiler replaced by a new one, is expected to leave that port for Boyne City this week. She will be loaded immediately for Buffalo. The Arizona, which is undergoing extensive repairs at Chicago, will leave next week for this port where she will begin her season's run. She will be practically a new boat when released from the dry dock.

Petoskey News: Tom Bendelow, the golf expert, arrived from Chicago Wednesday afternoon and went at once to the scene of the proposed golf course north of the city. In company with the grounds committee of the Petoskey Golf club he revisited the grounds Thursday forenoon, laid out the course, staked it, recommended the site for the golf club house, entrance to the grounds, etc., and left in the afternoon for Rockford, Ill., where he will lay out a course.

Hoyne Citizen: Considerable disappointment was evinced last summer when the Marine Band, long established as the leading band of northern Michigan, was disbanded. The ruption came over difficulties regarding a leader. Mr. Wilkinson being director at that time. It is with keen pleasure that the announcement of the reorganization is made. A meeting was called last evening by J. J. Holland, secretary, to discuss re-organization. Fifteen members responded and voted to have a band this summer. Enthusiasm was expressed and a willingness evidenced to make the band one of the best by regular and full attendance at each rehearsal.

Petoskey News: Game Warden Long of Alanson, was painfully injured Thursday in a fight with an Indian. Louis Pewabskong, of that village, while trying to search the Indian's boat for fish nets out on Burt lake, not far from what is called King's Point. The Indian then dropped the pike pole for the more handy weapon, an axe. He swung this and attempted to strike the game warden over the head but the latter ducked and caught the blade of the ax in his hand. The member was nearly cut in two. The Indian then aimed another blow at Mr. Long's head but he dodged this and the Indian took up his paddle and made for his shack down the lake.

Petoskey News: W. R. Caldwell, of Detroit, a man widely experienced in all branches of city government, was hired Wednesday evening by the new city council as Petoskey's first city manager. His salary was fixed at $7000 per year and his term of office until the first Monday in November, 1917. The contract under which he will work contains a clause that the contract can be terminated by either party upon a thirty day written notice. City manager Caldwell commenced his official duties Thursday morning and for the present at least his office will be that formerly occupied by City Engineer Tripp. Shortly after he had been hired as city manager, Mr. Caldwell named City Engineer Tripp as assistant city manager. The city manager will have the naming of a city marshal, chief of the fire department, policemen, etc., in the very near future but will want time to become acquainted with these department heads before making these nominations to the council.

County Normal Notes

The normal class and the training room children have begun their gardens. The place of the garden has been changed and the hot-bed had to be replaced. One member of the class reported that the onions are up.

The teachers examinations were held in the normal room last Thursday, Friday and Saturday. The normal class did some observation work in the ward schools and held their classes in the library.

The normal was invited up to the high school assembly room to the debate on, "Should the citizens be officially warned to keep off the armed vessels," which was given last Friday afternoon.

The class is making maps and baskets of reeds and raffia.

Nine members of the class visited several rural schools with County Commissioner May L. Stewart last week.

We all were very much pleased to hear of the death of little Billy Miller who was a member of the training room and who will miss the little lad very much. The training room children and normal class sent flowers and extend their sympathy to the bereaved parents.

SEVEN and one-half acres, close in well suit at a bargain, well located. Call on or telephone, H. S. HANSHA.

HORSES AND DRIVERS ALIKE

Their Respective Callings Seem to Bear Out to Perfection Harmony in Appearance.

Ever notice how the horse resembles the driver—or the driver the horse? Inquire the Columbus (O.) Dispatch. Here stands an old horse hitched to a scavenger's wagon. The driver, the wagon and the horse all resemble each other. The wheels of the wagon do not "track." They wobble around, wagon and the horse all resemble each other. The wheels of the wagon do not "track." They wobble around, emitting serpentine tracks and creak and groan as they rumble along. The horse has a spavin on one leg and a mishapen hood on one foot and a few white patches on his back where the harness in other days has made sores. And there is the driver, poking about in the barrels in the alleys, unkempt, wobbly in his gait, uncertain upon his feet, defective in his features—for all the world like the horse and wagon.

Here comes a fellow down the street driving a high-headed horse, with shiny harness. It seems out of date, of course, for the motor car has rendered obsolete the best of horses and the finest of carriages. But the driver is of the same stripe—a smooth-enough looking fellow, well groomed and harnessed to perfection and sided in flashy apparel. But he, too, seems a bit out of date; at least he carries you back to the "sporty" days of the past. He and the horsey and his harness smack each other as nearly as the scavenger and his outfit resemble each other.

There goes an ice wagon—a pair of ponderous Norman horses, with strength in every feature. And on the seat of the wagon sits a man of strength, with good, strong arms and robust body, resembling the stability of the wagon and the team.

You can go through the whole list and you will find the resemblance of driver and team and vehicle. We wonder if it will come to be the case with the motor cars when we have a motorized world. We half suspect it will.

THINK MUCH OF ENVIRONMENT

Breeders of Black Cattle Will Have Nothing of Light Color About Their Establishments.

The breeders of the Polled Angus—a particular race of black cattle in Scotland—who make a great point of keeping up the perfect uniformity of their blackness, getting rid of every individual that has even a single white foot, take care to have everything black about their farmsteads. All the buildings are black, the horses are black, the dogs are black, the fowls are black. No breeder will have anything colored or white about his place. Though no account can be given of the physiological action which makes these precautions effective (as they are asserted to be) in securing the desired results, yet some scientists are strongly inclined to think that some influence of this kind is concerned in producing many singular correspondences between the surface aspect of plants and creatures, inhabiting marshes and the character of the bottoms on which they live.

DEMOCRATIC COUNTY CONVENTION

Charlevoix, May 10, 2:00 P. M. at the Court House for the purpose of electing delegates to the state convention.

Committee,
R. A. Risk, Chairman.

KEEP YOUR SKIN CLEAR AND HEALTHY

There is only one way to have a clear, healthy complexion and that is to keep the bowels active and regular. Dr. King's New Life Pills will make your complexion healthy and clear, improve the bowels greatly, stimulate the liver, cleanse the system and purify the blood. A splendid spring medicine. 25c at your Druggist.

Equal Suffrage Notes

JESSIE M. HIMES, Publicity Chairman Charlevoix County Equal Suffrage Association.

The question of equal suffrage is again to be voted on in New York in 1917. Just five months after it was declared "dead forever" in the eastern states as a result of the election of last November the resolution providing for resubmission passed both houses of the legislature by an overwhelming majority.

He—"There are two periods in a man's life when he never understands a woman."

She—"Indeed! And when are they?"

He—"Before and after marriage."—Philadelphia Evening Ledger.

And yet there are some men who think they understand women well enough to represent them on election day.—Woman's Journal.

The women of Cadillac are given credit by the wets for keeping Wexford county dry. The wets were sure of victory until the women turned out in large numbers and went to the polls to plead with the voters to vote dry. If these women had only had the ballot do you not think they would have used it? "Bricks without straw" is the heavy task of unenfranchised women.

Ten thousand circulars are being prepared by the Denver Chamber of Commerce to send to Iowa to help in the suffrage campaign. These circulars will contain data based on government reports showing the "prosperity conditions" in suffrage Colorado.

"We become more and more convinced," says the Rural New Yorker, "that the big question of modern farming is how to keep the girl on the farm contented and enterprising. The boy will stay there if the girl is satisfied."

A member of the Babson Statistical Organization, of Boston, Mass., says: "Those who oppose woman suffrage on the ground that it would tend to 'mess' legislation are generally those who believe that child labor in the South and elsewhere is a good thing for the children.

The Chicago Herald says editorially: "As for the record of Illinois women voters on liquor questions it has been appalling in many communities—to liquor dealers."

School Commissioner's Column

May L. Stewart, Commissioner

Normal students attended the commissioner in visiting schools last week and observed work in Marion, Hayes and Bay.

Mr. Erforth at Horton Bay says he has been assured of new seats for the school room for next year. These have been badly needed for some time and will effect several unlooked-for improvements.

Teachers' examination April 27-28. There were 26 applicants of whom 5 wrote on second grade and the remainder on third grade.

For those writing without experience or normal training, certificates will be issued until statement of state normal credits is sent in. Several applicants will have to wait until the close of the summer session of the state normal schools.

Second round of visits complete in all but the Beavers. They're next. The commissioner regrets that the Nowland, North Bay and Gill schools had closed a few days before she arrived for a second visit.

CARD OF THANKS

Words cannot express the deep heartfelt thankfulness to all of our friends and neighbors who so kindly aided us in this sad hour of our bereavement.

Mr. and Mrs. M. E. Woodgate.
Mrs. Henry Van Oye.

The Roorback

By JESSIE SHERWIN

(Copyright, 1916, by W. G. Chapman.)

"Mayer—state representative—congressman—natural sequence, boy," chirped Ben Driscoll, political manager of the district and he slapped the dignified favorite candidate on the shoulder in his free and easy way.

Hon. Waldron Morrison did not resent the familiarity of his visitor. He was used to all sorts and conditions of men since public favor had begun, five years previous, to thrust its rewards upon him for championing in the courts a series of improvements that had made of Lisle, a struggling village, a fine thriving inland city.

"Congressman!" he repeated with inquisitival smile. "Pretty strong opposition, isn't there? Frankly, Driscoll! I don't expect to be elected. The enemy are fighting hard."

Nothing! commented Driscoll vigorously, "you will beat Worden two to one. We've got that fixed. Their last hope is some kind of a roorback, and where will they find one against you, I would like to know?"

Waldron Morrison winced, but he had his suspicions! discovered from his visitor. Driscoll swung from the office, aggressive, self-assertive, proud of being the champion of a class and a powerful candidate, as he put it to his cronies.

Morrison sat at his desk a!ccile for some minutes. Then he got unlocked the office door, received himself and leaned his head on his hand. His face grew serious and thoughtful straightened up, his lips set grim. He waved the man to a chair.

"You have come a long way to see me?" he observed steadily.

"You are familiar with the city, Mr. Morrison?" insinuated his visitor.

"Yes, I once lived there."

"That admission made, I can treat with you plainly," observed the other. "There were some incriminating papers left behind by you at Creston."

"I know all about them, proceed," directed Morrison in a harsh dry tone.

"They have come into my possession," went on the unblushing knave. "Published at the present moment here they would blast your hopes of office and possibly force a second begins."

"Blackmail, eh?" propounded Morrison with brutal frankness.

"Call it that, if you choose," was the bold response.

"You scoundrel!"

"I am used to that," scoffed the lawyer. "It's a plain, dead-open-and-shut case. Here are the papers," and he produced a sealed envelope. "It's either you or your political opponent. Hell pay well. My employer to you is five thousand dollars."

"Possess those papers, which you have stolen, or I will shout you dead where you sit!"

Like a bolt from a blue sky the words were spoken. An unsuspected intruder stood in the doorway—a tall, massive dark-eyed beauty in her dainty white hand, which clasped a gleaming revolver directed squarely at the heart of the blackmailer.

The lawyer sat like one thunderstruck. He seemed to lose his possibility all over. His hand extended the packet as he shrank from the gleam of angry eyes and the threatening weapon.

"Go, you serpent!" spoke the woman and he slunk from the room. The woman sank to the seat he had abandoned, she faced the wondering, wrought-up Waldron Morrison, placed the envelope before him.

His eyes were fixed on the glorious by beautiful face, insane strength and force of character, perchance suffering had lined it about the eyes and lips, but she was a radiant creature even now.

"I have tracked that scoundrel who stole those papers from my dead father," she said, her voice steeled to repress the slightest throb of emotion. "He was my father's lawyer. He found the papers. Oh, cruel! cruel! Never until my father was dying, did he tell me that you assumed the place of my dead brother as a criminal act."

She broke down. His arose and stood a long tender bow upon her bowed head.

"And now!" he softly intimated.

"Oh, take me back! take me back!" she pleaded, and his arms and his heart were open for a resting place for that poor, bruised spirit.

DARNING SOCKS AS BUSINESS

Mild Drudgery of Women Estimated Worth Less Than 75 Cents Per Day—Cheaper to Buy.

In an address a New York advertising man said the biggest field open to his business man today was in making new wants among the people, and he illustrated his contention in this way, the Ohio State Journal observes:

If stocking makers could convince women it was cheaper and better to buy stockings than to darn old ones, what a big it would be to the knitting industry. Darning stockings and socks is the bugaboo of every woman.

There is a fine suggestion in all this. Darning stockings is too insignificant an occupation for women of high thinking and simple living. It may be a useful labor, but it is so tedious as to wear the patience out of a good woman. There is a humility in the task that adorns a rare woman but there is also a mild drudgery about it that crawls all over the nerves and leaves a track of worry and impatience. Or, disarity it doesn't pay. It is possible, if the work was brought down to the base of ordinary wages, the good woman wouldn't earn more than 75 cents a day and that will buy six or seven pairs of socks that will endure two wearings. Besides, darned socks are not much improvement on the original kind.

Hot-Cross Bread.

The old custom of marking a cross on bread accounted for the former use as a "charm cure" in various ailments, particularly toothache, and also for belief in its power to propitiate the elements. Until quite recent time Greek sailors took to sea small loaves known as St. Nicholas' bread, which they threw into the waves in time of storm. To this day the Russians seek to repease the angry spirit of the White sea by offerings of bread. Another survival of the old custom of basting the sign of the cross to ward off malign influences is to be found in the house wife's devices to make the fire drag by placing a poker across the bars of the grate. It was believed that by thus "making the cross" all evil spirits would be banished from the hearth and home.

Endeavor.

"The trouble with you, my dear fellow, is that you lack ambition. You are not born with a desire to become famous. You would never think of turning from pleasure for the purpose of undergoing hardships in order that your name might live through future ages. You have never done anything to lift yourself abo s those around you. You are one of the many who are content to exist and to pass from the earth without ever having done anything worth of note."

"Say, you don't know what you're talkin about. I just accomplished something worthy of note, bub." I was George Washington creasin' the Delaware on a foist in a pageant once."

Availability.

"I understand Crimson Gulch has a new sheriff."

"Yes," replied Broncho Bob. "Cayote Joe's got the job. He's a unpopular anyhow that bein' sheriff would make any difference in his dead standing."

He Arose to His Feet Trembling.

His glance was fixed upon a stray ray of sunlight glinting into the room. In a moment the illusions of a dark hid corridor in his mind that held him past memories.

Mayor, state representative, congressman, he repeated softly. "Yes and before that. If they knew!"—and then he checked himself, and arose to his feet and paced the room in a fevered, disturbed way.

Waldron Morrison had come to Lisle five years previously. No one asked where he came—no one asked for at that time a heated campaign was on as to the choice of Lisle and another town as the metropolitan center of the district. At a critical juncture Morrison made a legal suggestion that won the victory for Lisle. Its grateful people remembered it. Honors were thrust upon him and riches, but—he was a lonely man.

How lonely, none knew except himself, and the secret he hid in the most sacred recesses of his sorrowful soul. He was softened, his heart nigh melted under the influence of his intense emotions, then his lips set firm, he drew himself up to his full majestic height. He was from one more Hotlow as were to him the promises of aggrandisement, he resolved to remain stanch and active in a field where there was at least surcease from memory.

Then Morrison became involved in the hardest battle of his political career. There was a split in his party, and bitter strife with an direct adversary. Two days before election, Driscoll, boyant, optimistic, triumphal as usual, burst in upon him.

"You're there!" he announced confidently. "We've won! It will be a landslide!" and proceeded to detail a bargain with the disaffected sons whereby their votes would be plumped en masse for his candidate.

There was something in struggle and victory after all. Morrison decided, and he tried to take some in the high sense of usefulness and honor that had always attended his political preferment. It was pleasant to realize that from nothing he, a stranger five years ago, had won his way to the highest position in the gift of the community. There was no one near and dear to him to share the glory, but all the same he had gained the pinnacle, he had demonstrated truly that "men might rise from their dead selves to better things."

There was a tap at his office door and he said "Come in." And a man passed through the guilt reception room and confronted the visitor reminded him of some dark forbidding raven. A nameless chill struck his heart. The impression deepened as the stranger extended a card. It read: "Abner Doylan, Attorney at Law, Creston."

"Creston! Two thousand miles away, yet a message, Creston, from which remote city he had fled as from a pestilence, Creston, the abiding place of his faith, hope and love, and later the sepulcher of all his fondest dreams!

In an instant Waldron Morrison comprehended this man's mission. He

Kin Hubbard Essays

SONGS O' TODAY

By KIN HUBBARD.

"Ia Your Daughter Singin' th' Reignin' Hits o' th' Day While Some Buddin' Lothario Sets Unhandcuffed in th' Same Room?"

When I stand idly by an' watch th' laiign of sel, thro' a modern play I can't help thinkin' how for we've travelled since th' days when th' mere mention of "Th' Black Crook" caused th' oldtime mother t' turn purple with shame. Jest think o' th' big, slim an' cuddle songs o' t'day an' th' dear old ballads o' yesterday—songs like 'Only a Faney Blossom,' 'There's a Letter in th' Candle,' 'Meet Me by Moonlight Alone,' 'Mollie Darlin,' 'Sweet Genevieve,' 'My Ole Kentucky Home,' 'Sweet Violets,' 'Suwanee River,' an 'In th' Gloamin.' Oh, My Darlin.' Th' ole songs inspired sentiment an' pastoralism—they were songs that brought out th' best that wuz in us, ballads that caused burnin' tears an' tender emotions.

After th' oldtime beau listened t' a couple o' verses o' 'In th' Gloamin,' or 'Take Back Your Heart,' his brain stirred with lofty thoughts an' he wus perfectly safe t' have around. 'Come up t'night an' sing, honey, come up t'night, Whatever I'll know it's you (whistle). Come up t'night an' wear your love-t' an aspaline' list o' 'tremendous metroplitan hits' an' no questions are asked. For instance: 'Allegro Modi-stato.'

'Most ever feller meets a girl some day.

Some little girl who steals his heart away.

You have your dearest friends t' take th' girlie home,

Give up all you own I'll be alone.

You've got a chance t' press her t your heart,

But you've just got th' girl an' you're afraid t' start.

There's your parlor, lights are low,

If you had any sense you ought t' know—

(Chorus).

All th' time she's waitin' fer you t' hold her,

All th' time she's hopin' you'll gin her a kiss,

All th' time, all th' time—she's waitin fer some sissin'

Oh boy! Oh boy! look at th' you you're missin.

All th' time she's givin' you chances But you never make a move or show a sign,

She's gittin' closer inch by inch,

If you move over it's a cinch,

She's waitin' for you t' love her all th' time.

Here's th' chorus of another "terrific hit" that's findin' instant favor in our most exclusive homes. It is full o' inspiration an' designed especially t' cause th' average youth t' spring upon his lady love an' sets th' last hair th' wrong way. Th' ladies like it, too, because it makes them feel kinda sorry for th' poor feller.

'Come up t'night, my honey, come up t'night,

Whatever I'll know it's you (whistle).

Come up t'night an' wear your love-t' an aspaline' list o' 'tremendous metroplitan hits' an' no questions are asked. For instance: 'Allegro Modi-stato.'

'Most ever feller meets a girl some day.

Some little girl who steals his heart away.

You have your dearest friends t' take th' girlie home,

Give up all you own I'll be alone.

You've got a chance t' press her t your heart,

But you've just got th' girl an' you're afraid t' start.

There's your parlor, lights are low,

"No Matter How Wise a Feller Is He's Liable t' Git Taken in on Any One o' Th' Ladies, Fer Ther Is no Why in th' World t' Git a Line on a Girl Till t's Too Late t' Kick Out."

eternity with a cold blooded fabrication on her full red lips.

A connubial partnership is just like a business partnership. Once in a while you find a firm that's been in business for many years because both members have pulled together. When a one-member o' a firm wants t' swing on th' swivin' ropes an' look pretty while his partner does th' work a split up soon follows. Sometimes a business man "I advertise for a partner with capital an' no experience, an' lots o' girls are lookin' fer th' same thing.

O course there's no such animal as the ideal wife. Men an' women alike have ther short comin's. There's all kinds o' wives. There's th' stylish dresser who hates children; poor bread makers who are swell mothers; gilt edged cake bakers who never dust th' planner; highly intellectual wives who can't manage their hair; lovin' wives who want t' boil every thing; party wives who don't want t' go to nothin; housewives who can't see anything funny; poor lar wives who are never at home; home lovin' wives who don't stay in Urbana without injury t' his reputation; wives who want t' be sure he's liable t' git taken in on any one o' them, fer there is no way in the world t' git a line on a girl till it's too late t' kick out.

Some wives never give their husbands a pleasant look unless their hair is combed an' nuff bone on approach. It costs a feller twice as much t' make up with his wife as he earns fer refusin' her something. No matter how long a feller has lived with his wife some new an' unexpected phase o' her character 'll pop out everday.

Some early sage has remarked that it is for better t' spend one whole Sunday in Urbana, Ohio, than it is t' spend two minutes with a contentious woman. He could have substituted 'ideal' for contentious an' extended th

"I Have Been in Battles, Too."

ing all around me. But I do not like to talk about those things. Everything is peaceful now, and I am glad there is no red mark upon my shining blade.

"I guess if you had done such deeds as I have, said the little sword, I would stay in the sheath." said the big sword, "you do not seem to understand that you are a real hero. I am all, but just a fer sword. The Indians you killed were little bucs dressed in Indian costumes and played at being killed.

"Your battles were all make-believe, and the little boy who carried you has grown up and is a real soldier now. But don't you mind," said the big sword, as the tin sword began to rattle uneasily on the wall, "you were the first sword he carried and you were ever so that taught him to honor his country, so you have a great deal for which to be thankful.

"We will divide honors. You were the first and I hope I'll be the last sword he will ever be called upon to carry for his country."

The little tin sword grew quiet and the last cinder on the hearth grew cold. "Good night, little sword," said the big sword, and the little tin sword was asleep.

Aims of Boy Scouts.

The Boy Scouts are not military. That has been clearly stated many times. Consideration for others is one of the chief lessons taught, would keep there from having any part in "spreading arm eagle war," but the discipline and training in all useful work and in concerted action would be of incalculable value in case the nation needed to call on its men for defense.

Light and Strong.

The bones of all flying birds are hollow, thus combining the greatest strength with the least weight.

Th' Ideal Woman

Professor Alex Tansey, who has mastered three tongues an' been divorced once, discussed the woman in th' home before th' Art Embroidery club yesterday afternoon an' said:

Girls marry jest th' same as boys join th Regular Army. They have no thought or knowledge o' th' warfare ahead. They just want t' git away from home. A girl 'll go with a feller an' jest because they both love movin' pictures or chop suey she thinks she's found her affinity an she sets about t' land him. A girl is purty slick. She'll agree with everything a feller says durin th' theater gain' stage. She'll even excuse closer or knit him a purple necktie if he shows a disposition t' study her every wish, an when th weddin' ceremony is performed she'll promise t' love, honor an' obey just as th' trap is spring an' swing off fer

"No Matter How Wise a Feller Is He's Liable t' Git Taken in on Any One o' Th' Ladies, Fer Ther Is no Why in th' World t' Git a Line on a Girl Till t's Too Late t' Kick Out."

THE SANDMAN IN STORY

By Mrs. F. A. WALKER

THE TIN SWORD.

Once upon a time, two swords hung on the wall in a real soldier's room. One was a large sword and had been in a real war. The other was a little tin sword which the real soldier played with when he was a little boy.

When he hung the big sword on the wall after he came home from the war, he said: "You are much larger than this little fellow beside you, but you have never killed Indians, and he has."

Although he laughed when he said it, the little tin sword felt itself of great importance, and it did not mind in the least the size of the big sword because so many times as large as it was.

That night, when the house was still and dark, and the only light in the room was from the dying embers on the hearth, the little sword said to the big sword: "Is it true that you never killed an Indian?"

"I have never killed anyone," answered the big sword with dignity.

"What is the use of being a sword?" asked the little one, "if you never have killed anyone. Why, I have killed so many Indians that I cannot remember the number."

"I have been in battles, too," continued the little sword, "and I cut down the enemy, and once a dog was a bear and I killed him, too."

"Did you call a dog be a bear?" asked the big sword, taking notice of the little sword for the first time when it was not asked a direct question.

"Because he looked like one it was," replied the little sword. 'And once a cat was a tiger, and we went tiger hunting, too."

"How about the Indians?" asked the big sword, "were they real or play Indians?"

"Real, of course," answered the little sword "everything was real that we did. The Indians were long trousers with feathers in the side of the hat and a band of long feathers sticking up around their heads. You should have heard them shout and give the war-cry."

"Was there any blood shed?" asked the big sword, beginning to understand what the little sword was talking about better than it did itself.

"What is that?" asked the little sword.

"If you had ever been in real battles you would not ask?" replied the big sword.

"But you have never killed anyone and I have," said the little sword, "I do not see why you should say I have never been in a real battle when you have never done anything worth telling of yourself."

There is a great deal to be done in a battle besides killing, replied the big sword. "I led the men who did the fighting and directed them. The people who hold me high above his head, so that all the soldiers who were following would know where to go and what to do, and I saw the enemy fall

"I Have Been in Battles, Too."

ing all around me. But I do not like to talk about those things. Everything is peaceful now, and I am glad there is no red mark upon my shining blade.

"I guess if you had done such deeds as I have, said the little tin sword, still sure that he was the hero, "you would want to tell all about them."

"My dear little tin sword," said the big sword, "you do not seem to understand that you are a real hero, and all, but just a tor sword. The Indians you killed were little bucs dressed in Indian costumes and played at being killed.

"Your battles were all make-believe, and the little boy who carried you has grown up and is a real soldier now. But don't you mind," said the big sword, as the tin sword began to rattle uneasily on the wall, "you were the first sword he carried and you were ever so that taught him to honor his country, so you have a great deal for which to be thankful.

"We will divide honors. You were the first and I hope I'll be the last sword he will ever be called upon to carry for his country."

The little tin sword grew quiet and the last cinder on the hearth grew cold. "Good night, little sword," said the big sword, and the little tin sword was asleep.

Affectation.

The wild hawse affectation makes in that part of the world which should be most polite is visible wherever we turn our eyes; it pushes men not only into impertinences in conversation, but also in their premeditated speeches. At the bar it torments the bench, whom business it is to rest off all superfluities in what is spoken before it by the practitioner; as well as several lit the pieces of bluster which arise from the law itself. I have seen it make a man run from the purpose before a judge who was, when at the bar himself, as clear and logical a speaker as any of the pomp of eloquence in his power, he never spoke a word too much.—Steele.

Sarsator Sorghum's Ideas.

"What is your idea of neutrality?" "Neutrality," replied Senator Sorghum, "is the state of mind which enables a man to chop wood and use the chips for full instead of dropping now and then to put one on his shoulder."—Washington Star.

A SPELLING MATCH.

Ten little chickens standing in a line,
"Peep, fully," then there were nine.

Nine possied faces, fearful of their
"Ch-h-h-y, atty," then there were eight.

Eight pairs of blue eyes, bright as stars of heaven,
"B-ro-w-y, lusty," then there were seven.

Seven grave heads nodding, in an awful fix,
"L-a-d-y, lady," then there were six.

Six eager dottings, determined each to win,
"D-u-t-y, duty," then there were five.

Five hearts, so anxious, letting
"S-c-h-l-l-r-r, scholar," then there were four.

Four mouths like rosebuds on a
"M-r-c-y, mercy," then there were three.

Three pairs of pink ears, listening keen and true,
"D-n-e-s-t, only," then there were two.

One band of yellow hair, bright as gold,
"H-o-m-e, home," and the spelling match was won!

—New Orleans Picayune.

ENCOURAGE BOYS AND GIRLS

Progress of Club Work in Pennsylvania Is of Special Interest—Many Clubs Formed.

In view of the support which has been given the movement in recent years information lately secured by

Corn Raised by Pennsylvania Club Boy.

the agricultural extension department of the Pennsylvania State college on the progress of club work among the boys and girls of Pennsylvania is of special interest. The statistics are as follows

Twenty-eight counties have reported a total of 941 corn clubs, 39 potato clubs, 41 garden clubs, 181 live stock clubs and 664 poultry clubs. Definite figures on the number of domestic science clubs are lacking, but it is known that such clubs are well represented. The total number of members in agricultural and domestic science clubs reported in the state is 8,290. Ages of club members range from eight to twenty-one years.

It is with a view to lending aid to the advancement of this movement that the Pennsylvania School of Agriculture has designated an individual to direct this phase of extension work.

MYSTIFYING CHEMICAL TRICK

Plain Blue Handkerchief Turns White When Warmed—Few Drops of Iodine Is Sufficient.

A plain blue handkerchief is shown to the audience. When the handkerchief is warmed it turns white and when heated resumes its former color.

Make a starch paste and add enough water to the paste to thin it. Then add sufficient tincture of iodine to color the liquid blue: a few drops will do the trick. Dip a white handkerchief with this blue liquid and when the handkerchief is dry it is ready for the trick.

RAISE A MOTORCYCLE STAND

Time and Trouble Saved by Use of Door Springs—Does Little Trick Automatically.

A motorcyclist may save the time and trouble of raising the stand when the machine is made off by fastening one end of a door spring to the stand near the bottom, and the other end to a convenient place on the lug. Then when the machine is made on the stand, the spring is stretched, but the removal of the weight releases it, and the stand is pulled back into place.—Popular Science Monthly.

Aunt's Joy.

"I told you last sabbath, children," said the Sunday school teacher, "that you should all try to make someone happy during the week. Did you do that, you Susie?"

"I did," answered a boy promptly.

"That's nice, Johnny. What did you do?"

"I went to see my aunt, and she's always happy when I go home."

A Literary Journey.

Tommy's mother wanted to go to town, so she said to his father:

"Will you keep Tommy, or shall I take him?"

"I want to go with you," shouted Tommy.

"Go where?" his mother asked.

"To a-b-c," Tommy replied.

Something to Satisfy.

What is it we all like to have but never like to keep?—A good appetite.

Goes Against the Grain.

Why is good advice like a sickle?—Because it goes against the grain.

Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe those hot water enthusiasts.

There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material left over in the body which, if not eliminated every day, become food for the millions of bacteria which infest the bowels, the direct result is poisons and toxins which are then absorbed into the blood causing headaches, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate from any druggist or storkeeper. This will cost very little but is sufficient to make anyone a real crack on the subject of internal sanitation.

Just as soap and hot water act on the skin, this combination clean and freshening, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe on the inside than on the outside, because the skin pores do not absorb impurities in the blood, while the bowel pores do.—Adv.

Sixty Waterfalls.

In ten miles travel 11 waterfalls are passed, the highest being Multnomah falls, second highest in the United States. Latourelle falls, Shepards Dell, Bridal Veil, Cooper falls, Dalton falls, Mist falls, Wahkeena falls, Benson park and Multnomah falls. On

New Columbia River Highway

WITH the building of the Columbia river highway through the gorge of the famous Columbia river, a paved driveway has been provided along the precipitous sides of the gorge and making this section of Oregon passable for the first time in history for automobiles and all other vehicles. The national dedication of the roadway comes June 7, opening day of Portland's tenth annual rose festival.

The building of a highway through the gorge of the river has been a dream of years until two years ago the work was taken up by public-spirited citizens, with the result that the highway, hard-surfaced from Portland to the Multnomah county line, is ready for the tourist, and represents an investment in road-building of a sum exceeding $2,000,000.

In making passable the gorge for automobiles, there has been opened up a new viewpoint for the scenic beauties of the Columbia river. For miles are cliffs, waterfalls and virgin forests through which the highway winds. In many places it hangs to the cliffs hundreds of feet above the river. Its concrete and steel bridges spanning turbulent streams, supported by artistic walls of the massive rock for miles of its length.

The gorge was the home of Indian tribes in the early days, a fastness where they were safe from enemies. In the road, reduce the Indian trail of the Gods, and around its scenic grandeur many Indian tales were drawn. Leaving Crown Point the highway enters the direct view of the given it the title, "The Road of the Falling Waters."

Many Picturesque Waterfalls.

The Oregon Bureau of Scientific research the steps that have been thus far taken, at the suggestion of the Scientific Research Bureau of the Advancement of Science, to secure legislation in various countries in the interests of science. The committees of sections A and C of the British association adopted the following resolution at the Australia meeting: "That in view of the fact that moments which convey information of world-wide importance are sometimes disposed of privately in such a way as to deprive the public of this information, the council be requested to take such steps as may initiate international legislation on the matter." Since the Australian meeting this resolution has been accepted by the council of the British association and transmitted to the International Association of Academies.

Embarrassing Affection.

A Baltimore woman has in her employ an butler a darky of pompous and satisfied air. Not long ago he permitted a chocolate-colored damsel, long his ardent admirer, to become his spouse.

On one occasion, when the lady of the house made temporary use of the services of her butler's wife, it was observed that whenever the former, the two brought them together, the bride's eyes would shine with extraordinary devotion.

"Your wife seems wonderfully attached to you, Robert," casually observed the mistress.

"Yes, ma'am," answered Robert compliacently. "Ain't it just sickenin'?"—Everybody's Magazine.

Young people who marry for fun are in a different honor by the time the divorce court is sighted.

The almighty dollar covers a multitude of queer transactions.

A woman's idea of a good husband is one who does things for her folks.

GOOD REPORT
Doctor Proved Value of Postum.

Physicians know that good food and drink, properly selected, are of the utmost importance, not only for the relief of disease but to maintain health and vigorous life.

A doctor writes, "I count it a pleasure to say a good word for Postum with which I have been enabled to relieve so many sufferers, and which I count, with my valued companion Grape-Nuts, one of the daily blessings.

"Coffee was banished from my own table some time ago and Postum used regularly in its place" (Coffee is injurious to many persons, because it contains the subtle, poisonous drug, caffeine).

"I frequently find it necessary to instruct patients when they take Postum for the first time to be quite sure that it is properly made according to directions, then it has a clear, seal-brown color and a rich, snappy taste, as well as health giving qualities.

"The above letter, received over ten years ago, is fully confirmed by a recent letter from the doctor, in which he says:

"It is a pleasure to render a good report covering a product of which I am an enthusiastic friend.

"I still use Grape-Nuts and Postum Cereal in both its forms. And, what is more, I am having it used in the families of several patients in which there are children, and all unite in endorsing the fine qualities of your admirable product."

Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms:

Postum Cereal—the original form —must be well boiled, 15c and 25c pkgs.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly, 15c and 50c tins.

Both forms are equally delicious and cost about the same per cup.

"There's a Reason" for Postum.

—sold by Grocers.

GUIDEBOOK IN MUCH DEMAND

Caxton's Famous Works Most Sought After by Book Lovers—Throws Light on Traveling.

The guidebook most sought after by collectors is "Information for Pilgrims Unto the Holy Land," which is valuable because of the light it throws on distances and the cost of traveling in the fifteenth century, as stated by Caxton. The father of English printing was a practical man, who set himself to produce books for which there was a demand, while other early printers ruined themselves by printing luxurious works for which the public or their warehouses unsold.

His guidebook scrupulously sets out all that was needed in order to make a pilgrimage as cheaply and comfortably as possible. There were two routes to Venice—then the favorite port for Jerusalem pilgrims and Caxton gives the itineraries of both. He advises those who can afford it to travel from Venice to Jaffa in a galley, the return fare being 50 ducats, and shows how all the places of interest in Palestine could be seen in fourteen days.—London Chronicle.

Broke It Gently.

The impecunious author passed over the manuscript with a sinking hand. The editor of the Bugle started. "Hm—Mr. Wright," he said, with the air of a man who has just become saddled with a great responsibility, "and you ever have the Walter Scott received the suggestion of his first successful novel beat the "washing his hands?" "I—I believe I read it," stammered the unnecessary author, putting his hands into his pockets. A far-away look aid into the face of the editor. "I remember throwing out the suggestion," he said, softly.

Bobby Knew.

Uncle Ernest (improving the shining hour)—And what do we do with the flesh of the whale?

Bobby—Eat it.

Uncle Ernest (sarcastically)—Oh, do we? And what do we do with the bones?

Bobby—Put em on the edge of the plate.—London Sketch.

Crown Point.

Tourists who journey west over the Lincoln highway, or in fact any of the roads through Utah, Idaho or Montana, find good automobile roads leading to the new Columbia River highway.

Notwithstanding the cost of the highway has been enormous, it is already looked upon as the state's greatest asset from a tourist standpoint, and is one of the best investments ever made by an American municipality.

Little Mary's Suggestion.

Her father took Mary out for a walk one day to the country. They passed a pasture where some bulls were in closed. The bulls were bellowing, and Mary's father attempted an explanation of it, to the great amusement of Mary, who finally said, after many concerns had been rendered for her benefit, "Daddy, wouldn't it be a good joke if we were to hide behind a tree, and when people came, by you would undo your voice and frighten them."

His Grouchy Views.

"What his become of the fine old names like Prudence and Patience?" "They wouldn't be appropriated now," declared the old grouch. "If I had a couple of Daughters I'd name 'em Extravagance and Hysteria."—Louisville Courier-Journal.

Wash Suits of Two Sorts

Even tailored hats are no longer simple or severe. The proof of the pudding is in the tasting, and those who wonder if hats are approved and spent their money for boast intricate and bizarre trimmings are wrong. Those are made of wide or narrow ribbons and braids, lisses of silk or profusion and unusual mournings, fruits and broad ornaments in unusual variety, contribute, among other things, to their decoration.

A group, in which these tailored models are shown, gives a good idea of the work lavished upon millinery for this season. It is this requirement of fine workmanship that accounts for the higher prices, in part. Then the amount of trimming has been increased and the prices for materials have advanced. Millinery, considering everything, is not unreasonably high. At the left of the picture a familiar shape, in hemp or chip, is trimmed with a wide ribbon braid in trills of plaited ribbon, finished with a cluster of cherries, the stems of which are dropping brim is faced with taffeta silk.

At the right a wide-brimmed sailor has two lines of taffeta bordered with narrow braid on the outer edge, one of it on extending into the headsite. The top crown is of taffeta and braid, machine stitched, row on row, into a band. The handsome ornament is a big cabochon on which the braid is so placed that it stands on edge, forming a huge daisy motif. It is sewed against the crown along the edge, at its widest decorate.

A sailor with somewhat narrower brim is trimmed with ribbon in contrasting colors. Or a light tint and dark shade of the same color might be used. A flange of tinsel, like the lighter ribbon in color, is applied to the sidebrim. It is edged with narrow cactus tags that inclose lace or shirring wire that produces a very workmanlike fin.

The crown is encircled by two bands of ribbon, with the darker shade at the top. Two wingtips ends of the ribbon are wired along one edge and mounted at the front. Two plaited frills, one of light and one of dark ribbon, and a handmade ornament of braided ribbon attest to the demand for intricate ornamentation, which the model meets tastefully.

Light Gray Is Good.

Light gray, if one can wear it becomingly, is one of the best selections in the way of color for spring.

The close bodice buttons straight down over the seat with white pearl buttons, and the long bishop sleeves are of green crepe with white satin in cuffs. The collar is of white satin veiled with green georgette crepe.

Contrasting Fabrics.

Contrasting fabrics in skirts are much in vogue, particularly on the draped skirt. They match the coat lining in the case of a suit and may be of polka dotted, plaid, striped or plain silk of a bright color.

The Made in Tailored Hats

Mohair for Spring.

Mohair and worsted mixture is a fabric peculiarly suited for spring wear. It is light, cool, has a lustrous, silky sheen, and because of its springy texture is perfect for the new flaring skirt and cape coat. Brilliancy is a new color which is especially glowing and soft in the mohair and worsted weave, and the new blues are also notably rich and distinguished in this material. A navy blue shows green mohair and worsted in stitched bands on a shirt of green georgette crepe.

IN THE CITIES

How San Diego Dam Was Saved by Plucky Woman

SAN DIEGO, CAL.—A telephone call jingled at midnight. The call wasn't a Christmas greeting, for the wires, half down, were swaying in the storm outside. But it was loud enough to awaken the woman in the dark little room. It

couldn't have taken much more than a pinfall to do that.

"Turn loose the water in the reserve mains at once. You'll have to hurry to save the dam!"

That was the order that came over the telephone.

Mary McQuarrie, custodian of the La Mesa dam, didn't lose a second's time!

Without waiting to strike a light she was out in the rainstorm. Tumbling, slipping and falling she finally managed to get to the bottom of the steep, rocky ravine at the base of dam. She was out of breath and her body was bruised and scratched, but she twisted the wheel on the shut-off valve with a man's strength.

The force of the waters as they crushed out wrecked the pumphouse and drenched Mrs. McQuarrie.

Men came out the next day and took one look at the rising waters in the dam at the rushing spillway several feet deep in water.

"You risked your life to go down there last night," they told Mrs. McQuarrie, "and you saved the dam."

Mrs. McQuarrie smiled. "That's what I am here for," was all she had to say.

Mrs. McQuarrie is on the job every day in the year as custodian of the La Mesa dam. It was during the height of the recent rainstorm that her prompt action saved the storm from flood waters that rushed down on it. During the rains she stayed at her post, never consenting to rest from her vigil until the fight against the floods was won.

Mrs. McQuarrie's husband was drowned at Cuyamaca lake during a rainstorm three years ago. He was keeper of the dam at that place.

In appearance Mrs. McQuarrie is a motherly, pleasant looking woman of about middle age. She enjoys life with her daughter, her little home at the dam, her chickens and garden.

But she has always one eye open for the safety of the dam. That's the most important thing for her.

"I feel safer with Mrs. McQuarrie on the job at La Mesa than if a man were there," says Col. Ed Fletcher, who employs her.

Zoo Keepers in Hot Battle With Old Bibulous

NEW YORK—Bill Snyder, head keeper of the zoo in Central park, leaned against the elk enclosure, the other afternoon, gasping for breath, his trousers torn and his collar hanging by one button. Joseph Cunningham, his assistant, stood near, also dishevelled.

Inside the heavy wire netting and making every demonstration of uncontrollable temper, pranced and snorted old Bibulous, the father of all elks and the pride of the collection in Central park.

After this I will tackle an angry elephant instead of an elk with an intimation toward misbehavior," was the comment of Bill. His remark was drawn out because his hurried departure from the elk inclosure marked the end of a contest in which the two keepers barely escaped with their lives. For fifteen minutes a rapidly growing crowd had been the witnesses of a thrilling encounter in which the one man was pitted against the other, with the two keepers barely escaped with their lives.

When they got to the corral Bibulous was running up and down, frantic. He would stop suddenly, rock his head and rattle the graceful wire. Snyder and Cunningham entered the inclosure and fastened the door behind them. Bibulous noticed them and in a second charged, snorting and pawing. The keepers dodged and the elk brought up against the netting with force that sent him the more to madness him. Twice again he charged, with the third time caught Snyder by a button of his coat and dragged him to the other side of the inclosure, where there seemed no way of escape. Cunningham adopted the methods of the Spanish matadors and, by waving a red handkerchief, drew the charge to the flank. It served its purpose, and ridiculous changed the object of his attack.

After the moment of bewilderment had passed, skill the keepers succeeded in getting a lasso about the elk's neck. Then as he charged again the line tightened, and the animal was crashing down with his forearm broken under him. Before he could regain his feet Snyder had deftly loosened the lasso and with the help of Cunningham had fastened the elk to an inclosure wire. Then tearing open the gate, both keepers leaped outside the inclosure and what the door. Bibulous and Bibulous scrambled to his feet, and for nearly an hour afterward continued his demonstrations of anger.

Fishes and Frogs Show That They Know Colors

MERSON, WIS.—That fish know the difference between colors and have a sense of association seems to be indicated by an experiment recently made by an assistant in the zoology department of the University of Wisconsin.

IN PATHETIC WRECK

WRITER TELLS OF BEEING RUINS OF REIMS CATHEDRAL.

Beautiful Structure Damaged Beyond Hope of Repair, Though Parts of It Miraculously Escaped the General Destruction.

A correspondent of the London Standard, visiting the French from gives his impressions of the war-damaged cathedral of Reims. "The spectacle of the cathedral looms up out of the mist with Turneresque effect as we cop the Reims chain of hills," he writes, "and in ten Minutes we are in front of the statue of Jeanne d'Arc, which stands unscarred over against the wrecked portices. The Hotel d'Orleans seems to have benefitted by her stone image the charm she enjoyed against the abatis of war, as the street leading up to the square and the walls of the Lion Gate are in ruins, when not badly torn or altogether shattered by shell splinters. Thirty feet high around the basement, the masonry of the cathedral is shielded with sandbags, but not one of the statuettes that fill the interstices between the pinnacles seems to have escaped."

The interior, he says, is filled with an indescribable cold and emerging it is reminiscent of Egyptian buried temples. Swept into many heaps are what the verger calls "tears of lead." These are the settings of the stained-glass windows. Only one of a triple set of colored windows remains at most intact over the entrance to the sacristy. In the center aisle opposite the principal pulpit there is also a circle that time of the shells has touched. "All of the rest is more or less ruin," says the correspondent. "This is the more extraordinary because in the road there is a hole scarcely larger than a man's hand; but the shock was sufficient to reduce the interior to chaos." One instance of escape from wreckage is described as a freak that is almost a miracle. "Facing a huge chasm 29 feet square in the north wall in an inner passage," says the writer, "is a lovely bas-relief of the visit of the Magi, framed in a pure Gothic archway, as fresh looking as if it had just left the hand of the sculptor of five centuries ago."

"Before we leave," he continues, "we are taken to the "museum," as it is styled—a forlorn collection of rescued debris. It is curious to find here a hundred or two of the heads and dance missing from the outside statue and statuettes. They look as if they had been guillotined by the Germans, perhaps it is because the necks are the slenderest parts of the images, but it is almost tragic, although they are hot stone. Here is the Sourire de Reims, the famous woman's head that stood over the north door. It was noticed already that it had been snipped away and sold to an American millionaire, but there is no mistaking the 'Smile' as it lies, brown and chipped, on a bench—both eyes and the nose gone, and only the underlip curving upward. It is as if the features had been sliced off with a knife."

Become Valuable Industry.

Annual production of honey and wax in the United States has gradually mounted until it now totals in value more than $6,000,000.

USE QUAINT PHRASES

INDIAN BOYS WRITE HUMOROUS YET PATHETIC LETTERS.

One Complained That Mules "Injured His Religion"—Low Wages and Hard Work Has Embittered Life of Another.

The struggles of Indian boys in the different schools with the English language are revealed in a batch of letters in the possession of A. B. Wyly, superintendent of Indian schools in Oklahoma.

An Indian boy on a farm wrote: "I am not going to use those mule teams any longer than I can help. They injure my religion. I have to scold them and use bad words before I can get them going on such speed as I want them. Those facts are true, to be witnessed by God."

"I just received your good sarsaparilla letter and your picture," wrote another. "I can feel that it is purifying and enriching the letter and the picture, acting quietly on my liver and framer. Write me, I am in love with the truth."

Another Indian boy placed on a farm wrote a letter of objection to that form of labor, and a gentle complaint as to the wages he received.

"My honored school father and friend," he wrote to Superintendent Wyly, "now I am going to write you this day and inform you how I like my place. First of all matters I would say earnestly I don't like it. I think the trouble is I am too big for him, because he told me right before my face, that he rather have a small boy, as he can give him $6 or $7 a month for his labor. This was when I first came to this place and ever since he has had same opinion.

"Another thing he can't give me higher wages, he wouldn't do it for me, and yet he turn and write and me to work on two farms and yet he only give me $10 a month, gracious life. A woman can get more as $10 a month keeping house. I would rather be a housekeeper than work on two farms at $10 a month."

An Indian boy from the Snake settlement tries to tell the superintendent he is tired of school and would rather go back to his home. He is not the first boy who has "played sick" to get away from school, but no school boy ever voiced it in such quaint language.

"My dear friend school father," he wrote. "Particularly I am endeavoring to assume a splendid opportunity to say just concisely to you on this beautiful morning. I suppose you recognize that I am sick in my giblets. I mean I am well again no more. I want you to let me go home as soon as this month. If I stay here no long I can't be entirely well, maybe so."

Germany's Trained Men.

Here is the list in the logical order which the Germans considered in making war a science, remarks the Engineering Magazine: (1) Invention, finding out what to do; (2) organization, building the machine that would properly carry out what should be done; (3) records, gathering facts and statistics to be used by this organization in arriving at the right kind of conclusions in carrying out what should be done; (4) planning, logically arranging and coordinating all details so that the various steps can be rapidly and efficiently carried out; (5) standardization, carrying out the steps determined or actually doing the work in a proper manner; (6) incentives, the results of the successful application of the other five.

In other words, the Germans realized that to win the rewards of war the actual work would have to be done properly by well trained men, after the most careful kind of planning, based on and, as indicated by records, secured through an efficient organization, which thoroughly investigated every possible feature in connection with the task ahead of it.

Distinguished War Veteran.

The Journal Officiel of France contains the following: "Corporal Surrugue (Charles) No. 9131, Ninth company, Sixth regiment of engineers; veteran of 1870; knight of the Legion of Honor; volunteered for the duration of the war at the age of seventy-six, asked to be sent to the front as a sapper, shared without any sign of physical weakness all the work carried on by his company, both by day and by night, under the enemy's fire; a most conscientious soldier of discipline, energy and keenness." In private life Surrugue is a civil engineer and regularly walks many miles to superintend the construction and upkeep of the light railways in his district. A twenty-mile walk is mere child's play to him. For twelve years before the war he was the mayor of his native town of Auxerre, in Yonne, a place of 17,000 inhabitants. In the war of 1870 Corporal Surrugue served with General Faidherbe. Called up as a civil engineer, he gained the rank of captain. He was twice mentioned in dispatches.

After the Honeymoon.

Mrs. George Jay Gould was defending, at a dinner in New York, a marriage of a national rather than romantic nature.

"These romantic and impromptu marriages are very fine in the beginning," said Mrs. Gould: "but later on"—

She shook her head.

"Love," she said, "lasts at longest a year, but later on the wolf at the door does the same thing."

Effects of Blasts.

Firing a number of simultaneous blasts is estimated to be about 25 per cent more effective in breaking rocks than by firing the blasts singly.

To Make Your Nails Shine.

An excellent liquid polish for the nails is made of two drams of diluted sulphuric acid, one dram of tincture of myrrh, and rose water enough to make four ounces. Dip the nails in this solution, wipe and polish with a chamois skin.

NOTICE OF HEARING CLAIMS BEFORE COURT

State of Michigan, The Probate Court for the County of Charlevoix.

At a session of said court held at the Probate Office in the City of Charlevoix in said county, on the 27th day of April A. D. 1916.

Present: Hon. Fremont E. Gilbert, Judge of Probate.

In the matter of the estate of Elizabeth J. Gillies, deceased.

Notice is hereby given that 4 months from the 27th day of April A. D. 1916, have been allowed for creditors to present their claims against said deceased to said court for examination and adjustment, and that all creditors of said deceased are required to present their claims to said court, at the probate office in the City of Charlevoix, on or before the 27th day of August, A. D. 1916, and that such claims will be heard by said court on Tuesday the 27th day of August A. D. 1916, at ten o'clock in the forenoon.

Dated April 27th, A. D. 1916.

SELVESTER A. CORRELL, Judge of Probate.

Chinese Servants.

The servants in a Chinese family are not expensive, so far as wages are concerned, but they cost a great deal in perquisites. They rarely receive more than two dollars a month, but they are given their food, and they help themselves lavishly to anything they may desire. They dress themselves from the old clothing of the family, freely take the bargains and the toilet articles of the mistress, clothe their children from the common wardrobe, and, in fact, are a part of the family.

Taking Chinese Census.

The inhabitants of China are counted every year in a curious manner. The oldest member of every household has to count the families and make a list, which is sent to the imperial tax house.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Ernest Bolton and Lillian Bolton, husband and wife, of Boyne Falls, Michigan, mortgagors, to Frederick Bridge, Charlevoix, Michigan, mortgagee, dated the 1st day of August, 1910, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on August 11th, 1910 in Liber Forty-Nine of Mortgages, on page 38, and assigned by said mortgagee to the undersigned, which default is claimed to be at the date hereof the sum of Twenty Dollars and Ninety Cents ($20.90) Hundred and one Dollars and Sixty-Three Cents ($101.63) principal and interest, and no suit or proceedings at law having been instituted to recover the debt secured by said mortgage or any part thereof, and the money called for and secured on said described property.

Notice is hereby given that by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, on the First day of August A. D. 1916, at two o'clock in the forenoon, the undersigned, will sell at public auction, at the Circuit Court House, in the place where the Circuit Court is held, at public auction to the highest bidder, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage and attorney fee, for sale for which mortgagors are liable with seven per cent interest thereon from August 1st, 1916, and all legal costs, taxes and charges and attorney fee, the premises are described as follows: Lot one (1) and two (2) and three (3) and four (4) and the quarter of section one (1) Township thirty-four North of Range seven West, containing 159 acres of land, more or less, according to the government survey.

Dated Charlevoix, Michigan, April 18th, 1916.

ORDER FOR PUBLICATION

STATE OF MICHIGAN, The Probate Court for the county of Charlevoix.

At a session of said court held at the Probate Office in the City of Charlevoix in said county, on the 13th day of April A. D. 1916.

Present: Hon. Fremont E. Gilbert, Judge of Probate.

In the matter of the estate of Peter Lee.

Lois E. Campbell having filed in said court her petition praying that a certain instrument in writing purporting to be the last will and testament of said deceased be admitted to probate, and that she be appointed executrix of said will, and that letters of administration of said estate be granted to Fremont Gilbert upon the issuance of said will.

It is ordered, that the 26th day of May, A. D. 1916, at ten o'clock in the forenoon, be assigned for hearing said petition, and that said petitioner or some other person interested in said estate give notice to the persons interested in said hearing, of the pendency of said petition, and the hearing thereof, by causing a copy of this order to be published in a newspaper printed and circulated in said county.

SELVESTER A. CORRELL, Judge of Probate.

A true copy.

Mount Washington.

Mount Washington has the reputation of having the lowest temperature, together with the highest wind, ever recorded. For a good part of the year it is a little spot of the Arctic set in the temperate zone.

CHARLEVOIX SENTINEL.

VOLUME 47 — Charlevoix, Michigan, Thursday, May 11, 1916. — NUMBER 4

Thrift Campaign 1916.

This movement has been planned in every community in our nation. You will see it advertised in the newspaper; the schools; the factory; store and office; the moving picture houses and elsewhere. The plan adjusts itself automatically to large and small cities, counties and agricultural communities.

Many people do not always figure on how much they can save but more often figure for in advance, how they can spend their income. The active season in our city is rapidly approaching and the money making time is coming. We desire to regenerate a great number of New Savings Accounts and see the regeneration of countless numbers already opened.

You are urged to participate. If you have not been Saving with any degree of regularity, start in now. $1.00 will open an account in our Savings Department and you can add to it weekly or as often as convenient.

4% Interest paid on all Savings Deposits.

DOING BUSINESS

The Commercial Association is on the job. Weekly meetings are being held, and steady results are visible.

We hope to see every retail merchant enrolled and active in the work. Supplementing this, we hope to see every citizen "boosting" for Charlevoix.

Very much good can come of individual effort. Talk Charlevoix on every occasion; we have the goods to back up the talk. Let everybody do what he can to make Charlevoix a good market town, then demonstrate to the farmers that Charlevoix is the place to trade.

This is a co-operative proposition. A good market town can only be made where there exists between the farmer and the merchant a feeling of mutual interest and the assurance of mutual effort for mutual good.

Charlevoix enjoys the favor of climate nature to a degree surpassing that of any other town of Northern Michigan, but the beauties and blessings of nature are an asset only when they are supplemented by human effort.

Putting the Baby to Sleep.

In the matter of sleep, babies are inclined to be contrary. You must first form the time-honored habit of walking the floor with him. Care must be taken not to walk on a highly polished hardwood floor, for if you should happen to drop him he is likely to scream up the size, smooth surface. Pick out a room with a rug or a carpet in it, preferably one where your wife has been sewing during the day in this way the pleasure of the walk will be increased by the delightful pastime of picking pins out of the soles of your feet ever and anon, and the baby will have further opportunity of increasing his vocabulary.

If you object to walking the floor and are willing to stoop to deception you might hire somebody to drive a heavy cart up and down on the cobblestones in front of the house. The baby will think it is the milkman on his morning rounds, and, satisfied that he has kept you awake all night, he will go to sleep with a clear conscience. However, he will never have the same confidence in you have deceived him.

Had to Have "Owl Car."

A conductor on the Cottage Grove line insists that the following incident really occurred on New Year's morning:

The car was proceeding at about ten o'clock in the morning, when a tipsy individual who had been celebrating the arrival of the new year throughout the night stepped on to the track and hailed the motorman, saying: "Shay, m' frien', is dish Cottage Grove owl car?"

On being assured that it was a Cottage Grove car, but not an owl, he waddled unsteadily back to his seat on the curb, exclaiming:

"Go along, thon: I'm waiting for an owl car."—Chicago News.

Use of Acetylene in France.

The streets in more than 200 towns in France and the portions of Algeria that it governs are lighted exclusively with acetylene.

Notice!

Notice is hereby given that bids will be received by the Board of County Road Commissioners of the County of Charlevoix, on or before 12 o'clock noon, of the 16th day of May, A. D., 1916, at the county clerk's office, in the City of Charlevoix, County of Charlevoix, Michigan, for the building of a trunk line road, commencing one mile west of the west limits of the Village of Boyne Falls, or at the end of the stone road now built, on what is known as the Boyne Falls and Boyne City Road, running thence in a northeasterly direction on said road a distance of one mile, the bids to be made for both gravel and crushed stone road.

Road to be built according to plans and specifications on file at the office of the county clerk.

The Board of County Road Commissioners reserves the right to reject any and all bids.

Dated at Charlevoix, May 2, 1916.

Board of County Road Commissioners, of Charlevoix County, Michigan.
By RICHARD LEWIS, Clerk.

FOREIGN QUESTIONS ADJUSTED

GERMANY MAKES CONCESSION FAVORING PEACE—MEXICAN TROUBLE CLEARED UP.

The reply of Germany to the president's last note is regarded as favorable to a satisfactory adjustment of the submarine dispute. Yet the concessions are conditional upon this government "making England behave" in her blockade policy. Conditions now favor a continuance of diplomatic relations.

In the German campaign against Verdun the French are still holding off the German assault and gaining some ground. Military critics assert that the German offensive has spent itself.

In the Mexican trouble the Scott-Obregon conference has adjusted matters to the satisfaction of both governments. American troops are to remain in Mexico for sixty days, the Carranza Government, meanwhile, to use its entire military strength in the destruction of the Villista bandits.

The forty-second annual meeting of the Michigan Pioneer and Historical Society will be held in the Senate Chamber at Lansing on Wednesday and Thursday, May 24 and 25, 1916. Addresses will be made by President Emeritus Jonathan L. Snyder, of the Michigan Agricultural College; Hon. William L. Clements, Regent of the University of Michigan; Miss Sue L. Gillman, Historian of the Abel Fox Iowa Chapter, Daughters of the American Revolution; Major Roy Vandecook, of the Michigan National Guard; Rev. Father Francis Xavier Barth, of Escanaba; Judge Rollin H. Person, of the State Supreme Court; Professor David Friesy, of the University of Michigan; Hon. Gerritt Van Schoyen, of Holland; Mr. Adam Strohm, Superintendent of the Detroit Public Library; and others.

ACROSS THE BORDER

It is but forty minutes from Charlevoix across the border into old Antrim county and the county seat on the shore of the lakes of intermediate commerce, and in Frank Sears' Enger car the hills are climbed and the valleys traversed, while enthusiastic rules in the tonneau and paens of rapturous praise are sung as nature's panorama unfolds its beauties to your view.

On some of the hills on both sides of this ancient border line there are glimpses of rural beauty that even New England cannot excel. We sputter along the road, on either side of which the neat farm houses, big barns, broad plowed fields and green hillside pastures merge into memory's picture of the log houses and the corduroy highway of a half century ago.

It is Marion and Banks that shake hands with each other across the line. If it is Sunday, as it was with us, you pass country church yards, about which automobiles and more unpretentious farm equipages cluster. On the green sward, in the shade of the spreading maples, the neatly dressed children await the Sunday School hour. Pastoral happiness and well earned prosperity are everywhere evident.

The grange halls and school houses, primary evidence of progress, abound. Interesting, well built, cement-surfaced roads that your eye can trace on either side, into regions that charm and seem to beckon you from your chosen path. Clear, cool springs tempt you to alight, rippling brooks are crossed or paralleled, and then a shimmering lake appears as you round the bend.

If you return as the day wanes into gray of sunset, you see the long cows gathered for the evening milking; you see activity in the hillside dairy, and, perhaps, through the open door, you catch a glimpse of the table spread for the evening meal.

You return to your own domicil refreshed, invigorated, the better natured for what you have seen, your soul attuned to that of nature.

Your day has been well spent.

Robbing Your Own Pay Envelope

—The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.

—"I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.

—When the pinch of want comes the lesson of thrift comes too late. Time down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.

—Young man—young woman, are you robbing your pay envelope for pleasure and pastimes which in later years will deprive you of the comforts and necessities of life?

—Take $1.00 from your pay envelope to-a week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every payday thereafter.

A Righteous Work

THAT the local "Clean Up and Paint Up" campaign offers the local Business Organization a very definite and practical opportunity to lead in civic advancement is most convincingly proven by the experience of recent years. Chambers of Commerce, Boards of Trade, Commerce Clubs, Business Men's Leagues and all similar business associations have assumed the leadership of local campaigns in constantly increasing numbers. In hundredfolds of cities and towns last year the entire direction of the campaign was vested in a commercial club committee. And in many of these organizations the practical results were so worth while that the "Clean Up and Paint Up" committee has been made a permanent standing committee to assume interest in and give direction to the movement for homes and towns beautiful the year round. The campaign as a frank alliance of altruism and good business has a most pertinent appeal to representative business men united together to boost for the entire community.

TO RID CHILD OF WORMS

Don't scold the fretful, nervous child. Often its due to worms. Get rid of these by giving one-half to one lozenge Kickapoo Worm Killer, a laxative worm candy. Give only plain nourishing food, lots of out-door exercise and put to bed early. Watch stools and continue giving Kickapoo Worm Lozenges, they will positively remove the worms. See at Druggists.

Chronic Grouch.

"The subject under discussion was why some women and the like, "I said contrary to being a firm believer in quiet seven," remarked a successful tradesman. "For instance, there are just seven letters in the word obscene." "Yes, and in failure, too," growled the irritable pessimist.—Exchange.

TESTIMONY FROM CAPT. CAMPBELL'S FORMER HOME PAPER

The Whitehall *Forum* re-prints the Sentinel's obituary of the late Capt. P. D. Campbell, and adds:—

"The Forum agrees with the foregoing sketch of the character of the late Mr. Campbell for when "Pete" was engineer of the steamer J. H. Pauly, plying between Whitehall and Pentwater, he was never known to lay a lump of coal on the deck of the vessel under his rule and so became wise to his joking propensity. Mr. Campbell had to be watched all the time but was always good-natured whether the joke fell upon him or not.

"He was a good friend to the young men of this vicinity, assisting many of them in procuring their licenses as engineers and officers. True-blue and generous as he was known to us, his friendship was ever valued. Though he will no more personally be seen among us, his jocose and bluff disposition will ever be remembered by a host of admiring friends in this vicinity. The sympathy of Whitehall friends goes out to the bereaved family."

MOTHER!

Gov. Ferris has issued a proclamation designating Sunday, May 14, Mothers' day and urging those away from home to write mother a letter and those at home give her flowers and add a kiss.

Mother!

The most precious word in any language. The tenderness, the love, the joy and the sorrow that pulsates the human heart is held within the meaning of that sacred word—

Mother!

While mother lives her every heartbeat is for those to whom she has given birth, and her death extinguishes the light that illuminates their pathway. All the sweetness of the home centers in that word of words—

Mother!

When clouds gather and storms break upon you; when, in your weakness, you fall by the wayside; when friends fail you, it is *Mother* to whom you go for solace, and it is *Mother* whose abounding love and charity renews your soul's aspirations and your courage.

We are glad our good grey governor has given us another day in which to assert the sentiment of our better natures.

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by RAY WALTERS

COPYRIGHT, BY DODD, MEAD AND COMPANY

SYNOPSIS.

—11—

Adela of Dally's million dollar camp throws a scrapper to the camp. Walter Sandry introduces himself as Jim Hopper, and says he was the Bellingworth lumber co. Sandry and Adela go to the dance with the camp and the work starts into full of the Frenchmen. He discovers that Sandry has been in the Klondike and Alaska and Dally's offer of a similar position in Canada but he refuses. Poppy Ordway is disappointed in Sandry. Sandy's mother visits Dally's office to the East Bell Sandry's sister and Sandy's father. Sandy's father is paralyzed. The President gives the fight to Sandy and he goes to Ottawa. Sandy's mother visits Adela and tells Sandy that Adela is a good girl. Sandy's father dies. Poppy goes to Sandy in secret of his father's illness. Sandy's mother visits Adela and tells her that Sandy's father wants money. Adela gives to her friends the money for Sandy's father. Sandy's mother tells Adela that she was proud of Sandy the combination, she says Sandy was a good boy, but he was wild and needed his wife. Sandy's father dies. Sandy's mother visits Adela and tells Sandy that taking care of Sandy's father. Sandy's mother tells Adela that Sandy's father died in a drunken brawl in a dog house. Sandy's mother tells Adela that Sandy's father was her husband. Sandy's mother tells Adela that Sandy's father was her husband. Sandy's mother tells Adela that Sandy's father was her husband

"DAVID HARUM" AT MAJESTIC

WILLIAM H. CRANE IN HIS FOREMOST CHARACTERIZATION IN MOTION PICTURES

More than any other contemporary drama, "David Harum" abounds in the sentiments and homely principles associated with rural life in America. Presenting a type of rural business man with whom nearly all are familiar as its central character, the drama weaves about him and his life a romance as sweet and tender as a child's dreamie.

"David Harum" is a character that will live in dramatic history as long as honesty and truth continue to be virtues, for these qualities dominate the subject. The story progresses from its inception to its denouement with a rare charm, and discloses one of the greatest character developments ever presented in a work of the drama.

William H. Crane is admirably supported by a big cast of broadway favorites, including Kate Meeks and Guy Nichols and the popular Harold Lockwood and Hal Clarendon. The atmospheric adherance of the film subject to the original drama makes the photo adaptation impressively realistic. The scenes on the farm, in Harum's house, in the horse market, and the other environments of the play provide a colorful setting for the story. But above every other factor in the absorbing production towers the superb personal achievement of the star. This feature will be shown at the Majestic May 16.

In South America.

"Pedro, you're two hours late for dinner." "Yes, Chiquita. But the revolution today wasn't called till 2:30 and the score was 6 to 0 up to the eleventh battle, and I just had to stay and see who won."

Common Council

Council Chambers, May 8th.

The Common Council for the City of Charlevoix met on the above date, Mayor Rose presiding.

Aldermen present: See, Paddock, Cartier and Hiller.

Absent: Gelken and Benton.

Minutes of the meeting of May 1st and May 2nd were read and approved.

Entered: Aldermen Gelken.

Moved by Alderman Paddock and seconded by Alderman Hiller that the petition as presented by J. A. Timmer for a cement sidewalk on Nicholls St. abutting on lot 12 blk. 4 Dixon's Addition to the City of Charlevoix be granted. Motion carried.

Moved by Alderman Cartier and seconded by Alderman Paddock that the matter of the amount charged for thawing out the water pipe at Robt. Mitchell property be referred to the Electric Light and Water Committee for investigation. Motion carried.

The Mayor's appointment of M. J. Bonner as member of Board of Health for three year term was confirmed by the following aye and nay vote: Ayes, See, Paddock, Cartier, Hiller, Gelken. Nays none.

Moved by Alderman Paddock and seconded by Alderman See that F. A. Wilkinson be allowed to construct a sidewalk along the east side of lot on Burns street 4 feet 9 inches in width at the south end and 5 feet 1 inch in width at the north end, the east line of said walk to conform to and be an extension of the east line of the sidewalk on east side of said street. Motion carried.

Moved by Alderman Paddock and seconded by Alderman Cartier that Martha J. Ayers be notified to construct a cement sidewalk on Hurlbut Avenue along the south line of lots 78 and 79 Upright and Hurlbut Addition to the City of Charlevoix. Motion carried.

Moved by Alderman See and seconded by Alderman Hiller that the communication as presented by Henry Richardi be referred to Electric Light and Water committee to report at next meeting. Motion carried.

Moved by Alderman Gelken and seconded by Alderman See that the Purchasing Committee and Supt. of Water Works be instructed to purchase necessary water pipe. Motion carried by following aye and nay vote: Ayes, See, Paddock, Cartier, Hiller and Gelken. Nays, none.

Mayor referred the question of licenses of circuses to committee of Commerce, Charter and Ordinance.

There being no further business the council adjourned.

CHARLES H. EMREY,

KNEW HOW TO HANDLE MULES

Drivers in the Civil War Had Their Own Methods, and They Were Eminently Successful.

The wagons were generally drawn by four mules driven by negroes, who rode the nigh wheeler and managed the team by a jerk line to the nigh leader. In these days it may seem like a shiftless way to drive a team, but it worked well, and possibly because the darkies and the mules, through some medium or other, understood each other perfectly; at any rate the drivers talked to their teams as if they comprehended every word said to them. And comprehend it was with! Listening to, when the roads were bad and some of the wagons stuck in them were stuck in the mud, "Caline" (Carolina the nigh leader), giving her an awakening jerk of the line, "stop dreamin' with dem years of yours, Jeremiah (Jeremiah, the off-wheeler), "you'll think the inses is bitch you if you don't put dem doublehs agin dat collah." "Dah! (Dauhl), the wheeler he is only giving him a sharp dig in the ribs with his boot heels, the road getting heavier every minute. "Jo Collins, you old bankrupt sinnah! "Member, Mrs. N'nias' (Mrs. Annaias, or leader), coaxing for her left hip with the tip of his black snake, "if dis yere wagon stick in dat hole dis yere wagon, you'll wish your down in dat grave longside dat lie's hasbeed o' yours." And, on reaching the worst place in the road, yelling "Yep! Yah! Yah!" loud enough to be heard all way from Washington to Baltimore, every prophet and lady mule in the team knew what to expect if the wagon stuck, and generally the faithful creatures pulled it through.—Morris Bishop, in the Atlantic.

MAY DRAW HEAT FROM EARTH

Scientists Have Seriously Proposed Deep Borings by Means of Which It Can Be Obtained.

As we go downward into the earth we find a steady increase of temperature. So marked is this increase that it has been seriously proposed to make very deep borings in order to obtain supplies of warm water for heating our towns.

Arago and Walferdin suggested this method for supplying warmth to the Marais des Plantes in Paris; and now that such important improvements have been made in carrying borings to enormous depths the time may not be distant when we shall draw extensively upon these supplies of "submarine" heat.

The city of Budapest is extensively supplied with hot water from an underground source. It may be well to remember that in the event of our coal supply failing we have these inexhaustible supplies of heat everywhere beneath our feet.

Invitation to Enter.

"The latch string hanes out," signifies hospitality and is a standing invitation for a person to visit. In early times Indiana pioneers lived in log cabins built of round logs, notched near the ends, to make them fit closely together. Openings for doors and windows were made by sawing out holes after the logs were laid. The doors were of puncheons or rough slabs fastened together with wooden pins. Nails were expensive and little used. The door latch was a wooden catch or kind of trigger which, when the door was closed, fell into a little groove and could be opened from the outside by pulling a string, one end of which was fastened to the latch and the other, passing through a hole in the door above the latch, hung outside, so the latch could be raised by pulling the string. To lock the door the string was pulled inside. Hence the expression, "the latch string hangs outside," meant an invitation to come in.

How Habits Affect Sleep.

Habits play an important part in our daily life-habits, for instance, of drumming, tapping the foot, sniffing, pulling the whisker, "pushing the face," pulling out the watch every few minutes and scratching to relieve an itch.

The latter, say nerve specialists, is among those most difficult to conquer. If we can restrain the desire to scratch every time we feel an itching sensation we shall have made a distinct advance in control of our nerves, and we will find that in a short time the itching itself will lessen.

Science has lately discovered that if a person masters these habits, which tend to nervous breakdown, he will acquire the power of whatever position he assumes, and will fall himself falling asleep in a quarter of the accustomed time. He will feel more energetic the next day and perform his work better.

Agnostic Squelched.

Rev. Dr. A. C. Dixon, the American preacher filling Spurgeon's famous pulpit in London's Metropolitan tabernacle, quoted Spurgeon, in his part of that new symposium book, "What Happens After Death" in this happy fashion. Spurgeon was quoting an English pastor who had preached on the immortality of the soul, and who was approached by one of his parishioners who told him that he did not believe in such teaching. "There is no difference," this parishioner said, "between the man and the dog." "Well," replied the preacher, "I really thought that I was furnishing food for people who had souls; if I had known that there was a dog among them I would have brought bones for him."

Uncle Eben.

"A man dat honestly loves peace," said Uncle Eben, "is liable to git mighty irritated and hostile when he finds his peacefulness constantly interfered with."

Elusive Scissors.

A colored ribbon tied to scissors will give many minutes that are otherwise spent in looking for them. A piece of ribbon is pretty nearly sure to show where the scissors are hid, hidden under papers or sewing.

SNOW HITS FORESTS

Heavy Fall During Winter Causes Big Damage.

Logging and Milling Operations Hampered, Resulting in Decrease of Timber Sale Receipts—Not Without Beneficial Side.

Washington.—According to forest service officials, the unusually heavy snowfall which has signalized the past winter in most of the West has materially affected national forest business. Timber sale receipts have decreased in some regions because logging and milling operations have been hampered by deep snow and exceptionally cold weather. The same factors have given stockmen using the national forest range much concern, although as yet there have been no severe live stock losses reported. The foresight of the stockmen in providing winter feed, which is now generally practiced, makes a recurrence of the former immense losses very unlikely. The damages caused by the snow and resulting slides and floods to forest service trails, telephone lines and other permanent improvements are as yet unknown, but undoubtedly are heavier than usual and their repairs will make much spring work for the rangers.

Most of the railroads in crossing the mountains of the Northwest run for considerable distances through the national forests. Reports from the forest officers show that some of the roads have had a strenuous struggle with the snow to keep the lines open. The great rotaries have had hard work to plow through the heavy drifts. Snowslides have swept down the steep slopes, filling the cuts, burying the tracks to a great depth, and not only blocking all traffic but in several cases destroying bridges and property. These slides usually occur on slopes where fire has destroyed the timber, leaving nothing to hold the snow in place, according to the forestry officials, who assert that a thrifty stand of timber on the mountain sides is the best possible safeguard against these destructive avalanches.

The deep snow is not without its beneficial side, say the forest officers. It will lie long on the slopes and ridges, keeping the ground moist until late in the spring, and thus greatly reducing the danger of early fires which sometimes occur with serious consequences. A spring fire usually destroys little timber, either green or dead, but sweeps rapidly over stump land and old burns, feeding on the dead vegetation of the preceding year, its menace to property and life is remote settlements has been demonstrated. By keeping the ground moist until it is covered with green vegetation through which fire will not run, the great snowdrifts become active agents in preventing spring fires.

SEA WATER A DISINFECTANT

British Treat Brine With Electricity With Good Results in Hospital Ship.

London.—The disinfection of the hospital ship Aquitania by means of the electrolysis of sea water is a fact of considerable local importance, inasmuch as the possibilities of manufacturing a strong disinfectant from sea water was a discovery made in the bacteriological department of the Liverpool university.

It was during a series of experiments in the electric treatment of milk that Frederick C. Lewis, assistant lecturer in bacteriological methods in the University of Liverpool, developed the idea of producing a strong antiseptic from sea water. This, according to the Liverpool Courier, was two years ago. Since then all the disinfection and cleansing of cultures and slides in the bacteriological and pathological laboratories at the university have been done by an electric chemical apparatus which insures a powerful disinfectant from salt water.

GREAT TREES IN DANGER

Student Says He Has Discovered Rust That is Ruining Big Trees.

Seattle, Wash.—A graduate botanical student of the University of Washington reports discovering peridermium galeanosum, a fir rust attacking the giant firs in the Cascades and the foothills of the Olympics.

This is the first appearance of the rust west of the Mississippi. The rust attacks the needles of seedlings, denudes the trees and causes their death.

The university botanists are seeking to prevent introduction into the Northwest, through eastern nursery stock, of the pine blister rust, which is causing great damage in New England, Pennsylvania, New York and Ontario. The disease reached the eastern states in nursery stock from Europe.

Cruel and Inhuman.

New York.—Declaring that her husband's "cruel and inhuman" treatment caused her to lose 14 pounds, Mrs. Morris W. Henry has applied for a separation.

Girls Study Scrubbing.

Winsted, Conn.—Girl students at the Gilbert high school have will be taught scrubbing, washing and ironing. Twelve enameled washtubs have been installed.

MAN THE WOMAN WANTED

Five Who Were All Right Returned Because she Wished to Hire a Negro.

Indianapolis.—W. C. De Miller, federal labor commissioner in Indianapolis, has decided that he has reached the point where patience ceases to be a virtue. Recently, among his many daily requests for laborers, he received a request from a woman who lives on a farm near Greenwood. It outlined qualifications as follows:

"I want a man who neither smokes, drinks, chews nor swears. A widower, if possible, who has had experience, and I do not care if he has one or two children. He must not be afraid of work and must have good health and must have clean habits. Please send me ten or fifteen men of this character and I will select the one I want."

De Miller eventually found five men who were willing to make the trip and take their chances of obtaining the position, but when the five men returned to the labor commissioner's office that same evening De Miller was somewhat surprised to hear them explain that none of them could meet with the woman's requirements.

"And why?" demanded De Miller.

"Because she wants a colored man," was the unanimous reply.

ROYALTY NURSES WOUNDED

Nearly all members of the Austrian royal family are engaged in charitable work connected with the relief of those afflicted in some way by the war. The photograph shows the Archduchess Maria Theresa at work in one of the Austrian hospitals.

BORN A SLAVE, DIES RICH

Johnson Left a Large Farm and His Personal Property to His Children.

Stockton, Kan.—The will of the late Sanford Johnson has been filed for probate. According to this document he left 640 acres of Rooks county land, free from incumbrance, besides personal property to the sum of $7,600.

Born in bondage, freed by the Emancipation Proclamation and with no educational opportunities, Johnson succeeded in accumulating property far in excess of that of many of his white neighbors and associates. He came to Rooks county in the early eighties and homesteaded the quarter section on which he died.

He reared six children, giving all a common-school education. He has always been considered one of the industrial and upright farmers in his community. His property was divided between his children.

HIS HUMP AN OPIUM CACHE

Detroit "Hunchback" Arrested With Can of Drug, is Accused of Smuggling.

Detroit, Mich.—It was learned that James R. Reynolds, well known in Detroit for the last ten years and supposed to be a hunchback, is not deformed at all. When arrested here recently Reynolds had a can of opium in his hump.

According to the police, Reynolds made frequent visits to Canada. There he bought opium, placed it in his hump, for which a tailor had generously provided by extra cloth and padding, and brought the drug to Detroit.

From here the opium was shipped to New York, Boston, Chicago and San Francisco. A woman known as the "$10,000 beauty," who was recently arrested in Detroit and ordered out of town, is said by the police to have been an accomplice.

Skate Bible to Get Drink.

La Crosse, Wis.—"Barrio" Ross wanted a drink but didn't have the price, so he offered to trade a Bible for a glass of whisky. The deal did not go through because the bartender had been arrested. It was found that the Bible had been stolen from the city mission.

Drowned in Beer.

Dahlonega, Ga.—While trying to dip some beer from a well which had been filled with the liquid by revenue officers, following a raid on a "wild cat" still, Homer and Jack Wehunt and Charles Garr's fill into the well and were drowned.

AVOID SPRING COLDS

Sudden changes, high winds, shifting seasons cause colds and grippe, and these spring colds are annoying and dangerous and are likely to turn into a chronic summer cough. In such cases take a treatment of Dr. King's New Discovery, a pleasant Native Tar Syrup. It soothes the cough, checks the cold and helps break up an attack of grippe. Its already prepared, no mixing or boiling. Just ask your druggist for a bottle of Dr. King's New Discovery. Tested and tried for over 40 years.

Northern Michigan

The Y. M. C. A. camp on Torch Lake will open June 27. The dates for this year are June 27-July 6, high school conference camp; July 7-August 17, regular camp for boys from 12 to 16; August 21-31, state rural leadership conference camp.

Boyne Citizen: The bids for street paving were opened by the council last evening and all found to be higher than the estimates. The lowest was that of Marsman & Green, Grand Rapids, for $1.49 per rod. Other bids were from Clark & Rogers, East Jordan, and Lee Howland, Caro. The committee, after figuring some time in conjunction with local men, decided the city could save money by doing the work by the day. The present plan is to construct with Lee Howland for the cement surface and curb and gutter work will be decided by the council at their next meeting. Many are opposed to doing the work by the day and considerable discussion will doubtless come before the councilmen when they meet.

REMEMBERED HIS DEAD CHUM

Stricken Soldier Tries to Promise He Had Made, Though Himself Close to the End.

Mrs. Guy Lord, of Lincoln, Neb., tells a soldier story. Mrs. Lord, who has interested her greatly in relief work for soldiers, received a letter from her son, who is in the hospital. The superintendent told her that Mr. Lord's son was doing. An operation had been performed on him and it had not been successful.

"He is very anxious to see you," said the superintendent.

"Does he know about his condition?"

"No; we have not told him."

Mrs. Lord went at once to the soldier's bedside, and found him weak, but perfectly conscious.

"I am glad you have come," he said. "I want to ask if you will write a letter for me. There was a comrade of mine shot down at Santiago, and before he died he made me promise that I would send a message to his mother. I've got her address here." He drew a paper from his shirt. "I have wanted that I was well enough to write, but now I am getting on slowly and I'd rather you did it. You see, I know what mothers—how anxious they get. I'll write to her myself when I'm better."

Then he dictated the message, speaking the words with difficulty, and there was about it the last words he spoke. He died that night.—Cleveland Moffett, in Leslie's Weekly.

Antagonism That Helps.

He that wrestles with us strengthens our nerves and sharpens our skill. Our antagonist is our helper.—Burke.

Cheap and big can Baking Powders do not save you money. Calumet does—It's Dearer and far superior to most milk and soda.

OUR PUBLIC FORUM

Frank Trumbull
ON UNIFICATION OF RAILROAD JURISDICTION.

There is no more perplexing problem in government today than the proper regulation of railroads, and no one more capable of discussing the subject than those who finance and manage railroad properties, for experience is the foundation of understanding and practical wisdom the stepping stone to success.

Frank Trumbull, Chairman of the Railroad Executive Advisory Committee on Federal Relations, when asked for his views on the effect of regulation upon railroad investments, said in part:

"The desirability of regulation is, of course, admitted. Whether the regulation the railroads have had is a successful one is a fair subject for discussion. One thing is certain—there is at present practically no appetite for fresh investment in railroads; that is for new construction or large improvements.

"Now that an efficient banking system has been established by the Federal government, a solution of the railway problem, fair alike to investors and to the interest of the public, is first in importance among our national domestic questions. The interdependence of railway owners and employees and of the shipping and traveling public has been demonstrated so often that I do not attempt here to prove it over again.

"Are railroad managers entirely to blame? Suppose you are attempting to administer a railroad in an honest and straightforward way. Most railroads are so managed; there have been some exceptions, just as there have been wicked banks. Suppose you put the best engineers, the top of the barbered and other people who have made sharp horse trades. Put in other affiliations mentioned, does anyone expect the State to penalize the banking business as a whole or the apple business or the raising of horses?

"The situation is much as if you had built a hotel in some good sized town, say, twenty or thirty years ago. Probably very few, if any, of the bedrooms were provided with bathrooms. Perhaps the furniture consisted of a bed, a bureau, a washstand and two or three chairs. Suppose that after investing your money in that way the State passed a law stipulating that the price per room should not be over two dollars per day. Suppose after that the State passed other laws requiring a certain number of bath rooms, additional furnishings, fire escapes, screens on all the windows, sanitary appliances, etc. Perhaps these requirements are reasonable and in the public interest, but where would you get the money for new and better hotels under such restrictions of profits? I have said that the situation of the railroads is much like that, but the hotel investment is simplicity itself as compared with investing in a railroad."

FOOLED THE BUNKO STEERER

Texan Was Altogether Too Wide-awake to "Fall" for Any Such Barefaced Trickery.

One evening while Colonel Richie's recipient was stationed at the fashionable and crowded Grand Hotel, a dressed Texan walked into a hotel office, says a New Orleans paper, and, squaring himself at a table, began the task of composing a letter. It was evident that the Texan was not at his ease. He chewed the epistle. Then he fished out a black wallet, unwound a strap a yard long, and extracted a $5 bill, which he carefully folded up with the sheet.

By that time the performance had excited the sympathetic interest of several bystanders, and one of them pointed out the mail box in the corner. "Just put your letter in there, my friend," he said. "Hey!" exclaimed the Texan, glancing up. "I said to drop your letter in that box," repeated the other. The big immune bent upon him a look of unutterable scorn. "Well, I've heard tell of all kinds of city bunko games," he said slowly, "but that's the darndest barefaced one of the bull lot! Don't you say nothing, now, or I'll have to smash y'. Say, mister!" he called to the clerk, "kin you tell me where the postmaster keeps his shop?" He was given the proper directions, and returned beaming.

"Say," he asked one of the bright staff confidentially, "do I look jest as green as all that—like I'd bite at such a game?" He was assured that he looked like a thoroughbred, and went away happy. "Hope to die if I ever give any more tips to a Texan," was the comment of the gentleman who pointed out the box.

NO RAISE FOR LEVINSKY

Goldstein Was Able to Prove With Cold Figures That His Employes Did Not Deserve It.

Levinsky worked for Goldstein at $15 a week for a year or so. Then one day he plucked up courage and asked Mr. Goldstein for a raise.

Goldstein said: "Vy do you vish a raise for? Vat do you do vit your time?"

Says Levinsky: "For you I vork eight hours. I sleep eight hours and I play around for eight hours."

"Den," says Goldstein, "I show to you vy you do not deserve any raise. Look! There is 365 days in the year. Yah? You say yourself you sleep for eight hours a day. Dat is von tird of the year, so we take it away, 122 days, and dere is left 243. Den we vill take away the time you play around, vich is another 122 days, and ve half 121 days. Now you don't had to work Sundays, so ve vill take away 52, vich leds us ok."

By this time Levinsky was thinking hard.

"Also," says Goldstein, "you hat off Saturday afternoon, vich is 26 more days, leaffes 45. Also for lunch dry day you jose so much time, say for the year 14 days, vich leads only 29. Now for all those sheenty holidays in the year, vich are 28 in all, ve must deduct it, vich leads only one day—that is for Yom Kippur, so you see, Levinsky, the matter is you do not vork for me enuff that I should raise you even a little."—Coal Age.

Her Punishment.

He—Does your father object to my staying so late?

She—No! He says it serves me right for being in when you call.

The Price of Efficiency.

Mrs. Outlaw—You are so late Outlaw—My dear, wash up ready to come home at twelve, but couldn't think of an excuse till three.

Making Paper From Grass.

The department of agriculture is experimenting with wire grass as a source of supply for pulp in making paper. It is reported that the resultant paper has proved thoroughly satisfactory, but that more bleaching powder must be used than in the case of poplar stock.

JAIL IS BETTER THAN HOME

Kruse Paid to Stay There Rather Than Live With His Relatives.

Chicago, Ill.—August Kruse, who for five years has been a voluntary inmate of the Du Page county jail at Wheaton, Ill., rather than live with relatives who doubted his sanity, told the sheriff he was going West to live on a farm.

Kruse paid the county $1 a day for the privilege of living in the jail. In 1906 a petition to have him declared insane was heard in the county court. He was found to be sane, but would not return to his home, and after five years' absence returned to Wheaton and arranged for quarters in the same jail to which he had been taken years before.

"I want to get back to the farm," said Kruse. "I sit here and think of what I used to do, and I'm going to begin over again. I'm going away off though, not back to the old farm."

MADE ORPHAN BY SUICIDE

Horvi Savich, little Serbian boy, who was made an orphan when his mother committed suicide at sea, because of the death of her husband, killed in the war. The picture was taken on the arrival of the boy at New York recently.

FOR RENT—I have purchased an up-to-date electric floor surfacing machine, which I will rent out by day or hour. Apply to ED. SEAMAN, Charlevoix, Michigan.

Law's "Reasonable Doubt."

Ordinarily everybody knows what "reasonable doubt" means, and what the law means when it says that the prisoner cannot be convicted if the jury has a reasonable doubt of his innocence. But when the judge gives a dozen instructions on reasonable doubt it is clear that nobody could understand what is meant.

St. Augustine, when questioned about a doctrine of the church, said: "If you ask me, I don't know; but if you don't ask me, I know very well."

The result is, in any important case, that the confused jury goes out to find a verdict, taking with them an armful of instructions. Melville Davisson Post writes in Saturday Evening Post. Half of these instructions will tell them that if they believe certain things they must find the prisoner guilty and the other half will tell them that if they believe other things they must acquit the prisoner, and sometimes the instructions will be so drawn that upon the statement of the same beliefs one instruction tells them to acquit the prisoner and the other tells them to convict him. So they do not know what to do, and probably toss up a penny on the verdict.

MOTHER'S DAY TO BE OBSERVED IN MANY TOWNS AND CITIES OF COUNTRY

Public Exercises to Be Held in Churches and Sunday Schools on the Second Sunday in May—Loyalty and Devotion of the Mother to Be Given Fitting Public Recognition—Observance of Mother's Day Originated by Miss Jarvis.

By ANNA BLAND.

Washington.—The second Sunday in May will be observed as mother's day in most cities and many towns throughout the United States, and, in honor of American mothers, both living and dead, public exercises will be held in churches and Sunday schools.

Since the day of Miss Jarvis' inspiration many thousands of letters were first invested there have been written beautiful tributes to the sacred love of the mother, and this tenderest of all earthly ties has been extolled in exquisite verse and prose by world famous poets as well as the humblest bards of every land and every clime. Many of the sacrosanct rites of ancient Egypt, which scientists have recently unearthed, contained tablets, or other records, which were inscribed with praises for the motherly virtues of the women of those houses of those olden days; and those tombs were built long before the time of Christ. But not until recently, however, was the loyalty and devotion of the mother given public recognition by a special observance held in her honor.

Mother's flower—do you know what it is? The spicy, snow-white carnation. It was chosen by the originator of mother's day as the emblem of mother love.

Originated by Miss Jarvis.

"But my own mother's flower," some may say, "was the pink or "the lilac" or "the rose." That may be true, for mothers have a way of loving best these dear, old-fashioned blossoms; but Miss Jarvis, who originated the observance of mothers day, no doubt had in mind these differences of taste when she chose as an emblem for the occasion the white carnation for, surely, this beautiful, fragrant flower combines every lovely quality of all the flowers ever loved by mothers the wide world over! It symbolizes purity, sweetness and endurance—and are not these the qualities of a mother's love?

Miss Anna Jarvis, who first thought of inaugurating a special day dedicated to honor the mothers of the land, is a Philadelphia woman, one who has long been identified with philanthropic movements of her home state. It was while honoring the memory of her own beloved parent from whom she had long been parted by death, that she conceived the idea of setting aside one day every year for the purpose of paying tribute to the mothers of America.

There is an old custom observed in England, on the 17th of March, whose purpose is to honor the mother of the land, which is called "mothering Sunday. On this day some special act of love or kindness is performed. In olden times the day was made a glad home-coming occasion, and gifts were carried to the mothers, and heart-to-heart talks indulged in around the mother-log fires by parents, sons and daughters. "Mothering" Sunday may, or may not have been Miss Jarvis' inspiration when inaugurating our own mother's day; the customs, however, embody the same beautiful sentiments. As soon as Miss Jarvis made known her plan she received letters from interested people from all parts of the country, inquiring for particulars. It was only a short time before mother's day was being observed in some form, in nearly every state in the union.

Association Takes Up Work.

In the beginning all the expense of the movement was borne by the originator, but soon the work became too heavy to be carried on or financed by an individual. The Mother's Day International association was formed with Miss Jarvis as president, the object being to promote the observance and forward the work of mother's day in every land.

A resolution passed the United States house of representatives and senate in May, 1913, commending the observance by the president, his cabinet and other heads of government departments. The honorary vice presidents of the association are the governors of the states.

The legislatures of a number of states have passed bills for the observance of the day.

It seems a pity that mother's day does not occur during all home week or home-coming week, as it is called in some localities where an annual pilgrimage is made to the old home by the wanderers from the home fold. One naturally thinks of the silver haired mother as being the center of those glad gathering of the clans. It is "mother" who first greets the lost sheep and welcomes him home, with tears of joy; and it is her brave smile and words of cheer that speed him on his way when good-bye must be said. One day set aside in special reverence of mother, in the season of home-coming, would seem particularly appropriate, whether she be still in the old home or is quietly sleeping where the goldenrod nods in the little burying ground on the hill.

History teems with inspiring incidents illustrating the wonderful sacrifice of mother love. The records of the Mayflower show that of the eighty wives and mothers confined in the ship's cabin, fourteen died within a few months after the landing at Plymouth. Surely it was by no mere chance of fortune that not a single daughter and only three sons of those first voyagers were taken! We may know for a certainty that it was the self-sacrifice of these loyal mothers that spared the lives of the children and husbands.

Mother Sticks to the End.

A warden of a large penitentiary was recently heard to say that in cases of "lifetermers," or those serving long sentences, he found, that, although the wife would often cease her visits after a time, the mothers in fair weather or foul, was never known to desert the prisoner and visited faithfully until the end.

The most vicious criminal melts in the glow of the mother love he bore him. She has never been known to forsake the grim, hardened man in prison garb, for, no matter how crimson his sins, how steeped in crime his soul may be, he is still a little boy to be petted and loved and cherished as in the days when his gather held nestled upon her bosom.

"When the world shall despise and forsake you; when it leaves you by the roadside to die, unnoticed the dear old mother will gather you in her feeble arms and carry you home and tell you of all your virtues until you almost forget that your soul is disfigured by vices—that you do too much for one whose love is so boundless, so beautiful and pure; that if the mothers day finds our loved ones no longer with us, we can find no fitter tribute to her blessed memory than in the performance of some thoughtful act in behalf of the mother of someone else.

GERMAN CROWN PRINCE

This is the latest picture of the crown prince of Germany with his only daughter, Alexandrine Irene, born April 7, 1915.

RECAPTURE FLOWER MARKET

French Horticulturists now Raise Lilies Germans Used to Ship to France.

Paris.—The lily of the valley, first flower of the year and emblem of good fortune, will soon make its appearance on the corsage of the midinette, whence, says the Figaro, there is every likelihood that it will find its way to the coat lapel of the soldier on leave from the front.

This year the lilies of the valley found in France will be truly French. Hitherto—excepting last year, which was one of eclipse—they came from Germany, where the horticulturists grew them in profusion or forcing them according to the condition of the Paris market. French horticulture has neglected this flower almost entirely until the death in 1915 showed them how easily they could capture the market for themselves.

WAR HERO KNIFE GRINDER

Paris Dismembered Soldiers are Already Finding their way into minor occupations—the "petits metiers." The Figaro notes the presence in the streets of one-armed knife grinders, one of whom, it says, was seen wearing the war cross. He did a thriving business in the Rue de la Paix, where it seemed as if all the dressmakers had suddenly decided to have their scissors sharpened.

For centuries it has been French custom for an itinerant grinder to give some souvenir to his customers. This modern "remoulageur" gave a copy of the "Marseillaise."

Limbergers Change Name.

Hackensack, N. J.—Declaring that people held their noses when they were introduced, Edward and John Limberger, brothers, have asked the courts to change their name to Reyers.

Fate of Annie Laurie.

The familiar song of "Annie Laurie" says the London Chronicle, was written by a soldier in Flanders to his ladye-love at home. The writer was William Douglas, and Annie Laurie was one of the three daughters of Sir Robert Laurie of Maxwelton, doubtless. Annie did not marry her soldier lover, who say that Douglas was killed in Flanders, but whether or not that is so Annie was led to the altar in 1709 by James Fergusson of Craigdarroch.

REQUIRE REST FROM LABOR

Men Make Mistake When They Keep Their "Noses Too Close to the Grindstone."

"Keeping one's nose close to the grindstone" is a popular phrase which describes what a great many people think is the most efficient way of accomplishing any given task. According to this idea, the most work can be done in the quickest time by keeping overlastingly at it with just as few interruptions as possible.

Science now believes that it's all a mistake to keep one's nose too close to the grindstone. Careful studies made in a large number of manufacturing establishments led to the conclusion that the most work is done with the least risk of accident only when a man gives his mind and body frequent opportunities for rest.

Records kept in English factories where men are engaged in soldering tins show the amount of work done during each hour of the day to be as follows:

In the morning—first hour, 114 tins; second hour, 147; third hour, 159; fourth hour, 157; fifth hour, 136.

In the afternoon—first hour, 119; second hour, 146; third hour, 153; fourth hour, 155.

These tables agree with those of other factories in giving a higher output for the second hour than for the first hour due to the facility which comes with practice.

But the chief point which they drive home, when studied in connection with the number of accidents is that after the second hour of continuous effort, both morning and afternoon, there is a common and marked decrease in the output and a corresponding increase in the frequency of accidents. The factory owner who wants to get the most out of his employees will break up their work day by frequent periods of rest.

In this investigation it was impossible to record the cumulative effects of failures from day to day, and from week to week, but there was evidence that the physiological products of fatigue cannot be got rid of in a working day. This means a growing predisposition to disease and to the form of mental excitement which results in social unrest.

From Bad to Worse.

Henry Guy Carleton, wit, journalist and playwright, stuttered and was not sensitive about it.

When the Fifth avenue theater burned Mr. Carleton appeared in a newspaper office where he was then employed. The usual Saturday night confusion was greatly increased by the fire. The office was bedlam. Ballard Smith, managing editor of the paper, was bellowing his orders with all his wonderful vigor in the effort to get the press on time.

"Mac-mister Smith," began Mr. Carleton, "I've a p-p-ragmat-m-atic idea about the Fifth Avenue theater f-f-fire."

"Great heavens, man!" roared Smith. "Don't stop to talk to me about it. Don't you know this is Saturday night, and we go to press in 15 ten-minutes! Get to work and write it, and write as fast as you know how. I want copy, not conversation. Don't you know every minute is precious?"

"Yy-yes, sir," said the other, with an insistent effort to hold the editor's attention, "but I've-want to k-know if you w-w-would lent me your s-s-t-t-cographer."—Everybody's Magazine.

Not Much as Boys.

When parents get discouraged over the lack of study and the frequent concentricities that their boys manifest or even over their physical misfortunes or poverty, they ought to find hope and consolation in the thought that Isaac Watts was constantly scolded for his absolute indifference to books and boys' sports; Charles Darwin showed such an eccentric tendency to absentmindedness that on one of his lonely tramps he walked off the embankment, and nearly lost his life; Ralph Waldo Emerson was a hopeless dreamer; the great Dumas threw was a fearful stammerer; Abraham Lincoln, Elihu Burritt, Charles Dickens and Andrew Carnegie were the poorest of poor children; Anthony Trollope, the prince, was hopelessly gawky and the butt of his school; Audubon of bird fame was put down by all the elders as a fool; Caesar and Napoleon were epileptics; Oliver Goldsmith was a hopeless slovenly, and Thoreau was adjudged by everyone to be a crank. The queer boy does not always grow to be a man of no worth.—Selected.

Dostoevski's Answer.

In the doctrine that each is responsible for all, that suffering is a purifying discipline, and may be vicarious as well as personal, and that through such a discipline man may find God, is the answer of Dostoevski, the Russian novelist, to the riddle of the ages.

"The wants as put into the lips of Father Zossima may be taken as uniting on his message to mankind: "Brothers, have no fear of men's sin. Love a man even in his sin, for that is the semblance of divine love, and is the highest love on earth.

"Loving humility is marvelously strong, the strongest of all things, and there is nothing else like it."

To Break in New Pipes.

An electric carbonizer for inserting in the bowls of new briar pipes and so charring the inside that the smoker will be saved the trouble of breaking in his new pipe, is described by the Scientific American.

After Cleaning With Gasoline.

Put about one-third part vinegar in the water with which you dampen the cloth when pressing an article cleaned with gasoline. This will remove the scent of the gasoline and will prevent circles forming.

Lines to Be Remembered.

It is a fair, even-handed, noble adjustment of things that while there is infection in disease, and sorrow, there is nothing in the world so irresistibly contagious as laughter and good humor.—Dickens.

KILLED SEEKING TO ESCAPE

How General Morgan, Famous Confederate Raider, Ended His Long Series of Forays.

In December, 1862, Longstreet, who had been conducting an active campaign in Tennessee, returned into Virginia, leaving the noted guerrilla, Colonel John H. Morgan, to carry on the struggle in East Tennessee. December 31 there was a fight between General Shipp and Morgan—the latter having an army of about 4,000—near New Market, in which Morgan was defeated. In another fight January 16, 1864, Morgan made the attack and Shipp was driven back to Strawberry Plains. Morgan lingered in East Tennessee until May, and late in the month, with a small band of men, he went over the mountains and rabbled through eastern Kentucky, plundering the wealthy districts as he went through. He captured several small towns, dashed into Lexington, turning the railway station and other property there, and hurried on to Frankfort. But General Burbridge was in pursuit, and came up with Morgan's men near Cynthiana, and in the fight which followed, Morgan lost 200 in killed and wounded, 400 prisoners, and 1,000 horses captured. Morgan now retreated into East Tennessee. In September he had his forces concentrated, and Morgan himself and his staff were at the house of a Mrs. Williams. General Gillem, with a strong force, surrounded the house, and Morgan was killed while trying to escape. His body was sent through the lines by a flag of truce, and was buried with imposing ceremonies at Abingdon, Va.

DREAD THE "SNEAK CURRENT"

Electricians in Constant Fear of Happening Which Means Immediate and Fearful Disaster.

One of the most dreaded risks in the use of electricity for power purposes is the "sneak current," which may be compared to a leakage in a water pipe. Only it is far more dangerous, because you can smell escaping gas, whereas you cannot smell "sneak current." One of the earliest warnings of the existence of this new kind of hidden peril occurred at the Corliss works of the Manchester (Eng.) corporation on September 19th, 1896. In the engine room of the power house at the time no fewer than fourteen engines, each of the horse power, were working at full pressure. By some unexplained means a weak current reached and fused the copper rivets which held together the two ends of a leakage belt connecting one of them engines with a dynamo. The result was that the belt parted, the released flywheel started revolving with terrific speed, and presently flew to pieces. These, hurtling in all directions, wrecked other flywheels, and in a few seconds the splendid power house, with all its costly and beautiful machinery, was utterly destroyed.

Knew Extremes of Fortune.

Few careers have covered wider extremes of fortune than did that of John of Cappadocia. He was a Roman officer of very high rank under Emperor Justinian, in the sixth century. He was a very able man, and under his direction the finances of the government flourished wonderfully. Incidentally he amassed a great fortune for himself. But he was very corrupt, and the revenues were raised "on the deaths of thousands, the poverty of millions, the ruins of cities, and the desolation of provinces." He lived most extravagantly, and indulged in all sorts of wicked practices. But his life of sensational profligacy was suddenly changed into one of abject poverty. Though guilty of many crimes, he was accused of one of which he seems to have been innocent, and was condemned to be scourged like the lowest of criminals. Nothing of his vast fortune was left him but one old ragged cloak, and it is said that for seven years he begged bread in the streets of cities that once had treated at his name.

Uses of Poverty.

Poverty has spurred to splendid achievement many a youth who, reared in luxury and endowed with a fortune, would have accomplished nothing. Too man who has made some costly sacrifice for love or duty's sake, or opposed a determined front to afflictions concerning which the only choice was as to the spirit in which they should be met and borne, is often happier than another whose restrictions imposed no hardships, or who has never been called upon to battle with adversity. The woman whose presence in a sick room is a better tonic than any which the physician prescribes, whom little children love, and to whom young girls go with their perplexities, is frequently the one who years ago buried all personal ambition in the grave of husband or child, wrestled with her sorrow, conquered it, and learned thereafter to live in the joy of other lives.

How About Your Manners.

Manners are of the head and the heart. Perfect manners can be only of both, because occasions there may be in social life when the heart is not a sufficient guide.

A clever person with little or no heart may be better mannered, as a rule, if he takes pains than a good natured person with little or no head; but when he fails, as he is prone sooner to fall some time, his selfishness or ignorance, betraying him, he falls with a thud.

Lye as a Cleanser.

Polverized lye can be bought in cans with perforated tops. It is so useful in the household that no housekeeper can afford to be without it. If put into the sink, it keeps the drain clean, the lye uniting with grease and making a soap. It is invaluable for removing grease and stains from pots, pans and kettles, and especially the garbage pail, which should by all means be kept clean. A long-handled dish mop should be kept on hand to be used when cleaning with lye, as it is exceedingly injurious to the hands.

EXTENDS CORN AREA

New Discovery Pushes Belt Much Farther North.

Experimenters at Minnesota University Stumble Upon Way to Make Grain Germinate More Quickly With Nitrobenzene.

Minneapolis, Minn.—Scientists at the farm of the University of Minnesota have announced a discovery which may result not only in vastly increasing the corn production of Minnesota and other states but in extending the northern limit of the corn belt much nearer Hudson bay.

The announcement comes at a time when seed corn shortage is reported to be particularly acute. Bank and railroad officials of the Twin Cities are trying to help farmers get seed and prices are said to be as high as $6 a bushel, with prospects of going up to $8 or $10 by planting time.

If future tests sustain present indications of experiments carried on at the university, every bushel of corn planted may be made to send up more sprouts and these sprouts may grow so fast that several weeks may be gained in the maturing of the ripe kernel.

The discovery, believe they have found, quite by accident, a commercially practicable method of increasing both the germination efficiency and the germination rate of seed corn. It came about in experimenting with various insecticides to be used in treating grains.

Prof. William Moore of the entomology department and Prof. H. K. Hayes of the agronomy department have been working on fumigation processes for killing grain parasites. It was important that germination qualities of grain treated should not be impaired in the process, so they regularly checked plantings of the treated grain against plantings of the untreated.

It was in connection with the use of nitrobenzene that they bumped into the unexpected. They found that not only was the grain not impaired for seed purposes, but that it actually was bettered. Corn seemed to thrive on the fumes of nitrobenzene. Not only was the percentage of germination increased by treatment, but the rate of germination also was speeded up.

The experiments checked and rechecked, again and again, with the same results. An experiment with 1911 corn, for instance, brought out that the treated seeds sprouted nearly two weeks before the untreated, when planted at the same time, and of the former about 18 per cent more kernels germinated than of the latter.

"We are not saying that the treatment will so result with all corn," Professor Moore said, "as our experiments have not gone far enough to justify so sweeping a statement, but we expect to wind up the most significant test of all on the subject next week, after which we shall have something to announce.

"Nitrobenzene is an oil, a coal tar derivative. Its price has been raised somewhat by war causes, but it is commercially obtainable. We fumigate the corn by placing it in a closed box in which is suspended a cloth saturated with the oil. The fumes do the work.

"We think well enough of present indications to make known our findings at this time, so that farmers who are facing a critical seed corn situation may try out the process if they see fit.

"Why does the treatment so affect the corn? We haven't the slightest idea. We only know that it has had that effect with corn we have treated."

Religious Notes

Congregational Church

Public Worship at 10:30 a. m., and 7:30 p. m.
Sunday School at 12 m.
Christian Endeavor Meeting 6:30 p. m.

A. T. ADDINTON
Sunday School at 11:00
Preaching at 2:30 p. m. standard time.

The New Minister.....Mr. L. D'Otge
Prof. Toothache.....Jas. Leonhauts
Cassonda Pie Plant.....Fay Malyea
Hezekiah Sharp.....Quinton Walker Jr.
Dr. Hoonick.....Arthur Edwards
Ralphy Bunter.....Earl Shipton
Seth Perkins.....Leslie Shapton
Daisy Lovejoy.....Mildred Eckinger
Obdela Hardup.....Jessie Mayforce
Petunia Pimples.....Hazel Richardson
Uncle Alec.....S. Beers
Augusta Wind.....Cora Driggett
Mrs. DeLancy.....Mrs. O. D. Hammond
Henrietta.....Frances Richardson

In addition to the above named characters there will be the members of the Ladies Aid Society, The Old Maid's Club, Sewing Circle, etc.

BIG P. M. WASHOUT

During the terrific rain storm Tuesday night two washouts occurred on the P. M. railroad just south of Petoskey.

One washout was 60 feet long and 30 feet deep, another, also south of Petoskey, was one mile long. Several washouts have occurred in the same place before.

"No!—
I Said
Calumet!"

"I want what I ask for—I know what it would mean to go home without it. Mother won't take chances—she's sure of Calumet's quality, wholesomeness, tasty biskuits—of positive, uniform results. Calumet Baking Powder is economical, too."

CALUMET Baking Powder

Highest Quality
Leavening Power
Absolutely Pure
Calumet Baking Powder
Delicious Biscuit
Cheap and big can Baking Powders do not save you money. Calumet does—it is Purest and far superior as sour milk and soda.

Barnard Doings.

Mr. Clyde Smith and family were the guests of Albert Smith at Norwood Sunday.

Mr. and Mrs. Ben Bennett spent last Sunday in Boyne City at the home of Stewart Bennett.

Mr. Wm. Shapton left Saturday for Flint to spend a few day with his brother Thomas, who has been ill for some time.

Mrs. Archie Brown and son have returned from a short visit at Norwood and left Monday for Detroit.

Miss Ethel Shapton is spending a few weeks in Flint at the Thomas Shapton home.

Mothers' Day will be observed May 21st with appropriate exercises. Rev. Quinton Walker will make the address of the day.

The I. T. Class "hiked" over the hills to the home of Floyd Black Tuesday evening, where they spent a most pleasant evening. Very dainty and delicious refreshments were served by the hostess. Arrangments were made at the business meeting to buy new lamps for the church, and give $5.00 for the church painting fund.

May 16th is the day appointed for a general clean up for the church and premises. A dinner will be served at noon, the women are invited to bring the proper paraphernalia and present arses—the fight is on.

The warm spring days are a temptation to many to pass by the little "church in the dell." We must reach the mark again, come one, come every body and a hearty welcome is all. "What kind of a Sunday School would there be if every member were just like me?"

The rain storm kept many from attending the Ladies' Aid meeting at the home of Mrs. A. Bolduis. Those who braved the storm report a good meeting and most excellent dinner.

Ada Walker, Joe Rotlema, Malcolm Lewis and Maragurite Smith will attend the State eighth grade examination at Charlevoix Thursday and Friday.

Mr. and Mrs. Edmund Shapton motored to Boyne City Sunday.

John Zylstra's baby has been very sick for several days.

Miss May Spaude, of Charlevoix, spent Sunday in Barnard.

The Grange received into full membership on Wednesday of last week Mr. and Mrs. Ben Bennett, Mrs. Clyde Smith and Will Ager. After the business meeting a supper was served and social hour enjoyed.

The Reformed church of Barnard will have an pastor for the summer months a student from the Holland Theological Seminary, Robert Kroodsma. He will make his home with John Zylstra.

Miss Charlotte Hull, of Charlevoix, was a visitor at the James Willis home Sunday.

Board of Education

May 2, 1916.

Regular meeting of the Board was called to order by President Hampton.

Members present, Hampton, Glasford, Hiller and Nordrum.

Absent, Bridge.

The treasurer's report shows a balance on hand of $5072.03.

The following bills were presented and read:

General Fund Orders

121 Abbott's Powers, repairs	12.75
122 A. E. Mason, supplies	2.35
123 H. R. Fowler, supplies	1.29
124 Wm. Schultz, supplies	2.00
125 A. W. Gamble, supplies	2.25
126 Frank Lenosky, supplies	1.50
127 Dr. H. L. Sweet, supplies	2.00
128 Dr. H. L. Sweet, supplies	2.00
129 H. H. Wood, county normal trip	2.00
130 Mrs. Ella Sharpe, county normal trip	2.00
131 Dr. Young & Son, insurance	15.00
132 Frank Lenosky, supplies	1.50
133 Mrs. Hazel Ingersoll, Board and rooms	3.50

Library Fund

134 A. C. Methven Co., books	2.50
135 Van Ruren, freight and drag	1.50
136 A. D. Velte, fertilizer	1.00
137 Frank Lenosky, supplies	1.50
138 Leslie Rice, janitor	20.00
139 Mich. State Tel Co., Rentals and calls	7.45

Teachers' Fund

140 O. Nordrum, teacher pay roll	85.00

Moved and supported that the bills as read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

These minutes were read and approved and on motion the board adjourned.

E. J. HILLER, Sec'y.

County Normal Notes

The Elson Art Exhibit held in the high school assembly room last week was well attended. Each day a short program was given by the grades and the high school orators added much to the entertainment. The normal class served punch and waffers in the high school assembly hall Friday afternoon.

Miss Whiting has been giving the class work with raffia and reeds.

The vegetables that were planted in the hot bed are up and looking well.

Two bird houses were made by one of the sixth grade boys in the training room last week and the normal class and training room put them in trees on the school premises. The houses are being watched with the hope that wrens will build there.

Henry Richardson and Catherine Lundquist attended school with School Commissioner, Mary L. Stewart, Monday morning. It was considered in view of standardization which will be a help to the class in preparing their commencement program.

Equal Suffrage Notes

JENNIE M. HIMES, Publicity Chairman Charlevoix County Equal Suffrage Association.

Votes for women have brought to Colorado the most prosperous era in its history, so says Governor Carlson. The votes of women helped to make Colorado dry.

The Massachusetts Legislature which does not believe in burdening women with the ballot does believe that her strength otherwise is unlimited. It has just refused to adopt the 48 hour bill for women but has extended the provisions of the bill to include thousands of men not formerly included, such as men employes of the county and state.

The men of Saskatchewan are much pleased with themselves for having granted the ballot to women. Commissioner Yorath recently congratulated the women upon the victory and said that already men were admitting that their former objections were due largely to the fact that they had never seriously considered the justice of the question.

Miss Margaret Wilson, daughter of the President, appeared before a committee of Congress to urge the use of school buildings in the District of Columbia as community centers for the discussion of public affairs. Congressman Focht of Pennsylvania objected: "But the people of the District of Columbia have no vote. Why should they discuss politics and say such things?" Miss Wilson retorted with a smile: "I had supposed that congress cared a little something about the people of the District of Columbia whether they voted or not." If not, does Congress care anything about women?

$ DAY SPECIALS

SATURDAY, MAY 20th.

We are offering May 20 only for cash, the following goods. Don't wait until the day is nearly gone to do your trading but come early and you can be waited on and make your selections. Try us, we will try to please you.

SAVE A DOLLAR: with every purchase of a raincoat we will give FREE any $1.00 umbrella.

A. E. MASON, Charlevoix, Michigan.

School Commissioner's Column

May L. Stewart, Commissioner

Mr. Coffey, the state standard school inspector, arrived Monday, May 8th. He came at the invitation of several school boards of the county to meet with them right at the school house and study with them their own local problems. Mr. Coffey is a former commissioner of years of experience and a specialist in rural schools. The list of schools visited will be published next week.

Three Eells attendance record the past year—best in the county. Out of 29 pupils enrolled 19 received diplomas of honor for being neither absent or tardy throughout the entire year. Up to the present writing this is more than three times want any other school has yet gained. There were during the first four months 24 neither absent or tardy and 20 during the spring term. If any school can beat this send in your record post haste.

Rock Elm placed a halo about the 2nd day of May by holding a Mother's Day. There was a good attendance, a fine program, a photographer much delicious home-made candy and thereby problems profitably discussed. "You should have seen the "winding of the Maypole."

Afton has decided on 12 new seats and a new floor. For some time Afton has been getting in line for something better than they have.

Wilson Athletic Meet was Wednesday the third. Afton won.

Social at Walker school on May 10th. This was a special legal enthusiastic, social gathering.

At present just half of the rural teachers are subscribing for "Modern Tor Topics."

Eveline Athletic meet at Walker school the fifth. One good way to celebrate Arbor and Bird Day.

Clean Up Day May 10th. Are you cleaning up?

Oblidah was pushing at a mighty big job—Saddest time I have seen over and Oblidah went with it. When the scores for was surprised to see by his footprints that he was the first inches in advance of his first position.

Friday, the fifth was a big day Picnic at Horton's Bay. Athletic Meet in Walker school; a surprise on Mr. Pensley by the patrons of the school and school board presenting him with a much deserved memento for his services during the past year, and a picnic at the Chaddock school. If the blue bird knows of more celebrations on this glad day, he should send in the glad tidings. The commissioner was so sorry that the examinations kept her from participating in these festivities. She appreciates the kind invitations received even though she was present only in spirit.

It's a long way to the new standard, It's a long way to go,
It's a long way to the new standard,
To the the finest school I know.
Good-bye narrow school house,
Good-bye pinched pence,
It's a long, long way to the new standard that my heart proclaims.

Norwood News

Roberta Ferguson and Bernice Bush of Charlevoix, walked to Norwood last Saturday, returning Sunday.

Mr. and Mrs. Ben Pearl spent the week-end visiting relatives in Charlevoix.

A number of the young people attended the movies at Atwood Friday evening.

Mrs. Wm. Richardson and daughter Marjorie are visiting at the home of Amos Richardson.

Wm. Superneau and children visited at the Block farm, in Barnard, last week.

Norwood people did not forget to set out trees and place bird houses on Arbor and Bird Day.

Mr. and Mrs. Holcebeck were called to Charlevoix Saturday by the serious illness of Mrs. Holcebeck's sister.

Raymond Stafford has recovered from the serious accident he received last Monday.

Miss Omsteed and Miss Frances Todd, of Charlevoix, were visited with relatives and friends in Norwood.

George Block, of Charlevoix, was in Norwood Sunday.

Dr. Beuker, of Ellsworth, was in Norwood Saturday evening to attend the Guard drill.

MEMORIAL SERVICES

The Test

By MAY RIDPATH

(Copyright, ... A. by W. G. Chapman.)

"Gentlemen," spoke Robert Dale, arising at the table where his male guests had just finished their cigars after the ladies had retired from the room, "I am about to announce that this is the last social function where we may meet under present pleasant conditions. I am going to give up the house tomorrow and remove to more humble quarters."

There was a dead silence. There was not a person in view who had not for several days past heard rumors of a great money loss for the supposedly wealthy owner of the splendid mansion that now harbored them. Could it be possible that there was a tangible foundation to these current rumors. The interested group soon knew, for Mr. Dale continued:

"I will remove tomorrow into the more humble and appropriate gardener's house. You will all be welcome to our more modest quarters, just as you have been here."

Then, the blank consternation at an error, he looked about them in the direction of the drawing-rooms.

"Missed!"

I heard he was speculating in war bride."

"Too bad for the expectations of that amiable son-of-his, Vance Dale!"

These and more remarks began to go the rounds of the guests. Many left early. Some neighbored, even to acknowledge the compliment of their invitation. And when they were all departed Mr. Dale walked over to his stalwart, handsome son and clasped his hand.

"I Shall Always Be Your Friend."

his hand, as though there was some understood bargain between them, and Wrath said and even cuckoled with judicious solemnity.

And now, young man, to shoulder the sadly fallen as a soul for a living!" he said.

The broken was sent the next morning as Vance Dale, wearing a hickory shirt and leaning an over his sturdy shoulder, started "to work." Mr. Dale owned a pasture lot, at one end covered by a thicket of trees. These were to be sacrificed for their value as fuel.

Shades were raised, curtains were drawn aside, doors were opened a crack. Finally Wardens Dale stared and marveled. The fastidious, cultured, luxury-reared Vance was compelled to work like a common laborer! The Dales had become poor! They were no longer the society leaders of the place! The cold shoulder of the world was voted.

There were three houses that Dale passed which were of persons intent to him. Since he had come back from college he had been attracted by three young ladies of the town. His father encouraged him in preparing the way to choose a wife. Janice Willard was the most graceful, or rather majestic, young lady in the place. She had seemed to aim the ideal of womanhood. As he neared her home Vance saw her coming down the street. She noticed him, paused and quickly retreated to the house.

"A cut—a snub!" rather bitterly muttered Vance. "All right—father said she was a fair-weather friend.

His face grew brighter as he looked towards the home of Kitty Darling. She was a sweet, kittenish piece of humanity. She came bounding out in the rustic gate, piquant and eager. His heart warmed towards her.

"Oh, dear me!" she cried, as he prattled, "I have cried half the night over the great misfortune of your poverty that has come to you. But I shall always be your friend, for it was you who introduced me to dear Alack Wayne, and we became engaged last night."

"Um!" uttered gravelled Dale, as he went his way. "I don't seem to have impressed ladies as I thought. As to Helena Wayne," and he glanced at the great above piece of Vanderbilt, "of course I am clear out of her set now."

The Waynes, as he knew, were out of town, where their fortune was made. Dale dessert in the social scale of course they would join the selfish time-serving majority. Vance felt pretty bitter as he thought of all his little of charmers. He had aspired most to stately, but warm-hearted, Helena.

"I must put her out of my mind," he ruminated, "although he thought of her in a solace."

The peerless Helena floated in imagery before him all that day. It was a strenuous one. He came home at night with blistered hands and aching and strained muscles, but, oh, how he ate and slept! He will arise as he learned early next morning that the Waynes had returned. Its heart gave a great bound as at cutting time that afternoon he threw aside his ax. His hands were a sight, raw and bruised a log had rolled over his foot and he was quite lame! But, he, he gained the road as automobile whizzed up. Helena Wayne was driving the machine.

"For you!" she cried in happy, almost jolly tones, pounding the idle unroomy cushioned rear seat. "Shall I betray my real interest in a good friend and confess that I drove out in the hopes of giving you a lift, for I have heard terrible stories of your martyrdom," and she glanced pitying ly at the scratched, swollen hands.

He wondered, as she drove to the post office, if she was not just showing the people of the town that she was not a bit ashamed of acquaintance ship with a man wearing a hickory shirt and earning his bread by the sweat of his brow.

The removal from the big house to the little one had been effected. It was wonderful how accommodatingly the harmonious three accepted the vast change in their fortunes." Mrs. Dale smiled quietly, her husband went about chuckling serenely to himself, Vance called cheerfully and quite comfortable.

And, lo and behold! just as duck set in Helena, who had so accommodatingly and proudly driven Vance home, appeared with her father. Evidently the interested maiden had convinced Mr. Wayne of the frightful condition of the hands of the novice axman, and her father, at one time a doctor, had brought a lotion that would give the sufferer ease.

"They're true blue," observed Mrs. Dale, after the Waynes had gone, and a great glow of comfort settled down in the heart of the longing Vance.

It diffused still more intensely as the second day after that, Miss Wayne appeared at the old pasture lot armed with seed and other garden.

"I want to make a sketch of the old timber you devastate in the land scape," she explained to Vance, and he found for her a comfortable shaded spot and did little else during the day this morning.

There was a gloomy day or two for the woodchopper. Then sunshine and happiness came back in the form of Miss Wayne appeared, intent on another sketch. She had brought her lunch. He, as well, in spite of himself, put them together and Vance was on the verge of delirious bliss.

Miss Janice Willard heard of the "romance on" in at the nature lot and sniffed disdainfully. As she had Vance Little Kitty Darling clapped her hands when a smart letter, in the mail, came current that Helena and Vance were engaged.

Then one day the gossips were amazed to observe that the Dales were moving back into the old house, and Helena stared broadly as Vance, dressed of attention his wonderful duties, appeared at her home with a new eight-cylinder car.

"Why," she said wonderingly, "Your work and the charming log cabin we are to build—"

"All fetched!" cried Vance. "Father insisted on a test, and you're the one who said it, you dear, darling, charitable, pitying—"

She stopped his enlisiems with a kiss of true love and contrite.

Bobbie's Prayers.

"Mother," yelled little Bobbie, "come on up and hear my prayers."

"Yes, dear, in a minutes," his mother answered. Then she went on painting the cards and remain the possessor of a good no-trump hand.

"Mother!" Bobbie yelled while her partner was trying to decide whether to raise the bid to three or not, "come quick and hear my prayers."

"Please be quiet," she replied. "I'll come in just a minute."

She got it for three in no-trump, and the playing proceeded.

"Mother, come and hear my prayers," Bobbie pleaded when she led the four-jack of hearts with nothing higher than the nine turned up in the dummy hand.

"Be still, can't you!" she answered. "I'm trying to think."

Her heart lead gave her opponents a chance to get in with a long line of spades, and before she could establish her diamonds she had lost six tricks.

"There it!" she exclaimed, slapping her cards down on the table, "now can you expect a person to do anything against such luck?"

Then she went upstairs and heard Bobbie's prayers

If They Told the Truth.

"I won't be home tonight, dear, I'm going to break loose and see if I can free myself of being tired of looking at you."

"Good night! Next time you ask me to such a poor dinner, put me alongside of somebody who is at least half witted."

"There is absolutely nothing the matter with you, madam, except mean laziness; but just to maintain appearances and give myself an excuse to call again, I'll write out a couple of prescriptions and charge you five dollars."

"I can't begin to tell you how little I enjoyed your voice; I don't think I ever heard a worse one."

"Darling, life without you would not be worth living—say, for about a couple of years."—Life.

Cost of Gunfire.

The type of shell which is fired from the great German howitzer costs $150 to produce. The shrapnel and field guns are loaded with shells which each cost over $10 to produce. The German 54 inch exploding guns demand a shell which costs $200, and the heaviest fortress cannon fire a projectile valued at $1,500.

The cost of the gunfire in the royal navy is very heavy; and a single discharge from a 13inch gun costs at least $4,000. A battleship therefore means that $7,500 worth of ammunition has gone. In a sea fight, if the large guns on a dreadnaught only fire ten shots each, and the smaller weapons one hundred, the cost of the ammunition for one battleship during the engagement is $800,000.—Tit-Bits.

Not So Warm.

"My dear Miss Witt," said young De Sapps, "youah weaplendent beauty sets the world on fire, doubtless, doubtless."

"Oh, well," replied Miss Witt, "don't let a little thing like that worry you. The conflagration will be too insignificant to require the services of the fire department."

"I Shall Always Be Your Friend."

Millinery for Motor Wear

In millinery for motor wear the season provides hats, bonnets and caps, leaving it to the wearer to assemble the ensemble which she will come for choosing among them. Among the bonnets, the bonnet, or cap, has finally triumphed, as the most sensible headwear for the motorist. And those who meet her demands have provided wonderfully attractive and well-made models of this kind.

Nearly all motor-wear millinery is made of fabrics or of a fabric combined with a millinery braid. The shaves fit the head by means of elastic cords or other devices that hold them snugly to place, and are designed with visors or brims that protect the eyes. Veils of thin chiffon, only moderately long, are important adjuncts to all sorts of headwear designed for the motorist. The bonnet of black and white checked fabric, shown in the picture, with veil of green chiffon, is a good example of the new mode. The veil is wrapped at the ends with knot and silk tassel.

Designers are also presenting hats for motor wear that are cleverly made to do duty as street hats as well. They are soft and close-fitting and made of the same materials as the bonnets, but in combinations of braids with fabrics there is more braid and less fabric than in the regulation motor bonnet. They are more trimmed and their veils are entirely separate. The tourist who does not wish to be burdened with an extra hat on a short journey finds this style convenient.

Compared to other classes of headwear the motor hat is most modest in price. No one should be indifferent, in selecting it, to the variety of shapes and colors that promise something becoming for every face.

Charm Lies in Well-Dressed Hair

Nearly all the new coiffures are in high, with the hair combed back and brought to the top of the crown and sometimes to the top of the head. In all of them the forehead and ears are at least partially covered, and fashion favors the appearance of abundance of hair carefully dressed. Large puffs help out in achieving the high hair dress, and in short curls and the touch that is in keeping with the present modes in hat dresses and neckwear.

But in spite of the prominence of the high coiffure, young women, and some older ones, refuse to abandon the more youthful style of the low hair dress. They are wise who refuse to sacrifice a single charm on the altar of fashion when it comes to choosing the manner of doing the hair. A small, shapely head, with all its pretty curves, is something to be proud of, and why should a stately coiffure crown the saucy or demure head of youth?

Whatever choice is made, the hair is to be waved and the coiffure must be speak care in its dressing and neatness in finish. One of the most attractive of these styles is shown in the picture. The hair is waved in very large waves for this coiffure and parted to a long part at one side. It sweeps across the forehead from the part and over the ears, and is rolled in a loose coil pinned close to the head above the nape of the neck. These short, full curls are pinned in at each side. This is an innovation in modern hairdressing, but it is merely a revival, along with full skirts, panniers and ruffles, of the fashions of long ago.

Women should experiment with attractive and practical arrangements of the hair. The coiffure, more than anything else, can add or subtract years in the appearance. Occasionally one sees a happy mortal to whom nature has been unusually kind. Her hair waves naturally, grows in the best possible lines about the face and neck, and presents adorable little ringlets that are more pretty than the most elaborate coiffure styles, for nature has made her independent of them. But the majority of women give themselves less concern than they should in this matter. The charm that lies in well-dressed hair is within reach of all of them. It is a matter for study, and in considering it one must consider also the style of clothes with which the coiffure is to be worn.

Julia Bottomley

Daily Thought.

Endeavor to be patient in bearing with the defects and infirmities of others, of which we ourselves are not free. Let us not be offended also that many failings which we see in others, are met with by others.—Thomas a Kempis.

Afternoon Frocks.

A hint of the directoire period is seen in afternoon frocks. The note is masculine rather than feminine, but in either event the lines of that period are so attractive that one cares not whether its masculine or feminine expression is followed. Several afternoon frocks also display an 1850 drapery at the back, almost suggesting the bustle, only that the fullness is entirely accomplished by the material alone, fold upon fold. The latter frocks are best made of silk taffeta.

The Back Fullness

is then more carefully accomplished.

Another indication of the return to past fashions is a new dolman wrap quite along original lines. Taffeta in any of the various colors is charmingly employed in the construction of the dolman. "Pinked" quilting usually borders the edges.

Market for American Pork.

The city of Copenhagen is daily consuming about 25,000 pounds of American salt pork.

THE SANDMAN TIME STORY

By Mrs. F. A. WALKER

Copyright, 1915, by Associated Newspapers.

THE ENCHANTED MOUSE.

One day the wife of a poor man caught a mouse in a wire trap. She took it to a pail of water to drown it, when, to her surprise, the mouse spoke to her.

"Good madam," it said, "I am an enchanted mouse and have to stay in some by been a prince. I hope some day to come into my own again. Give me life and you will never regret it."

"If you will promise never to take the bread and cheese in my pantry again," said the wife, "I will grant your request."

"That I will," said the mouse, "and promise to keep the outer mice away also."

So the wife opened the trap and the mouse ran into a big hole in the wall.

"What are you doing?" asked her husband, who came in at that moment.

When the wife told him what the mouse had said he was very angry. "Why did you not make a wish?" he said. "If it is an enchanted mouse he can grant anything, and we are living in this old hut and I never in all my life had enough tobacco to fill my pipe. I wish he may give me that I may have a comfortable home and a full pipe."

So the wife went to the hole and called:

"Mouse, mouse, pray come to me. I have a favor to ask of thee."

The mouse put its head out of the hole and asked: "What do you want of me?"

"I caught you in a trap," said the wife, "and let you go without wishing. My husband wishes you well. They are soft and close-fitting and made of the same materials as the bonnets, but in combinations of braids with fabrics there is more braid and less fabric than in the regulation motor bonnet. They are more trimmed and their veils are entirely separate. The tourist who does not wish to be burdened with an extra hat on a short journey finds this style convenient.

Compared to other classes of headwear the motor hat is most modest in price. No one should be indifferent, in selecting it, to the variety of shapes and colors that promise something becoming for every face.

"What Do You Want of Me?"

where she was; everything was so beautiful, but her husband came and took her by the hand and led her through the large rooms.

"Isn't this better than the small house?" he asked.

"I shall never be comfortable here," said the wife, "it is far too grand for me."

But even this did not satisfy the husband, and one day he said: "I should like to be an emperor and rule over all, go to the opera and ride a-walking down the street and me not along to make it go."

"Something Like It.

Bobby was rehearsing the patriotic lines he was to speak at the Sunday school Fourth of July celebration.

"It—it—oh, yes—it gimleted world for our great and free country."

"Gimleted? Gimleted?" Why, Bobby, he teacher interrupted. "Another word." "Augured."

"Oh, yes; augured! I knew it was something like a good drink."

Self-Help.

A couple of little boys were discussing matters personal to themselves. One of them said:

"Do you say your prayers in the morning or at night?"

"At night, of course," said the other. "Anybody can take care of himself in the daytime!"

Not the Kind She Wanted.

"I would be willing to work for you," he declared, "until my fingers dropped off."

"I haven't any doubt of that," she replied, and I like to start in a job that I can be able to do a little brain work for me."

MECHANIC CHOKES A HAMMER

Half-Hearted Artisan May Be Sized Up by Grip on Handle—Be Positive and Earnest.

You may tell a good deal about a mechanic's efforts and purposes by the way in which he handles his tools. You may size up a half-hearted artisan by the grip on his hammer handle. If he holds it in the extreme end he means business and hits the nail a substantial blow; if he grips it up near the hammer head, making you half expect the poor thing will open its iron jaws and say, why then you may be sure of a tyro and a shirker. Little things of the kind indicate clearly the manner and determination with which a boy or man tackles any job or hobby. Go to it with a grip on everything that means a positive and earnest effort.

TEACH POULTRY IN SCHOOLS

Younger Generation Kept Interested and More Efficient Poultrymen Are Brought Forth.

In every school district in Oklahoma there has been a poultry association organized through the efforts of the State Poultry association.

The association is a junior organization, largely from the central body, and poultry topics and poultry literature are distributed among the members of the juvenile organization. By this means the young people are kept more interested and more efficient poultrymen brought forth each year. This is all done to state that it far behind our Missouri valley states in production of farm poultry. This fact might work out for good results in many of our own school districts.—Twentieth Century Farmer.

WEED WATER PIPE MATERIAL

Large, Hollow, Straight Stalks of Common Cow Weed Used by Boy on West Virginia Farm.

A boy of fourteen, on a West Virginia farm, has piped water from a hillside spring to the house a hundred yards away, and the total expense was less than 50 cents. He used the large, hollow, straight stalks of common wild cow weed, over an inch in diameter and each five and six feet long, fitting the little stalks into the big one and after wrapping the latter with twine he coated the joints with hillbilly, also wrapping the centers and painting the outside with sulphur and lime. The pipes are supported on forked sticks, overhead high for a part of the distance, and the weed tube we put up under the stony ground.

CROKINOLE IS SKILLFUL GAME

Soreness of Fingers May Be Entirely Overcome by Putting Propelling Digit Against Groove.

A great many persons do not thoroughly enjoy the skillful game of crokinole for the reason that their fingers become sore after shooting. To overcome this entirely put the propelling bent finger gently against the carom, or nearly so, and there will not only be no sting to the faster it and den contact with the carom, but the direction of the shot may be far better controlled. Let the front edge of the exact center of the carom edge for absolute accuracy.

Cutting Out the Frills.

The simplest dress may be all know, most extremely demonstrated by Dr. Agnes, the prize philosopher of Greece. He lived in a barrel which he carried about with him, ate the plainest food, was clad most scantily. On his belt he carried a cup for drinking, modern hygiene notwithstanding. One day he saw a boy drink out of the palm of his hand, when Diogenes threw away his cup.

He Understood.

"I don't see why horses are afraid of automobiles," said Bob.

"Well, I do," replied his ten-year old companion. "They look like big girls a going without horses."

"What if they do? That is no reason," replied Dick.

"Now look here, Dick! You know you've got sense if you saw a girl a-walking down the street and me not along to make it go."

Stroke of Mustard.

"What is this thing you're giving me?" asked the man at the railroad restaurant, making a wry face.

"A sandwich, of course. What did you think it was?" asked the cross-looking blonde.

"I thought it was a mustard plaster."

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use For Over 30 Years.
Children Cry for Fletcher's Castoria

Co He Gets Around.

"Why do you lace so tight when Cincoma comes around?"

"Oh! the poor fellow's arm is so short."

SPEAKS UP FOR CANADA

And No Wonder—Renting His Land He Made $8.50 Per Acre.

So many Americans now have personal knowledge of Canada, that false reports concerning this country are being quickly corrected by Americans themselves who know the facts, and who are too fair-minded to let a false statement go unchallenged. A case in point arises out of a statement supposed to be made by a resident of Alberta, and published recently in the Spokesman-Review, of Spokane, in which the condition of settlers in this country was painted in a very bad way indeed. The writer of this attack on Canada refused to let his name be known, so it can be taken for what it is worth, but Mr. S. L. Wallace, of N 4722 Crestline, Spokane, who had lived for some years in Western Canada came to the defense of the country in the following letter which was published in the Spokesman-Review of February 11, 1915:—

"To the Editor of the Spokesman-Review:

"In Sunday's Spokesman-Review was a letter from a man in Alberta to the chamber of commerce, asking that something be done to keep Americans from going to Canada, and saying that that government was run by the railroads, banks and manufacturers; that once a man got there he never could get away. Had this man published his letter over his own signature there is no doubt but he could get out of Canada.

"No country will do as much to help a man to get on his feet, if he tries to help himself, as Canada. I know of the government helping people to provisions, feed, seed grain and fuel, and charging only cost of delivery to the nearest town and 6 per cent. What more could a man want?

"I lived five years in Southern Saskatchewan and assisted a patient to 320 acres of as good land as I ever saw. I have raised over 10 bushels of oats on sod, 40 bushels of wheat, and 20 of flax to the acre. Until I lost my health I never was better satisfied anywhere. I had my land rented this last year for one-third. It brought me almost $8.50 per acre, or $1,145.71 for 128 acres.

"This man says he loves the land his fathers died for. So do I, and I love the land that gave me my home.

"S. L. WALLACE."

N4722 Crestline, Spokane.—Advertisement.

The Trouble.

"Those soldiers don't look natural, do they?"

"No, it is not. The soldiers are real soldiers. Not being versed in acting, they can't look natural."

It's a poor brand of religion that doesn't cause a man to try to treat his neighbors decently.

The KITCHEN CABINET

If you rise superior to your disappointments, whatever their may be, you are adding 100 per cent to your power to conquer future difficulties.

The sure way to catch success is to catch its opportunity.

GOOD THINGS FOR THE TABLE.

When preparing cranberry sauce try this combination to be served with cranberries are out of season. Add a cupful of seeded raisins to a quart of cranberries that have been cooked and rubbed through a sieve. Cook five minutes after adding the raisins, then turn into a mold and chill.

Graham Cookies.—Take a beaten egg, add a cupful of sugar, a tablespoonful of butter, a teaspoonful of cinnamon, one cupful of sour milk, or buttermilk, one teaspoonful of soda, two cupfuls of graham flour and a cupful of chopped raisins. Drop, on a greased pan and bake in a moderate oven.

Maple Walnut Dessert. — Diamolve one package of peach or orange gelatin in half a pint of boiling water. Add a half pint (one cupful) of maple sirup and when nearly cold a cupful of walnut meats, cut rather fine. Set away to harden and serve with whipped cream.

Berlin Cabbage.—Slice red cabbage very thin; let stand an hour in cold water to crisp. Drain and put into a saucepan, using two tablespoonfuls of butter, a half teaspoonful of salt and one tablespoonful of chopped onion, a grating of nutmeg and a dash of pepper for each quart of cabbage. Cook until the cabbage is tender, about two tablespoonfuls of vinegar and one tablespoonful of sugar; cook five minutes and it is ready to serve.

Amber Marmalade.—Now is the time to prepare this delicious concoction. Cut in thin slices one grapefruit, one orange, and lemon, cover with twelve cupfuls of cold water, let stand over night. Cook until the peel is very tender, four or five hours, let stand again over night. Then add one cupfuls of sugar and cook until thick.

Success doesn't consist in never making blunders, but in never making the same one twice.

The worse a reputation the harder it is to live.

DISHES DAINTY AND DELICIOUS.

When serving a fruit cocktail of grapefruit, for example, use a French dressing combined with a mayonnaise, seasoning with paprika, tabasco sauce and celery salt and adding enough mayonnaise dressing to give the sauce a fluffy consistency.

Apple and Bermuda Onion Salad.—Cut in small dice two or three of apples and one of Bermuda onion, add a third as much of finely diced celery and a mayonnaise or any good boiled dressing. Celery may be added if liked, using the same amount of celery as of onion. This is a salad particularly well liked, served with a pork roast, or with chops.

Apple and Raisin Salad.—Pare and cut into small dice three choice apples, squeeze over them the juice of a lemon and add a cupful of raisins that have been soaked over night in orange juice, a cupful of the tender hearts of celery, cut in small pieces, season with salt and paprika and pour over a well-prepared French dressing, serve on blanched lettuce well chilled.

Plum and Cheese Salad.—Select choice ripe plums and remove the stones. Drain and dry them and cut open from the sides to the dimension and one slide, removing the stones. Chop fine a dozen pecan meats and fill the plums, rinsed in cold water and dried; heat these into a cream cheese, adding cream if more moisture is needed, a little olive oil and lemon juice, and, if desired, a suggestion of onion. Shape the cheese into balls and fill each plum with a small ball of cheese. Arrange the cheese balls and the plums in a nest of heart leaves of the lettuce and serve with French dressing.

Crab Cocktail.—Take a half cupful of mayonnaise, a third of a cupful of catchup, a third of a cupful of olives, shredded, a stalk of celery, cut fine, and a can of crab meat. Mix and chill and serve in green peppers or in cocktail glasses.

Care should be taken when serving delicately flavored fruits not to overseason the salad dressing and thus destroy the flavor of the fruit.

All fifteen cents to him who wants fifteen cents' worth of sunshine. The man who goes for what he wants Will get it all the quickest.

SEASONABLE DISHES.

Brown a cupful of well washed rice in two tablespoonfuls of butter, add a small onion cut in shreds; stir and cook until the onion is slightly browned; add two cupfuls of hot broth, half a teaspoonful of salt and a dash of paprika; cook until tender, adding more broth as it is needed. When done add two tablespoonfuls of sausage fat and two canned pimentos cut in bits. Turn out on a platter and surround with cooked pork sausage.

Calf's Liver en Casserole.—Fry five slices of fat salt pork until brown. Add to this hot fat one dozen potato balls, one dozen carrot balls, one stalk of celery, six onions sliced. Cook very slowly for ten minutes, then place in the casserole. Cut in thin slices liver and lay it on top of the vegetables. Season with salt and pepper and a pint of boiling water and a tablespoonful of kitchen bouquet. Cool one hour.

Goette.—Roll two pounds of flank beef until tender, then put it through the meat grinder. Put into the liquid left from boiling the meat one pound of cooked potatoes, then add the minutes then mix it with the meat; season with pepper and salt and put into a mold to cool. Cut in slices and serve. This is very good sliced for scrapple and is served with or without sirup.

Rice With Orange Marmalade.—Cook rice in milk and season well, then mold in a ring mold. When ready to serve fill the center of the mold with orange marmalade. This is a delicious dish for Sunday evening supper. Serve with whipped cream, sweetened and flavored with grated orange rind.

Philadelphia Scrapple.—Cook a pig's head in boiling water until the flesh slips from the bones; chop the meat fine and add to the broth in which it was cold and reheat the liquid to the boiling point, adding a teaspoonful of salt for each quart of liquid with pepper to taste, stir in carefully, stirring constantly, cornmeal, to the consistency of mush. Let it boil vigorously for a few minutes then cook more slowly for half an hour. At the last stir in the meat and turn into pans to cool. Cut in slices a half inch thick and fry brown. Serve hot for breakfast.

Among all the basic principles of economic life, none is more vital than the principle that a commodity should have a price that is should work for its owner, that it should be paid the full value of what it produces.—Scott Nearing.

MORE RICE DISHES.

In America, rice is more commonly used as a dessert than as a vegetable. The wholesome dishes in combination with other foods are legion.

Rice Czarina.—Butter a baking dish and put in a layer of boiled rice in the bottom. Over this sprinkle fine chopped fresh tomatoes, season with salt and pepper, place another layer of rice somewhat thinner, and over this spread finely chopped green peppers and so alternate the tomatoes, peppers and rice until the dish is full, having a layer of rice on top. Pour the tomatoes juice of peeled butter over all, cover and cook in a slow oven 20 minutes.

Belgian Rice Dessert.—Add a half cupful of boiled rice to a pint of hot milk and a half cupful of currants; stir in the yolks of two eggs well beaten and two tablespoonfuls of sugar. Remove from the fire, add a teaspoonful of vanilla and form into croquettes. Roll in egg and crumbs and fry a golden brown. Serve with currant jelly and roll the croquettes in powdered sugar.

Rice Creole Style.—Chop fine one onion, one sweet pepper, and cook with half a cupful of raw ham, shredded fine, in a fourth of a cupful of butter; cook ten minutes, then add a cupful of cooked rice and three cuptuls of broth, simmer 20 minutes and add four sliced tomatoes and a teaspoonful of salt. Cover and cook slowly in the oven or in a double boiler.

Nellie Maxwell

Japanese Proverbs.

Proverbs have great importance with the Japanese in their daily life, according to a writer in the Christian Register. Among four hundred adages there, with their English equivalents, are quoted: "Some insects feed upon smartweed" (tastes differ); "Accounting for tastes; "If at a burry go round" (The more haste, the less speed). "Live under your own hat; "Let well-enough alone; "Be short in the front gate to misfortune" (The tongue is a fire, a world of iniquity).

Not What He Wanted.

I had taken my little nephew to a restaurant for dinner. When the waiter put the dessert in front of him he let it be picked it up and handed it back to him, saying: "Take it away, anything to read, thank you, we want something to eat."—Chicago Tribune.

Spirit of Mischief.

"You should never be cross." "I can't help it sometimes," replied the small fry. "I use to start in to argument between father and mother as to which of them I take after."

Considerate Statesman.

"Of course you have your own ideas about what the government ought to do in a crisis." "Yes. But I'm not saying anything. While the government will have to act so promptly there won't be time to listen to all the speeches I could make on the subject."—Washington Star.

Goes Too Far.

Any man who can brush at all his troubles is too hypocritical to be a desirable acquaintance.

When Plants Do Not Thrive.

Bury a small piece of beefsteak close to the roots, or lay a piece of raw potato in the soil close to the roots of the roots. If there are worms around the roots, they will come to the meat or potato to eat, and may be easily removed.

Speaks First.

"Does your friend give much thought to his speeches?"

"I resided Senator Sorghum. "The only trouble is that he doesn't do the thinking before he makes them."

ART TREASURES IN SAFETY

Priceless Tapestries and Paintings Were Removed From Paris When the German Army Advanced.

M. Henri Marcel, French director general of national museums, has reported to the government details of the transfer to Toulouse of the art treasures of the Paris Louvre, says the St. Louis Post-Dispatch.

The occasion of the report was popular rumors that some of the most valuable paintings had been scratched or otherwise damaged.

M. Marcel states how he had opposed the government's order to remove the treasures at the time of Von Kluck's drive to within twenty miles from Paris, and how he finally consented to pack them, as will as the most famous tapestries of Reims, Chantilly and Compiegne.

Each painting was wrapped in oversized wax paper, with a layer of cotton over it back and front, special boxes were made with copper spirals holding the frames in position and protecting the magnificent sudden shocks. And finally 106 of the most valuable paintings, with an even number of less value, were taken to a special train in the Metro station; the cars were padded. Thickly; two guards were in each car. The train, says the report, carried over $200,000,000 worth of treasures.

Arrived at Toulouse, the most serious operation, that of unpacking, was successfully undertaken in the presence of the entire Louvre board, and each item was checked in after-museum examination. Not one picture suffered on the way or in packing or unpacking, and all are stored in the "museum-fort" building, which has been tested as to dryness; in fact, the most minutest surveillance, so that harm cannot come to the pictures or tapestries.

They are not now on exhibition, but only stored for safety. Mr. Marcel says that they are quite safe. He takes them back to Paris now, "as they are going to keep each turn of the wire from coming into contact with the adjacent turns, and this is done by wrapping a heavy thread between the turns (Fig. 7). Two coats of shellac will help hold the coils in place. The end blocks (H, Fig. 7) should be 1¾ inches square, with a 3-inch notch cut in each of two corners. Nail them to the ends of the cylinder as shown. The slider rods (C, Fig. 6) should be of brass, ¼ inch square and 12 inches long, and should have a hole drilled at one end to receive binding posts E (Figs. 6 and 8), and a pair of holes through which to screw the rods to blocks H. You can get the brass rods and have them drilled, at almost any machine shop. Make sliders E (Figs. 6 and 9) out of a piece of springy brass. Bend one end into a sleeve to slip over the sliderod, and round off and bend down the other end to slide over the surface of the wire coil. Scrape away the shellac in their path. Fasten a post to one end block H, and connect it to one of the wire coil to it.

"The fixed condenser (Fig. 10) is made of alternate layers of tin-foil and writing-paper.

"Cut two squares of cardboard of the size of A (Fig. 12), for the top and bottom (Fig. 11), then 21 pieces of writing-paper of the same size, for layers B, and 20 pieces of tin-foil of the size and shape of C (Fig. 13). Build up the condenser as shown in Fig. 11, with the tabs of the tin-foil layers projecting over the edge, and with alternate layers reversed. When the top cardboard has been put in place, take two pieces of insulated wire, scrape bare a length of six inches of each, and run these bared ends through the top cardboard and wrap around the tin-foil ends (Figs. 10 and 11). Then wrap the condenser first in red and then in black tape between the turns (Fig. 7). Two coats of shellac will help hold the coils in place. The end blocks (H, Fig. 7) should be 1¾ inches square, with a 3-inch notch cut in each of two corners. Nail them to the ends of the cylinder as shown. The slider rods (C, Fig. 6) should be of brass, ¼ inch square and 12 inches long, and should have a hole drilled at one end to receive binding posts E (Figs. 6 and 8), and a pair of holes through which to screw the rods to blocks H. You can get the brass rods and have them drilled, at almost any machine shop. Make sliders E (Figs. 6 and 9) out of a piece of springy brass. Bend one end into a sleeve to slip over the sliderod, and round off and bend down the other end to slide over the surface of the wire coil. Scrape away the shellac in their path. Fasten a post to one end block H, and connect it to one of the wire coil to it.

HANDICRAFT FOR BOYS AND GIRLS

By A. NEELY HALL and DOROTHY PERKINS

(Copyright, by A. Neely Hall)

A WIRELESS TELEGRAPH RECEIVING SET—PART 1.

With one or two exceptions a boy can easily construct the instruments of a "wireless" receiving set.

The detector, shown in Fig. 1, requires a wooden base, A, a pair of dry-battery binding-posts B, a piece of silicon, C, a strip of brass, D, and a piece of springy wire, E.

Bind the silicon to the base with the brass strip, D, bending this as in Fig. 1, and pinching holes to fit over the binding-posts. Bend the piece of wire E into the looped form shown in Fig. 3, secure one end to the binding-post, and cut off the other end to rest upon the piece of silicon.

The transformer (Fig. 4) requires a cylinder about 2¼ inches in diameter and 3½ inches long (A, Fig. 7). A roll like this will do and sawed off will be just right. On this cylinder a single layer of copper wire of about No. 30 gauge, not insulated, must be wound. It is necessary to keep each turn of the wire from coming into contact with the adjacent turns, and this is done by wrapping a heavy thread between the turns (Fig. 7). Two coats of shellac will help hold the coils in place. The end blocks (H, Fig. 7) should be 1¾ inches square, with a 3-inch notch cut in each of two corners. Nail them to the ends of the cylinder as shown. The slider rods (C, Fig. 6) should be of brass, ¼ inch square and 12 inches long, and should have a hole drilled at one end to receive binding posts E (Figs. 6 and 8), and a pair of holes through which to screw the rods to blocks H. You can get the brass rods and have them drilled, at almost any machine shop. Make sliders E (Figs. 6 and 9) out of a piece of springy brass. Bend one end into a sleeve to slip over the sliderod, and round off and bend down the other end to slide over the surface of the wire coil. Scrape away the shellac in their path. Fasten a post to one end block H, and connect it to one of the wire coil to it.

"The fixed condenser (Fig. 10) is made of alternate layers of tin-foil and writing-paper.

"Cut two squares of cardboard of the size of A (Fig. 12), for the top and bottom (Fig. 11), then 21 pieces of

TWO GOOD GAMES TO MAKE.

There isn't much work to the making of a checkerboard like that shown in Figs. 1 and 2.

Twelve inches and concourter square is a good measurement to use. This provides for 64 squares each one inch and one-half in size, and a margin of one-eighth inch around the outside. It is better to use cardboard than wood, because of its lightness, and if you will hinge two pieces together as in Fig. 2, the checkerboard will slip into a bookcase.

To prevent the cardboard from warping, it is necessary to paste paper upon both sides. The black or red pa-

per is best for covering the back. Paste this on first, lapping it a distance of one-half inch over the edges of the playing surface; then cover the playing surface with the lighter-colored paper of the two you have selected for the squares. When the pasted paper has dried, measure the exact width of the margins and the squares along the four edges of the playing surface, and with ruler and pencil rule lines across from side to side, from these points. This will give you the positions of the 64 squares.

DOINGS OF THE VAN LOONS — There seems to be reason for their satisfaction

DOLLAR DAY, SATURDAY, MAY 20

Saturday, May 20

Your Dollar will do extra duty at our store.

Wizard Mop, Polish and Buster
$1.00--Nearly Half Price.
The Regular Value Being $1.75.

A particularly timely and interesting value for the Housekeeper. This offer is for the one day only.

The offer includes the following:

1 75c Wizard Polish Mop, the wonderful triangle mop so widely known and treated with the famous WIZARD Polish; adjustable long handle.

1 50c bottle of Famous Wizard Polish, it gives a hard dry luster to the furniture or woodwork.

1 50c Handle Duster, chemically treated and fine for dusting all furniture and woodwork, it takes the place of the old feather dusters, it absorbs the dust; can be washed without injury.

We will have a large assortment of

ONYX
Triple Coated Enameled Ware.

Every piece warranted absolutely satisfactory for your money back. Your dollar will go further in this enameled ware sale than it has ever done before. Remember that this is a high grade triple coated ware and every piece warranted satisfactory.

$1.00 per Gallon
For a $1.25 Barn Paint.

This is a high grade structural paint made from oil and paint remnants. Suitable for barn, silo, tool house and all rough work. Its price is moderate and to use it is true economy.

This paint is manufactured by the well known paint firm of Martin-Senour Company.

It is an extra good value for the money.

AVOID ENVY AND JEALOUSY

One's Own Honest Purpose and Good Will Is the Only Source of Real Comfort.

There is nothing which so sours the face and shrivels the muscles as envy or jealousy.

You have been comparing your worldly goods with those of your neighbors?

You think he has so much more than you have and win so much less effort?

Perhaps, but you don't know about that secret sorrow which may be eating the heart out of the one who looks so prosperous in your eyes.

You do not know about the sickness in his home any more than he knows about yours, and it is safe to say that there are balances. Things even up.

Maybe he is a spendthrift and has, all his money won't help him. Then he gets the credit of being the most miserable being. As he loses the spark of life grow dimmer the thoughts of his dishonest deals will drive all others from his mind. The anguish which he will undergo will torment him to the very last, and fruitlessly he will plead for life prolonged, for he fears the river side.

The power which comes from honest purpose and good will to fellowmen—from unselfishness, not envy and hatred—is the only thing which can bring real comfort in the sunset of life.—Chicago Examiner.

Defended by Human Wall.

According to legend, the ancient castle of Hapsburg, overlooking the Rhine, was founded in 1020, and was without surrounding walls for defensive purposes—a strange omission in those warlike days. A friend, coming to stay at the castle, so greatly deplored the absence of the usual defenses that its lord declared that, before sunrise on the following morning, his stronghold would be surrounded by impregnable walls. Naturally the visitor smiled and did not believe that this thing could come to pass; but, in the early morning, he was awakened by the lord of the castle, who bade him look out upon the walls. He had kept his promise, but in an unexpected way. Instead of seeing a surrounding wall made of stone, the visitor saw an unbroken circle of the lord's followers, all in their armor and bearing weapons. And it has since been the boast of the Hapsburgs that the family's devoted subjects were sufficient defense in no matter what emergency.

Scant Praise for Verdi's Music.

An English critic said of Rigoletto when it reached London in 1853: "There is little offensive music in Rigoletto; the ears are seldom stunned than in most of the composer's other works and there is, we believe, less precious in the writing. Nevertheless Verdi's sins are scattered in every scene. Poverty of ideas, an normal effort at grandeur, never accomplished—strange and odd phrases, lack of coloring, and a perpetual swagger in the dramatic effects, are unmistakably true Verdi. Yet there are airs melodious if you will—as Rigoletto, which are sure to find favor with the barrel organs."

Destroying Bad Eggs.

Millions of bad eggs are seized every year in London, and the way they are destroyed is to tip them out of their cases and run a steam roller over them.

Insolence.

Insolence is pride when her mask is pulled off.

Long-Lost Found.

"Ah yes, so he is housecleaning," said Mrs. Snow White. "Yes," replied Mrs. Marsh Green, "she is mighty lak' now in' things round onto in a while. Why, I does come across a pair of slippers under de bed dat I hadn't seen for five years."—Dallas News.

Seasoned Wood.

The effect of seasoning wood is to bring into the same space 10 per cent more fibers than when the wood was green.

RHEUMATIC PAIN STOPPED

The drawing of muscles, the soreness, stiffness and agonizing pain of rheumatism quickly yield to Sloans Liniment. It stimulates circulation to the painful part. Just apply as directed to the sore spots. In a short time the pain gives way to a tingling sensation of comfort and warmth. Here's proof—"I have had wonderful relief since I used your liniment on my knee. To think one application gave me relief. Sorry I haven't space to tell you the history. Thanking you for what your remedy has done for me."—James S. Ferguson, Philadelphia. Sloans Liniment kills pain. 25c at your druggist.

Had Old Gentleman Guessing.

Bobby (trying to get away)—Say, pa, want a quarter. Didn't you tell the sisters last night that I couldn't be sent for nickels?" Father—That's just what I did, you young rascal." Bobby—"Well, then, what do you mean by beating me now?"—Boston Transcript.

Evidently an Untruth.

"That man accuses you of being the greatest grafter on earth." "Yes," replied Senator Sorghum. "But he doesn't mean it. If he believed it was the greatest grafter on earth he would fight with me in every occasion, trying to get next and make himself useful."

CHARLEVOIX SENTINEL.

VOLUME 47 — Charlevoix, Michigan, Thursday, May 18, 1916. — NUMBER 5

Thrift Campaign 1916.

This movement has been planned in every community in our nation. You will see it advertised in the newspapers; the schools, the factory, store and office; the moving picture houses and elsewhere. The plan adjusts itself automatically to large and small cities, counties and agricultural communities.

Many people do not always figure on how much they can save but more often figure far in advance how they can spend their income. The active season in our city is rapidly approaching and the money-making time is coming. We desire to regenerate a great number of New Savings Accounts and see the regeneration of countless numbers already opened.

You are urged to participate. If you have not been Saving with any degree of regularity, start in now. $1.00 will open an account in our Savings Department and you can add to it weekly or as often as convenient.

4% Interest paid on all Savings Deposits.

County Normal Notes

Florence Maddaugh was absent Wednesday morning on account of illness.

Miss Carrie Gelkon visited the normal room Tuesday afternoon. She gave the class a most interesting talk explaining her work in the hospital training school also some of her latter work.

Thursday and Friday the class had the opportunity of doing some profitable observation work, as the eighth grade county examinations were given in the normal room.

Sadie Donlevy was absent Monday morning on account of sickness.

Last Monday evening the normal class went out to the Walker school and attended a meeting of that district which was for the purpose of scoring the school for a standard plate.

The new set of practice teachers began their work last Monday morning. Catherine La Londe and Rena Carroll have charge of the third grade, Sadie Donlevy the chart class, and Mary Hoice the sixth grade history.

Ruth Chelsie and Rena Carroll spent the week end at their respective homes in Ellsworth and Central Lake.

WHITE CARNATIONS
(For Mother's Day)

Written for The Sentinel

Your rosy fragrance from the land
Where poplars round the realm of the rose
Incense our song and empty our hand
To pluck and place on our memory vase.

In other land a lonely clime
Ill sheltered sun-kissed patient brave
Hung green, delight of children's time
Fair pretty petals, kind nature's resumptions.

In strife and color, for long hours
Of nearly sunshine, shadow-self
For drenched showering summer showers
We know you then the cruelty of fate.

But soft land land, gentler's caress,
Lovelight that must from expository blue
Clouded by mists of figure dress
Ah! fell to drop—infer home a—the dew.

Come to us now, after long years
Sweet as this flower's child-spiritual beauty,
And children's mother's memory-tears
A mother's love, that knows no death!

Chicago May 14, 1916. —Charlotte M. Higgins

Did You Ever Stop to Think of all the Good Things to be Had From Your Flour Mills?

Did you ever taste "grits?" A breakfast food that is always fresh, always good, and costs less than a quarter of the package goods. Try it and enjoy seeing the children eat. Or crayola wheat? Perhaps you like the taste of wheat. Take a sample of cracked wheat. Let it cook all the time you are getting supper. Then leave on the stove till breakfast; it ready in the morning. Serve with sugar and cream. If you are a little inclined to indigestion this is better than the bran breads. Our granulated corn meal is the freshest, the best granulated, the yellowest on the market. If you want the white corn meal we have that too.

If you want to make bran gems or bread we have the bran.

There are many more good things made right at home, if you have not tried them it is our fault for not telling you of them. Any of these can be had at your dealers or at the mill.

ARGO MILLING CO.

DEATH OF AMOS T. BURNETT

A CITIZEN OF STERLING CHARACTER—IDENTIFIED WITH PIONEER ACTIVITIES

Amos T. Burnett died at his home on Park avenue, this city, early last Friday morning, of pneumonia, and in his death there passes from earth another of the stalwart characters who are written indelibly into the history of the straits and Little Traverse Bay regions.

Deceased was born in Plymouth, Ashtabula county, Ohio, Feb. 19th, 1840. Soon after attaining his majority went to Cleveland, where he secured employment in an oyster house. Here he became acquainted with Capt. Fargo, whom he joined in a fishing expedition to Northern Michigan. They landed at Little Traverse (now Harbor Springs,) in September, 1865. Mr. Burnett was so favorably impressed with the country that he decided to remain.

He remained at Little Traverse about five years, where he was employed in a store. In the fall of 1865 he entered the employ of Capt. John Waggley and took charge of a store at Cross Village, where a postoffice was established in 1869, with Mr. Burnett as postmaster at a salary of $12 dollars per year. In 1871 he was married to Sarah C. Wagley. It was during this year that the writer first met Mr. Burnett. His manly, efficient and straight forward qualities were so conspicuous in his manner that a 40-years friendship between the two pioneers began on that autumn day in the store on the bluff.

In 1877 he entered the mercantile business for himself at Cross Village, which was then the chief trading center of Emmet county, and where the generosity and integrity of our friend made his name a household word among the Indians and homesteaders of that region. He held the offices of supervisor, register of deeds and county clerk.

On the first day of October, 1895, he moved, with his family, to Charlevoix and engaged in the dry goods business. In the fall of 1903 his store was burned, and he entered the real estate and insurance business, which he continued up to the time of his fatal illness.

He was identified with the Presbyterian church at Cross Village from the time of its organization in 1896 until his removal to Charlevoix, where he became a member of the First Congregational church. For a number of years he was a member of the board of trustees, and was one of the deacons at the time of his death. He is survived by a daughter and two sons—Mrs. Nellie Hinchey, of Charlevoix; H. L. Burnett, of Lansing, and E. A. Burnett, of Harbor Springs. His wife, to whom he was devotedly attached, died about two years ago, mourned by the entire community.

The title of "Christian gentleman" was never more fitly applied than to Amos Burnett. One of the earliest recollections of the writer is the respect in which he was held by all who knew him. We have never heard a word spoken of him that could be construed as a reproach.

Of all the many traders of the Indian payment and Indian agent days, Amos Burnett was one of the best known. To the Indians he was a friend and counsellor. His word to them was always a guaranty of fair and honest treatment. He was "Amos" to them, and doubtless there were those who did not know his other name. If they had trouble it was "Amos" to whom they went, and they never went in vain. Even after his removal to Charlevoix they came to him for counsel, and when they could not come this far they went to "Amos," at Harbor Springs.

The life of Amos T. Burnett leaves the world better for his having lived.

The funeral was from the Congregational church Sunday afternoon, Rev. C. E. Taggart officiating. Interment at Brookside.

Death of A. Volter.

Word was received Monday of the death, at or near Vera Cruz, Mexico, of Mr. A. Volter. Mr. Volter had been ill for some time in a Vera Cruz hospital. He was a very intelligent German gentleman, and was superintendent of an American sugar factory in Mexico. During the brief existence of the Charlevoix factory he was superintendent here.

He leaves a wife and daughter here, with whom he spent about half of each year.

Announcement.

To the Electors of Charlevoix County:

I hereby announce myself as a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and I respectfully solicit your support.

M. A. McDonald.

Second hand household furniture for sale at 204 Park avenue. Good bargains on desirable articles.
Mrs. F. G. Hines.

Activity on the Beavers.

A trip to Beaver Island on the City of Hoyem, on a calm day, when you can go via the head of the island, skirting the shore to the harbor, as the SENTINEL scribe did last Saturday, is a holiday of rare enjoyment.

At Cable Bay, about three miles north of the head, hidden from view by a screen of overgreen, is the hotel under construction, and a row of cottages. A considerable force of men are at work, a comfortable boarding house having been built for their accommodation. A well built dock stretches out into the lake, which will, doubtless, be a regular stop for the steamer.

As we glide along the coast myriads of wild ducks rise from the water ahead of us, returning to their bath astern. Two big wild geese take to the air and disappear. The lake is unruffled, and to the northward and eastward we can see the fishing boats gathering their "lifts." Later, after we have dined at the excellent beaver hotel, the boats are arriving with their loads. The fishermen say they are having the best fishing for many years.

There is abundant evidence that Beaver Island is on the threshold of a resort boom; and we do not wonder, for Nature has been beckoning, lo, these many years.

BOY KILLED IN HAYES

An accident very much out of the ordinary occurred at Hay Yard school house, in Hayes township on Friday, by which the seven year old son of W. H. Burns met his life.

It was the noon hour and teacher and pupils were in a grove near by eating a picnic dinner. For some reason the boy remained at the school house. When school called the teacher found the boy standing, apparently, on a short step-ladder, his head projecting from the window, which had fallen across his neck. The little fellow was choked to death.

R. C. Hammet passed the school house in his car about noon and saw the boy, as he thought, with his head resting upon his arms, which were folded on the window sill, but did not discover any evidence of an accident.

METHOD OF PROCEDURE

Men well trained in science and the practice of agriculture and known as County Agricultural Agents, are employed and located permanently, one in each county or like area of the State (with or without assistants), as rapidly as circumstances warrant and funds permit.

These agents coordinate and apply the results of several departments of the Michigan Agricultural College, the United States Department of Agriculture, and other research institutions with such studies of farm practice and farm organization as may be made by the agent in the course of his work, to the end of carrying concretely to the farmers of the county or community, on their own farms, a knowledge of sound principles and successful practices in agriculture. They also aid in the organization and redirection of the agriculture of the community, and in the correlation of all economic and social forces with the agencies working for the improvement of agriculture and country life, in so far as may be possible and desirable; and bring into existence when needed, and cooperate with, agricultural clubs, associations and other organizations whose objects are the improvement of agricultural practices, marketing methods and educational, home, and social conditions throughout the country.

Farmers and members of their families are met individually and in groups for the purpose of study, instruction, and demonstration in field, barn, creamery, school, and elsewhere.

ANOTHER CHARLEVOIX BOY IS MAKING GOOD

Elmer M. Little and A. F. Johnson have taken over the interests of the Fon du Lac Cigar Co. and will continue to conduct the cigar store and billiard and pool hall at 57 South Main street, says the Fon du Lac Commonwealth. Enlargement and improvement is contemplated.

A. F. Johnson was formerly manager of the local store of the United Cigar Stores having been in that position the past year and a half. He has been with the United company for three and a half years, part of the time in Chicago. His home is at Charlevoix, Mich.

RHEUMATIC PAIN STOPPED

The drawing of muscles, the soreness, stiffness and agonizing pain of Rheumatism quickly yield to Sloans Liniment. It stimulates circulation to the painful part. Robbing Your Own Pay Envelope

—The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.

—"I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.

—When the pinch of want comes the lesson of thrift comes too late. Once down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.

—Young man—young woman, are you robbing your pay envelope for pleasure and pastime which in later years will deprive you of the comforts and necessities of life?

—Take $1.00 from your pay envelope this week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every pay-day thereafter.

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by RAY WALTERS

COPYRIGHT, BY DODD, MEAD AND COMPANY

SYNOPSIS.

—1—

Stiets of Dalliy's timber camp directs a stranger to the camp, Walter Sandry, returning home from Yellow Pines, has the Dillingworth Lumber Co. cruiser, Hampden, in his party. Sandry's father, Hampden of the Yellow Pines, is joining him in the Soo; Bert Sandry and Hampden's men fight over the latter's claim to a girl in Detroit. Sandry and Dalliy Stiets have been friends. Dalliy Stiets has never been married. Peggy Ann with Hampden and his mother that Hampden is crooked and that some one else is the real owner of the Yellow Pines. Sandry and Hampden meet Dalliy and Janet and he discovers who has offered more money for the timber than Dillingworth's agent. Dalliy Stiets, who is the proud of Peggy, tells Sandry of the offer made by the commission. She sees Stiets and Sandry in conference and knows by his way, but is taken up and finally is entrapped into the plot. Hampden, who is given Peggy's place in the Yellow Pines office and is a strenuous knight, for the two strangers, for Hampden was a man to fear in his camp.

—2—

At first they held him by main force, and later by argument and reason.

"Flight," said the lawyer in the pink saw, "flight does not mend matters. It's your only chance."

Dillingworth's agent had disappeared, "what for?" This damned driver has let her get the originals of those letters of mine about the timber claims in 7-10, and they should per the hundred hard." Yes, the damnedest ass I ever seen!"

And the man's mouth, red eyes glared at his accomplice with the murderous, but the commissioner had some spirit himself and came back with defiance.

"Fools! We're two together. was from you she got her first knowledge of the game. She fooled her first suspicions out of you in her horseback rides. She told me so. Back now you took her word on the deals, she said.

Hampden groaned and Sunn his head in his arms on the pine table.

"All right," he said at last, "I'll fight."

But with the last sight of the book board bowering down the hill road with his visitors to catch the early train back to camp, a light grew up in his heavy face that would have puzzled that astute man, the Portland lawyer.

"Yes, by God!" he said in a voice thick with menace, "I'll fight! And I'll make a fight that'll be remembered all along the coast!"

CHAPTER XXV.

Five in the Forest.

The next day was the ninth of August. The thermometer, hanging on the eastern side of Sandry's office, went slowly up to 108 by two o'clock.

Ma sat on the east porch to her little rocker and Stiets braided her mats on the step, while Peggy Ord was watched her from a cushion against the wall. The donkey tooled idlently at the upper cutting and from time to time the dinky engine rumbled its high-piled flats down the little track to the railway at the sloughs mouth. The men were all out and the summer silence hung upon the cookshack and the deserted cabins, simply over since their former occupants had turned their coats for Hampden's two-year contracts.

Suddenly Coonsah, lying on the step, got up and sniffed the air. Stiets looked at him; her fingers ceased. Then he sat down on his haunches, threw up his muzzle, and began to bay a melancholy inconsequential.

"Hush," said Stiets, "hush, Coonsah!" And she, too, lifted her head after the fashion of wild things, smelling the sultry atmosphere.

"Fire!" she cried suddenly, "it's fire!"

The general creaked up and hurried to the steps, but already Stiets was off and running up the valley toward the cutting. When she reached the donkey Sandry was standing beside it, but the girl passed him with not a glance, running to where the foreman sat a choker.

"John!" she cried; "John—there's a fire on the west ridge!"

Every man within hearing dropped his work instantly and stood up.

"Fire, is it, lass?" said Dally as he passed the donkey-engineer, "an' send a slant. We'd better all go. Sandry. Tain't likely it's much, but we got to stomp it out, whatever tis. Ben a lookin' for rain."

They all trailed down the valley on a double. It took them the better part of an hour, but when they went down there was not a spark left alight.

"What do you suppose started it, John?" asked Sandry.

"Oh, some darned little college snips from Corvallis, likely, with a cam and a cigarette. Or maybe it was some camper stayin' overnight on the ridge—some greenhorn. An' it's mighty dry—mighty dry."

They went back to the cutting, though every jack of them lifted up his eyes from time to time to the ridges around. At supper the loggers

"It's Broken Out Again!"

discussed the forest fires of other years, the logic opened by the incoming, it was a queer night with a dark sky, though the heat had given way to the sweet coolness of the coast under the mysterious ocean wind, and Sandry from his old seat at table looked out at the western ridge.

"John!" he cried, rising suddenly, "it's broken out again."

Sure enough. Against the upper darkness little red tongues licked diffuse up and the men, white and Indian, tumbled out of the cook-shack.

It was twelve o'clock when they turned in and Sandry was posted.

The next day nothing happened. Twice at dawn of the day following the camp awoke to see a fine, fairy-white haze all through the valley and the crest of the west ridge, for half a mile, sending up fanciful pearl plumes in the soft morning. This time it had gained a start and the camp turned to earnest. Sandry said:

"John," said Sandry solemnly, "that is no college fire with his cigarette. Could it be Hampden?"

The foreman turned upon the owner.

"You hain't a real westerner, yet, Mr. Sandry," he said with a smile. "You think Hampden's run his rolling-pins—as fine timber as there is in the world, sir, mind! He'd burn it, hain'an' come fight with us like a brother first."

"Then what's setting those fires?—for it looks as if they are being set—My God! Look there! There's one!"

A cherry, red eye winked and leaped and died, to leap again across the ridge in a wavering rush and stop.

"That's damned close to our cutting!" cried Dally starting down the mountain in a stumbling run.

And that last fire burning strongly where no brand could have dropped even with a wind, marked the beginning of at the upper cutting and that grew and mounted to heart-stilling panic, of superhuman labor, as Sandry, a year before, could not have believed possible—a time to be long remembered in the coast country.

By eight o'clock next morning the little wind from the backwater had freshened with a devilish perversity, blowing the creeping flames merrily toward the south.

Dally sent Stiets on Black Bolt to Toledo, to ask for a dozen men to help in the fight.

He abandoned the donkey on the ridge, forced down hill slowly, and set his men again in the valley.

Within an hour after Stiets left, men began to arrive by the road—on horseback, in wagons and later on foot, for there is no rail like that of "Fire" in the big woods to bring recruits. The breath of excitement in Dally's orders and fell, to with a will, and the men set to work to clear a heavy sapling in sight, digging trenches to head off any ground fires that might be started.

But destiny was against the Dillingworth. The wind changed, as does that overreasoned word of the ridge fire for once—grew gusty and despite the trained work, for every man knew this business, it readed the flames through the underbrush faster than they could handle it. Dally, black with smoke and ashes, was everywhere. Sandry clung at his heels, watching his methods, learning everything he could, listening, picking up, catching on with lightning rapidity. He knew himself to be ignorant, and where he was the head with his interest at stake he must make himself competent.

At night Dally was grim and silent, hoarse with shouting, and he stamped into the porch, where the women waited, the flames just fagged and against the night in a hundred places on the west ridge and up the hills on both sides at the cutting.

"Stiets, honey," he rasped, "I'll have to call on you again. There's a man is one over the first shoulder toward the East Range—up in the old cabin. Ride down to Toledo an' tell 'em to send the men. You'll need 'em all. I can't spare a man—I've sent out half the men I dwell behind this, an' if I hoch this fire I'll kill him, dama hich!"

"Sir!" said Ma from the shadows.

So Stiets and Black Bolt and Coonsah thundered down through the darkness to save the Dillingworth, and the heart in the girl's breast was throbbing with anxiety for Sandry—"More than," admitted the woman honestly, "Von Harris, on telephones to Corvallis for more men."

"It's done, Johnny," said Ma Dally, panting in the final, her sleeves rolled up from brown, capable arms, "I sent Stiets down the back. She'calls' for all the stations between."

The valley was as light as day, the mined all up and down its length, and three horsemen were loping up its level floor. Loan, Ithe man there were, clad in saver khaki, and they emerged from their horses with bandoneike alacrity, dropping reins over saddle horns instead of on the ground. Those three horses were well trained, intelligent aide, ready to stand for hours in one spot, to come at a whistle, and they wanted no drag grass around to hinder.

"We're forest rangers," announced the spokesman, a quick-eyed, steady man, "and we're ready. Give me your men."

"Thank th' Lord!" said Dally fervently, "take command."

The ranger stood for a moment with his two companions, motioning, dividing localities, sketching a quick plan. Then he gathered his men, putting them under one of his aides.

"Go to your posts," he directed briefly, "and cut a forty-foot fall straight across the dip behind the fire. Go on and cut it up over the big ridge. Don't stop to fight."

In the men hurried off with cross-cuts and axes, he plunged into the camp and with the authority of command, taking men from what seemed impertinence passed to them at work with a quiet, quick, and an error to rational messages in 3; minutes and 12 seconds.

"More men," shouted the foreman hoarsely. "Von Harris, on telephones to Corvallis for more men."

"It's done, Johnny," said Ma Dally, panting in the final, her sleeves rolled up from brown, capable arms. "I sent Stiets down the back. She'calls' for all the stations between."

The valley was as light as day, the mined all up and down its length, and three horsemen were loping up its level floor. Loan, Ithe man there were, clad in saver khaki, and they emerged from their horses with bandoneike alacrity, dropping reins over saddle horns instead of on the ground. Those three horses were well trained, intelligent aide, ready to stand for hours in one spot, to come at a whistle, and they wanted no drag grass around to hinder.

In the men hurried off with crosscuts and axes, he plunged into the camp and with the authority of command, taking men from what seemed impertinence passed to them at work with a quiet, quick, and an error to rational messages in 3; minutes and 12 seconds.

"Go telegraph for the Vancouver soldiers," he directed tersely, "this is going to last all records."

(TO BE CONTINUED.)

First Telegraphing.

New world's records for fast and accurate telegraphing have been set at the international telegraphic tournament in San Francisco a few weeks ago.

Richard C. Bartley transmitted the fastest and most perfect "Morse" by ticking off 40 railroad messages without an error in 25 minutes and 11 seconds, and beating the automatic transmitter.

George W. Smith, Jr., won the receiving contest by taking 4-0 transcribing without an error 40 railroad messages in 3; minutes and 12 seconds.

WHERE WAS HOG-BITE?

MATTER SEEMED TO CALL FOR SOME EXPLANATION.

Bitter Complaint That "Moonshine" Had Been Tampered With Reflected on Somewhat on Public-Spirited Watcher on Duty.

Moonshine whisky was being made by someone somewhere in the neighborhood of Twin Fork creek of the Cumberland mountains in Kentucky, but there was no more definite knowledge than that—someone somewhere in the neighborhood of Twin Fork. It was exceedingly good whisky, too. None of your amber-colored "store" whisky that has been aged in charred barrels until it has changed color. It was what the moonshiner calls "man's whisky," white in color, as clear as spring water. And, according to moonshine standards, it was old. The man who discovered the first jug of it tasted it, and then—it came out, rolling down the back of his throat, as announced, "Ah! Ahh! Ahhh! Ahhhh!" Ahhhh! Ahhhh! Ahhhh! I reckon that liquor was made at least a month ago."

The first jug had been found in a hollow tree. The hole in the jug was empty and beneath it was a bright silver dollar. The finder did not disturb either jug or money. Returning the next morning, he found the jug, but there was no money beneath it, and the jug itself, instead of being empty, was half filled with liquor. Half an hour later, the money was there, but had disappeared.

Twin Fork is in a "dry" county, and there was a good deal of excitement. The hollow tree was watched for days, but nothing happened. In the crotch of a big elm, but nothing happened. Then a half-gallon bottle was found in a cleaner of bushes two miles from the village, Twin Forks. To wealth it was half a dollar in small change, pennies, nickels and dimes. The finder of the half jug was discovered in some bushes half-way up a mountainside that "Hog-Bite" Taylor came out and announced his willingness to aid in apprehending the moonshiner responsible. He had been declaring himself in favor of a little moonshining. The home-made liquor, he declared, was better and safer than the stuff bought from mail-order houses, and half again as cheap. Why should a man be compelled to order by mail and then wait several days for an inferior article?

"Hog-bite's" proposal was simple. He would, without fuss, go out and watch the newly discovered hiding place and see if he could not catch the moonshiner in the act of bringing the jug. So that he would not have to neglect his post for supper, "Hog-bite" took along a package of chicken sandwiches and a jug of clear, cold water. He would not have to leave the vicinity of the jug for even a drink. He was to report next morning. Morning came and no "Hog-bite." Nine o'clock—ten o'clock—eleven o'clock.

Somebody went out to investigate. He found neither jug nor "Hog-bite." Stuck on a twig of a tree, however, was a note, printed with lead pencil. It read:

"I don't object to nobody bein' left to watch my jug of liquor. But I object like — to the man what left to watch it drinking half of it and filling it up with water."

Tiny German States.

Some of the states are so small that an diliputian size as is evidenced by the fact that it is impossible to count eleven of them, including two kingdoms, two duchies and three principalities, in an area smaller than a half hours.

A good walker, starting from Stornbach, in Bavaria, will arrive in half an hour at Lichtenstone, which is situated in Saxe-Meiningen. There the road proceeds in one and a half hours to Ebern, Bamberg (Bavaria, Oberbranch), after which in a few minutes Gleiss, in Schwarzburg-Rudolstadt, is reached.

Half an hour's walk brings the pedestrian to Altenposnert (Hesse, grand duchy), an hour farther on lies Dreseen, on Prussian soil, and the last stage is another hours stroll, finishing up at Saalthal, Saxe-Altenburg.

Women Used in Garrisons.

Women are now being employed in garrisons in France in the place of soldiers of the auxiliary service. The experiment, just begun at the headquarters of the Thirty-ninth infantry at Caen, has proved so successful that the minister of war has suggested that the commander of other garrisons use the services of women wherever it is possible. This the drafts of the 1888 military class will be limited, which will permit professional men to continue to attend to their regular duties and will give employment to the widows, mothers and sisters of soldiers killed.

All the women used in the garrisons are to be classified under the direction of various chiefs of the service and are placed according to their qualifications.

Everywhere You Go Everywhere They Know

Alabastine

FOR 35 years Alabastine has been the choice of homewives who take particular pride in the decoration of their homes.

For 35 years Alabastine has been sold everywhere by paint, hardware, drug, and general stores. It is known by dealers and users alike as the "list beautiful" for walls and ceilings.

Alabastine is a dry powder that mixes perfectly in cold water. You can easily, yourself or your local painter will do the work (directions are on every 5-lb. package). Alabastine comes in the 5-lb. packages only.

Free Color Plans

The best decorators advise the use of specific products containing well and ceiling flatness. Only Alabastine gives the results of 35 years, but if you write for the free "Alabastine Packet" you will be shown how to secure the very best interior effect, and will tell you how you can have your choice of these and 500 others at practically no expense. Write for the "Packet" and "Hints" especially adapted to your home. Address

A. L. HART & SON.

Barnard Doings.

Mrs. Wm. Shapton entertained her S.S. class of girls on Saturday. The "Sunbeams" report a pleasant time, and the home work of their study books in better shape.

On Sunday May 21, the church and S. S. will observe Mother's Day. Special music has been arranged for and Rev. Clinton Walker of Charlevoix will deliver the address. Everyone is cordially invited to attend this service and make it a memorial to your mother.

A little stranger has come to brighten the home of Mr. and Mrs. Albert Kiester. The boy arrived Monday. John and the mother are doing nicely.

The Royal Onion spent a pleasant evening with Mr. and Mrs. Frank Matchett Thursday, and planned to meet May 25 with Clyde Smith.

The storm postponed the "clean up" arranged for Wednesday, but on Thursday a good bunch of men and women arrived on the scene and began operations. The results were most satisfactory, even though it took some time to forget the back aches.

Mrs Albert Van Heule a former resident of Barnard, spent several days with Mrs. Wm. Burns last week.

School Commissioner's Column

May L. Stewart, Commissioner

A big eighth grade class, at least 250 that took the examination.

It is to be hoped that every boy and every girl receiving a diploma will attend high school next year. Tuition can and must be paid up to $20 per year if application is made before the fourth Monday in June.

Athletic meet at the fair grounds for South Arm township, last rainy day rather spoiled it. Nothing fair about it.

On a more careful figuring of the score, the East Jordan Agriculture club found least in the Wilson athletic meet the Kings school was in the lead with Affton a close second.

Time to take the census now. Everybody's busy.

Twenty-two certificates will be issued from the April teachers' examinations.

Mrs. Cowles plans on being here for the canning demonstration June 30th. Complete program published later.

Survival of Ancient Type.

One of the strangest animals known to zoologists is the tenrec, an insectivorous animal found only in the island of Madagascar. It is supposed to represent a very ancient type of animal which is now almost extinct. Madagascar, once a part of the mainland of the African continent, was separated therefrom at a very remote period in the past. As a result a fauna peculiar to the island has been developed.

LOCAL AND PERSONAL

Regular term of the circuit court May 22.

Read the Burnett adv in another column of this issue.

Fred Myers has installed a new electric corn popper for summer use.

Dollar Day Saturday. Charlevoix merchants offer bargains that are attractive.

Jud Burkes, of Petoskey, will race James Tree at the roller rink Saturday night, May 20th.

Reported that the Green Bay Fish Co. contemplate the establishment of a station in Charlevoix.

Meyer Levinson left Monday for Detroit to attend the annual convocation of the Grand Chapter R. A. M.

O. Nordrum, Judge Mayne and A. L. Fitch went to Grand Rapids Monday to attend the grand encampment Patriarchs Militant.

Dr. and Mrs. F. H. Wilkinson leave today for an eastern trip of three weeks that will take in New York, Boston and Washington.

The fire department was called out Friday morning to a small blaze at the home of Jackson Walker, on Petoskey avenue. Very little damage done.

Adam Plister has added an electric driven pop corn machine to his already well equipped cafe. Other improvements in the place indicate increasing trade.

Mr. McLean, of the Holland-St. Louis Sugar Co., accompanied by a government beet sugar expert, were in town last week arranging for the 1916 sugar beet crop.

The regular monthly meeting of the Woman's Missionary Society of the Congregational church will be held Friday afternoon of this week with Mrs. Cartier, 705 State street.

Dr. and Mrs. F. A. Graham, Mr. and Mrs. Ghent, Billings, and Miss Elda Arthur, of Harbor Springs, motored over here Sunday to attend the funeral of the late A. T. Burnett.

Saturday of this week is "Dollar Day." Read all the ads in this issue, and then come to town prepared for great bargains. Charlevoix merchants are wide awake for trade, and they want you to call on them.

Rev. Homer Alexander Brown, with Petunia Pimples, Augusta Wind, Odelia Haslun, Professor Topnote, and many others of equal note, will appear at the Methodist church on Tuesday evening, May 23d at 8 p. m. Come and laugh and live. Get the "morgue inns off your mug." Get your tickets early. 25 cents.

The steamer City of Boyne changed places with the Columbia Saturday. The Columbia returns to the Little Traverse bay ferry run, and the City of Boyne goes permanently on the Island mail route. The Boyne, during the winter, has been thoroughly overhauled and strengthened, with changes that greatly increase and improve her cabin accommodations and freight space.

The largest car ferry in the world will be in operation within a few months by the Ann Arbor railroad in service on Lake Michigan. The ferry will cost $500,000. The boat is 338 feet long and 56 feet wide and is all steel. The vessel is being constructed by the Great Lakes Engineering Works, at Ecorse, and is more than 60 per cent completed. It will be finished in time for November delivery.

The Majestic Theatre is giving the public some very fine attractions, in fact as good as are produced anywhere. The "David Harum" picture last Tuesday night, with the distinguished Wm. H. Crane in the star part, was worth a half dollar. On Friday evening of this week manager Mize will present "The Love Route," a picture story of entrancing interest. On Tuesday evening next "A Gentleman of Leisure" will be given. This is a Lasky production of the highest class. The Majestic is doing excellent work.

Charlevoix merchants are making an concerted effort to improve the market facilities of Charlevoix. The farmers and the merchants are jointly interested in the proposition. Where two parties are interested in any proposition it means "get together" on that proposition, the merchants are bound to do their part, and they want to meet the farmers more this half way. This is the year, with apparent improved crop conditions, when co-operation is mutually most useful, and the "Dollar Day" project affords a most excellent opportunity to both farmers and merchants, to harmonize all differences and promote mutual benefit.

NOTICE.

There will be no work done on cemetery lots before or after Decoration Day unless paid for. by order of Cemetery Board.

KEEP YOUR SKIN CLEAR AND HEALTHY

There is only one way to have a clear, healthy complexion and that is to keep the bowels active and regular. Dr. King's New Life Pills will make your complexion healthy and clear, move the bowels gently, stimulate the liver, cleanse the system and purify the blood. A spicing and spring medicine. 25c at your Druggist.

MASONIC.

One of the most notable meetings of Charlevoix Lodge No. 382 F. & A. M. occurred last evening, when diplomas or certificates were presented to ten members who have reached the age of 65 or over, and who have been Masons fifty years or over. Past master S. M. Rose presented the certificates on behalf of the lodge.

The life members are: I. S. Webster, W. A. Smith, J. J. Aldrich, A. M. Ross, J. A. Hawkins, M. J. Stockman, A. McNeil, P. S. Brown, Dr. L. Lewis, F. J. Smith, A. Bishop. Only just three two named in the above list are the only living charter members of the lodge, the others having died in the past.

Nine pastmasters were present at the Tuesday night meeting. Supper was served at midnight.

Boyne Citizen: Mrs. Mary Isaman, of South Arm township, died suddenly yesterday morning. She was fifty-two years of age and for the past eighteen years had suffered from inflamatory rheumatism. The past ten years she has been a confirmed invalid. Mrs. Isaman was, previous to her marriage, and for sometime afterwards, a teacher in the county schools. She was widow to James Isaman, a pioneer resident of the county, who still lives on the farm homesteaded by him many years ago.

Michigan and Dixon Avenue Lighting.

Light District No. 1.

Notice is hereby given that the plots, plans, diagrams, and estimates of cost of the proposed lighting of the following described districts in the City of Charlevoix, Michigan: A zone from the north line of Pine River north to the north line of Dewey avenue, and from the west line of Michigan avenue to the east line of Lake Michigan, and from the south line of Clinton avenue to the south line of Michigan avenue, and from the west line of Michigan avenue to the waters of Lake Michigan and to Newton Street north of Michigan avenue and to the waters of Pine Lake and Clinton avenue, and from the west line of Newton Street south of Michigan avenue to the waters of Pine Lake and Clinton avenue, and from the west line of Michigan avenue to the waters of Lake Michigan and to Dixon avenue, including all of the following described streets and alleys, excepting from the above description all public streets and alleys:

Michigan avenue, Dixon avenue, Clinton avenue, Newton street, Dewey avenue, Pine Street, Lake Street, Andrews Street, Clinton Street, and all alleys.

CHARLEVOIX, MICH., JUNE 1, 1915.

CHARLES H. KOBBE,
City Clerk.

WANTED.—At once, man to do milking. Address Coulter Bros, phone 72.

WANTED.—Girl to do general house work. Address 210 Park avenue.

WANTED.—Girl to do general housework. Permanent employment if satisfactory. Address 308 Park avenue.

Announcement.

I hereby announce myself as a candidate for the office of county clerk, on the republican ticket, subject to the ratification of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. GRAFF.

NOTICE.—Having fenced in my land on the lake shore between Norwood and Charlevoix, I will receive stock for pasture for the season of 1916. Apply at Norwood to A. J. Holichok, or to Edwin Cook at the James O'Brien farm.

L. J. NASH.

THE VALUE OF A LIQUOR LICENSE

THE CITY'S FEE IS NOT ALL OF IT. NOTE THE VALUE TO THE MEN WHO SELL LIQUOR

WORTH $1,000, VALUE $10,000

That Is The Liquor Seller Will Cause Want and Suffering To Make Money For Himself.

How much is a saloon license worth? This question has agitated a good many city councils in Michigan as they faced the annual grading of licenses. It brings two answers. The license is worth a given fee to the city which grants it, but it also is worth many times that fee in profits to the liquor dealers.

"A saloon license in Jackson is worth at least $10,000 to the man who gets it," declared an official of that city to a representative of The New Republic. "We need to have ever ninety saloons in Jackson and now with thirty-two, the profits of each retailer are very large."

Pinconning, a little town near Bay City, has voted a long fourteen cent tax on the issue by adding $500 as a village license to that required by the state, making the total $1,000. In Blanchard the one thousand figure also prevails. Tuesday night meeting, Supper was served at midnight.

Dowagiac, Niles, Ionia and Ludington have not yet seen the light, is furnished by such talk and little action on the subject of reducing the number of saloons in various Michigan cities. Bay City succeeded in counting out six licenses this year but still has 106 here in a city of 45,000 population. Saginaw as well as Bay City furnished much talk of reducing the number but Saginaw granted its full number of 101 licenses.

Manistee managed to count out one saloon, leaving twenty-eight which must have been quite an effort for Manistee since it decided to have nothing to do with local option and is advertising its saloons as a unusual pal attraction to motor tourists.

In Detroit absentee sentiment was maintained by the liquor committee of the common council when it was expected that something like a bonehead would drop and scores of licenses would be refused which heretofore have been granted. About 50 fewer licenses were granted leaving the total 1187.

Most of the local fights of saloon licenses are in fact conflicts among brewers rather than retailers. The city council has a hard time regulating a retail saloon when the influence back of the retailer happens to be one of the great breweries. Thus the brewers are in the business of controlling the sale of their product. While the people are not interested in who makes the stuff, they do have a practical interest in law enforcement and in the character of the man to whom they must look.

With "blind pigs" flourishing in a crowd cities and with saloon keepers constantly violating many laws and with city councils afraid to refuse licenses when they ought to, the conditions in many Michigan cities are alarming to increase and solidify dry sentiment.

"The Flats" and Its Bar-rooms

Construction reduce in that element of population which is old and vicious also takes their summer recreation a St. Clair Flats. The flats section north of Lake St. Clair, has long been famous for its summer cottages and hotels, scattered about among pretty resident canals.

It has also been notorious because of its house way in which certain bar rooms were operated. Dancing, gamblin and worse evils, have at times been accompanied by drinking. Cheap trips by fast steamers between Detroit and Port Huron have made the Flats popular.

But it is stated that during the coming year only one saloon license will be granted by the Clay township board. This action cuts out several drinking places, and while it saddens the hearts of the blindously inclined it will gladden those who believe in safe and sane recreation.

It's Dry in Temple.

Temple and Clare county went dry. This set of facts came some time ago of Wexford, Missaukee, Osceola and other "dry" counties to make a "rye" face and cuss the government and people who voted the county dry. Temple was a favorite watering place for a few Cadillac people, who would take their week's wages and spend it for the wages and the week end in the village. However, the saloon closed its doors last Saturday night and will remain closed for at least two years.—Cadillac News.

Mobilizing the Liquor Forces

Liquor forces are rapidly organizing and mobilizing their forces in Michigan. Before the local option election of April 5 they had begun to hire workers in many sections of the state. There is no doubt whatever that they will wage a vigorous and expensive campaign. No doubt has come to the statement made some time ago that a campaign fund of $1,000,000 will be raised to defeat the anti saloon cause.

PUBLIC HIGHWAYS

GOOD CULVERTS ARE NEEDED

Crossroads and Byroads Are Put Off With Old Wooden Contraptions—Accidents Result.

There is a good deal being said and written about good roads. I fear that the main thing is overlooked in their haste by a good many people. They want to do it all at once. I fear the culvert proposition is overlooked by the automobile man road association, writes J. W. Edwards of Dawson county, Nebraska, in Independent-Farmer. They forget that much travel and heavy traffic is done on side roads, especially threshing outfits. It is a lamentable fact that the crossroads and byroads are put off with old wooden culverts, thereby causing innumerable accidents while if some attention was given to building solid concrete culverts, something that would be everlasting and cheaper in the long run, there would be less accidents and threshermen would not need to travel three to five miles to get one mile. The automobile also has to travel these crossroads and byroads frequently.

A wooden culvert soon rots out and becomes dangerous inside of a few years. This is caused by floods and different kinds of weather. While concrete is desirable—water and floods may come and wash over them, but they are left where put and it is safe to cross over—the ordinary wooden bridge may be washed out and float off or become dangerous to cross. How many wooden structures do we see or hear of after such large flood, being washed downstream, and otherwise damaged or auto are driven on to the supposed culvert thinking it is there, only covered with a foot or two of water, to

Substantial Stone Culvert.

find it entirely gone or with two or three planks gone with the result that one person and probably a horse or two are drowned. Then another death trap will be built.

The writer knows whereof he speaks. He knows of one case where three men drove on to what they thought was a culvert. The water had backed up from the main creek and covered the culvert and it looked all right, but it was partly washed away. The outcome was one man nearly drowned, and both horses drowned and needed down stream. Another case under my own observation, was that of a threshing engine which went through a culvert ofdat or ten years ago and about that down stream happened? A fireman was wounded to death.

Now if our good roads boosters will move mole to see for good revised culverts, and the Byroads, Dirt roads will have less opposition. Young for good culverts.

Register Tractive Force.

A divisional commission on ordinary draw is used by the United States department of agriculture to register the tractive force required to draw various weights over different kinds of roadways.

Make Finishing Touches.

For putting the finishing touches to concrete roads, a machine driven by a gasoline engine has been invented that can finish about 3,000 square feet a day.

Shape for Country Roads.

Country roads should be kept in such condition that they will shed every drop of water that falls on them.

Reasonable Proposition.

A good road between every farm and market is a reasonable and worthwhile proposition.

Muddy Roads Cut Profits.

Muddy roads always add to the distance to market and cut the profits on produce.

AVOID SPRING COLDS

Sudden changes, high winds, chilly mornings cause colds and grippe, and these spring colds are annoying and dangerous and are likely to turn into a chronic summer cough. In such cases take a treatment of Dr. King's New Discovery, a pleasant Laxative Tar Syrup. It soothe the cough, checks the cold and helps break up an attack of grippe. Its already prepared, no mixing or fussing. Just ask your druggist for a bottle of Dr. King's New Discovery. Tested and tried for over 50 years.

WOMEN SEEK BARBER'S AID

Not Even the Tallest Dixon Is Allowed to Stay on the Chairs of Japanese Ladies.

In Japan not only men but women go to the barber if there be any sign of hair on their faces. They do not permit even the soft down to show. Much the Japanese are often seen with it—but unshaded on the faces of some Western women. Often, too, the eyebrows are shaved. In recent years the female barber has begun a feature of the profession in Tokyo, most of these being the wives of barbers who wish to make themselves useful to their husbands, though some are independent.

The accomodation of every mouth is provided as a barber's hobby, when they come up shop and go to theaters and places of amusement, for when they are often troubled with fresh beards, to name but one of the thrills and other entertainment of the places of amusement, to be met in their shops free. Most of the instruments now used by Japanese barbers are made in Japan, though at first they were all imported.

Colored Rope.

Every rope used in the British naval service from the heaviest line to hawsers, wherever used on board ship or in dockyards, has a special mark in its strands, for purposes of identification, a colored thread. A different color is used according to the part of manufacture, red, blue, green and yellow being adopted for different parts.

The presumption is that any rope with the colored thread found outside of such uses is in improper hands. This system has prevailed in the British navy since long before the days of Nelson. A similar method of identification is employed to some extent commercially. Some railways work their rope in this way and in the lines employed in identifying ropes used for various purposes on ships, in operating machinery and in lifts, it would be liable to be stolen.

Tongues That Kill.

The tongues of some animals are very dangerous weapons. A lion could specially kill a man by merely licking him with his tongue. The tongue of all the members of the cat family are covered with numerous sharp spines, formed of tooth enamel. In the cattle tribe domestic cat these spines are very small, but are sufficiently well developed to give the tongue a feel of sandpaper. In the horses and seals, such as the lion or tiger, these spines are formidable, and enough to rip for an eighth of an inch or more with very sharp points or edges. In the seals the spines are so fine as to be soft and smooth, but when the animal is wounded the spines become rigid.

Josh's Auntlies.

"How is your boy Josh getting along with his home study?" inquired Mr. Farmer Corntassel. "He's learned a whole lot," replied Josh's paw. "Leastways, he's learned a lot of things I already know. He knows how to kick and cuss."

OUR PUBLIC FORUM

J. S. Cullinan ON CITIZENSHIP.

Mr. J. S. Cullinan, President of the Texas Economic League, in inviting the people to study and discuss citizenship and to give special attention to the problems of government, said in part: "Before we can intelligently study so important a subject as citizenship we must first define it. What is citizenship? Who is the best American citizen? Search the statute books for a definition of citizenship and unless one is a member of the legal profession we immediately become entangled in a labyrinth of confusing and oftimes contradictory laws. Seeking to promote or restrain most every form of human activity, much of them good, some of them bad and others indifferent. But laws come and go; the Constitution is permanent. The preamble of our Federal Constitution states that our government is ordained to give its citizens liberty and happiness. Read the Declaration of Independence and the Constitution of the United States and one can easily reach the conclusion that the best American citizen is he who is most free, patriotic, just, happy and active and who hence down to posterity a civ ilization more capable than he found it. The spirit of our country is freedom and no man can become a true American citizen unless he is free.

"Turning a moment from documents of State perhaps the best authority on citizenship, and one universally accepted by the public, is Webster's International Dictionary, which defines a citizen as 'A member of a State; a person, native or naturalized, of either sex, who owes allegiance to government and is entitled to political protection from it.' Further: 'A citizen as such is entitled to the protection of life, liberty and property at home and abroad.'

"We now have before us the authoritative definition of citizenship by both government and society and in order that the most humble citizen may feel perfectly free to enter into a study and discussion of this subject I will briefly outline my conception of what citizenship involves, for the work of the Texas Economic League will be in vain if the most lowly citizen does not feel free to express his serious thought and expression to his obligation to government and his responsibility to his fellow men.

"Applied to able-bodied adult males, with whom I take it we will have chiefly to do, a citizen's duty, in return for the rights, privileges and protection outlined above, would seem to be: First, to expend sufficient labor in production, or auxiliary occupations, viz., manufacture, transportation and distribution, to support himself and his family in comfort. Second, conform to all laws framed in the interest of society under the Constitution. Third, contribute his just proportion to the maintenance of government, in personal time, payment of taxes or, if need be, bearing arms in the defense of the nation.

"In reaching the above conclusions I have assumed that under our system of government citizens are owners in common and are entitled to the rights and benefits of government during the term of their natural lives and for such period only."

Vermont and Michigan.

Wouldn't it seem funny if the wets should suddenly be found fighting in favor of local option in Indiana county? Yet that is precisely what happened in Vermont, if the leaders of the prohibition campaign recently closed their work in a local option victory can be believed, says the Lansing Journal editorially.

Vermont's acceptance of local option and rejection of state-wide prohibition possibly requires interpretation by those who know. Interpretation is being given not only by editors at a distance, like ourselves, but by liquor dealers. These last mentioned are flooding the mails with ready to print editorial copy showing what a calamity Vermont missed by rejecting prohibition, and how stupid it is that Vermont should have decided in favor of local option.

We shall not press home the argument locally on our friends, the opponents of local option. It really is too funny, that they should be fighting local option in Lansing and other Michigan cities while their, according to report, fought to have local option adopted in Vermont. But, for the further interpretation of the Vermont situation we might refer to the leaders of the dry cause.

They affirm that through the "great victory" of the wets in Vermont, the whole state will have fewer saloons than are found today in the single Michigan city of Saginaw. Vermont has now 67, and may add a few more. Saginaw has 101. The wets of the state rooted for local option with all the means at their command, and the dry leaders in their statement.

Because the Green Mountain state for ages has been wedded to the old town meeting idea, it is farther suggested, it was easy for the wets to frame arguments to show that if local option machinery was not retained, according to the law passed in 1862, local home rule would be reduced to a minimum.

The further and final explanation is given that the rural vote on which the drys depended, was snowbound in the Vermont mountains fastnesses hence it could not be counted.

But the humor of the situation, as of interest right now in Michigan, is the eloquence of the wet orators in defending prohibition "which does not prohibit" by demanding that the people save themselves for "personal liberty" and retail local option.

With Michigan Home Rule bill month hence arrive for local option in order to oppose state-wide prohibition? Why not start it now and make it unanimous in Ingham county?

The Organization For Work.

Mobilization of the state wide army for a dry Michigan, began at Pere Pere in Van Buren county, the banner dry county of the state. Van Buren went dry in 1890 and has successfully withstood six separate assaults of the enemy. From Detroit to Duluth it is planned to have in every county an organization run by an executive committee, with a separate chairman in each township for men and for women.

"Two flying machines are touring the state. On the west side the principal workers are Grant M. Hudson, State League Superintendent, H. R. Calkins of Lansing, Mrs. E. L. Gulick of the Michigan W. C. T. U., Fred Washburn of Boston Harbor for the state Sunday School Association and Mrs Jennie E. Curtis of Rochester, music director. The schedule thus far has included Paw Paw, Marshall, Three Rivers, Cassopolis, Benton Harbor, Kalamazoo, Hastings and Ionia, Greenville, Alegan, Manistee and Ludington.

The flying squadron for eastern Michigan consists of Edwin Stanton, Detroit district superintendent of the league, Ex-Congressman J. D. Botkin of Kansas, Dr. Lucy Kirk Peal of Ohio and J. A. Carroll of California, music director. Beginning May 1, county rallies have been held at Adrian, Howell, Owosso, Ann Arbor, Lapeer, Bay City and Gladwin.

Every home in Michigan will be visited during the campaign, every church member and every one of the 300,000 Sunday School members in the state will be active in the work.

The financial reports say the liquor business is "in a bad way" because of the wave of public opinion against the saloon. In Rocky Dobson's report for March, 1916, was this statement: "Most industries are prospering, among the few dull lines are liquor, gold at retail, which continues comparatively bad always everywhere, even in cities where prosperity is in full swing. Many distilleries and breweries are doing well on account of war orders for alcohol. But generally speaking this war business does not make up for loss of domestic consumption. Credit must abroad carefully watch such industries."

One of the powerful elements on the dry side appears in the Holland population of western Michigan. Both Reformed and Christian Reformed denominations which represent many thousands of the best Dutch citizens in the state are endorsing the Anti-Saloon idea. A fact of much meaning is that the National Synods of both denominations meet this summer in Michigan. The Reformed Church Synod assembles at Holland in June and the Christian Reformed General Synod will meet in Grand Rapids.

An indication of the sentiment among these people appears in the resolutions adopted by Classis Grand River of the Reformed Church meeting in Grand Rapids and representing a constituency of 14,000 members in forty churches.

WOMAN FINDS BURIED GOLD

Mrs. Grey Dug Up Coins Which It Is Thought Mrs. Judkins Put Into the Ground.

Chico, Cal.—Fifty dollars in gold, believed to have been buried here more than twenty-five years ago, was discovered here the other day by Mrs. John Grey, wife of a shoe merchant of this city, while digging lily bulbs. Mrs. Grey, while sending lily bulbs turned up an old can, and found in it wrapped up in the remains of a hand kerchief, the gold.

More than twenty-five years ago a family by the name of Judkins occupied the home. Mrs. Judkins was known to have buried money, several packages having been found by her husband following her death. It is believed that this money also was hidden by her.

The can contained one $20 and three $10 gold pieces. The can in which they had been placed was rusty and the cloth which had been wound around the coins was decayed and fell to pieces when handled.

Cut Down on Servants.

London.—The war economy committee now recommends the cutting down of domestic servants male and female so as to liberate this labor for war purposes.

FOR RENT—I have purchased an up-to-date electric-floor surfacing machine, which I will rent out by day or hour. Apply to ED. SEAMAN, Charlevoix, Michigan.

VETERAN DIGS OWN GRAVE

Then He Falls in Love at Age of Eighty-Nine and Does Not Want to Die Now.

Milwaukee, Wis.—Out in Forest Home cemetery there is an open grave waiting for Francis Marion Collins, an inmate of the soldiers' home in this city.

Five years ago, after Collins had been denied permission by the cemetery authorities to dig his own grave he went to the city of the dead one dark, rainy night and by the light of a lantern prepared it. Collins is again eighty-nine. He had a tombstone, inscribed as he had directed, with everything but the date of his death, erected.

But though Collins is nearly four score and ten years old and ready to die, he doesn't want to go the ghost just yet. After making preparations for the last act of the long drama of his life, he turned eagerly to life and love. In fact, he has a sweetheart now. Her first name is Annette. He won't tell the rest. She is keeping the veteran interested in life by writing him interesting love letters and visiting him at the home several times a year.

Collins served four years during the war in Company I, One Hundred and Thirty-fourth Pennsylvania Infantry, army of the Potomac.

ROAD BUILDING

MANAGEMENT OF GOOD ROADS

Specialists of Department of Agriculture Place Responsibility for Highway Defects.

Where a county builds a good road and soon lets it become rutty, washed out or uneven, who or what is principally to blame? As a result of a study of conditions in a number of counties, road specialists of the United States department of agriculture are inclined to place the responsibility upon the following defects in road management, some or all of which are found in all counties where good roads are not properly repaired and maintained:

1. County boards, although having full administrative authority, appear not to attach to their official action in road matters the importance or legal effect which it should have.

2. County boards do not generally have sufficient accounting control of road funds to know what is available for any particular project, where funds have been or where existing balances are to be expended.

Good Road in New York.

3. Lack of any systematic practice in handling funds among most counties makes it very difficult to carry out over even a single year any persistent maintenance policy, because funds of locally obligated for maintenance purposes are not protected against sporadic and irregular drafts for miscellaneous purposes. The greatest likelihood consequently exists everywhere that there will be no balance in the maintenance fund in the last half or third of the year, although only a part of the fund allotted may have been spent.

4. Local labor available for maintenance work is made dissatisfied by the constant, unintelligent and unfavorable criticism of those using the road.

5. Maintenance continuing over a period of years—the ultimate inexpensible condition of effective maintenance—is jeopardized by lack of accounting control that will prevent spending next year's current income in this year.

6. The lack of skilled supervision in construction and the effect of this in increasing the cost or in making effective maintenance impossibly expensive is everywhere seen.

7. The county authorities are commonly opposed to following suggestions for maintenance that involve tying up road funds in any way, such as purchasing materials in advance to store along the road for making repairs or maintaining the road surface.

The only piece of novelty which women seem to have worked out for themselves is that on all occasions one should preserve the integrity of one's silk stockings.—Rebecca West, in the New Republic.

MUCH WASTE OF FARM LANDS

Suggested by Country Gentleman That Recklessly Heavy Maintenance Cost Be Avoided.

The Country Gentleman makes the sensible suggestion that a prodigal waste of land and a recklessly heavy maintenance cost be avoided by American roadmakers. Upon a four-rod government highway one dozen farm wagons could be, by a little crowding, set side by side, and each mile of government highway contains eight acres of land, "much of it good land, capable of growing 100 bushels of corn," while thousands of miles of the best highways of France, Germany and England are but one rod wide.

The Country Gentleman objects to Iowa crowning enough acres of the best farming land in the world" to growing a sufficient assortment of weeds to seed the farms that lie along the state's 104,000 miles of public road.

It may be added that a well-maintained road a rod or a rod and a half wide, with trees along either side, is much more agreeable to drive over than a road three or four rods wide, which can never be shaded and must always be an intolerably hot sun reflector during summer. Left unsifted, it is glaring and trying to the eyes. Oiled, it gives off heat like a stove.—Louisville Courier-Journal.

Benefits of Good Roads.

By furnishing better means of communication, good roads will add to the selling price of farm products and in every way will contribute to the comfort and happiness of the people. Then, furthermore, we can have a good system of consolidated schools only where we have good roads.

Most Valuable Roads.

Good wagon roads running into the country are more valuable to a town than an extra railroad running through it.

Daily Thought.

Time was when a Christian used to apologize for being happy, but the day has always been when he ought to apologize for being miserable.—Drummond.

Had the Elements of Success.

"He started life with a shoestring and now he has a million dollars. Seems incredible, eh?" "Not at all. I should consider that a man who could get anybody to buy one shoestring was inevitably bound to succeed."—Judge.

A HALF TRUTH IS A FALSEHOOD

INCREASED SALE OF LIQUOR DOES NOT PROVE FAILURE OF PROHIBITION

USED BY AMMUNITION MAKERS

There Is All The Killing Properties To It, However, But It Cannot Kill Prohibition

T. M. Gilmore of the National-Model Laborite League, the new president of the publication bureau of the Wine and Spirit Circular, criticized the newspapers of the country yesterday for what he claimed was a gross distortion of the failure of prohibition. He proved to a fair jury that the country is absolutely sober.

Taking the issue of April 10, 1913, carried a column article showing, first, that abstinence was reigning in place of drinking, and, second, against myself, that the country, instead of consuming alcohol and spirituous liquors are free, as proved by manufacturers of ammunition, that to be used.

Assuming the statement to be true, which, by the National-Model League, concerning the alleged increase in consumption of whisky in the United States, Major A. P. Loomis, State Manager of the Wilhelm Dry Campaign committee, declared the report was a half-truth which amounts to a whole falsehood. He said:

Every body knows there is a war in Europe. Most people know that the manufacture of ammunition requires alcohol and a quantity of alcohol. It is true that since the war broke out there has been a big increase in the production of distilled spirits by all the distillers in the United States. Many of the distilleries are running overtime, but it is absolutely false to say that this increase has anything to do with prohibition. The fact is these distilleries are selling their product to manufacturers of ammunition.

The statement of T. M. Gilmore, president of the National Model League, shows the increase in manufacture of ammunition, the failure of prohibition is absolutely false and misleading. Why should whisky be exempted in people who if it is true, are using it in increased consumption of whiskey?

EDUCATION AND PROHIBITION

The Students of the U. of M. See It Is Good Work to Combine the Two.

Lansing, Mich. — "University of Michigan students are deeply interested in the Michigan Dry Campaign committee," said Prof. Jesse Siddall, a student in every institution of the state for the fight against the saloon. The university and college people have been at the University of Michigan, Kalamazoo College, Albion and Hillsdale colleges with the annual state convention of the Intercollegiate Prohibition association.

"That the University of Michigan is not should be wholly rid of saloons is the conclusion of Harry S. Mason who is in charge of the inter-collegiate movement. Mr. Mr. Mr. who travels in all parts of the state he is convinced that thousands of alumni, and other thousands who are present of students at the State University will do anything in their power to abolish saloons in the state because thereby Ann Arbor will be made a dry town.

"Nineteen-twelfths of the students are faculty in the State University are on the dry side today", said Mr. McCain. "This statement may surprise you but it is a fact. Opinion and practice at Ann Arbor as to drinking have been steadily changing for the better in the last three years. I believe the state University alone will furnish us five hundred workers for this campaign and we may have three hundred at headquarters.

"Every educational institution in Michigan is being organized for the campaign of education showing the evils of liquor as a beverage. An army of five thousand students from the various colleges will be busy during the summer vacation distributing literature, canvassing communities and making speeches. Drinking will be a feature of the campaign. I am now enrolling workers."

A Comparative Statement.

In every city and county local option or prohibition invariably result in reducing the number of arrests. There is also a decided and often large reduction in the expense of conducting jails, courts, etc.

The actual relationship between the license system and number of arrests for drunkenness, misdemeanors or crime causes or contributed thereto, by conclusions reached, are influenced to a greater or less extent by the local policy in making arrests. Sometimes local officials, either professional, judicial or politicians, start out to make a record for arrests either under a wet or dry regime.

"Who is a non drink outlaw to be arrested?" This question is answered variously, but the answer is nine counties out of ten in Michigan proves that by far the licensed saloon is the greatest "Boniface of disorderly conduct." Nine counties of public intoxication and disorderly conduct. In Michigan dry counties, as in Kansas, Iowa and the dry states the local jail is empty by nine into entire disuse. In Michigan saloon establishments in business continue the last period of license to sell it offers full of "drinks" and in consequence full to overflowing.

Statistics are furnished the Sentinel by the Wilhelm Dry Campaign committee, Chief of Police, in a letter to Major A. P. Dry Campaign committee March 2, 1916, while desirous to give any opinion for publication, received the following statement of arrests.

Comparative record of arrest, Kalamazoo police department:

	Date	Drunk	Total
May	1914	52	123
May	1915	42	61
June	1914	48	171
June	1915	28	76
July	1914	88	189
July	1915	48	91
Aug.	1914	96	194
Aug.	1915	45	81
Sept.	1914	145	191
Sept.	1915	101	157
Oct.	1914	100	267
Oct.	1915	46	72
Nov.	1914	104	159
Nov.	1915	41	72
Dec.	1914	101	159
Dec.	1915	55	76
Jan.	1915	79	121
Jan.	1916	50	90
Feb.	1915	75	117
Feb.	1916	39	73

Under the wet regime, far more men were sent home than were arrested when there was any possibility of getting a saloon or without harm, to the Free Lodging Lodge and Free Dry regime, many of the former inmates were sent home with their family and will gathered under their arms.

THE LIQUOR VOTE OF KENT COUNTY

Mr. Hudson States the Election Was a Severe Blow for the Wets.

Lansing, Mich.—"If George Ellis had not been defeated in Grand Rapids the Anti-Saloon League would be probably would have had a very hard time in carrying the prohibition campaign in comparation with the success which is so adverse to the interests of the liquor dealers," said Mr. Hudson, president of the Michigan Anti-Saloon League. Through the defeat of Ellis, the Wets said, the liquor interests lost their strong hold on the great Grand Rapids campaign.

He says that the Wets have made the notion that Ellis defeat was a blow to all interests in the liquor business the whole state. He is informed that Ellis was beaten by the liberal element and not by the prohibitionists in manner but to lead the liquor forces. He said the Wets had made Ellis the anti-saloon mayor of Grand Rapids, the anti-saloon mayor who appointed Ellis chief of police of Grand Rapids and who sought to cut out the bad features of the Grand Rapids saloons, to make a prominent factor in the anti-saloon fight.

"The University of Michigan is not should be wholly rid of saloons is the conclusion of Harry S. Mason who is in charge of the inter-collegiate movement. Mr. Mr. Mr. who travels in all parts of the state he is convinced that thousands of alumni, and other thousands who are present of students at the State University will do anything in their power to abolish saloons in the state because thereby Ann Arbor will be made a dry town.

"Nineteen-twelfths of the students and faculty in the State University are on the dry side today", said Mr. McCain. "This statement may surprise you but it is a fact. Opinion and practice at Ann Arbor as to drinking have been steadily changing for the better in the last three years. I believe the state University alone will furnish us five hundred workers for this campaign and we may have three hundred at headquarters.

"Every educational institution in Michigan is being organized for the campaign of education showing the evils of liquor as a beverage. An army of five thousand students from the various colleges will be busy during the summer vacation distributing literature, canvassing communities and making speeches. Drinking will be a feature of the campaign. I am now enrolling workers."

Highway Improvement

INCREASING VALUE OF LANDS

Immense Uncultivated Area Cannot Be Developed Until Improved Highways Are Constructed.

There are over 400,000,000 acres of unreclaimed land in the United States awaiting development that cannot be developed without improved highways. It has been shown that the value of land is increased evenly with the improvement for the roads, the increase running from 62 to 89 the acre. As the roads are improved there is a corresponding increase in population. In twenty-five counties, taken at random, which have contained on an average only 14½ per cent of improved roads in the decade 1900 to 1909, there was a falling off in population in 19 county in county. In twenty-five other counties, taken at random, in which there was an average of 41

Good Road in Nebraska.

per cent of improved roads, the increase in population was 21 per cent. The back-to-the-farm movement will progress just in proportion to the improvement of the highways, and the improvement of the highways is dependent upon substantiation not less than upon concession.

There must be skill in the supervision as well as in the building of the roads. Therefore at least nine-tenths of the work on the roads has been done under the direction of men without any knowledge of roadbuilding, which is an art based upon a science. There are today more than 100,000 petty road officials in the United States who have no practical knowledge of the simplest engineering problem that must be solved in the location of the roads, in their relation to a general system, or to related systems. They are supposed to have exact technique in neighborhood politics and are made at the polls. It is from this fetishism that the problem must be solved if the country is to enjoy the benefits of a well ordered system of highways.

Good roads not only cost a great deal of money in their construction, but also in their maintenance or administration. It has been the habit in this country to work on the roads for a few days in the year, and this has meant that the roads have been neglected for the rest of the year. Macadam roads do not take care of themselves, concrete roads should have constant attention, sandclay roads require daily supervision if they are to give service for which they were designed and built. In Prussia every mile of road is inspected daily, and it is the constant vigilance of road supervisors that enables the railroads of the country to take care of the business of the country. There ought to be the same sort and degree of supervision of the roads of the United States if they are to give the service for which they are built. To make a mile of macadam road eight feet wide and eight inches thick, 1,760 tons of stone are required, and to make a mile of gravel road eight feet wide and eight inches thick, 1,142.93 cubic yards of compacted or, 1,866 cubic yards of loose gravel are required, and in order that the best results may be secured there must be competent supervision not only in the mixing of the materials employed in the building of the roads of the several types, but in the placing of materials.

There are 2,500,000 miles of what are commonly called "dirt roads" in the United States and to make them effective there must be proper drainage, good grading and alignment. We will make them fit for the traffic and consent surface betterment, and it is nothing short of criminal waste to build roads of macadam and expect them to take care of themselves. Undoubtedly the best system of maintenance for all roads is that which provides for the permanent and sometimes continuous employment of skilled laborers who have charge of particular sections of road, or who may be assigned to any part of the county or other road unit where there is work most needed.

Good Roads in Philippines.
The Philippines in the first half of 1915 built 126 miles of road.

Build Better Roads.
Every rain is an argument for the 365-day road.

Neighbors and Builders.
Good roads are neighbor makers and trade builders.

Food for the Stock.
Good stock must have good food and plenty of it.

Early Mail Communication.
San Francisco's first regular overland communication with the East was established by pony express in 1860, the charge for postage being $5 for half an ounce.

Loss Caused by Insects.
It is estimated that the annual loss to agriculture in this country from the depredations of insects and rodents alone is $10,000,000,000—about $1 a month for every man, woman and child in the United States.

Good Roads in Mississippi.

GOOD ROADS

SOUTH CAROLINA ROAD COST

State Is Far Behind Most Others in Amount Spent for Improvement of Its Highways.

There are now only four states in the Union that have not enacted laws providing for state aid for good roads work. One of these states is South Carolina, the others being Indiana, Mississippi, and Texas. Three times other states, however, are above South Carolina in expenditures for road work. Indeed, according to information which has been received at Clemson college from the United States department of agriculture, this state ranked bottom of its record in road work and is considerably behind most of the other states of the Union in this respect.

In 1914, South Carolina spent $1,000,000 on road work, this money coming from local funds of counties, townships, and districts. There were no expenditures by the state and local units jointly, or by the state alone in the same period. Indiana spent $13,253,761 and Iowa spent $11,023,000. Not long South Carolina compares well with even the other southern states. As against this state's $1,000,000, North Carolina spent $2,200,000, Georgia, $2,500,000, Alabama, $2,750,000, Mississippi, $2,865,000, Tennessee, $2,900,000, Texas, $3,100,000. In fact, the only states on the list which spent not above South Carolina in road expenditures are the undeveloped states of Arizona, Nevada, New Mexico, Utah and Wyoming, and the dwarfed five commonwealths of Delaware, Rhode Island, and Vermont.

The total of all surfaced roads in South Carolina is 4,885 miles. In this respect the state compares favorably with many, since its percentage of surfaced roads is 17.3, making it the thirteenth state in the Union in percentage of surfaced roads. Three states, Ohio, Indiana and New York, contain nearly one-third of all the surfaced roads in the United States, with a mileage of 77,544.

New York has spent $82,638,749 on its roads and is spending $15,000,000 more on them in 1916. This, it should be understood, is the amount spent by the state government and does not include the huge expenditures by local units.—Clemson College Bulletin.

GOOD ROADS QUITE POPULAR

Spirit of Building Is Becoming Universal—All People Would Receive Some Benefit.

The United States Good Roads association at its recent annual meeting in Birmingham showed 21 prominent citizens of different sections of our country life members of the organization. The spirit of building good roads is becoming universal and it is only a question of a very short time when the federal government will see the necessity of appropriating money to build good roads. All people would be benefited by good roads. War benefits no country or people. It destroys lives, business, homes and brutalizes people.—Florence (Ala.) Herald.

Roads Built by Convicts.
One thousand miles of perfect roadway have been constructed by Colorado convicts in the past seven years. At first armed guards were used, but during the second summer the honor system was introduced and it is still in vogue.

Uniform Material.
It is important to have uniform material in road building, whatever that material may be. This task is reasonable for wariness and chuck holes.

Good Roads in Philippines.
The Philippines in the first half of 1916 built 126 miles of road.

Build Better Roads.
Every rain is an argument for the 365-day road.

Neighbors and Builders.
Good roads are neighbor makers and trade builders.

Food for the Stock.
Good stock must have good food and plenty of it.

Early Mail Communication.
San Francisco's first regular overland communication with the East was established by pony express in 1860, the charge for postage being $5 for half an ounce.

Loss Caused by Insects.
It is estimated that the annual loss to agriculture in this country from the depredations of insects and rodents alone is $10,000,000,000—about $1 a month for every man, woman and child in the United States.

Prevention and Intervention.
An ounce of prevention is worth a pound of intervention, but it must be used at the right time.—New York Sun.

Composition of Wheat Grain.
A grain of wheat is composed of four parts: the husk, which consists of five layers of bran; the germ, or embryo; a thin membrane inclosing the starch cells, and the germ. During the milling process the bran coats and the germs are removed.

Mammoth Deposits.
Mica deposits sufficiently large to develop called in twenty states.

Why Is a Vixen.
"Mamma, what is a vixen?" asked Vivien of her mamma, who was discussing this favorite of all face exercises. "Why, a vixen, baby—well, why, a vixen is a pepper," she explained. Silence for five minutes. "Mamma," asked Vivien, "can you pass without gaping?"

Miserable Happiness.
"Some folks," said Uncle Eben, "is so terrible busy train to look like dey was happy dat dey makes dese yeh perfecky miserable."

Worth While Question.
Strong impulses are but another name for energy. Energy becomes turned to bad use, but more good may always be made of an energetic nature than of an indolent and impassive one.—John Stuart Mill.

FIVE HISTORICAL PROGRESS POINTS

THE FIGHT AGAINST SALOONS SHOWS GAINS MADE SLOWLY BUT WERE CONSTANT

VOTER CAN PUSH WORK ON

The Steady Cooperation Is Inspiring and Results Will Benefit Every Good Citizen of Michigan.

Five points in Michigan history mark the progress of the fight against the saloon: statutory prohibition in 1853, constitutional prohibition defeated in 1887, local option begun in 1889, liquor laws amended in 1909, 1911, 1913 and the submission of constitutional prohibition in 1916.

Statutory prohibition was adopted in 1853 and remained on the statute books until 1875 when it was replaced by the present license law.

Prohibition by constitutional amendment was submitted to popular vote in April 1887. The issue had been troublesome for several campaigns in state politics. Leaders of the dominant party agreed that it could no longer be avoided. In a total vote of 807,837 the prohibition amendment was defeated by a majority of 5,654.

In 1889 a local option bill was passed with the county as a unit. This law has been frequently amended and improved. Under its provision Van Buren county in 1890 was the first county in the state to vote out saloons and although several contests have been waged in that county it has remained dry to this day. During the following ten years, eleven counties, at different times, outlawed the saloons but owing to lax law enforcement, due largely to serious defects in the law itself, all of them returned to the license column.

In 1896 the Anti-Saloon league of Michigan was organized with W. H. Fox of Grand Rapids president and J. F. Brant of Ohio superintendent. During the twenty years passed, this organization, in cooperation with many other Anti-Saloon agencies and societies in the state has done heroic service for entire abolition of saloons for Michigan.

Through persistent cooperation of many forces allied against the saloon a total of forty-five counties was secured up to April 3rd, 1916. Since 1887 no legislature would consent to submit such a prohibition amendment to the constitution, but at the 1913 session the legislature agreed to permit the electors to vote on a proposition so the constitution could be amended by the initiative and referendum as well as by the old way of direct submission after a two thirds vote in the legislature.

The Michigan Dry Campaign committee was organized at Lansing in the fall of 1914, to wake a campaign on behalf of the organized churches, farmers clubs, workingmen, business men's association, W. C. T. U. and other organizations opposed to the saloon. With the cooperation of these forces in city and country petitions were circulated last winter to be filed at Lansing not later than July 1st.

The history of the local option campaign in Michigan counties would make a book by itself. By determined fighting each county was carried and in legislative districts, the Anti-Saloon league and other prohibition forces made such an impression on the state legislature that the local option law was amended from time to time and vicious bills urged by the brewers and distillers were defeated.

The legislature convented to pass the Search and Seizure law and an amendment to the Drug law requiring a physician's prescription in some counties for the purchase of liquor in drug stores. Attempts to repeal the local option law were defeated. The Fray bill was passed regulating liquor shipments into dry counties.

Previous to this amendment the number of dry counties had gone back from forty to thirty three but the tendency in recent years has been towards increasing the dry area of the state.

The Bar.

Written by a life convict in Joliet, Ill., prison:

The saloon is sometimes called a bar —that's true.
A bar to heaven, a door to hell;
Whoever named it, named it well,
A bar to manliness and wealth;
A door to want and broken health,
A bar to honor, pride and fame;
A door to grief and sin and shame,
A bar to home, a bar to prayer,
A door to darkness and despair.
A bar to honest, useful life,
A door to brawling, senseless strife,
A bar to all that's true and brave;
A door to every drunkard's grave,
A bar to joys that home imparts;
A door to tears and aching hearts.
A bar to heaven, a door to hell;
Whoever named it, named it well.

Seattle a Thirsty City.

Seattle, Wash.—"Consumption of water in Seattle has increased to such an extent since the prohibition law went into effect January 1 that the hotel keepers desire a reduction of their water rates. A petition signed by 75 of the leading hotel was on file with the city council asking for a 25 per cent reduction in water rates.

Flavoring With Corncobs.
Making incisions across the corn from the cobs and add a little cold water to it, making it as creamy as possible. Then place the cobs in the kettle with the beans and boil until time to put in the corn. The result will be a sweetness and creaminess not usually found in succotash.

In Leap Year

By GEORGE COBB

Copyright, 1924, by The McClure Newspaper Syndicate.

There were two predominating features, dread and timidity, in the thoughts and actions of Hubb Burton as the leap year came in and he was made the target of organized mirth and raillery on the part of those who fancied they could play upon his weaknesses.

"You're a selected victim, Burton!" declared more than one of his little town club of which he was a member. "Oh, he'll never escape through the mesh!" insisted others. "You'd better keep away from the trap of social functions!"

"I rarely favor them," observed Burton gravely.

And have a bodyguard," was the further advice. I understand that the girls clubs had got out a regular program, with dates and victims. Not a unmarried man in the town will escape."

Yes, and a well-liked individual like Burton will be the especial object of persecution!"

Hubb Burton smiled, but it was not a natural smile. Dreams had wandered him a shrinking, self-deprecating element, and he had never suspected. At twenty-eight he found himself a reverend young man, with an inborn veneration for all womankind, yet bashful and retiring. If he had ever dared, he had never been able to summon up the courage to confess the fact to anyone, even to the sister.

A confirmed woman hater," was the snappy ultimatum of more than

"Ee—That is Strange."

one of those disappointed, for in intelligence and fortune Burton was a most desirable "catch."

The "boys" at the club were fond of jokes, and the arrival of the month with 29 days in it found them wicked designs.

"Now, look, you want to rush the program hot and heavy!" was the decision of the president, a tireless and chief maker and therefore the plot to give Burton a period of misery was set in motion.

A young lady called twice, sir," was the announcement of his landlady, two evenings later, when Burton came home from the office.

He colored and fidgeted. Visits from young ladies comprised a proceeding to which Burton was as strange as stranger. He could not even recall where recently he had passed command with a member of the opposite sex so far as a single block on the public streets.

Er—that is strange. Leave any name?" Ah, perhaps my sister from Smithville."

"Oh, no, sir—I know her," declared the landlady. "She was a stranger. Your visitor was young and graceful and acted very anxious to see you. It struck me she was quite mysterious. And when she left I noticed she joined two other ladies in the street."

"Williness!" gasped Burton to himself. "If she came from the club, curtailing exercise of the leap-year privilege by the female sex this year is true, I fear I am going to be the object of some amusement."

For three days Burton did not go home to dinner. For three evenings he went without a light in his room and barricaded the doors. His "veiled lady visitor" did not appear again, however. He began to feel relieved, when a letter reached him.

Its pages were delicately scented and the handwriting was exquisitely dainty. Its sentiments were burning, professing "the ardent admiration of a longing soul seeking a life ideal" and begging it in him. It promised further epistles. It suggested that he wear a pink carnation in his coat the next day, in order that his correspondent might know that her continued attentions might not be distasteful to him.

That especial morning Burton buttoned up his coat tightly and reached his office by unfrequented byways. He stayed away from the club, he had serious thoughts of taking a vacation. When one day a bouquet was delivered, he decided that affairs had reached the limit. He was so disturbed he decided to take a day off.

Burton made for the outskirts, craving for a day's solitude in the woods. As he passed a certain house he gave one startled glance behind him and quickened his pace. His blushing cheeks and his hair, in fact, a faded lady of uncertain age waving her hand from an upper window, had fleetingly not to hear. He saw her throw a tight wrap over her shoulders. "So she has run out of the front door."

"Dreadful!" gasped Burton. "I do believe she is going to follow me. Yes, she is, and long ago—say! she may be the one who sent me those letters."

In desperation Burton edged off the street. A row of bushes protected him. How was he to know that Miss Cecilia Dempster was simply seeking from him a contribution to the town relief fund for the poor?

Then as he glided through the open doorway of a great barn and realized where he was, Burton flushed to the roots of his hair. Why! he had invaded the precincts of the Morton home, and Ruth Morton was a very dear name to him, although he had never told anyone so—no one, not even Ruth herself, who would have been pleased to learn the fact.

Twice he had been Ruth's escort to a town entertainment. Then he had been too bashful to call. Often he had thought of her. Now he dodged back farther into the barn. Ruth, four of her little sisters and Mortons accompanying her, were making straight for his retreat.

"Why, Mr. Burton!" exclaimed Ruth, and she looked really pleased, though flustered, as she came upon him—"is this your long-looked-for call?"

"Er—why, yes," declared Burton in stumbling tones, feeling that he was acting like a dunce. "That is, I—well, I'm taking a day off and you see, sort of putting in the time—"

"Which you can do to decided advantage to us," chirpie the spritelike Ruth. "Myself and this brood have about ten bushels of apples to pare and cut for evaporation. You shall string. Will it please you?"

"Please me! It will be delightful!" declared Burton.

"Then come, sir, you must be aproned like the rest of us."

What a thrill went through his sensitive being as Ruth tied a big kitchen apron around him! What a novelty it to be aided amid the party laughing group, doing his share of the work.

Then there was a grand lunch, then a ramble in the orchard. Nine, ten, ten instead upon his staying to tea, and then there was moonlight, and a feverishly delicious critical review of the garden gate, his own face closer to the charming one of Ruth.

What ever possessed him? What put new courage into his timid soul? What prompted his being so daring, blurting out all the story of his fears and his hopes, he found Ruth his ideal soul sympathizer.

Love, love, love!—it drove him bold as a lion, to the club that evening. His fellow members stared. There was a new Burton revealed. He bore his head high. There was a happy smile on his face.

"Got you yet—the leapyear pirates?" questioned one of the group as he and Jonas Burton into parlor.

"Oh, yes," answered Burton, and there was a cheer and joy in his tones. Jonas pulled his hair. Hubb was. Didn't ask me. Tell it to the world that I am the happiest man it holded. I'm going to be married.

"Miss Dempster?"

"Not so bad that bad charming, lovely, incomparable Ruth Morton!"

THE ORIGIN OF SURNAMES

Those Most Familiar Were Taken Originally From the Occupations of the Holders.

Once upon a time given names were the only names in use. One was Tom, Dick or Harry, and that was all there was about it. Our present surnames arose from the nicknames. Then Tom, the Taylor became in time Tom Taylor, and his descendants used Taylor as the family name. The most familiar of our surnames were taken from the occupations of our forebears, as Smith, Baker, Brewer, etc. Many men, moving to new towns, had the name of the place from which they had come fastened upon them. Others took names like Page King and Bishop, from playing those parts in plays. Hogg and Bacon are simple Pictish descriptions from pourcel, meaning little pig. Gain and Grice are old dialect words of the same meaning. Fred Wendlebert Pitchin was polecat, and so the keen student of language traces the beginnings of our names in the old dialects. Some of the nicknames were originally distinctly uncomplimentary, as Sly for sly. Cameron for crooked nose and Kennedy for well ugly head. Grace developed from grace of form. Anglican Guy.

Hot Indorsement.

An amusing illustration of a very excusable misuse of idioms comes from Calcutta. Mrs. Ada Lee tells the story: "The Lee Memorial Normal Training school need a teacher, a pundit, as such a one is called in India, for mathematics. An advertisement was inserted in the Calcutta Statesman. There were many applicants, one of whom promised enthusiastically, 'If you will give me the position I shall not cease to throw hot water into the institution from the time I enter until I leave.' Of course, the pundit supposed that his efforts would have just the opposite effect from throwing cold water on the enterprise."—World Outlook.

Making One's Life Blessing.

Letting go the unworthy; things that meet us—disease, worry, discontent, and selfseeking—and taking loyal hold of time, work, present happiness, love, duty, friendship, sorrow, and faith, let us so live in truth as to be an inspiration, strength, and blessing to those whose lives are touched by ours.—Anna Robertson Brown.

A Fly in Fire.

"Our childhood ambitions are seldom realized."

"Too true.

"Life with me is just the reverse of what I thought it would be."

"How so?"

"I thought I was going to set the world on fire, and now I am doing selling insurance."—Louisville Courier-Journal.

Difficult Diet.

"You Americans are becoming a race of dyspeptics," remarked the observant visitor. "You are too impatient."

"Maybe that isn't it," replied the quiet citizen. "Maybe it's all due to the habit we have got into of swallowing our indigestion."

The KITCHEN CABINET

Life is worth while. Its work is not superfluous. Its joys are not superficial. Its discipline is not unnecessary. When disappointments come, face them courageously.

Wondrous is the strength of cheerfulness.

MEALS FOR SMALL FAMILY.

When buying chicken, save the wing tips, neck and giblets for soup.

Save the white meat for creamed chicken or for pudding and one may have several meals from one chicken.

Chicken Pudding or Souffle.—Chop five cooked white meat of the chicken, then rub it fine. Put half a cupful of dry bread crumbs with a cupful of milk over the fire to soften, add the chicken, salt, pepper and the yolks of three eggs, beaten. Mix well, then fold in the well-beaten whites and put into a buttered baking dish. Bake in a moderate oven twenty minutes or until it is firm. Serve at once or it will fall.

It is much better to entertain two or three guests on different days than to give a large affair which upsets the routine of the home. On the day of the day before entertaining for an evening company one might have cookies, then the cold slice meat may be used in various ways or served in sandwiches for the evening.

A pineapple or Malan cheese keeps well and is perhaps a more economical choice to buy unless cheese is bought in very small quantities.

Left-over fish may be served in a cream sauce or in a salad, making a good dishes so that one not boy a fish, boil or bake it and not feel that it is too expensive for the small family.

The following is a good dinner menu for the small family: Tomato soup, broiled slice of fish with lemon butter, potato balls, sliced cucumbers with French dressing, apple pie, cheese and coffee.

Mutton Boudins.—Take a pint of finely chopped mutton, previously cooked. Cook tapioca for two minutes two tablespoonfuls of soft crumbs and half a cupful of stock or water; add a tablespoonful of butter and the meat nicely seasoned with salt, pepper and onion juice and two well beaten eggs. Fill into greased custard cups. Set in a pan of boiling water and bake until firm. Turn out and garnish each boudin with parsley.

Lack of concentration is not fatal. A mind wandering is a mind distressed.

One doesn't learn much while talking, which may explain why some people know so little.

VEGETABLE DISHES.

Cabbage is one of our wholesome vegetables and if properly cooked is a most delicious dish. Unfortunately it is usually easily digested. Uncooked cabbage is more easily digested than cooked, but if the vegetable is cooked in an open kettle allowing the odors to pass off with the steam, it is found to be more easily digested.

Cabbage With Pork.—This is a homely old-fashioned dish, but very appetizing. Place half a pound of salt pork in a kettle of boiling water and cook gently for three hours. Place the cabbage in the kettle with the boiling pork and cook until the cabbage is tender. Serve with vinegar. Smoked ham or bacon may be used instead of the pork, if liked.

Celeriac.—This is a delicious vegetable native to our German friends, and one that should be more often grown. The roots, not the stalks, are used. They are about the size of a turnip. Pare the celeriac, cut in thin slices and let stand in cold water, drain from this water and drop into boiling water and cook until tender. Drain and rinse in cold water, then reheat in a rich white sauce and serve. Celeriac makes a nice cream soup, or simply cooked and seasoned with butter, salt and pepper and used as a vegetable with chicken it is most appetizing.

Force mashed and seasoned potato through a ricer into a buttered baking dish, place in the oven to brown.

Gypsy Stew.—Cook together small carrots, new onions, green peas and potatoes until tender, then add two slices of diced salt pork, fried brown, to the drained vegetables, and season well with salt, pepper and rich milk, heated to the boiling point. Serve hot.

Common American Birds

Interesting information about them supplied by the Bureau of Biological survey of the United States Department of Agriculture

Mocking Bird
(Mimus polyglottus)

Length, ten inches; not easily distinguished from the similarly colored loggerhead shrike by the absence of a conspicuous black stripe through the eye.

Range: Resident from southern Mexico north to California, Wyoming, Iowa, Illinois, Maryland, casual farther north.

Habits and economic status: Because of its incomparable medleys and

imitative powers, the mocking bird is the most renowned singer of the western hemisphere. Even in confinement it is a masterly performer, and formerly thousands were trapped and sold for cage birds, but this reprehensible practice has been largely stopped by protective laws. It is not surprising, therefore, that the mocking bird should receive protection principally because of its ability as a songster and its preference for the vicinity of dwellings. Its place in the affections of the South is similar to that occupied by the robin in the North. It is well that this is true, for the bird appears not to earn protection from a strictly economic standpoint. About half of its diet consists of fruit, and more cultivated varieties are attacked, such as oranges, grapes, figs, strawberries, blackberries, and raspberries. Some but less than a fourth of its food is animal matter, and grasshoppers are its largest single element. The bird is fond of cotton worms, and is known to feed also on the chinch bug, rice weevil, and boll weevil. It is unfortunate that it does not feed on injurious insects to an extent sufficient to offset its depredations on fruit.

Killdeer
(Oxyechus vociferus)

Length, ten inches; distinguished by its piercing and oft-repeated cry—killdee.

Range: Breeds throughout the United States and most of Canada; winters from central United States to south America.

Habits and economic status: The killdeer is one of the best known of the shorebird family. It often visits the farmyard and commonly nests in pastures or cornfields. It is rather suspicious, however, and on being approached takes flight with loud cries. It is noisy and restless, but fortunately most of its activities result in

benefit to man. The food is of the same general nature as that of the upland plover, but is more varied. The killdeer feeds upon beetles, grasshoppers, caterpillars, ants, bugs, caddis flies, dragonflies, centipedes, spiders, ticks, oyster worms, earthworms, cutworms, leeches and other crustacea. Among the beetles consumed are such pests as the alfalfa weevil, cotton-boll weevil, clover-root weevil, clover-leaf weevil, pine weevil, billbugs, white grubs, wireworms, and leaf beetles. The bird also devours cotton worms, cotton cutworms, Israelites, mosquitoes, cattle ticks, and crawfish. One stomach contained hundreds of larvae of the alfalfa weevil, one of the most troublesome species. The bill peers everywhere upon the earth that are annoying to man and injurious to his stock and crops, and this should be enough to remove it from the list of game birds and insure its protection.

Ruby-Crowned Kinglet
(Regulus calendula)

Length, about four and one-fourth inches. Olive green above, soiled white below; concealed feathers on head (crest) bright red.

Range: Breeds in southern Canada, southern Alaska, and the higher mountains of the western United States; winters in much of the United States and south to Guatemala.

Habits and economic status: In habits and haunts this tiny sprite resembles a chickadee. It is an active, nervous little creature, flitting hither and yon in search of food, and in spring stopping only long enough to utter its beautiful song, surprisingly loud for the size of the musician. Three-fourths of its food consists of weevils, bugs, and flies. Beetles are the only other item of importance (12 per cent). The bugs eaten by the kinglet are mostly stinkers, but they are the most harmful kinds. Ten specimens of aphids, or plant lice, are pests and often do great harm to trees and smaller plants, while plant lice and scale insects are

with wholly whitish underparts that have a light line over the eye.

Range: Breeds throughout the United States (except the South Atlantic and Gulf States) and southern Canada; winters in the southern United States and Mexico.

Habits and economic status: The rich, bubbling song of this familiar little house wren is one of the sweetest associations connected with country life. Nesting in a tin can, a hollow log hill, sharp eyes, and strong feet are qualifications that enable such birds to find a place in the world. Nothing is too inaccessible for the house wren, and it has a light line over the eye. With fish—potatoes are always served.

The message of wisdom is to know that you is first, and that real life is now, because it is the only life.

It is better to know less than to know much that isn't so.—Josh Billings.

FOOD FOR PRIME OF LIFE.

Nature's plans cannot be thwarted. As a man sows he must reap. At fifty, if men and women have lived correctly, physical and mental powers should be at their best. The manner of living then decides whether these powers continue to a ripe old age. The food we eat is the springs from the river of enthusiasm, and he is never old who keeps in touch with the moving stream of life. The vital and mental nourishment cannot be separated and it is yet one of the unaccountable things that we will not remember it. A perfect old age has its foundation laid in youth. One cannot defy all the laws of God and man for twenty years and expect to enjoy old age. Defiance has never failed to reap of the seasons which embitter life and spread from humanity food of a miserable crop in diet. The child in the mother of his country, and the appropriate food. After the building process is complete he needs only enough food to keep the machine in good repair.

Business men are as unwise in their noonday lunches as are their wives when they criticize because husband comes of a cocoanut cake and a cup of cocoa. One is as absurd as the other. The man who bolts hearty food, burrying through the meal back to his work simply has no time for death-bed confidences.

A wholesome meal for a brain worker, who takes time to masticate it, is a small piece of red meat, cauliflower, or a baked potato, a sliced tomato, some boiled rice or a baked apple with cream, cup custard or sponge cake with stewed prunes, whole-wheat bread, with plenty of butter, and a moderate use of coffee.

Nellie Maxwell

Poisonous Javanese Snake.

As everyone will instantly comprehend, the amazingly of Java, a very poisonous snake, is so called from his umbrellike hood. The creature makes a peculiar noise by the nimble shoving of its tongue and a slight touch of its fangs is fatal.

Uses for Apple Wood.

Apple wood, said almost exclusively for saw handles, also furnishes material for the large wood type used in printing signs and posters.

What She Meant to Imply.

"Life"—the name is sure, I don't know why, unless it was because it because I have failed to realize your expectations." Sue—You mustn't mind me completely. All that I have done is to express my conviction that you have more than justified my fears.

Daily Thought.

It is best to know enough no doubt; but to love foolishly is better than not to be able to love at all.—Thackeray.

In the Same Boat.

"I say, old man," began Jenkins, a chronic borrower, "I'm in a terrible fix. I want some money badly and haven't the slightest idea where on earth I'm going to get it." "Neither have I," declared Hilkins, stalking off

New Source of Wealth.

Experiments have shown that the Chinese wood oil tree, from the nut of which an oil used in varnishes is obtained, can be successfully grown in northern Florida.

Good Furniture Polish.

Mix equal parts of boiled linseed oil, turpentine and vinegar. Rub well and Shake well each time before using. Apply with a woolen cloth, then polish with a dry cloth. This makes all marks and scratches disappear and furniture looks like new. It is very inexpensive and is better than the best furniture polish on the market.

To Determine Painting's Age.

According to a London chemist, the surest way to determine the age of a painting is to analyze the pigments.

Persistent Advertising Pays.

One great, flashy advertisement may attract attention and also lang some orders, but it is the steady, persistent advertiser whose results are uniformly satisfactory. It does not do to advertise spasmodically. Your results will be far better, if you use small space continuously than to "plunge" and then stop.—Western Monthly.

There seems to be a league for everything except the suppression of the open-faced sneeze.

What Becomes of the Opals.

The reported great shortage in the United States may be due to anything from latent interference with neutral trade to the fact that neighbors with auto honk loudly before the house when returning home at midnight. What becomes of gotten goats is another of those questions like that concerning the whereabouts of lights that go out.—Springfield Republican.

Colorado has the highest automobile fund.

BEGIN HOT WATER DRINKING IF YOU DON'T FEEL RIGHT

Says glass of hot water with phosphate before breakfast washes out poisons.

If you wake up with a bad taste, bad breath and tongue is coated, if your head is dull or aching; if what you eat sours and forms gas and acid in stomach, or you are bilious, constipated, nervous, sallow and can't get feeling just right, begin drinking phosphated hot water. Drink before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it. This will flush the poisons and toxins from stomach, liver, kidneys and bowels and cleanse, sweeten and purify the entire alimentary tract. Do you inside bathing immediately upon arising in the morning to wash out of the system all the previous day's poisonous waste, gases and sour bile before putting more food into the stomach.

To feel like young folks feel; like you felt when your blood, nerves and muscles became loaded with body impurities, get from your druggist or storekeeper a quarter pound of limestone phosphate which is inexpensive and almost flavorless, except for a sourish tinge which is not unpleasant.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels. Men and women who are usually constipated, bilious, headachy or have any stomach disorder should begin this inside bathing before breakfast. They are assured they will become real cranks on the subject shortly.—Adv.

Wrong Diagnosis.

"Your condition is very serious," said the doctor to the nervous patient indeed. What ailes you?"

"The patient seemed puzzled. "But, doctor—" he began.

"There's no but about it," insisted the physician. "A complete change of scene is the only thing that will cure you."

"Or a scene shifter."

Many School Children Are Sickly.

Children who are pinfaced, feverish, cross will get immediate relief from Mother Graves' Sweet Powders for Children. They cleanse the stomach, act as a laxative, and are recommended by thousands of mothers. Sold by druggists everywhere. Used by mothers for 35 years. All Druggists, 35c. Sample FREE. Address, Mother Graves Co., Le Roy, N. Y.—Adv.

Keep a-Moving Along.

There never was a time in the history of the world when it takes so much to make a person of movement as today. We are none of us content to live our lives in one place. We must all be going somewhere in search of the substantial necessary, one of the most troublesome species. The bill poster ever exclaims against those that are annoying to man and injurious to his stock and crops, and this should be enough to remove it from the list of game birds and insure its protection.

HE GUIDES the NATION'S ARMY

THIS is a sketch of Newton D. Baker, President Wilson's new Secretary of War, formerly Mayor of Cleveland.

NEWTON D. BAKER," I had been told by a man well acquainted with him, "is the kind of a man that good citizens we all approve of highly—and fail to imitate. He has lived ideals. He has high principles. He is utterly free from all the little petty and unaffected bots in thought and life. He has a clear, well-disciplined mind. He has an extraordinary power of concise and effective speech. Without being in the least effeminate, he is a good talker. You will find him full of charm. Out in Cleveland he died in a modest frame house with his wife and three children, smoked fifty cigars a a 25-cent pipe, drove his own Ford, and for amusement read Greek and Latin books on the street cars. Thus runs an article by Rowland Thomas in the Sunday World.

"It is interesting to notice," my informant added, "that he is the second of Tom Johnson's disciples to be lifted into prominence. Johnson's friend, Brand Whitlock is the other. It is hardly exaggeration to say that Brand Whitlock, in Belgium, has proved himself a great man. Will Baker be as successful in the war department? Frankly, much as I like him personally, I am wondering whether he will measure up to the job. What he has done he has done well. But—he has never been tested out in really big affairs. Has he the capacity for them? You know a Secretary revolver may be a perfect weapon—as a revolver—but fail lamentably if pressed into service as a peacoat gun! Is Newton D. Baker big enough to be secretary of war at a time like this? That's what I'm asking myself. That's what the country is asking itself. I think."

Naturally those remarks ran through my head as I talked with the new secretary of war last week. I saw him twice, once in his modest hotel room at the Cleveland club, where he is living for the present as a bachelor "because the children are in school in Cleveland and we don't want to break into their year." The second time he was in his office in the war department, the office to which one penetrates through that dread antechamber where hang the portraits of all the previous incumbents of the office.

On both occasions I got the same impression of the physical man. Nature, in molding his body, did a neat job. He is a markedly small man, but in proportion all the way through. He never carries no suggestion of the dwarfish. His head is large, but not enough so to make him look top-heavy. His hands and feet are of medium size, well formed and muscular. He has a chest big enough to broaden his shoulders, but none so adipose lapping. His skin is swarthy, his hair dark and curly, his eyes dark and full of life, but comprehensive rather than keen; the eyes of the student or, at a pinch, of the man of life; the brow of a scholar; a face in general in which the peripatetic lines of strength are accentuated to some extent by a pointed friendly, a bearing which I should call attentive rather than alert—there is no suggestion of the "Ca ira" in his manner.

His mentality is not so easily characterized. I'd like to practice and perfect myself in a series of rather detached glimpses, as he himself revealed it to me in the course of our conversation.

Our talk ranged over many topics. We had, for instance, been talking about the extraordinary amount of reading of standard English authors he had done before he was twenty years old, and I asked him where he had learned that the author tongue thus acquired had not been an important element in his university successes. He said: "I think that is true. Ability to express myself effectively in speech and writing is great value to one."

He had a brief sketch of his university history. Mr. Baker was born in 1871 in Martinsburg, W. Va., a mountain town of 7,000 people, whereabouts his father was the leading physician. He was the second of three children. He graduated from the war department. "The circumstances of my case are unusual enough to partake of the romantic. In 1897, when the young and active Democrats of Cleveland were returning from his first visit to Europe, he was table-mate of the late W. T. Stead and a middle-aged Cleveland lawyer, who followed a year of graduate work in Roman law, comparative jurisprudence, economics, and then his law course, which he took at Washington and Lee university, completed in two years, instead of three year. 'That compression,' he told me, 'was done for family reasons. Money was not plentiful in a country doctor's family, and there were other sons to educate.' After his graduation in 1896 Mr. Baker hung out his shingle in Martinsburg to indicate that he was 'willing to practice law,' as he puts it, and remained in that receptive condition until 1896, the last year of the Cleveland administration, when Postmaster General Wilson asked him to Washington to be his private secretary. 'I divided my two cases between the other members of the bar and went to the city.' he said.

In 1899 Mr. Baker was invited to come to Cleveland, O., as a partner with Foran & McTigue, one of the city's leading firms of trial lawyers. He went there, met Tom Johnson and was magnetized by that amazing man into a lifelong local politics and had fourteen years of active campaigning there, serving twice as city solicitor under Mayor Johnson and two terms as mayor after his chief was deposed. He declined to run for a third term, and has been resumed his law practice at the beginning of this year when he was called to Washington.

Returning to our topic, I asked him to what other qualities he ascribed his success as a speaker he felt indebted for what he had accomplished. He pondered that and said:

"Looking at myself impersonally, I am inclined to think I have a very patient mind. I mean by that a mind which moves slowly, which plods forward instead of dashing or leaping. There is nothing brilliant about it. A brilliant mind, it strikes me, is like a thoroughbred horse, good for a race but afterward needing to be stabled for a day or two. My mind is like a plow horse. It cannot spurt, but it can go on turning furrow after furrow. That has served me well, I think.

"By a patient mind," he went on, "I also mean a mind which does not leap to attitudes and decisions, but feels its way. And a mind which does not get its back up easily. Opposition does not make my mind bristle. A difference of opinion is not a personal thing with me.

"And I think," he said, his dark eyes twinkling and his wide lips quirking with fun, "it has been a very decided advantage to me to be so little and to look so young. I really mean that." he hastened to add and cited two instances in illustration. One was his argument before the Supreme court of the United States in the Cleveland traction cases, an argument which attracted the flattering favorable comment of the learned justices. The other was a speech which he made in a water-logged state, as delegate to the Baltimore convention which nominated Woodrow Wilson.

"Neither of those," he commented, "could by any stretching of words be called a great speech. The natural disadvantages of men was what pulled me through in both cases. I looked so young and seemed so much that my boyish face 'Give the boy a chance!'"

Such cases illustrate a prudence inclined me to ask him how life struck him, so to speaking, what attitude he took toward life. "Of the Mosaic law," he said. "That is my one ambition. There is no office or position that I care for. But I'd like to practice and perfect myself in a series of rather detached glimpses, as he himself revealed it to me in the course of our conversation.

Our talk ranged over many topics. We had, for instance, been talking about the extraordinary amount of reading of standard English authors he had done before he was twenty years old, and I asked him where he had learned that the author tongue thus acquired had not been an important element in his university successes. He declined to run for a third term, and has been resumed his law practice at the beginning of this year when he was called to Washington.

Returning to our topic, I asked him to what other qualities he ascribed his success as a speaker he felt indebted for what he had accomplished. He pondered that and said:

"Looking at myself impersonally, I am inclined to think I have a very patient mind. I mean by that a mind which moves slowly, which plods forward instead of dashing or leaping. There is nothing brilliant about it. A brilliant mind, it strikes me, is like a thoroughbred horse, good for a race but afterward needing to be stabled for a day or two. My mind is like a plow horse. It cannot spurt, but it can go on turning furrow after furrow. That has served me well, I think.

"By a patient mind," he went on, "I also mean a mind which does not leap to attitudes and decisions, but feels its way. And a mind which does not get its back up easily. Opposition does not make my mind bristle. A difference of opinion is not a personal thing with me.

"And I think," he said, his dark eyes twinkling and his wide lips quirking with fun, "it has been a very decided advantage to me to be so little and to look so young. I really mean that." he hastened to add and cited two instances in illustration. One was his argument before the Supreme court of the United States in the Cleveland traction cases, an argument which attracted the flattering favorable comment of the learned justices. The other was a speech which he made in a water-logged state, as delegate to the Baltimore convention which nominated Woodrow Wilson.

"Neither of those," he commented, "could by any stretching of words be called a great speech. The natural disadvantages of men was what pulled me through in both cases. I looked so much that my boyish face 'Give the boy a chance!'"

Such cases illustrate a prudence inclined me to ask him how life struck him, so to speaking, what attitude he took toward life. "Of the Mosaic law," he said. "That is my one ambition. There is no office or position that I care for. But I'd like to practice and perfect myself in a series of rather detached glimpses, as he himself revealed it to me in the course of our conversation.

Our talk ranged over many topics. We had, for instance, been talking about the extraordinary amount of reading of standard English authors he had done before he was twenty years old, and I asked him where he had learned that the author tongue thus acquired had not been an important element in his university successes. He said: "I think that is true. Ability to express myself effectively in speech and writing is great value to one."

He had a brief sketch of his university history. Mr. Baker was born in 1871 in Martinsburg, W. Va., a mountain town of 7,000 people, whereabouts his father was the leading physician. He was the second of three children. He graduated from the war department. "The circumstances of my case are unusual enough to partake of the romantic. In 1897, when the young and active Democrats of Cleveland were returning from his first visit to Europe, he was table-mate of the late W. T. Stead and a middle-aged Cleveland lawyer, who followed a year of graduate work in Roman law, comparative jurisprudence, economics, and then his law course, which he took at Washington and Lee university, completed in two years, instead of three year. 'That compression,' he told me, "was done for family reasons. Money was not plentiful in a country doctor's family, and there were other sons to educate." After his graduation in 1896 Mr. Baker hung out his shingle in Martinsburg to indicate that he was "willing to practice law," as he puts it, and remained in that receptive condition until 1896, the last year of the Cleveland administration, when Postmaster General Wilson asked him to Washington to be his private secretary. "I divided my two cases between the other members of the bar and went to the city," he said.

In 1899 Mr. Baker was invited to come to Cleveland, O., as a partner with Foran & McTigue, one of the city's leading firms of trial lawyers. He went there, met Tom Johnson and was magnetized by that amazing man into a lifelong local politics and had fourteen years of active campaigning there, serving twice as city solicitor under Mayor Johnson and two terms as mayor after his chief was deposed. He declined to run for a third term, and has been resumed his law practice at the beginning of this year when he was called to Washington.

Returning to our topic, I asked him to what other qualities he ascribed his success as a speaker he felt indebted for what he had accomplished. He pondered that and said:

"Looking at myself impersonally, I am inclined to think I have a very patient mind. I mean by that a mind which moves slowly, which plods forward instead of dashing or leaping. There is nothing brilliant about it. A brilliant mind, it strikes me, is like a thoroughbred horse, good for a race but afterward needing to be stabled for a day or two. My mind is like a plow horse. It cannot spurt, but it can go on turning furrow after furrow. That has served me well, I think.

"By a patient mind," he went on, "I also mean a mind which does not leap to attitudes and decisions, but feels its way. And a mind which does not get its back up easily. Opposition does not make my mind bristle. A difference of opinion is not a personal thing with me.

"And I think," he said, his dark eyes twinkling and his wide lips quirking with fun, "it has been a very decided advantage to me to be so little and to look so young. I really mean that." he hastened to add and cited two instances in illustration. LONDON PAPERS $6.40 EACH

People in Brussels Pay High for the Allied News—Is Their Chief Luxury.

Paris—A Belgian banker who has been permitted by the German administration to come to Paris on business connected with relief work states that the chief luxury of life in Brussels is the purchase of London and Paris newspapers, which can be had easily if one will pay the exorbitant price demanded.

The Times of London is worth 32 francs ($6.40), the Temps of Paris 32 ($6.40), the Matin of Paris 20 ($4), and the other French papers 18 ($3.60). The penalty for being caught with one of these papers is not severe and is usually not enforced against persons of good standing, but the penalty set by the agency which distributes the papers would be very severe.

The German officials have had no success in running down the distributors, so it is thought that perhaps German soldiers have their hand in it, for the profits on a couple of hundred copies of the Times each day are considerable.

LION CUB AS A PET

The lapdog is rapidly losing his place as a favorite. It is being filled by monkeys, cats, and even little pigs. Miss Helen G. Bonfils of Denver's "Sacred Thirty-six" has adopted as her favorite a tawny lion cub and takes it with her when driving about Denver.

WIG AND GOWN FAIL PORTIA

Would-Be Woman Lawyer's Garb Correct, But Justice Won't Listen.

London.—Wearing the wig and gown of a barrister of the Inner Temple, Lady Ellen Rose completely upset the equanimity of Justice Neville in the law courts the other day when she appeared before him and attempted to plead in a case in which she was interested.

English law will admit no Portias, and Justice Neville politely but firmly told her as much.

"Are you a barrister?" was all the astonished judge could say as his eye fell on her.

"I am a barrister in my own cause," said Lady Ellen.

Justice Neville replied: "The garb that you are wearing is reserved for members of the bar, and I cannot have you masquerading in that costume here."

SLAPPED HIS FACE IN COURT

Nickols Was Accused of Assaulting a Woman and Judge Gave Him Thirty Days.

Canton, O.—A new care for slapping faces has been demonstrated by Police Judge Quinn, who has become noted for the original sentences he hands down.

Thomas Nickols was before him on the charge of slapping the face of Mrs. Bessie Mars, proprietor of the boarding house where Nickols lives. Mrs. Mars was on the witness stand.

"Demonstrate to the court just how Nickols slapped you," she was ordered by the judge. She took the order literally, and, going up to Nickols, gave him a sounding whack across the face with her open hand.

"About that hard, Judge," she said.

"About thirty days to the workhouse for you," the judge ordered, addressing Nickols, as he called the next case.

Something the Grouch Escapes.

A truly courteous man has to listen unfeelingly to the same story a great many times.

Not Retribution.

"The man who introduced the slide trombone in the United States has just died in New York from natural causes."—Boston Transcript.

Those Dear Girls.

Edith—"I think Jack is horrid! I asked him if he had to choose between me and a million which he would take and he said, the million." Marion—"That's all right. He knew if he had the million you'd be easy."—Kansas City Journal.

Friendship.

Friendship springs up and grows naturally; it cannot be planted at will. Foolish friendships are often formed in youth. It is useless to talk against them, since young people always resent criticism of their friends. We must simply tolerate them and trust to the awakenings of common sense to prove all frivolous friendships false and unworthy.

Her Preference.

"I absolutely refuse," says Jessie Wilcox Smith, "to paint the old Dutch girls Field paints—the 'girls will get you' if you don't watch out kind." Miss Smith, it appears, prefers to paint the kind of pictures you think of in reading James Whitcomb Riley's "Raber Calls Me William, Sister Calls Me Will."—Kansas City Star.

Swastika an Ancient Emblem.

The swastika has been employed as a charm from China to Peru, and some archaeologists contend that it is the most ancient form of the cross; others say that it represents the solar movement. Buddhists affirm that it means the union of spirit and matter and that gradual evolution.

HE KNEW WHEN TO ESCAPE

Story Teller Made His Little Contribution to Gathering and Then Left Hurriedly.

Story telling was in progress in the village pub, and the next in turn was a railway plate-layer. Round him gathered an expectant audience.

"It was just such a night as this," he began, "bright and clear, with a touch of frost. I was alone down the line, when I saw before me, lying light across the rails, a great beam. For a moment my heart stood still. Then a distant rumble warned me that the midnight mail was approaching. With a great effort I flung myself between the obstruction and the line, and the great train passed unharmed."

There was a thoughtful silence after he had finished speaking. Then somebody said:

"If you couldn't lift the beam, how did the train get over it?"

"Yes," another interposed, "and if you flung yourself between the obstruction and the express, why didn't you get killed?"

"Both questions are easily answered," said the plate-layer, sidling towards the door. "The obstruction was a moonbeam, and I jumped forward so that my shadow took its place. There—"

He got outside just in time.—London Tit-Bits.

CARRYING TWINSHIP TOO FAR

Elder Brother Protested Against the Accuracy in Duplicate Careers.

They were twin sisters six years old. They ate, drank, slept, worked and played like twins. Their career so far had been almost identical. They had a brother, eight, who looked down upon them with the superior wisdom and experience of his two extra years.

One morning all three were walking to school together. The sidewalks and streets were for the most part covered with ice and snow, making navigation quite difficult even for strong young pedestrians. It was too early for the sun or father to have cleared off the pavements.

Suddenly one of the twins slipped and fell solidly to the sidewalk. No pioneer had she accomplished this grandest descent than the other one did likewise.

"Aw, just because she lost a tooth yesterday and then you went and pulled one of yours out, too, is no reason why you have to fall down when she does," was the disgusted comment of their eight-year-old brother.—Columbus Dispatch.

Expensive Repairs.

In order to stimulate his trade, the village blacksmith hung out a sign that read, "Whatever It Is, I Can Repair It." On the morning of April fools' day, the town wag allowed his way through the island that was collected round the door, and, with pole attached, to the parts of a broken lamp chimney.

"I'd like you to put this together for me as soon you can, John," he said, winking toward the crowd.

The smith took the ragged bits of glass, examined them carefully while the idlers looked on with considerable amusement. Then he went into the room in the rear of the shop. Stepping across the alley to the grocery store, which was out of sight of the crowd, he bought a ten-cent lamp chimney exactly like the broken one. How everyone laughed when he stepped out of his little room a moment later and put the whole chimney into the astonished wag's hands with the dry remark:

"I'll have to charge half a dollar for that job."

What He Would Do.

There is an Irish priest in the province of Quebec who deserves to be popular. He is hale fellow well met with everyone in the village, asks for contributions, and gets them from Protestants and Catholics alike. One day a delegation of "twelve men called on him—men who had frequently contributed to Father W.'s church—told him they were going to erect a new Baptist church, as the old one was too small, and asked him to subscribe to the fund.

"Well, boys," he said, after a slight hesitation, "you know my religion forbids my doing that, but I will give you fifty dollars to help tear the old church down."

Wisdom Cannot Always Save.

Superior wisdom doesn't save a man. A weather prophet catches cold as often as anybody else.

Art of Self-Effacement.

The art of self-effacement may be considered to have made a considerable advance when someone brings out an autobiography without an "I" in it.—Judge.

SLAPPED HIS FACE IN COURT

Nickols Was Accused of Assaulting a Woman and Judge Gave Him Thirty Days.

Canton, O.—A new care for slapping faces has been demonstrated by Police Judge Quinn, who has become noted for the original sentences he hands down.

Thomas Nickols was before him on the charge of slapping the face of Mrs. Bessie Mars, proprietor of the boarding house where Nickols lives. Mrs. Mars was on the witness stand.

"Demonstrate to the court just how Nickols slapped you," she was ordered by the judge. She took the order literally, and, going up to Nickols, gave him a sounding whack across the face with her open hand.

"About that hard, Judge," she said.

"About thirty days to the workhouse for you," the judge ordered, addressing Nickols, as he called the next case.

Invaluable Habit of Thrift.

No one can acquire a fortune unless he makes a start, and the habit of thrift, which he learns in saving his first hundred dollars, is of inestimable value later on. It is not the money, but the habit which counts.—Darius Ogden Mills.

COULD NOT BE KEPT HIDDEN

Many Nations Have Vainly Tried to Prevent Other Countries Purloining Sources of Wealth.

The following national secrets that have become world property are described in Farm and Fireside.

There was a time when the Turkish government prohibited the death penalty on persons caught trying to smuggle dirt of any empire the best Turkish Arcora grain. In 1487, a Californian, Doctor Bailey, brought four goats in Turkey, carried them on mules, camels and in a closed carriage for some hundreds of miles, shamed off their Oriental wool, rolled them in coal dust to make them look coarser and more corporation, and succeed with the astonishing results and a whole skin. The Dutch once had the monopoly of the cinchona ranches in the West and Southwest Indies, with Asiatics from North Africa and other parts of the world.

Once the governments of China and Japan guarded with similar zeal the exportation of the tea plant. Somehow, some, who have need of our allies, however, some forty years ago, and the oriental plantations of southern tea plants is still flourishing in South Carolina.

Fifty years ago Brazil was engaged in an effort to keep the rubber tree in Brazil and in that empire. The seed was smuggled to Ceylon, however, and for half a century East Indian planters have been perfecting the rubber tree until now the best plantations are there, rather than in Brazil, and the Brazilians who want the best varieties send to Ceylon here and other Asiatic countries for their trees for planting.

The Indian lost his goat, the mandarins their tea and the dons their rubber trees—and in return Brazil has given the Asiatics the plague of the water hyacinth and the Mongolians have sent us the San Jose scale, the gypsy moth and several other pests.

"There are at least two ideas to the matter of free exchanges, but it is one of the most fascinating subjects connected with agriculture."

Bibles on Watch-Chains.

The Germans are carrying their own particular way of giving outward demonstration to their piety. In this it frequently takes the form of wearing miniature Bibles as charms on the watch-chain. They are not so attractive form about an inch square and three-eighths of an inch in thickness, and contain the first five leaves of the Old Testament. The text of the book is in Hebrew and the titles in Latin. It is true that the text could not be read without the aid of a powerful magnifying glass, but that does not trouble the Russian "sacred guild"; he places great reliance on the fact that he carries the "word" on his person.

Forgetting Things Learned in Haste.

To commit "points" to memory during a few hours or days of intensive application immediately preceding an examination, for instance, little or no work having been performed during the previous course of the term, is a bad mode of study, say scientists.

Things learned thus in a few hours, on one occasion, for one purpose, cannot possibly have the same mental relations with other things in the mind. Their hasty acquisition and their few paths and are relatively little liable to be awakened again. Speedy oblivion is the almost inevitable fate of all that is committed to memory in this simple way.

A' Ye Blind?

A large firm in Aberdeen, says Pearson's Weekly, recently engaged an office boy a raw country youth. It was part of his duties to attend to the telephone in his master's absence. When first called upon to answer the bell, in reply to the usual query, "Are you there?" he nodded assent. Repeating the question came, and still again, and each time the boy gave an answering nod. When the question came for the fourth time, however, the boy losing his temper, roared through the telephone:

"Man, a' ye blind? I've been noddin' mun head off for the last half hour!"

Good Roads Fill Churches.

The good road kills the country churches. It stands for neighborliness, and, best of all, it leaves good schools all along its line. It keeps the country boy with it. The good road is a sign of culture, humanity, and civilization in a county, a state, or a nation. Does your community stand the test?

Constipation

Is to be dreaded. It leads to aches and pains, to sleeplessness, to Bad Blood, to Pimples, Eruptions and a score of other troubles follow. Don't let Constipation last one day longer. Keep the Liver, Kidneys and Bowels healthy and active. Your druggist or Postmaster, sixty cents.

ORDER FOR PUBLICATION

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

At a session of said court held at the Probate Office in the City of Charlevoix, in said County, on the 24th day of April A. D. 1916.

Present, Hon. SEVERETA A. CORBELL, Judge of Probate.

In the matter of the estate of Peter D. Campbell, deceased.

Claude Campbell having filed in said court her petition praying that a certain instrument now on file in the Probate Office of this County be admitted to probate, and that the administration of said estate be granted to Roger Donald Campbell or to some other suitable person.

It is ordered, that the 10th day of May, A. D. 1916, at ten o'clock in the forenoon, at said Probate Office, be assigned for hearing said petition, and that the heirs at law of said deceased, and all other persons interested in said estate, are required to appear at a session of said court, then to be held at the Probate Office, in the City of Charlevoix, in said County, and show cause why the prayer of said petitioner should not be granted.

And it is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said time of hearing, in the Charlevoix County Sentinel, a newspaper printed and circulated in said county.

A true copy.

CHARLEVOIX SENTINEL.

VOLUME 47 — Charlevoix, Michigan, Thursday, May 25, 1916. — NUMBER 6

Thrift Campaign 1916.

This movement has been planned in every community in our nation. You will see it advertised in the newspapers; the schools; the factory, store and office; the moving picture houses and elsewhere. The plan adjusts itself automatically to large and small cities, counties and agricultural communities.

Many people do not always figure on how much they can save but more often figure for in advance, how they can spend their income. The active season in our city is rapidly approaching and the money-making time is coming. We desire to represent a great number of New Savings Accounts and see the regeneration of countless numbers already opened.

You are urged to participate. If you have not been Saving with any degree of regularity, start in now. $1.00 will open an account in our Savings Department and you can add to it weekly or as often as convenient.

4% Interest paid on all Savings Deposits.

THE CHARLEVOIX STATE SAVINGS BANK

GLEANERS ARE ORGANIZING IN THIS COUNTY

E. H. MAGNANT, STATE ORGANIZER MEETING WITH GREAT SUCCESS IN SECURING NEW MEMBERS

For the past several days E. H. Magnant, state worker for the Gleaners, assisted by local men, has been actively engaged soliciting membership for that order in this county. Several Arbors have been organized.

The Gleaners, contrary to the prevailing opinion among many, do not establish stores nor compete with local retail merchants. They co-operate in bringing trade to a city by the providing of a market which will offer sufficiently attractive prices as to insure farmers hauling their marketable produce to the city. A warehouse is usually erected when the order becomes sufficiently strong and with organization at both ends the cost is lowered to the consumer and profits increased for the producer.

In the providing of adequate markets for that produce which is shipped to other points is an important factor in the upbuilding of the agricultural interests of a community. This is the work for which the Gleaners stand to the farmer, hence to the nearby city. Contrary to being a mail order organization the Gleaners forcefully combat the inroads of the catalogue houses and conduct educational campaigns which foster the spirit of buying at home.

The Gleaners of this locality have a fine concrete block warehouse nearly completed in Charlevoix township, at the foot of Pine Lake.

VACANCY IS FILLED BY REGION BANKERS

At a meeting of the executive committee of Group 2, Michigan Bankers' association, held in Traverse City last week, W. J. Rachow, vice president and cashier of the Charlevoix State Savings Bank, was elected secretary-treasurer of the group to fill out the unexpired term of George C. Glenn, deceased. H. O. Bishop, cashier of the People's State Savings Bank of East Jordan, was elected member of the executive committee to succeed Mr. Rachow.

"RULE G" SHOWS FINE WORKMANSHIP

"I am not surprised that the use of railroad workers as actors has resulted in the production of a notable picture. This was to be expected. The daily life of a railroader is a drama; it develops his dramatic sense. For several years I have been studying the men who makes the wheels go round, and writing him in articles and fiction, and, in my opinion, he is the most intelligent, most dependable and most highly developed workman in the world."

It seems to be the endeavor of successful motion picture producers to work into every picture at least one big "punch." "Rule G" contains six episodes, either of which might qualify as a "bunch" big enough to make the picture a success. The story starts with a thrilling accident on a huge wheel, and the interest is not allowed to relax for a moment during the five reels. It is at first incredible that railroad men with no previous training whatever could have been quickly prepared for the more difficult parts of acting. It is said that many of the scenes were filmed over and over until Director Rice was convinced that he had attained the highest possible effects. That no one was injured proves the great skill with which machinery and trains were handled.—Rufus Steele, in Railway Employees Magazine. At the Majestic Theatre, Friday evening, May 26th.

DeRue Brothers' Ideal Minstrels

Billy DeRue ably demonstrates the fallibility of the old saw, "There is nothing new under the sun." His dialogues and merry quips all bear the hallmarks of originality. It has been truthfully said that Billy DeRue and Lew Dockstader solely evolve the roaring absurdities, which constitute the stock-in-trade of a vast army of imitators on the American stage.

This season he has a new line of talk for his monologue, and a budget of side splitting parodies of his own writing, which is a guarantee that they will please. He will be seen at Charlevoix Opera House on Saturday, May 27, with DeRue Bros. Ideal Minstrels. Prices, 25c, 35c and 50c.

MEMORIAL DAY 1916

By CHARLOTTE M. BRICKER

(Written for the Sentinel.

Comrades, we have lived long since
You fill a soldier's honored grave
Sightless they now, unsoiled unsine
Blow the proud hand you died to save.
Our Lady perched on lofty pine
Conquered from mountain heights descend
Far battle-tossed fairest mess.
Would God, that we with them had died

Broken in spirit, weak of heart,
Sense-jagged, with feeble hands we bear
The tattered and the shoddiest flag
Your flying out free to martial air
Comrades, our duty honoured
Endeavored to an alien land
Our children's children, like the chief
And none reached and waving hand

Years fall today from our dim eyes
Upon your sacrificial, flower-decked
We live too long who live to see
The country that you died to save
Secured and scoff'd by lesser men.
In faith realized, thanked its saviour
Comrades, bowed beneath the fear
In the frayed folds, we hide our shame.

—Ontagon.

A MOLLYCODDLE IN THE CAMP

We have just discovered in glancing over the Elk Rapids Progress, that the editor thereof is an anti-preparedness mollycoddle Henry Ford parallel. There are some of editor Perry's views which we endorse, but he takes large over into politics, dams up the stream of his prolific intellect and with it irrigates but one parched field, to the neglect of others which come within the scope of righteousness, we demur to his declaration.

We make this remark as a republican, which brother Perry is not; and we have not yet discovered an appropriate spot in which to place him unless it be in that political purgatory for which Mr. Bryan is chief custodian.

THE NECTAR OF THE GODS

CHARLEVOIX HAS THE WATER PROBLEM SETTLED FOR AGES TO COME

The liquid chlorine apparatus recommended, in fact practically ordered, by the state board of health has been installed at the water plant and was put into commission yesterday evening at about 5:30. The apparatus was set up and started by G. R. Ellis, who finished his duties today.

This is the same water purification method that has been adopted by about 700 cities and has been giving satisfactory results wherever tried. It is not to be understood that all these cities have the same make of machine as that of Traverse City any more than cities in motorizing their fire departments would all buy the same make of apparatus. The principle and process, however are the same. The liquid chlorine process, moreover, is but an advance in the chlorination method for sterilization that has been in use for about twelve years.—Traverse City Record-Eagle.

About every town on this shore of Lake Michigan is up against a water problem.

For all time the water problem is settled for Charlevoix. We may have our troubles concerning power plants and electric currents, etc., but one our water gets into the mains troubles cease.

Charlevoix water is absolutely pure. It will stand the test of the most scientific analysis. It is Lake Michigan water, filtered through more than a mile of sand and gravel.

If you are not bitten by a microbe until you swallow one in Charlevoix water, you are safe.

SCALDED TO DEATH

WARD AINSLIE, FIREMAN ON TUG J. W. PARMELEE, VICTIM OF FATAL ACCIDENT

Ward Ainslie died Monday morning from the effects of steam scalding last Saturday.

He was fireman on the fishing tug J. W. Parmelee. The tug laid at the dock, having just arrived in with a full head of steam. The engineer directed the fireman to "blow off." Ward turned the blow-off valve, but kept turning until the entire valve was released from the steam pipe, Ainslie receiving the full force of the blast on his face, chest and arms. When taken from the boat the flesh was hanging from his arms.

Deceased was about 35 years of age and leaves a wife. He was the only brother of Mrs. F. W. Mayne, of this city; Mrs. Flora Lewis, of Grand Rapids, and Mrs. F. A. Kenyon, of Mackinac Island. His aged mother, Mrs. Nelson Ainslie, also of Mackinac Island, arrived with her daughter Tuesday morning.

"RULE G" SHOWS FINE WORKMANSHIP

"I am not surprised that the use of railroad workers as actors has resulted in the production of a notable picture. This was to be expected. The daily life of a railroader is a drama; it develops his dramatic sense. For several years I have been studying the men who makes the wheels go round, and writing him in articles and fiction, and, in my opinion, he is the most intelligent, most dependable and most highly developed workman in the world."

It seems to be the endeavor of successful motion picture producers to work into every picture at least one big "punch." "Rule G" contains six episodes, either of which might qualify as a "bunch" big enough to make the picture a success. The story starts with a thrilling accident on a huge wheel, and the interest is not allowed to relax for a moment during the five reels. It is at first incredible that railroad men with no previous training whatever could have been quickly prepared for the more difficult parts of acting. It is said that many of the scenes were filmed over and over until Director Rice was convinced that he had attained the highest possible effects. That no one was injured proves the great skill with which machinery and trains were handled.—Rufus Steele, in Railway Employees Magazine. At the Majestic Theatre, Friday evening, May 26th.

GETTING READY FOR ANNUAL TOUR

Instructions have been issued to advertisers and printer that forms for the 1916 West Michigan Pike guide will close on Saturday, May 26. The guide is to be printed and ready for distribution on Monday, June 12.

Interest in the annual pike tour is greater this season than ever before, as good roads enthusiasts from all parts of the state, from Chicago and along the Pike highway are to participate. Cities and along the line, where stops are to be made, are already beginning to plan suitable entertainment and reception for the Pikers. The most elaborate attempt will be made at Mackinac City for July 13 and 14, when the western, eastern and northern Michigan pike tourists meets for the second annual Michigan agricultural and good roads congress as a fitting finale to the tour.

BUT ONE MORE BOOST TO THE TOP

At the recent meeting of the Grand Encampment, Patriarchs Militant, at Grand Rapids last week, Judge Mayne, of this city, was elected High Priest.

This places Judge Mayne next to the highest position in the order, which is Grand Patriarch. Next year the Judge will succeed to that title.

The Patriarchs Militant is a degree in Odd Fellowship corresponding to Knights Templar in Masonry.

PIONEER RESORTER DYING

At Otsego special says that George E. Bardeen Sr., founder of the Bardeen Paper Mills company, is seriously ill at his home of that city, having suffered a relapse. It is not expected that he will live more than a few days. He improved in health during the winter, but this month began to lose health rapidly. He was one of the first paper manufacturers in Michigan and brought the industry to Otsego. Mr. Bardeen was one of the founders of the Charlevoix Summer Home Association.

East Jordan Enterprise. About election time the salary list of East Jordan was under discussion and many thought it too high. The amount if we remember rightly was $3,200 for East Jordan and Boyne City was $5,600. We note in this connection that the Boyne City salary list just adopted calls for $6,135.

RHEUMATIC PAIN STOPPED

The drawing of muscles, the soreness, stiffness and agonizing pains of Rheumatism quickly yield to Sloan's Liniment. It stimulates circulation to the painful part. Just apply as directed to the sore spots. In a short time the pain gives way to a tingling sensation of comfort and warmth. Here's proof—"I have had wonderful relief since I used your liniment on my knee. To think one application gave me relief. Sorry I haven't space to tell you the history. Thanking you for what your remedy has done for me."—James S. Ferguson, Philadelphia. Sloan's Liniment kills pain. 25c at your Druggist.

STATE TO BUILD 1,000 MILES OF ROADS IN 1916

DEPUTY HIGHWAY COMMISSIONER POINTS OUT HOW AUTO TAX DECISION AIDS COUNTIES

State, county and township road officials of Michigan are much pleased at the recent decision of the Supreme court, wherein the new automobile tax law was declared constitutional. According to Deputy State Highway Commissioner L. C. Smith the decision places more than $1,000,000 at the disposal of highway officials, one-half of which is credited to the state highway fund for the payment of state reward upon roads built according to state specifications.

County funds are helped by the new law because one-half of the money paid in by a county in automobile taxes is returned to the county treasurer for the maintenance of county roads. Where a county is not operating under the county road system the money is divided among the townships, villages and cities for building or maintenance of highways. Mr. Smith says 1,000 miles of good roads will be built this year.

"Under the road act the state highway commissioner has caused an inspection of all state reward roads in Michigan to be made this spring and has directed the various counties and townships as to the necessary repairs," said Mr. Smith. "In most cases the township and county officials are ready and anxious to make the necessary repairs but have not sufficient funds. Now that the auto tax law is valid a fund not otherwise arranged for is placed at the disposal of the commissioners and no doubt a large part of it will be used to maintain the old state reward roads."

Robbing Your Own Pay Envelope

- The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.
- "I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.
- When the pinch of want comes the lesson of thrift comes too late. Once down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.
- Young man—young woman, are you robbing your pay envelope for pleasure and pastimes which in later years will deprive you of the comforts and necessities of life?
- Take $1.00 from your pay envelope this week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every payday thereafter.

CHAPTER XXVI.

—13—

The Spirit of the East.

Company H, under Captain Donald Ben, they trotted swiftly up with the quickness of hard-trained infantry and stood in column of fours while the officers sought the hold of affairs. Daily promptly sent for the young foreign ranger, and in less time it takes in the telling these two were united. Winterrose, the woodsman and the soldier, were ready to grapple with the enemy. Light-marching kits were dumped upon the ground, and the bandoleered men took to the hills and the timber under cover of decisive orders. Two hours later wagons arrived with commissary supplies and the strong, blessed-well grub, too, on a military air.

It was a little struggle, and it was indicative of the force that has developed under the human atoms settling in semidarkness beneath the threatening forest, choked by the smoke dayed by the almost unbearable heat, menaced by the flames that at any moment might sweep here or there adding the rocks and declivities of the unwoo hills and out of scarps.

That was the great danger they guarded against—the possibility of getting hemmed in. Guards were detailed to watch the vanguards of the foe, to note the speed of the flames, the lie of the timber, the lines that were likely to go faster, following the different growths, but in the mysterious dark and the silence of vast mingled sound they were imposed and each man had to take care of himself.

The mighty boom of falling pine arbor on the forest, heavy with a their said years of age, crashing through obstructing branches, shook the earth each second. With each crash an opulence fall wealth and world-economy and prudence trembled at the sacrilege. It was a carnival of waste, a sacrifice of the gifts of God—and among all those strong souls it with heart and hand and brain there was none who knew its worldwide import so well, who lamented it so keenly as the lean, brown forest rangers whose special foe it was.

"And to think a dozen miles of government trails have been prevented it!" cried the lanner with an oath.

Out of the valleys leapt the heavy smoke had obscured the setting sun entirely. Night was upon the world. Range it had spread up to the heavens, drifted afar on the changing wind and all the distant valley of the Nez Iamette knew that the forest fires were burning in the nile.

The rapers throughout the state told of it the day and it awakened no more interest than would have attended the announcement of a heavier run of salmon than was usual in the Columbia.

They were too common, those fires that started with the rattlesnake dens each year, too much a part of everyday life, and they did not know that this was to be a season of time in the coast country.

Thus was when they were unknown, three monsters of destruction—a long-past time it was, when the union fire forest rangers, the silent Red Mon of the hills, had barred out the nether Hands each year or than a pony might go anywhere unbridled.

The silent rangers had gone with the years—passed to the Hunting Grounds and the spirit-world in the flitation, and now the great timber had shed its dry foliage and its pitch, the little grasses had sprung up season after season, the vines had crept between and a man might not pass from the fastness without built trails.

So Destiny took up the lam and played with it that hot, dry August.

All through the early hours of the long night they labored, dirty, blackened, tanned sorceresses of men, running here and there, digging like mad in the white trench that was to stop its surface flames, sawing unceasingly at the towering trees, while the spade brought to light unfamiliar tidings of the approaching fire.

High against the dim, smoke-lighted sky the dark canopy of the East Butt whispered and moaned as if in fear, and from time to time Sandry, a hazard, grim-lipped specter of a man, lifted his bloodshot eyes toward it. It was still his cue, his future of the Hillingworth, fosters the tassle of Hampden's threats, the unrecorded deed and the unfinished trail of the Yellow Pines at the south, and he pulled at his beard pathetically.

There was still a stretch of almost impenetrable timber near the summit of the big ridge which must be cut down before the flames reached it—if all would be lost.

"Men, I shall we make it, John?" asked he owner desperately of Daily, when as by in the smoke with wet rags to it over the mouths of the men.

"Ought to if the wind stays where it is."

It was two o'clock and that hour in so sleeping world, awake when all the elements are at an ebb.

Then, all suddenly, Destiny laughed. Old Dominic's lungs were a stentorian wind that rose as the elemental ebb ice turned. Hell broke loose upon the land and heaven was not. Fire, accompanied the world. Its increased roar changed to the thunder of the spheres. It appalled the hearts of men, stayed their hands in fright. All throughout the darkness of rolling smoke wherein they worked between the roaring torrent and the East Butt that mighty voice commanded cessation.

Instantaneously, without orders, as men where there was no commanding elevation save between those a few feet apart, they dropped their spades, their tattered blankets, their axes. They straightened from their labor, leaving the excavations in the trenches. Here and there, above the solemn thunder boom voices began to call. It was the time to quit and they realized it instinctively.

"Out! Out! Out!" they cried to each other in the dusk. "Get out! Get out!"

Walter Sandry, working near the apex of the pushing line, was just beginning to run past him back along the trench and the cutting. He lifted dazed eyes to the ridge where dim, crest he could see between the boles, so near had they won to victory. Only a few more hit pieces, a dozen saplings, a scant few yards of trench and he would be done—the long lines of safety stretched across the back of the East Butt.

"Stop! Stop! Stop!" he cried with a great voice that came from the very depths of he lungs with borrowed power. "Stand by me, men! For God's sake stand by!"

He saw dim shapes falter, half turn toward him and start on. Again he raised his stentorian cry and flying sparks behind to unleash, stamped against their will by its compelling power.

"I'm Johnny Eastern, all right, but I'm going to stay! Who'll stay with me?"

Out of the dense obscurity came Collins, a huge, fantastic figure, and stood beside him without a word. In the instant of the time there was not even a hand and gripped the giant's shoulder.

"A dozen men and we've won!" he cried.

He saw the halting shapes turn, rather another and another, retrace their steps and spring back into the darkness. Every man of them was western born and the trail had gold a home. He leaped himself for the handle of a saw attching out from the side of a fallout sugar pine and the whining song of the crosscuts rose again under the dwarfing roar.

Fourteen men had heard and answered that call, and they were alone in the purgatory of heat and smoke. All the rest were running for their lives down the cleared fall toward the valley beyond the dip.

From time to time Sandry glanced upward at the increasing light. The sugar pine fell with a rending roar, and with Harris, who, he saw for the first time, had been pulling with him, he ran to the land.

He saw as he ran that one of the men, working like a fury to fell the saplings, was Murphy, who had greeted his pompous "Dillingworth" with such grimness latter in the end day.

His head a moment's vague wonder at this odd strip of humanity that could hold such prejudice, fight with Hampden's men in savage enmity, to pass their ranks later with hang-dog humiliability at the call of gold, and was still willing to turn back to fight with him on death's brink, because he had resented their taunt of East and West.

One by one, in silence, in a tension that drew the skin tight on their faces, they saw the last remaining sapling fall, the kindling saplings laid on earth, the trench, much narrower and shallower, creep upward to the ridge.

Against time, against wind that scorched their bare arms and tortured their starting eyeballs, against a stifling atmosphere that drove them nearer and nearer to the earth for breath, they drew the last blade, sent the last big pine crashing toward the north.

The ridge was clear in the increasing glow.

"Now!" cried Sandry with the triumph of a general on a victorious field, "for the ridge and over!"

But even as he dropped his saw and ran, calling his men, Collins' big voice came through the rolling smoke with the calm of finality.

"Over! Over! It's a ninety-foot drop on to hard rock beyond that ridge!"

Sandry stopped in his tracks, his head cleared as if with a whiff of sait air at that cry.

The men had closed in with the instinct of their kind to be together in danger, as if so the danger were less sense.

But the Easterner was undaunted.

"Then we'll take to the East Butt," he cried, "even though it is a crown fire and coming fast. I think our trench will hold it."

With all confidence he turned to the south. Instinctively the men had drawn in behind him. The neck of the East Butt was a wavering wall of fire. He whirled and glanced back along the fall and the trench. Long experience in the woods had taught him to read the language of fire. The half-looked-for had happened. The little bunch of fighters were hemmed in, ringed around by fire. Death faced them on every side.

"Fire, as the owner sent! Searching back to every quarter he sprang for cover.

"Here!" he cried, "here! Into it! Every man of you, in, I say!"

At the crest of the sheer ridge he slid, abandoned tunnel gaped in the gloom, a dim haven of refuge in the mouth was overhung by vines, its recess unknown in the blackness. Sandry sprang to its edge and turned back for the men to pass. They stood, a small silent bunch, gazing in wordless consternation at the red canopy.

"Now is how it fell did it get across the fall?" said Collins hoarsely.

But one by one they stooped and entered the small black hole in the earth. It ran backward into the ridge, narrowing as it went, and the rock floor uneven with the heaps of earth fallen from the roof since some long forgotten prospector had carved it out.

For a time for a moment they breathed more easily, standing close together, swaying, panting, waiting mass of humanity. Sandry stood at the mouth, the last to enter. He looked out in blank amaze at the unchained mad fiend of the burning world. The great roar had reached its zenith. It came booming and roaring to the fall and the trench. Its sound was indescribable. The heat grew until the flesh on Sandry's arms and face rose in blisters. A shaft of flame shot down across the tunnel's mouth. Smoke rolled into it and here and there a gasping breath ended in a moan. They were no air to breathe. Like trapped animals the men jumped back from the fire.

Collins' Big Voice Came Through the Roaring Smoke

and there, feeling for an opening, a crevice to crawl into, away from the agony of heat and suffocation. And yet they lost control of themselves.

"My God" cried Murphy shrilly. "I can't stand it! Let me out an' I'll die as get it over!"

He came groping to the entrance, facing the increasing heat. His face was a madman's, his mouth open, his teeth exposed in a snarling, ghastly smile. Men came and went in relays, sleeping upon the ground for short shifts, rigidly apportioned and observed. The great flood of flame, runner after an errant wind, had piled in the forces in heavy billows in among the northern hills. It seemed a thing of irresistible might but the toilworn men hung to its flank with a dogged persistence, emboldened and encouraged by the success on the east ridge.

Sandry, limping painfully, and haggard as a ghost, stuck with the rugged dogged Mac's commands and Daily's warnings. At each fresh sight of his face the girl Hilots was wrung with anguish. It seemed as if he could bear no more and yet the spirit in him drove him on.

Once she ventured a timid protest.

"What is the timber worth if you die?" she asked plaintively, and Sandry, dry, still somewhat of a 'way, parried the yearning question.

"Who would care?" he laughed wryly, 'would you, Little Squaw?"

The girl did not answer but as she turned away the ready mist sprang to her eyes and he reached a contrite hand to her shoulder.

"Forgive me! I know you would!"

It seemed to Hilets as the horror swept north and the men were lost for hours in the dim fastnesses, that something was about to happen.

She felt a prescience of disaster which Coonnah shared, and they two stood apart for long spaces of time, silent, listening, the muscles of each drawn taut. From time to time the great mongrel would squat upon his haunches, lift his heavy muzzle toward the dun-smoke heavens and bay with a long-drawn, silver note that was the East Butt further down stood sirrom and green. The effort had not born in vain. The holocaust was checked, the fight was safe.

Back toward the north stretched a forest of tall, black spikes, piled in confiers and there by heavy spots of fire where fallen logs, dry and pitch-laden, burned steadily. The green canopy was gone, every vine and bit of brush, every sapling and fern. Only a few edge still crackled and snapped with streamers of flame were licking across it. The half-looked-for had happened. The little bunch of fighters were hemmed in, ringed around by fire. Death faced them on every side.

"Fire, as the owner sent! Searching back to every quarter he sprang for cover.

"Here!" he cried, "here! Into it! Every man of you, in, I say!"

At the crest of the sheer ridge he slid, abandoned tunnel gaped in the gloom, a dim haven of refuge in the mouth was overhung by vines. Its recess unknown in the blackness. Sandry sprang to its edge and turned back for the men to pass. They stood, a small silent bunch, gazing in wordless consternation at the red canopy.

"And how is hell did it get across the fall?" said Collins hoarsely.

But one by one they stooped and entered the small black hole in the earth. It ran backward into the ridge, narrowing as it went, and the rock floor uneven with the heaps of earth fallen from the roof since some long forgotten prospector had carved it out.

She Felt a Prescience of Disaster Which Coonnah Shared.

for men who face danger. They were used to the silence, for there was no record between the Daily and Daily held long ago shut this 'bird o' th' earth' out of her good heart and Hilets hated her with the fury of the woman whose mate is threatened.

At last a solitary Indian came down the valley, running, his mouth full of excitement and glorious prediction. The whole of the Hilets would go. It was the wrath of the Great Spirit turned loose upon a wicked world. It was the judgment. There was nothing like it. It fell into Jargon and reverted to the ancient gods, and Hilets shocked him sorely.

"What do you mean, Quanna?" she cried, "have you forgotten the Preacher and the Bible? There is only one God and he holds us in the hollow of his hand. It is not the destruction of the world, it will stop. What more has happened and where is Sandry of the camp?"

Everything had happened. The whole country was afire. Not only a ridge or two, a valley in between, as it had been here, a day, two days back, but ridge after ridge, valley after valley—the world, the earth, the heavens. Sandry was somewhere up behind the Hog Back.

For a moment the girl looked out across the sleepy, lying blue, a dirty ribbon between its gray and wilted banks. Then she turned troubled eyes to the general.

"Mother," she said, "I know it was. There's danger to Sandry, and I'm going.

"Child, you're wrong this time. Sandry's a man. Well as you know th hills I need to you go. I forbid it."

They faced each other a moment while the old woman's back her brainy and tightened her belt.

"I'm going," she said quietly. "Mr. Daily, you had better raised her in his arms—and stuck.

At the puncture up rushed Patrolman Sheehan, bellowing for hot water. He came just in time to prevent Margaret taking off her shoes and stockings before the enthusiastic crowd that lined the saccharic shores. So a watery trail was blazed to the marooned and Miss O'Leary was carried forth, as sweet as she could be, but very glassy. She went home and her mother refused without giving his name, and thus ended the tragedy of "The Lass and the Lasses."

Common American Birds

Interesting information about them compiled by the Bureau of Biological Survey United States Department of Agriculture

Russet-Backed Thrush
(Hylocichla ustulata)

Length, seven and one-fourth inches. Male, upper parts including the top of head and tail nearly the same color as the back, this one is distinguished by its tawny eye-ring and cheeks. The Pacific coast subspecies is russet-backed, while the other species is the olive-backed thrush. The remarks below apply to the species as a whole.

Range—Breeds in the forested parts of Alaska and Canada and south to California, Colorado, Michigan, New York, West Virginia, mountains, and Maine; winters from Mexico to South America.

Habits and economic status: This is one of a small group of thrushes the members of which are by many ranked first among American song birds. The several members resemble one another in size, plumage, and habits. While this bird is very fond of fruit, its partiality for the neighborhood strawberry keeps it from frequent visits to the farm. Its diet is 93 per cent vegetable, consisting of fruit, mostly of wild species, and 7 per cent animal, consisting of insects, including such pests as cutworms, but no useful species. The general habits of this thrush are those of the family to which it belongs. It habitually inhabits its sun plus prey on a thorn, sharp twig, or burr of a wire fence.

California Jay
(Aphelocoma californica)

Length 13 inches. Distinguished from other jays within its range by its grayish color and conspicuous dark brown patch on the back.

Range—Resident in California, north to southern Washington, and south to southern Lower California.

Habits and economic status: This jay has the same general traits of character as the eastern blue jay. He is the same noisy, rollicking fellow and occupies a corresponding position in bird society. Robbing the nests of smaller birds is a favorite pastime, and he is a pestilent any upon domestic fowls and well knows the meaning of the cackle of a hen. Not only does he steal eggs but he kills young chicks. The insect food of this jay constitutes about one-tenth of its annual sustenance. The inclusion of grasshoppers and caterpillars makes this part of Habits and economic status: The loggerhead shrike, or southern butcher bird, is common throughout its range and is sometimes called "French meeking bird" from a superficial resemblance and not from its notes, which are harsh and unmusical. The shrike is naturally an insectivorous bird, which has extended its bill of fare to include small mammals, birds, and reptiles. Its hooked beak is well adapted to tearing its prey, while its shrike habit enables the individual to hang hit upon the plan of forcing its victim, if too large to swallow, into the fork of a bush or tree, where it can tear it asunder. Insects, especially grasshoppers, constitute the larger part of its food. Though the mottle, caterpillars, ants, wasps, and a few spiders are also taken. While the butcher bird occasionally catches small birds, its principal vertebrate food is small mammals as field mice, shrews, and moles, and when possible it obtains lizards. It habitually impales its sur plus prey on a thorn, sharp twig, or burr of a wire fence.

Catbird
(Dumetella carolinensis)

Length, about nine inches. The slate-gray coloration of the body and tail are distinctive.

Range—Breeds throughout the United States west to New Mexico, Utah, Oregon, and Washington, and in southern Canada; winters from the gulf states to Panama.

Habits and economic status: This familiar bird is one of the commonest birds. Tangled growths are its favorite resting places and retreats, but berry patches and ornamental shrubbery are not disdained. Bird seed is a fifthrate dooryard visitor. The bird has a fine song, unfortunately spoiled by occasional cat calls. With habits similar to those of the mocking bird and a song almost as meritorious, the catbird has never secured a similar place in popular favor.

Safe Light.

Gelatin-coated photographic films can be obtained by fixing cut undeveloped plates, or by receiving the image from developed negatives with ferricyanide and hypo, can be made the basis of very effective safe-light screens both for orthochromatic and for nonorthochromatic plates. Dipped numbers of the glasses should be stained by immersing them in solutions of naphthol yellow and of methyl violet respectively; one one of each should be bound up together film to film. If a diffused light is required a sheet of tissue paper, or of papier mineral, may be interposed.

One of the Finest.

"Officer, I have been assaulted and robbed, and I want you to arrest the thief."

"Did you take his name and address?"

"Why—er—no."

"Well, then, how do you expect me to arrest him?"

IN THE CITIES

He Wanted to Draw Out Only a Hundred Million

NEW YORK.—A short, heavy-set man neatly dressed walked into the Wall street entrance of the subtreasury the other afternoon and said: "I want to draw $100,000,000 as soon as possible."

Hugh Byron, who has been a special officer in the building for many years and knows almost all of the big men in the financial district by sight, stepped up to the visitor.

"What did you say your name was?" he asked.

"Why, don't you know me?" the man asked in surprise.

"I ought to," admitted Byron, "but—"

"Why, I'm John D. Rockefeller and I want to draw this small amount as a matter of convenience."

"I'm very sorry, Mr. Rockefeller," answered Byron, "but we haven't that amount in the vaults at the present time."

"Very well," was the response, "I'll go elsewhere."

About an hour later the man reappeared.

"Say," he said, "I've been down the street to a bank, where they couldn't do anything for me, and then I went to the Equitable building, which I own, and they gave me a check right on me there. What shall I do?"

The suggestion was made that the visitor transact his business over the telephone. It being pointed out that he might be accommodated if he would leave his office address.

"Why, I'm a stranger said without hesitation, "I'm down at 26 Broadway. You can get me there at any time."

"What room are you in?" was asked.

"Oh, I don't remember. I'm down the building." And then the man turned to his questioners suspiciously and said: "Are you trying to aid me?"

Assured that no one was fooling him the visitor left the building, after thanking as many of the men in it as he could reach for their courtesy and was last seen going in Wall street in the direction of the river.

Sharp Albany Woman Traps Smuggled Chinamen

ALBANY, N. Y.—Through the quick wit of Mrs. William Chambers, ticket agent on the Greenbush bridge, which spans the Hudson river at this point, Frank B. Wiley, Chinese inspector of the United States Immigration bureau, made a sensational arrest of alien Chinese. For weeks Inspector Wiley, aided by revenue officers and the local police, had a net spread about Albany for Chinese smugglers. The arrests went to jail four Chinese, together with William Lapenne of Lewiston, Ky., and Charles Baker of Hamilton, Canada. The white men are accused of trying to smuggle the yellow men into this country.

Stopping from the Federal building, at Broadway and State street, just before noon, Mr. Wiley saw a covered automobile speeding toward the Greenbush bridge. A yellow face peeking from beneath curtains aroused his suspicion, and, commandeering an automobile, he started in pursuit. Dodging trolley cars and other vehicles, the two machines made a wild drive for the bridge leading across the river on the highway toward New York.

At the approach to the bridge Mr. Wiley leaped from his running board and with a drawn revolver commanded the driver of the other automobile to halt. It looked as if the automobile carrying the Chinese was about to make a dash across the bridge. A shrill whistle blown by Mrs. Chambers, the gate tender, however, caused the big draw of the bridge to swing open. That caused the automobile to stop, and when the blackets were torn aside four Chinese were found beneath the quarters supplied with food, in which they had made their journey across the state. Inspector Wiley said the Chinese would be worth $250 each in New York.

Molasses Glues Girl and Rescuers to Street

NEW YORK.—Miss Margaret O'Leary arose the other day feeling all stuck up. And well she might, for the night before she stood glued to the intersection of Third avenue and Twenty-fifth street with a sticky substance that tumbled off Frank Timmons' truck and burst.

For fully an hour Miss O'Leary stuck there, firm as a person plaster, in the plot and to the molasses both thickened. Stranded in midstep, looking "just too sweet for anything" Miss O'Leary got gummier and gummier in her efforts to be loose, while hero after hero, bound to star in "the sweetest story ever told," stumped in boldly, one by one and stuck.

One young Lochinvar, at last stroode out of West Twenty-fifth street and, lion hearted, drop by drip, drop by drop, strapped to Margie's side, pried her loose, gathered her in his arms

New Orleans Beauty Wore the Smuggled Aigrets

NEW ORLEANS, LA.—Justice gallantly awaits beauty's pleasure in New Orleans. Special Customs Agent W. H. Howe, hot on the trail of aigrets worth $1,000, smuggled into New Orleans, found them at noon on the hat of Miss Zetta Hawkins, blonde and beautiful, who lives with her parents at 1527 Canal street.

The captain bowed and said: "Madame, I regret it most intensely, but I've come for those feathers; they were smuggled."

"Oh, my darling little bonnet; won't you just let me try it on once more, officer," the young woman pleadingly cried.

He consented to her slight request.

Four girl friends came in and they, too, tried on the marvelous creation.

"Mr. Officer, I was just going to wear it to a party this afternoon. Now, won't you let me do it? Oh, please."

He never wavered and he sat in her parlor from one to five o'clock.

Rounding into her home, still jubilant in triumph, Miss Hawkins said: "Oh, officer, thank you so much. I just am all wild, and now," she added, turning aside to hide her tears, "you may take it."

British authorities, backed up by their French allies, have decreed that Tommies need not pay rent for whatever quarters they may have to occupy during time to time in France, though it is probable that some restitution will be made the landlords by one or both governments when the war is over and opportunity to settle the cases presents itself.

The marimba, Guatemala's national musical instrument, is a huge affair on the xylophone principle, played by striking its varitalued keys with padded drumsticks. Guatemalan Indians, who have quite as much power and endurance as the Africans, carry the marimba from town to town and their backs, although they look nearly as ungainly and weigh probably half as much.

To help a physician make a close examination of a patient's throat there has been invented an instrument that holds his tongue down and covers his mouth with a glass shield.

Electrical operations taking current from a light socket has been invented by a French scientist to purify the air in a room by literally pumping it into a reservoir and washing it.

When a man loses his temper look out for a stinging retort.

HANDICRAFT FOR BOYS AND GIRLS

By A. NEELY HALL and DOROTHY PERKINS

COPYRIGHT, 1916, by A. Neely Hall.

HANDY THINGS TO MAKE FOR MOTHER.

For the sleeve board (Fig. 1) you will require wood three-quarters or one inch thick, out of which to cut pieces A and B (Fig. 2 and 3), and a carpenter's "dowel" stick about two feet long from which to cut four pieces five inches long for connecting A and B (Fig. 2 and 3 show the measurements for cutting pieces A and B).

(Fig. 2) sticks upon the end of the ironing board and the toothpick legs have heads glued upon their ends.

The duck (Fig. 9) is one of the many floating toys which can be made. Fig. 10 shows the head and neck, Fig. 11 the body. The legs may be toothpicks or matches; glue them into holes in the cork body. The tail is made of several strands of worsted tied to a pin (Fig. 12), which is stuck into the body.

The funny little porcupine (Fig. 4) has a tapered cork body (Fig. 5), toothpick legs, a cardboard head (Fig. 6), and toothpick quills.

Because cork birds and animals are funny creatures at best, it is proper to devise varieties other than those found in zoos. Fig. 7 shows a peculiar specimen. Isn't he a dandy with his ornamental neck? Five its standard cork body, a toothpick form the neck, the cardboard head (Fig. 8) sticks upon the end of the toothpick neck and the toothpick legs have heads glued upon their ends.

CORK TOYS.

If you will save the cork from every empty bottle before it is thrown out or disposed of to the ragman, you will soon have enough shapes and sizes to provide an afternoon's fun of tormaking. If you do not want to wait until enough corks have accumulated by this means, you can get what you will need at a drug store.

In addition to corks, you must have some cardboard, some wooden beads, toothpicks, burnt matches, pins and glue. For cutting the corks use a very sharp knife.

The horse (Fig. 1) has a body made of two tapered corks, with the small ends glued together. Use the pattern in Fig. 2 for the head, and glue this in a slot cut across the end of the body. The legs may be toothpicks or matches; glue them into holes in the cork body. The tail is made of several strands of worsted tied to a pin (Fig. 3), which is stuck into the body.

The funny little porcupine (Fig. 4) has a tapered cork body (Fig. 5), toothpick legs, a cardboard head (Fig. 6), and toothpick quills.

Because cork birds and animals are funny creatures at best, it is proper to devise varieties other than those found in zoos. Fig. 7 shows a peculiar specimen. Isn't he a dandy with his ornamental neck? Five its standard cork body, a toothpick form the neck, the cardboard head

rights II the right distance apart for the legs to go between pieces A and B. Nail up rights II in place, then slip a saw through the slots, and cut a small groove in base A (B, Figs. 3 and 11) so that a saw will cut through the bottom bread crust easily.

Strip E (Fig. 9) is nailed to the far edge of base A, so that the bread fits against when cutting, and strip F (Fig. 9) fits between pieces B, on the end of base A, and should be of the proper width so that it will be exactly five-thousandths of an inch space between its inside edge and slot D.

Elephant's Sonata.

Here is a good story about the cleverness of a musical showman. An elephant was advertised to play a sonata on the piano. A great crowd assembled to see the show and was refused at the doors. There was a very solid platform, and a grand pianoforte. The elephant came on, and was received with deafening applause. The impresario led it up to the instrument, when it suddenly turned tail and walked away. Nothing could be done to induce it to come back, and the audience got excited and seemed to think they were the victims of a fraud. Whereupon the manager addressed them, and announced that the animal, usually so docile, had recognized in the notes on the keyboard of the piano the teeth of its mother, and positively declined to play on that instrument. The Italian audience was as much amused with the story as they expected to be with the sonata, and the elephant, coaxing on again and doing a few tricks, was cheered, and danger was consequently averted.

BICKERINGS OF A BACHELOR

Men suffer untold privations, but women always tell them.

Sometimes it makes a man hot when you hand him cold facts.

One sure thing about women is that you can't be sure of them.

"The world seems all the brighter to lovers when the light is dim.

Married men are henpecked and bachelors are chicken-pecked.

If a man has plenty of money he can afford to marry for love.

Kissing as a theory is far less satisfactory than a practical example.

Lots of men would be glad to work—if they could find someone to work.

Of course a woman always has the last word—and incidentally about 99 per cent of the preceding conversation.

There is no law to restrain a woman from kissing a pug dog—but just the same it a mean advantage to take of the dog.

A woman may be a good talker and still have a slight impediment in her thoughts.—Indianapolis Star.

OLD GEN. GROUCH SAYS—

If you pay as you go these days you stay at home.

Every woman is an opera box looks like a Lady Godiva.

Sympathy costs nothing unless you sympathize with a widow.

If you are present it is a toast; if you are absent it is a roast.

Figures do not lie because women hang them up in the closet.

There's no such thing as a good man gone wrong; it is only a bad man found out.

You pick out a woman you think is a steady reader and she proves to be a little runabout.

Don't kick a man when he is down. You don't know how tall he may be when he stands up.

Every woman can hammer nails like lightning—which doesn't strike twice in the same place.

If you see black hand prints on the bathroom towel you may be sure your small boy has "washed" his hands.

SOME DAY SOMEBODY WILL—

Invent something without claiming that it will revolutionize the world.

An artist will draw a funny picture without depicting anyone in it getting hurt.

Some man will tell his wife he wished she could cook as well as his mother. No man has dared to do it yet.

Some George Washington of a newspaper reporter will describe a wedding without writing that the "bride was charming."

Write a problem play in which the problem will be about finance or theology or something fit for family discussion.

There will be a waiter with enough human intelligence to take your order, which will include a demand for a cup of coffee with the vienna, and to bring that coffee, instead of waiting twenty minutes and then asking if you will have coffee.

FROM OUR NEW PRIMER

What is the man doing?

What would a wise man do?

Why do you call him a fool?

Because it is unwise to look a gift horse in the mouth.

A wise man would sell the horse for what he could get and let the other chap look.

Some one presented the fool man with a horse and he is looking in his mouth to try and ascertain its age.

HOW TO BE HAPPY

Do not expect too much from your friends.

Make whatever work that comes to you congenial work.

Retain your illusions, and do not believe all the world wicked and unkind.

Keep your nerves well in hand and inflict them on no one.

Relieve the miserable and sympathize with the sorrowful.

Do not waste your vitality in superfluous and energetic talking, especially in gossip.

Do not forget that kind words and a smile cost nothing, but are priceless treasures to the discouraged.

In neither self-conceited nor family centered, but have a free flow from outside interests to keep you alive and thoughtful.

Never let yourself mean over the past nor worry about the future, but make the best of the present and keep sweet and cheerful.

Do unto others as you would be done by; and when old age comes to you, and there is a hole in your head about your head, you will be loved and considered.

How It Impressed Him.

Willie's father was trying to impress upon him the tremendous progress that science and invention have made in the past fifty years.

"Just think, Willie," he said. "When I was a boy there were no telephones, no electric lights, no talking machines, no moving pictures, no X-rays, no wireless telegraphy, no—"

"Dee," interrupted Willie. "What an awful lot of boys everybody must have been!"

"To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.—Adv.

An Optimist.

"Some say the world is growing worse."

"I don't think; that way, although they are adding more crimes to the statute books."

A Fizzle.

She (as she orders a phosphate)—I'm drinking nothing but charged drinks now.

He (dismally)—dame here!—Sun Dial.

FITS, EPILEPSY, FALLING SICKNESS Permanently Cured. Free $2 bottle. Dr. Kline's Great Nerve Restorer. Marvelous results. Dr. Kline, Specialist, 931 Arch St., Phila.

Uncanny.

Novelist—How are my novels going? Publisher's wife—Uncanny, sir, unless it's shoplifters.—Puck.

Severe.

"Stealing a kiss is no crime."

"No? Then why does a man get a life sentence if he is caught at it?"

FRECKLES

How to Remove Them

The fact that so many people are willing to pay the price for a reliable remedy for freckles is evidence that they are troubled with them. Nothing else has been found so satisfactory, and as it is simply put up in ounce of strong double strength, it is not surprising that it should be recommended as the most effective freckle lotion. Any druggist will supply the ounce of strong double strength for a small consideration, and if it does not remove the freckles it should at least give the money back. Freckles are caused by the action of the sun's rays upon the skin, and the sooner the lotion is applied after the appearance of the first freckle the better the chance for its complete disappearance. It should be applied to the face, neck, arms, and hands every night and morning.

ABSORBINE, JR. Reduces Strained, Puffy Abdomen, Lumbagoin, Pain Bad, Fistula, Lumbago, Sweeney, Strains and allays pain. Heals Sores, Cuts, Bruises, Boil Chilblain. It is a SAFE ANTISEPTIC AND GERMICIDE. Does not blister or remove the hair and horse can be worked. Pleasant to use. $2.00 a bottle, delivered. Book 4 free for special instructions and Book 5 M free. ABSORBINE, JR., the family antiseptic for boils, felons, sprains, bruises, varicose veins, varicosities, varicocele, hydrocele, varicose ulcers, veins, throat and lungs. W. F. YOUNG, P. D. F., 310 Temple St., Springfield, Mass.

CUTICURA COMFORTS BABY

Suffering From Itching, Burning Rashes, Eczema, etc. Trial Free.

Give baby a bath with hot water and Cuticura Soap, using plenty of Soap. Very lightly dry and apply Cuticura Ointment gently to all affected parts. Instant relief and speedy cure of the most fiery eczemas, rashes, and other skin and scalp eruptions, with loss of hair, when all else fails. Cuticura Soap and Ointment are sold by druggists and dealers everywhere. Sample each free with 32-p. Skin Book. Address Cuticura, Dept. L, Boston.

"I DON'T SUFFER ANY MORE"

"Feel Like a New Person," says Mrs. Hamilton.

New Castle, Ind.—"From the time I was eleven years old until I was seventeen I suffered each month so I had to lie in bed. I had headache, backache and such pains I would cramp double every month. I did not know what it was to be easy a minute. My health was all run down and the doctors did not do me any good. A neighbor told my mother about Lydia E. Pinkham's Vegetable Compound and I took it, and now I feel like a new person. I don't suffer any more and I am regular every month."—Mrs. Hattie Hamilton, 822 South 16th St.

When a remedy has lived for forty years, during which time its popularity and influence and thousands upon thousands of women declare they owe their health to it, is it not reasonable to believe that it is an article of great merit?

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

ABSORBINE, JR. Reduces Strained, Puffy Abdomen, Lumbagoin, Pain Bad, Fistula, Lumbago, Sweeney, Strains and allays pain. Heals Sores, Cuts, Bruises, Boil Chilblain. ALLEN'S FOOT-EASE

The Antiseptic Powder to Shake into Your Shoes

Sold wherever shoes are sold. Over-heated, aching, tired, swollen, sweating feet relief in 15 minutes. Sample free. Address Allen's Foot-Ease, Le Roy, N. Y.

W. N. U., CHICAGO, NO. 20-1916.

If you Suffer from Backache, Lumbago, Kidneys or Rheumatism, Take Hot Water and "ANURIC"

American men and women must guard especially against kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, but they sometimes become weak or sluggish, and a stitch in the back, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead, when your back hurts or the urine is cloudy full of sediment, or you are obliged to seek relief two or three times during the night, when you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your druggist a half pint bottle of Anuric (Lithia Tablets) or dissolve one of these tablets in a glass of water and drink a glass daily.

Anuric is a powerful diuretic that will dissolve uric acid as readily as hot water does sugar. Dr. Pierce's reputation is back of this remedy. Dr. Pierce's Anuric Tablets are now prepared in the form of a concentrated tablet, convenient for the life of women, and have a world reputation for the past 50 years. Adv.

Bumper Grain Crops

Good Markets—High Prices

Wheat, Oats, Barley, Alfalfa and Grasses

The winnings of Western Canada at the Soil Products Exposition at Denver were mainly wheat. This list comprised Wheat, Oats, Barley and Grasses, the most important crops in the Province of Winnipeg, which sweep stake on Alfalfa.

No less important than the splendid quality of Western Canada's wheat was the quality, as shown in the excellence of the cattle fed and fattened on the grasses of that country. A recent shipment of cattle to Chicago topped the market in that city for quality and price.

Wheat Crop produced in 1915 one-third as much wheat as all of the United States, or over 300,000,000 bushels.

Canada in proportion to population has a greater acreage surplus of wheat this year than any country in the world, and at present prices you can easily get the revenue for the purchase. In Western Canada you will find good markets, splendid schools, congenial social conditions, perfect climate and other great attractions. There is no war tax on land and no conscription.

160 ACRE FARMS IN WESTERN CANADA FREE

COUNCIL PROCEEDINGS

Council Chambers, May 22, 1916.

The Common Council for the City of Charlevoix met on the above date, Mayor Hess presiding.

Aldermen present: See, Paddock, Carter, Hiller, Gelken and Benton.

Minutes of the meetings of May 15 and May 16, were read and approved.

Moved by Ald. Benton seconded by Ald. Gelken that the sum of $25.00 be granted the Relief Corps G. A. R. to be used for decoration Day purposes. Motion carried by the following aye and nay vote: Ayes, See, Paddock, Carter, Hiller, Gelken and Benton. Nays, none.

Moved by Ald. Paddock seconded by Ald. Carter, that the Finance, Purchasing and Printing committee be instructed to purchase from the Electric Wheel Company of Quincy, Ill., four iron wheels for Tar kettle. Motion carried by the following aye and nay vote: Ayes, See, Paddock, Carter, Hiller, Gelken and Benton. Nays, none.

Moved by Alderman Gelken and seconded by Alderman Carter the adoption of Ordinance No. III entitled "An Ordinance to define the Expenditures and Liabilities of the City of Charlevoix, for the fiscal year, commencing the first day of October A. D. 1916, known as the Appropriation Bill." Motion carried by the following aye and nay vote: Ayes, See, Paddock, Carter, Hiller, Gelken and Benton. Nays, none.

Moved by Alderman See and seconded by Alderman Hiller that the communication as presented by Thomas Dixon be placed on the table. Motion carried.

Moved by Ald. Gelken and seconded by Ald. Carter, that the street commissioner be instructed to blaze all trees known as poplar and silver maple trees, according to the Ordinance thereof, and that the city be instructed to serve a certified copy of this resolution on owners. Motion carried by the following aye and nay vote: Ayes, See, Paddock, Carter, Hiller, Gelken and Benton. Nays, none.

Mayor referred the matter of drainage at foot of Alice street to the committee on Streets, Sewers and Public Health.

Mayor referred the communication presented by M. B. Hooker & Son to committee on Streets, Sewers and Public Health.

There being no further business the council adjourned.

ORACLE H. EMREY, City Clerk.

Boat had Fourth, U. S. Local inspectors, were here yesterday inspecting local steam craft.

Decoration Day Program at Cemetery

Line of march will form at 10 o'clock sharp—standard time.

High School Orchestra.

Prayer, Rev. C. H. Taggart.

National Anthem, "Star Spangle Banner," by six young ladies.

Patriotic Work by G. A. R. and W. R. C.

Addresses by Mayor Hess and Rev. Q. Walker

Solo, Dr. F. H. Wilkinson, "America," by six young men.

Benediction, Rev. L. C. Vinyard.

The following will be the line of march under Capt. Willard A. Smith, officer of the day:

The Drum Corps leading the procession, followed by carriages for the G. A. R. and W. R. C. with guard lines of the Boy Scouts on either side and float with Camp Fire Girls in the rear; next in line will be the school children, in charge of Supt. Craig, with the fraternal orders and all others who wish to go on foot following. Every person who owns an automobile is wanted to fall in line next, with horses and carriages last.

Rev. Vinyard will have the program of the day in charge and with his troop of Boy Scouts will attend to decorating the graves. Every person is asked to decorate and carry a flag.

Our Corn is kiln-dried. It will keep. You run no risk. S. Orlowski & Son.

ROYAL BAKING POWDER

Absolutely Pure

No Alum—No Phosphate

LOCAL AND PERSONAL

BANKS Will be closed May 30. MEMORIAL DAY--- A LEGAL HOLIDAY.

Memorial services at the Opera House at 10:30.

Dellque's Minstrels Saturday night at Charlevoix Theatre.

Mrs. J. A. Carlstom is very ill at her home at Horton's Bay.

George Hughes, at the home of H. C. Gamer, was 96 years old last Thursday.

The steamer Mary Ethel, of Traverse City, is hauled out here to receive a new engine.

The Charlevoix K. T. degree team went to Petoskey, Tuesday evening, to do degree work.

Mrs. Anna Van Leuven is here to pack her household goods for removal to her home in Otsego.

Homer Bailey, formerly of this city, but now of Kalkaska, was here last week visiting relatives.

Herl Brown and wife, of Flint, arrived Sunday afternoon for the summer. They drove through in their car.

The St. James tug H. and M. Link was towed here Tuesday by the City of Boyne to repair a broken engine.

The city has a force of men at work cleaning up the park, which will be more beautiful than ever this summer.

The information comes from Chicago that Mrs. P. D. Campbell is out of the hospital, and is doing well at the home of her daughter.

The Baccalaureate address for the Normal class will be given at the Congregational church next Sunday evening at 7:30 o'clock.

Delique Co. Minstrel held forth at the Charlevoix Theatre Saturday night of this week. A good minstrel entertainment never fails to entertain.

The steamer Hum, of the East Jordan route, put in an appearance on her first trip Monday of this week, and will make daily round trips as formerly.

At the Majestic Theatre, Tuesday, May 30, you will see "Caprices of Kitty" featuring Elsie Janis. Don't miss it—it's good.

At the democratic state convention last week, Charlevoix county was honored by the election of R. F. Sinn, of this city, as a member of the State Central Committee.

Ira A. Adams, president of the Mackinaw Island Park Board, was in town Tuesday on his way home to Bellaire from the Island, where he went on business connected with park improvement.

On account of the death of the Judge's brother-in-law, all the jury cases on the calendar have been adjourned to a special term June 6th. Court is disposing of chancery cases, however.

The Burns barn on Lewis street has been moved back to the alley, and the owners, the Bakers, will convert it into a laundry for the Bison Hotel. Next season a cottage will be built on the Lewis street front.

It was a regular Fourth of July crowd that filled the town last Saturday—"Dollar Day." The Majestic Theatre was crowded for the free continuous matinee, and everybody enjoyed themselves. Pleasant weather contributed greatly to the enjoyment of the day.

The local agent is advised that a Northern Michigan inn boat will leave Chicago north-bound Thursday, June 1st. Regular sailings thereafter on last year's schedule, leaving Chicago Tuesday, Thursday and Saturday. Reason given for late start is a shortage of south-bound freight.

Mrs. Harrison Bedford arrived from Grand Rapids Monday. Mr. Bedford will arrive this week. They will open the Fountain City House for the season. Harold Bedford goes to Grand Rapids to manage the Hotel Charlevoix, but will probably make an exchange with his father during the season.

Road Commissioner Hammond has established his camp at Hook's corners, on the East Jordan road, but owing to wet ground, has suspended operations there, and is helping out the city on the State street paving job. The crusher is planted on the county lot, on Hurlbut avenue and is smashing hard-heads. Subgrading is well under way. Sid Henry has the curb and gutter work started and a tank car of tarvia is expected to arrive by the time it is needed.

Chairman Paddock, of the street committee, who has charge of the work, says State street will be ready for traffic by July first.

Silas Swalles has given the tug Meister, of Northport, a rebuild.

Frank Mitchell has sold the Beach Hotel a $200 Edison phonograph.

Mrs. Kate Miller and daughter Marjory, returned home from the South Monday.

In cranking up his car Monday there was a "three-thick" which broke C. S. Dodge's arm.

Dr. Armstrong attended the meeting of Pere Marquette surgeons at Grand Rapids this week.

H. L. Dasker and family, who have been in Detroit the past seven months, returned home Saturday.

Mrs. George Newberry and daughter, of Saginaw, are visiting at the home of Mr. and Mrs. Charles Bullinger.

If you like good music, negro melody, and negro jokes attend the Minstrel at Charlevoix Theatre Saturday night.

Miss Eldred, Western Union local manager, is taking a two weeks vacation. She is relieved by H. C. Baumgartner, of Detroit.

Louis Mercier has launched a fine 40 foot motor yacht for J. W. Keiter, of Paducah, Ky. She is already in commission, and she is a beauty.

A. F. Valentine, formerly of Norwood, now living at Lynn Haven, Fla., is in town on business connected with property interests at Norwood.

Dr. W. H. Birney, wife and daughter, who spent the winter motoring in the south, returned last week, and the doctor resumes dental work with Dr. Mitchell.

Capt. Sam Rose on Saturday bought the attic steamer Petosega, which was sunk in the river at Traverse City this spring. Capt. Rose leaves today for Traverse City to raise the boat, which will be brought here.

Miss Jessie M. Himer, who for nearly twelve years has been the principal of the County Normal school, will not return to Charlevoix next year. Miss Himer expects to continue her work at Chicago University this coming year.

O. E. Wilbur on Saturday acquired the ownership, from the estate of the late W. H. Aldrich, of Chicago, of the Round Lake and Belvedere avenue frontage, adjoining the Charlevoix Summer Home Association on the west. The property has a frontage on street and harbor of 263 feet.

According to present plans the annual West-Michigan Pike tour will start from Chicago July 10th. From Traverse City to Charlevoix, a portion of the tourists at least will forsake the official route and make the trip through the Intermediate valley, where the roads are good and the scenery incompared.

Further postponement of the reconversion sale of the Pere Marquette system has been granted by Federal Judge Tuttle. At the request of the bondholders the new date was fixed as August 7. It was broadly intimated today that a purchaser had been found who will take over the property when the reorganization is completed.

A hot fire illuminated the entire north side at mid-night Tuesday. Three barns belonging to Geo. Smith, Ben Yettaw and Eugene Bedwin, on Lewis street, were totally destroyed. The Smith building was used for a shop, and the loss included tools and surplus farm stuff—loss $800, partially insured. Bedwin was the principal loser. The team and horses were saved, but a ton of about $300 was entailed on storage, hay and feed. Partial insurance. The fire started in the Smith building from a bonfire. For a time it looked bad for several nearby residences. Those of Dr. Lewis, Mrs. Hattie McNeill and Wm. Scroggie caught fire and were only saved by prompt action.

Petoskey News: Omar Shawvy, of Grand Rapids, who has lived in Charlevoix, has come to Petoskey and taken a position in the mechanical department of the Michigan State Telephone Exchange.

It is reported that the Petoskey paper mills have been sold to southern Michigan capitalists, who will operate the plant and add a line of flat writing papers to the present output.

KEEP YOUR SKIN CLEAR AND HEALTHY

There is only one way to have a clear, healthy complexion and that is to keep the bowels active and regular. Dr. King's New Life Pills will make your complexion healthy and clear, move the bowels gently, stimulate the liver, cleanse the system and purify the blood. A spine-tingling medicine. 25c at your Druggist.

COMMENCEMENT PROGRAM

ORDER OF EXERCISES FOR CHARLEVOIX NORMAL EVENTS

The thirteenth annual commencement exercises of the Charlevoix County Normal class will be held at Charlevoix during the week of May 29th, at the Congregational church. Rev. C. H. Taggart will preach the baccalaureate sermon Sunday evening at 7:30. The class day program will be given Wednesday evening at 8 o clock; the commencement program will be given Thursday evening at 8 o'clock. Miss Isabelle Becker, assistant state inspector of rural schools, will deliver the commencement address. Everyone is cordially invited to attend these exercises.

The Alumni Reunion will be held at the close of the commencement address, in the basement of the Congregational church. Miss Lillian Flanders, class of 1912, is president of the alumni.

Class Roll of the Charlevoix Normal of 1916:

Martin Gillespie—Colors, Gold and White.
Effie I. Barber, Sharon L. Ben, Mildred Bloomquist, Catharine M. Boyle, Ella M. Boyle, Ethel Brown, Edith Burns, Florence Carroll, Lucinda Carroll, Ruth B. Cassells, Frances L. Dixon, Ruth A. Dudley, Hazel A. Eichenlaub, Florence I. Muldrain, Dorothea Fischer, Ethel M. Fitzgerald, Ruth M. La Leunde, Sophie J. Blanchard, Treasurer.

Class Colors.

Isaac M. Hines—M. Pol. President
Ada L. Williams, Vice President
Mrs. A. Williams, Secretary
Charlevoix County Normal Class of 1916 commencement program:

Processional ..... Mrs. V. La Leunde
Invocation ..... Rev. C. H. Taggart
Vocal Solo, "Star Spangled Banner" ..... Mrs. A. I. Cassells
Address ..... Mrs. A. I. Cassells
"Another Visit Little Boy Blue" ..... Ethel Brown
Vocal Solo, "Rose Dreams and Roses" ..... Mrs. V. La Leunde
Presentation of Diplomas ..... Hon. Levi L. Lyons

The Emmet County Republican Club will hold a banquet at the Hotel Perry in Petoskey Friday evening, May 26th. Several prominent speakers have been secured for the occasion.

Barnard Doings.

School will close this week Friday for the summer vacation.

Mr. Clyde Smith and family were Sunday visitors at the home of Harry Eisinger.

Miss Dan Sayple accompanied Harold and Virginia Starr to their new home at Ellsworth, Sunday.

Mr. and Mrs. Byers and Mr. and Mrs. Van Zante were Sunday callers at the home of Allen Kerr.

The sexton of our cemetery desires that those who wish to work on their lots will do so on Tuesday of next week.

Barnard was well represented Saturday at the Big bargain day in Charlevoix—about twenty-five families attended.

Mr. Arthur Beattie motored to East Jordan Sunday, bringing his mother home from a two weeks stay with her daughter.

Miss Stella Everts and Lisle Himebaugh, of Phelps, visited her brother, Leslie and attended the Mothers' Day exercises.

The Mothers' Day exercises at the church were well attended. The church was prettily decorated with yellow and white flowers, the old rocking chair nearly fifty years old, that had rocked some of the members of the congregation—contained a large bunch of white carnations and spoke mately of mother. Rev. Quinten Walker, of Charlevoix, paid an impressive tribute to motherhood, comparing some of the qualities of ideal Motherhood with the character of God, and at the close of his address presented first to the mothers and then to others present, the white carnation. Howard Bennet sang a solo with a male quartette chorus, "Tell Mother I'll Be There," that touched many and appropriate music by George Block, the choir and the beautiful words and music of the duett by Mesdames Block and Jacobs were much enjoyed.

Beaver Island News

Miss Kate O'Connor, Secretary and General Manager of the Citizen Realty Co., of Chicago, was here last week on business.

Mrs. Geo. Hase, vice-president of the Citizen Realty Co., of Chicago, was here Thursday looking over the lands in general.

Mr. G. E. Carrier, one of the managers of the C. R. Co., of Chicago, was here last week looking over some land belonging to the Co., also their orchard which is coming on fine.

Mrs. Wm. Helfrey returned home last week after visiting her sister in Royal City.

Mr. Peter Gallagher, of New York City, is home visiting his parents, Dan C. Gallagher and wife.

Miss Myrtle Douglas is at Sutton Bay visiting.

Arthur Flick, of Engadine, Wis., was here looking over some timber so as to set up a portable saw mill.

Capt. M. J. Bonner, of Charlevoix, was a visitor here last week.

The barge Buckley is here taking the railroad iron.

The Pawleigh man is here with his Fleet.

H. Boyle is home on a visit.

Henry O'Leary, of Charlevoix, is putting in a crop on his farm.

Norwood News

Mr. A. B. Stafford purchased a new Ford of Benj. Brown last week.

Miss Roberta Ferguson spent the week-end at home in Norwood.

Mr. P. McIntyre, who has been quite ill for the past week, is much better at his writing.

Mr. W. Richardson and daughter Hazel A. and Frances spent Sunday at the home of A. S. Richardson.

Mrs. Peter Block, Mrs. James Block and son Jamie visited relatives in Norwood Wednesday.

The Misses Faye Wagner, Drusilla Richardson, Eva Stafford and Roberta Ferguson walked to Antrim City Saturday after Arbutus.

Forrest Fowler, of Charlevoix, was in Norwood Sunday.

Dr. Beuker, of Ellsworth, was called to Norwood several days last week.

Mrs. Chas. Ferguson is visiting in East Jordan.

Mrs. M. O. Patterson, of Chicago, arrived at their cottage Tuesday.

Mrs. A. B. Stafford visited her daughter, Mrs. George Parsons, last week.

Mr. and Mrs. Harold Hedford and daughter, Dr. and Mrs. R. Harney and children visited at the home of W. H. Superneau Sunday.

This being the last week of school the teacher and scholars are planning a picnic for the last day, Friday, May 26.

Mr. and Mrs. Reed Conitt were in East Jordan Saturday on business.

S. Orlowski & Son's last Saturday Cash Special Prices are good next Saturday. Look these over. It means a great saving to you.

TO RID CHILD OF WORMS

Don't scold the fretful, nervous child. Often the due to worms. Get rid of them by giving one-half to one lozenge Kickapoo Worm Killer, a laxative worm candy. Give only plain nourishing food, lots of out-door exercise and plenty of fresh air. Watch moods and continue giving Kickapoo Worm Lozenges, they will positively remove the worms. 25c at Druggists.

Any 50c broom	45c

We are offering a window full of White shoes at per pair $1.00

A large lot of girls and misses shoes at per pair $1.35

A large lot of boys shoes at, per pr. $1.75

Tables full of men's shoes at ..... $1.75 $2.00 $2.25 and $2.50

Come in and look over our line of goods. We will sell at prices that will be satisfactory to you.

County Normal Notes

Sadie Donlevy was absent from school Friday.

Mary Boice was unable to be in school Friday afternoon on account of illness.

Ruth Chellis was absent from school on Thursday of last week.

Miss Jessie Burnett wrote a very interesting letter to the normal class last week. Miss Burnett is at the city hospital in Jackson. She reports that she likes the work very much. Miss Burnett is a graduate of the class of 1910.

On last Thursday Mr. Vernon Hopkins visited the county normal. Mr. Peasles gave a very interesting talk on ideas and plans that help to make a Standard school.

Rena Carroll spent the week end with her uncle in East Jordan.

The stork left a son at the home of Mr. and Mrs. Clark of Central Lake. Mrs. Clark was formerly Olive Sherman a graduate of the class of 1907.

A daughter was born to Mr. and Mrs. Shroeder of Conway. Mrs. Shroeder was formerly Marguerite Munger, a member of the class of 1912.

Hazel Richardson and Catherine Lafave have received teachers' certificates from the A. N. Palmer Co.

The baccalaureate sermon of the normal class will be held next Sunday evening at the Congregational church. Rev. C. H. Taggart will preach.

American Cedar for Lead Pencils.

Two billions of lead pencils are made each year. Half of them are made of American cedar.

Danger in Street Car Riding.

Physicians have decided that several forms of nervous diseases, sometimes dangerously severe, can be caused by persons standing up and holding straps while riding in street cars.

Petoskey News: The Petoskey high school has chartered the steamer Columbia for a trip excursion to the northern Michigan Tract Meet at Boyne City, on Saturday, May 27, and there is sure to be a large crowd make the trip. A delegation from the Pellston high school, another from Harbor Springs and another from Charlevoix will accompany the Petoskey delegation. The Petoskey high school band will furnish the music and the Petoskey baseball team will also make the trip and probably play against Traverse City.

Blue Flame Oil Stoves.

Now is the time to purchase your OIL STOVE and the place to buy it is

The Big New Hardware Store

where you will find four of the leading makes to choose from.

We sell and guarantee the following well known and popular stoves:

"REV-O-NOC" "NEW PERFECTION" "PURITAN" and "BOSS"

We have samples of the above stoves on our main floor and will demonstrate their respective good features all of this week and next in order that the purchaser may be the judge of which they like best.

We will be pleased to have you call and see these BLUE FLAME LEADERS, even if you are not ready to purchase as it will be of interest to anyone contemplating a stove buy in the near future to see these four stoves burning side by side.

Our Kyanize Demonstration

is still going with Mrs. Smith in charge and we invite the ladies especially to call and see what wonderful results can be had from using KYANIZE.

Moved and supported that the bills be read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

Moved and supported that the superintendent be authorized to get prices for installing proper ventilating apparatus in the laboratory. Motion carried.

These minutes were read and approved and on motion the board adjourned. E. J. HILLER, Secy.

Central Lake Torch: Central Lake has fallen in line with the neighboring villages, and is about to expend her best efforts in booming the town. The initial step was taken last Wednesday evening, when more than twenty-five of our citizens met to organize a Board of Trade.——Last Thursday evening those interested in the re-organization of the Central Lake band met at Mathers' hall to make plans for the summer. A good representation of band members was present. Mr. Arthur Nelson was chosen director, and to all who know of his musical talent this fact in itself is a guarantee of the band's success.

Recipe for Popularity.

All summed up, the little maxim, "be nice to people and they will be nice to you," about covers the whole subject of popularity.

LOST—Sunday afternoon, May 21st, a lady's gold watch. Finder leave at Sentinel office and receive reward. Watch is marked, Mrs. L. A. H. Henry.

Go scatter flowers where sleep the Blue and Gray,
Under one flag, a strong, united land,
An inspiration to the world we stand.

DENIES THAT GENERAL GRANT WAS UNFEELING

One Who Knew the "Silent Man" Well Tells of Instances That Prove Rumor's Falsity.

GRANT did not select the Wilderness as the scene of his first engagement; he was compelled to take it, writes Samuel H. Beckwith, chief cipher operator to General Grant, 1862-65. But he was not caught unawares as some unfriendly writers have argued. We well knew that the "Johnnies" were somewhere before us, ready to oppose brisk defense to our forward movement, and every possible precaution was taken to protect our troops against surprise. When the fight started we were prepared for them, so far as an army could be prepared for the struggle up hill before us.

During the first day's engagement General Grant was not idle. He wanted to learn first-hand what was going on about him. His personal inspection, therefore, was necessary, and Cincinnati, that magnificent war horse, was drafted into service. There have been many horses that have gained considerable places in equine history, but this noble animal deserves place among the best. He was a chestnut gelding of rare mettle, and when in action upon a smoke-covered field he certainly was an object of admiration. I was the general's only companion on that ride, and for one excellent reason, among others, my mount could keep pace with his.

There were a few moments during the ride in which I was reasonably sure that our chief would be unhorsed. A bullet of dwarf pine and cutting a small crescent above the line of Federal troops groping their way along Clanwill, in our immediate front, with a detachment of Confederates who were rushing through the tangle of wood. I realized that if bullets was the result, and several sang as ominous a song about our heads. We rebed up, and then, as our men drove the enemy back to cover, he continued on his way with this comment:

"When our time comes, Beckwith, we'll go out for better. There's no use trying to avoid it."

And avoid it he did not.

UNDISMAYED BY TIDINGS.

As was inevitable under such conditions as prevailed in the Wilderness, reports of the vicissitudes of the engagement were numerous and conflicting. To headquarters, where Grant awaited the outcome of the second day's fight, came courier after courier bringing news of the progress of the contest from various portions of the field.

Some of these were alarmingly incorrect.

But the evil tidings didn't disturb the chief. Several times during the night I visited his tent to receive or deliver messages, and found him apparently unmoved by the direful rumors.

He had done all that any commander could do to insure victory; the result was with Providence. Even with some of these disquieting tales unverified, he retired to his cot to snatch a much-needed rest, the least ruffled of the group about headquarters.

The morning of the 7th broke upon a battlefield strewn with the wreckage of terrible fighting, but the two formidable opponents had finished, writing into history the Battle of the Wilderness. The forces of Lee had retired behind their intrenchments; the Federal troops were unwilling to attack them so protected.

Orders were issued late in the afternoon for a night march of the entire army. Sheridan's cavalry, starting the evening the lieutenant-general and Meade with their staffs started out upon the way. When we reached Hancock's corps, the brave fellows were laying behind their works most of them asleep, and we picked our steps carefully along in the darkness to safeguard the recumbent soldiers.

Grant sought a brief interview with General Hancock and the twain rolled into an ambulance wagon and had covered for some time. I had been riding close behind my superior and now I dismounted and threw my bridle rein across the limb of a fallen tree nearby, while I flung myself down upon a pile of brush to await the reappearance of the general. I was pretty well fagged out and a few moments rest was most welcome.

It wasn't long before the boys aroused the presence of Grant, and although orders had been given to refrain from cheering, owing to the proximity of the enemy, when they learned that he was facing southward, they sprang to their feet and the rocks and woods sent back the echo of their boisterous shouts.

Some rather harsh criticism has been directed at General Grant for the tremendous sacrifice of life in the Wilderness campaign, and his alleged callousness at the wholesale slaughter of his men.

STOICISM OF GREAT CAPTAIN.

Let me, who was his constant companion during three years of the Civil war, bear testimony to his possession of a genuine humanity and manly sympathy. His was a most peculiar nature. Where others would feel and grieve, manifesting their anxiety in words and actions, he preserved a stern silence. But I am certain he felt as keenly and deeply the harsh of misfortune and sorrow as did those about him. During the bloody days of relentless attack and stubborn defense in the spring of 1864 I noticed an almost indefinable sadness in Grant, a sort of moody reticence, that convinced me, who understood the man, that he was suffering at the destruction of so many gallant troops.

It was after the battle on Cold Harbor that I went to the generals tent to deliver a cipherogram, and found him sitting alone, smoking a cigar and evidently buried in thought. His face bore a care-worn expression that indicated sleepless nights and weary days. For a moment he was oblivious of my presence; then he nodded to me and I entered, handing him the message. After reading it he turned to me with a sigh.

"Beckwith," he said, "the hardest part of this general business is the responsibility for the loss of our men. I can see no other way out of it, however, we've got to keep at them. But it is hard, very hard, to see all these brave fellows killed and wounded. It means aching heart in the old home. And he lapsed again into ruminating silence.

"There were two occasions when I was greatly moved, and that tears. The one was in the forepart of July of 1864, while we were in headquarters at City Point, in the shadow of beleaguered Petersburg. A telegram came in from Gen. W. T. Sherman, who was sampling with Hood at Atlanta, Ga., conveying the painful intelligence of the death of McPherson, the beloved commander of the Army of the Tennessee.

WORD OF McPHERSON'S DEATH.

This rugged and gallant leader, by his intrepid and cavalier bravery, had won for himself the enthusiastic support of his men and the unreserved confidence and admiration of Grant and his generals. It was a telling blow, just at this time, to the hopes and aspirations of the North.

I took the dispatch to the general and he read it silently. He was hard hit. I could readily see that. His mouth twitched and his eyes closed as if he were shutting out the baleful words. Then the tears came and one followed the other down his bronzed cheeks as he sat there without a word of comment. It was most eloquent silence.

The other occasion was in October of the same year, when the news of the death of Gen. E. D. Ransom reached us. Ransom and Grant had been comrades in arms in the West in the early days of the war, and a strong friendship had grown up between them. The son of the young officer struck home with peculiar force and none felt that loss more deeply than General Grant.

Perhaps the most welcome of all visitors was to Miss Julia W. Washburne, congressman from Illinois, and subsequently under President Grant, secretary of state. He was a close and beloved friend of the Federal commander. It was Washburne who bestowed upon me the sobriquet of "Giant's shadow," because, as he explained, wherever the general went I followed.

Lincoln at Gettysburg

The cemetery grounds at Gettysburg were consecrated on November 19, 1864. Mr. Edward Everett, the noted orator being chosen to deliver the oration of the occasion, the dedicatory address being reserved for President Lincoln. "Mr. Everett had spoken for nearly two hours," says a eye witnesses of Gettysburg, "and the people had listened attentively but in a cold, stolid fashion, but after Mr. Lincoln had spoken only a few words a wave of emotion swept over the audience and everybody was in tears. A deposition of fifty soldiers of the army of the Potomac, who were recovering from their wounds, were present, and when Mr. Lincoln began to speak they pressed forward listening intently to the president, and when he reached the well known words of that famous speech:

"The world will little note nor long remember what we say here, but it can never forget what they did here," great tears rolled down the bronzed faces of the soldiers. When the president finished there was a profound silence broken only by the sobs of the women, many of whom had been widowed by the battle. Then Mr. Everett stepped forward and shaking the president's hand, said, "Ah, Mr. Lincoln, I would gladly give my forty pages for your twenty lines!"

"Old Time Tunes"

Old Glory

MEMORIAL DAY

IT IS quite interesting to compare the photographs of the young volunteers who went out in the civil war with those taken today. One can scarcely recognize in those ill-fitting uniforms the men who today will commemorate the deeds of valor their comrades done before. They were as royal a set of young fellows as ever took up musket or handled a sword in defense of civil liberty. They wore the blue as some of them, and they look their best on Decoration day. There is a badge on each breast. The hand has grown feeble, the hair is turned gray, and with irregular tread and tune they follow the band and the children of the schools, all bearing bouquets of flowers to the graves of their comrades.

It is not the procession that marched down to the battle front away back yonder in the long ago that we behold today. It is but a remnant of that mighty host; but for a half century they have been keeping alive the fire of the old flag bright and the graves of their comrades green, and year after year reminding a new generation of the horrors of war, of the beauty of patriotism and the fidelity and love of country for each other. It is the epic of the Republic, and as the years go by, from the rich treasure of memories that have grown holier as the years have sped each year there is added to the store by one, from the blue files of the living with the badge upon their breasts and the green emblem around them. Beneath the green mounds, and the fragrance of immortelles they await the roll call on the eternal morning.

If in the bright afterwhile, some chronicler, with more than mortal prescience, were to write the achievements of the men who today occupy the place of honor in our community, there would be found written somewhere like this: The greatest service the men of 61-65 rendered to their country was not merely the preservation of an undivided flag, but in holding before our nation from year to year in this beautiful service the glorious ideals of civil liberty, and the awful cost at which these national virtues are maintained. If we would live to preserve the Union, it has been another thing to keep before the coming generations the principles which have been embodied in that union. This has been done by the Grand Army of the Republic in a way to call forth the admiration of humanity. If there is one thing more than another that has inspired the love of freedom into the soul of our young manhood and womanhood, it has been the Memory Group, tramp of the veterans, bearing their memorial wreaths to the graves of their martyred dead. It is a sight calculated to cause even the most cold to admire the principles for which have been embalmed in sacrificial blood.

The tears of the blue and the gray have healed the wounds of fratricidal strife. There are monuments to each that are sacred and holy. Today the same sacred tear will upon each, the same flag is beloved by all, a united country is our mortal heritage. There is no section but what the veteran's handgrip nor enmity in his salutation. God has made his handiwork of the blood of unmarked graves and has filled the old trenches with lilies of the valley. What once chamber rolled rampants sons the cannon of war, beneath the storms of half a hundred years stand as mute mementos to parts and city squares monuments of the years, which, if it please God, will never come again.

Debt Must Never Be Forgotten.

The generations that have been patriotic beyond the example of other nations in providing for those who left home and all its comforts, business and all its prospects, life and all its ambitions, to fight for the flag, for the Constitution and the Union. This is past history, and until the last man shall die "fought that good fight" is laid away in mother earth forever, we hope the American people will never forget for a moment the debt they owe to the valor and endurance of those who fought the nation's battles in those days now over everlasting even in memory. Their graves should be kept green with the tears of a grateful people, and as each Memorial day comes around in the year, flowers, the emblem of the resurrection, should be strewn profusely over the graves where the patriot dead lie, sleeping "the sleep that knows no waking" on earth and in time.

Their Fight for Liberty.

The generation of Americans of that grand army fought, not for oppression but for liberty, not for territory and power but for the perpetuation of human freedom. They earned for the more symbol of kingly sovereignty, and the fidelity of their country.

Can it be hoped that fifty years from now a united Europe may have a day of memories for the countless dead in this titanic struggle, a day for commemoration of the principles of humanity established for all time by this sacrifice?

Over the Some

The tide has risen 1861 is fading away to numbers only. It's still the same old blue.

KINDLY ACT OF SOUTHERN GIRL

Christmas Day Happening That Has Lingered for Many Years in Soldiers' Mind.

WE ALL sometimes visited by a tall, grizzled, square-shouldered man, with bronzed eyes that send forth kindly gleams from under bushy brows.

He is one of our soldier friends. A man who has made a success of living because he has kept the flower of romance alive in his heart. Although he has many interests, and is, at every odd, greatly alive to present day affairs, he finds time to dwell longingly on the memorable events of the days when he was devoting himself to his country's service.

His talk, however, is not all of combats on the battlefields. When last he sat at our fireside, his reminiscence took on the glow of romance. Looking into the depth of the dying embers, he said: "The day before Christmas, 1863, we were encamped near a small town in Mississippi. The order was given in camp that there would be no more fighting on Christmas day. Early Christmas morning most of us went into the town of M— on pleasure bent.

"My chum, a neighbor boy from New York state, was in about the same state of homesickness that I was. We didn't say much, but I knew he was thinking, as I was, about the family back at home, and the warm little farmhouse hidden in among the snowy hills.

"What's the use of Christmas without snow? he asked me, glumly, as we strode along.

"Mother can make Christmas out of any sort of place," I told him. It's another 1 miles today."

"We walked along the business street, with its roofed sidewalks. It was unusually wide, and as we came out into the residence section there were double rows of live oaks, their gray moss dragging the red clay drive ways.

"The houses were set far back from the sidewalk, within tall iron fences or brick walls, and guarded by heavy gateways. Box hedges flanked the walks to the portico. Roses vined and bloomed about the doorways, green ferns grew in the corners, and mocking birds sang in the satin leaved Japonicas.

"Into the gateway of the handsomest of these homes, a girl of probably sixteen sprouted in. Behind her came a colored man, carrying a big basket. The girl, slender as a fawn, spoke to me, probably because I was taller and different than my chum.

"Merry Christmas, Mistah Soldiah, my father presents his compliments and begs you to accept a glass of egnog."

"I'd have drunk blue vitriol if she had offer it it, but the eggnog was as velvety as her sweet voice, and we drank heartily, raising our soldier caps and feeling too shy for many words of thanks.

"I was nineteen at the time, and surely wished I could linger with that girl. I hadn't set my eyes on anything feminine for months, and then to come face to face with such grace and beauty was almost too intoxicating. I ran see her tonight as she stood before the high, fanciful iron gates of her father's home, graciously and unaffectedly offering his Christmas good cheer to men who tomorrow would resume the fight against his cause.

"She was a dark-eyed, dark-haired little thing, with high color. I remember how dainty her feet looked in black slippers, arranged across white stockings. Her hair hung in loose curlers and she wore a white skirted dress of some bright silk. I don't remember the color. I looked at her as long as I dared. I assure you.

"Back at camp, the Christmas day over, the weary vigil of battle once more renewed, I had a new fight on. It was with the brightest violo. that had ever crossed my gray country home. I wanted to know the name of that girl, to come back sometime to woo her and to win her.

"But I was a poor boy, as yet without the education which I meant to gain after the war, and because of the war, the training for my life work was to be belated.

"What had I to offer this bright creature who had apparently known only luxury. I had to reason myself out of that girl, and it was more of a struggle than the siege of Vicksburg.

"I might easily have found out her name, for we were encamped near M— some time, and I could have gotten leave to go there again. But I was afraid if I did know it, I couldn't keep from writing to her, and persecuting her or myself, as the case might be.

"Hoy that I was, I saw the need of nipping this passion in the bud, so I never went again to M——, nor heard the name of my dark-eyed southern beauty."

As the Line Lengthens.

Persons who have passed the half-century mark will remember how the country's story looked to them in their youth. It seemed like a bridge with the Revolution as one portal and the Civil war as the other. One stood at the beginning of things, and from other "in these last days." Washington and Lincoln seemed near complementary figures, the glorious fruitage of the two contrasting periods of valor.

Within the lifetime of these observers, the lines have lengthened so that both the Revolution and our Civil war seem old wars. We can even foresee the time when the historians will inquire which took place first, so near together will these epoch-making struggles cluster in the lengthening perspective of the centuries. Lowell tells us in one of his essays that in his youth soldiers of the Revolution still lingered about the gatherings-places of life's work with the grandsons of those whose fathers bravely died. We are nearing the time when our children should pray for remembrance the veterans of Appomattox, to tell their descendants of a correspondingly significant observation.

Brothers Again

Over the new-turned sod
The sons of our fathers stand,
And the flowers old light
Slept out of sight
In the clasp of a brother's hand.

For the old blood left a stain
That the new has washed away,
And the sons of those
Who fought the foe
Are marching together today.

Oh, the roses we plucked for the blue
And the lilies we twined for the gray
We now bound in one wreath,
And in silence beneath
Slumber our heroes today.

—Andrew Bonnyne Payne.

When Housework Drags

Keeping house is hard enough when well. The woman who has a bad back, dizzy spells, and dull, dragging headaches, has a hard lot, for the family tasks never let up. Probably it's the result of kidney trouble and not the much-dreaded "woman's weakness." Strengthen the kidneys with Doan's Kidney Pills. They are as harmless as they are effective and may be used for children with weak kidneys, too.

An Illinois Case

Mrs. Geo. A. Wilson, Washington, Ill., says: "I was asked for a long time and the kidney secretions passed too frequently. I was nervous and suffered sharp pains across my loins. Doan's Kidney Pills, for sale by all druggists, 50 cents a box, quickly relieved me and I never had any more of my kidney trouble."

Get Doan's at Any Store, 50c a Box.

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Don't Persecute Your Bowels

Cut out cathartics and purgatives. They are harsh, harm, unnecessary. Use

CARTER'S LITTLE LIVER PILLS

Purely vegetable. Act gently on the liver. Relieve a dose. Cure sick headache, biliousness, indigestion, constipation, sallow skin. Small pill, small price. Genuine must have Brent Good signature.

CARTER'S LITTLE LIVER PILLS. SMALL PILL. SMALL PRICE.

Vengeance First.

A young convict came singing around the corner of the big, sunny yard, and Judge Brine had just made himself comfortable in an easy chair on the big home porch.

"Good morning," said he to the man.

"Good morn'n'."

"What are you here for?"

"Beatin' up a policeman."

"Why, that's a serious offense. Now, aren't you glad you have thought better of it and intend to turn about?"

"Yes, sah."

"And when you get out you will reform?"

"Yes, sah, I'll beat up dat perlicemen what sent me up for beatin' him up—after dat, I'se gwine t' be a diffunt nigger, Judge."—Pittsburgh Chronicle-Telegraph.

Why He Resembles His Parents.

A bachelor friend of the young couple was being entertained at dinner, and during the evening he was presented by the proud mother to her infant son.

"Now, Fred, which of us do you think he is like?" she asked playfully, holding up the baby for inspection.

The guest viewed the tiny mite for a moment as he replied: "Well, of course intelligence has not really dawned in his countenance yet, but he's wonderfully like both of you!"—Youth's Companion.

His Sort.

"Yes, I actually hurdled the lion in his den."

"Close shave, wasn't it?"

GLASS OF WATER

Upset Her.

People who don't know about food should never be allowed to feed persons with weak stomachs.

Sometime ago a young woman who lives in Me. had an attack of sickness, and when convalescing was permitted to eat anything she wanted. Indiscretion feeding soon put her back in bed with severe stomach and kidney trouble.

"There I stayed," she says, "three months, with my stomach in such condition that I could take only a few teaspoonfuls of milk or beef juice at a time. Finally Grape-Nuts was brought to my attention and I asked my doctor if I might eat it. He said, 'yes,' and I commenced at once.

"The food did me good from the start and I was soon out of bed and recovered from the stomach trouble. I have gained ten pounds and am able to do all household duties, some days sitting down only long enough to eat my meals. I can eat anything that one ought to eat, but I still continue to use Grape-Nuts at breakfast and supper and like it better every day.

"Sometimes I think I could stand only a short time, and that a glass of water seemed so heavy. I am fully satisfied that Grape-Nuts was the food which saved my life."

Then came the day when Dick was around to see the house closed and a big "For Sale" sign in front of it. The town was buzzing with the news Miss Elsie's lawyer, who had had charge of her property, had absconded, taking with him her whole available thousand dollars.

Miss Elsie had remained secluded in the house since the Monday before. Dick hesitated only a moment; then he went into the garden and knocked at the door.

III

Miss Elsie herself opened it and stood, watching him through her tear-stained lashes. She looked less beautiful than ever at that moment, with her reddened eyelids and her disordered hair.

"It's too bad, ma'am," said Dick. "Just heard the news, and called to say how sorry I was."

"I suppose it's what they call life," answered Miss Elsie.

"I hope, ma'am, you aren't planning to sell the place because of that?"

"I certainly am. It's all that I have left now."

"Might I ask your price, ma'am?" inquired Dick.

"Eight thousand dollars," answered Miss Elsie listlessly. "It ought to be more, but the house is very old, and that's what I'm advised to sell it for. Ain't you never had a girl, Dick?"

Dick Sittingwell moved in his seat uneasily. "Cut it out, I tell you," he snarled ferociously. "Hell! Bourne End! Here's where I got off. So long, old man! See you next week as usual."

Dick Sittingwell had had plenty of girls when he was a young man, but the hope you might never meet with one is an unlikely end. And it was only within the last two years that he had romance, sweeter than any, and more strange, had come into his life.

He never spoke about it to Miss Elsie Van Nugent. It had never entered his mind that he could speak to her with out profaning her. That was his sanctuary, his holy of holies. And marriage was the last thing in the world which he had never dreamed.

Their acquaintance had begun by an accident. Dick, toiling up the hill at Bourne End on a hot summer day with his sample case in his hand, had seen the old maid standing at the gate of her garden, looking down the big house in the village and, taking her for the housekeeper, had called:

"Might I ask you for a glass of water, ma'am?"

Ill as she was, stammered Miss Van Nugent, and ran away, or rather hurried away, rather, for she had an air about her cold as if it had come from some Olympian spring. Dick confided in her.

Much oblige, ma'am," he said, and raised his hat and went away. He did not imagine what a romance that was to Elsie Van Nugent.

Afterward, upon succeeding journeys, it often happened that he saw Miss Elsie at the gate. Then he would nod pleasantly and pass a remark. By degrees their intimacy increased. Dick Sittingwell would often stay as long as the minutes, talking and looking wistfully at the big house in the cool grounds. He learned Miss Elsie's name at the hotel, the name of the place, and was the daughter of the late squire, the very last old maiden and they said, maliciously, that she was forty.

II

Elsie Van Nugent had never married because she had taken care of her father until his death, when she was thirty-seven. No opportunities came after that. Opportunities for marriage are few in the Cotswolds among women whom birth has made superior to the rest of the community. And, besides, Elsie was already growing into a typical old maid. She was becoming neat and thin, some worn gray streaks in her hair, and she had lost her color. Disappointment she had ever possessed was already gone beyond recovery.

Her life had been utterly cramped. Her bookish learning had never been modified by contact with the world, for her father had always been a recluse, and in his last days a fretful invalid. When she met the drummer she thought him a typical man of the world.

The acquaintance was a wonderful thing to her. She felt guilty in stealing down to the garden gate when Dick was coming that way—Thursday's he always appeared in Bourne End. She invented little excuses at first to account for her presence there. Gradually she thought how she would like to ask him in. But she never dared. It was not only fear of what the neighbors would say, but fear of what he would think of her.

It was odd that the uncouth drummer should be so strange a fascination over the old maid, but it was equally strange that he should find in her his ideal of womanhood. Two or three years passed, and their intimacy stayed exactly where it was. Neither dared to increase it, or to venture to speak of the thoughts in the heart. Dick was becoming balder and stouter, and Elsie more withered and lean.

Then came the day when Dick was around to see the house closed and a big "For Sale" sign in front of it. The town was buzzing with the news Miss Elsie's lawyer, who had had charge of her property, had absconded, taking with him her whole available thousand dollars.

Sweetness Stirred Her Gratitude.

Sweetness of disposition, gratitude, that young man Smiley has been here three nights in succession, and he has been nearly midnight when he left. Hadn't he better invite him to bring his trunk and make his home with us?" Innocent daughter—"Oh, papa, may I? It is just what we wanted, but he was too bashful to ask you. He'll be delighted when I tell him this evening."—Pittsburg Chronicle-Telegram.

Swedish chemists have found a way to remove from coal tar the finely divided carbon which it holds in suspension.

The Dreamer

By H. M. EGBERT

(Copyright, 1912, by W. G. Chapman.)

I

"Aw, come off, Bill! I'm too old for them dreams!" said Dick Sittingwell to his fellow drummer in the train.

"No, but honest! I mean it! Why, Dick, you must be making your cool four thousand, and if your firm went bust you could get as good a job anywhere. And forty-five if you're a day. Ain't you never had a girl, Dick?"

Dick Sittingwell moved in his seat uneasily. "Cut it out, I tell you," he snarled ferociously. "Hell! Bourne End! Here's where I got off. So long, old man! See you next week as usual."

Dick Sittingwell had had plenty of girls when he was a young man, but the hope you might never meet with one is an unlikely end. And it was only within the last two years that he had romance, sweeter than any, and more strange, had come into his life.

He never spoke about it to Miss Elsie Van Nugent. It had never entered his mind that he could speak to her without profaning her. That was his sanctuary, his holy of holies. And marriage was the last thing in the world which he had never dreamed.

Their acquaintance had begun by an accident. Dick, toiling up the hill at Bourne End on a hot summer day with his sample case in his hand, had seen the old maid standing at the gate of her garden, looking down the big house in the village and, taking her for the housekeeper, had called:

"Might I ask you for a glass of water, ma'am?"

Ill as she was, stammered Miss Van Nugent, and ran away, or rather hurried away, rather, for she had an air about her cold as if it had come from some Olympian spring. Dick confided in her.

"Much obliged, ma'am," he said, and raised his hat and went away. He did not imagine what a romance that was to Elsie Van Nugent.

Afterward, upon succeeding journeys, it often happened that he saw Miss Elsie at the gate. Then he would nod pleasantly and pass a remark. By degrees their intimacy increased. Heralding the Outdoor Season

For the woman devoted to out-of-doors a sports coat model, like that shown in the picture, is a good choice early season wear in a cool coat. At the end of the season it will own her nothing, for she will have had it always with her. Coats of this character are shown in great variety and they differ little from regulation sports coats. They are more quiet in color and somewhat more trim as a rule.

Not all the models designed for street wear are in quiet colors. The citron shades are much in evidence where smartly dressed women congregate. The checked coat is a favorite for both street and sports wear and is really classed according to the size of its checks—if they are big it is of the sports sort, while very small checks are about as conservative as the more trying black.

For the young woman the coat pictured is a model that it would be hard to improve upon. The material is in the front with a deep square yoke which improves its lines, giving them a straight direction at the middle front with a generous flare at the sides and back. It reduces to one side and has a collar high enough to be chic and becoming and so constructed that it can be turned back away from the neck when so desired.

Big patch pockets are furnished with a plait at the middle fastened with a button. The buttons at the front are set on in groups, and two buttons finish the oddly cut cuffs.

A suit for the street and general utility is made in a manner that appeals to young women and justifies their judgment. It is now in cut and very smart looking and it looks well in any of the fabrics—including the novel weave—that have been used for this season's suits.

The skirt is not a new model, but is cut fuller than usual with the inverted plaits that extend to the waist line. There are its only distinguishing features. The coat is a novelty, simply and cleverly cut, with raglan sleeves and very tail only. At the front a wide overlap terminates at the hem line. The coat fastens here with a half dozen large white bone buttons. Similar ones provide the decorative feature at the front and back and on the sleeves. There is a turnover collar of the material and cuffs similar to it with a plaiting let in at the back of each. As is nearly all the other tailored suits an extra collar and cuffs of white organdie, voile are designed, to facilitate the advent of summertime.

White pique, white satin, embroidered batiste and lace appear in collars and cuffs, with the various dark colors used just now for street wear. In collars and rovers and collars and cuffs there are occasional suits in which white broadcloth correspondingly faces the chance of losing its creamy whiteness and being thrown into the discard. But washable stuffs are prettier, more delicate, and more popular and the tailored suit, either in wool or silk, is immensely enhanced by their freshness.

Other tailored suits, cut on lines with which we are now familiar, can claim the distinction of originality in certain details of their finishing. One of these has what are known as saddlebag pockets of formidable size set onto the skirt, in their silk-braided decoration, fancy silk lining and finishing, the inspiration of Spanish bolero jackets. The coat is cut with a square opening at the front, has embroidered or braided revers and a little low-cut vestee. The neck is finished with a soft ruffle of lace and a soft chemisette of lace appears above the vestee.

General Utility Suit

Latest Matching Blouse.

The perennial popularity of the dark blue suit, which is even more pronounced than usual this year, is acknowledged by the blouse makers in attractive crepe Georgette and chiffon waists of various colors trimmed lightly in dark blue. These are more becoming than the all blue waist, yet have an air of belonging continuous to the suit. Plush pink Georgette with narrow hems, buttons and a fancy stitching or delicate embroidery in dark blue has delightful possibilities and the sand, biscuit and brown shades will be the same. Treatment well, as do certain porcelain, Japanese and medium blue.

Scent Bags.

Clothes scented with lavender have a delightfully clean, fresh odor. Make your own lavender bags out of bits of colored chiffon. Fill three-quarters full with the dried lavender; tie with ribbon finished with a rosette, and you will have the daintiest sort of scent bags at a very trifling cost.

REAL CHAMBER OF HORRORS

Attic in New York's Criminal Court Building Poor Place to Spend a Pleasant Afternoon.

Any attic is a collector of forgotten relics as thickly enveloped in associations as is dust. But in the attic of the normal household there is very little that is gruesome and much that is tender, and humorous, in its associations. The ghost of the past which lurks under the domestic eaves are for the most part kindly, though some may be melancholy and some foolish. One finds them, on rare visits to their musty retreat, making a gentle appeal to one's heart, seeking to soften one's facial lines with ghostly caresses, causing a philosophical welcome.

We dwell upon these characteristics simply to emphasize the contrast, presented by the fearsome wraiths haunting the attic of the criminal courts building. A spring housecleaning there, the first in many years of crime, has discovered among the dust gathering contents a thousand suits taken from the bodies of murdered men, including the clothing worn by Cornelia Young, by Stanford White and Herman Rosenthal. There was the trunk in which Elsie Sigel's body was found. There were rambling outfits captured in the spectacular raids of William Travers Jerome. There were weapons of every description, the agencies of murder and assault—in fact, an accumulation of criminal exhibits covering a decade and more of the city's history and recalling to mind a long list of bafflingly tragedies and sad failures and grim triumphs of Justice.

Perhaps it is not altogether fair to call this chamber of horrors our criminal attic, since to be completely representative it should gather also those more wholesome relics of a people's activities which eventually find their lodgment in museums. And yet until this criminal courts attic more nearly resembles in contents of attic than the domestic species the millennium will seem too far off to bother about.—New York Tribune.

City Bird Clubs.

It has taken more than twenty years of steady work by the National Audubon society to demonstrate the economic values of birds to agriculture, and the result is the enactment of protecting song birds and the federal laws protecting the migratory game birds. Incidentally, bird sanctuaries have been established in several places, remarks the Louisville Courier-Dispatch. Henry Ford's near Detroit, and Avery island on the Gulf coast, given by Mrs. Russell Sage, are noteworthy. Several state preserves have been set aside for the same protection. The bird club movement strives to save the birds, with objects both economic and esthetic. Bird club organizations have taken firm hold in several of our large cities, and have brought about increased attraction near to parks and residential sections reclaiming the wild native birds. The methods include planting trees and shrubs su

Go scatter flowers where sleep the Blue and Gray;
Under one flag, a strong, united land,
An inspiration to the world we stand.

DENIES THAT GENERAL GRANT WAS UNFEELING

One Who Knew the "Silent Man" Well Tells of Instances That Prove Rumor's Falsity.

GRANT did not select the Wilderness as the scene of his first engagement; he was compelled to take it, writes Samuel H. Beckwith, chief cipher operator to General Grant, 1862-65. But he was not caught unawares, as some unfriendly writers have argued. We well know that in Johnson's were spots where before us, ready to oppose brisk defense to our forward movement, and every possible precaution was taken to protect our troops against surprise. When the fight started we were prepared for them, so far as an army could be prepared for the struggle up in such a field.

During the first days engagement General Grant was not idle. He wanted to learn first-hand what was going on about him. A personal inspection, therefore, was necessary, and Cincinnati, that magnificent war horse, was drafted into service. There have been many horses that have gained conspicuous places in equine history, but this noble animal deserves place among the best. He was a chestnut gelding of rare mettle, and when in action upon a smooth-covered field an eyesore was an object of admiration. I was the general's only companion on that ride, and for one excellent reason, among others, my mount could keep pace with him.

There were a few moments during the ride in which I was reasonably sure that our time had come. As we penetrated a thicket of dwarf pine and swayed into a small clearing in which Federal troops grouping their way along closely, in our immediate front, with a detachment of Confederates who were pushing through the tangle of wood. A fusillade of bullets was the result, and several sang an ominous song about our heads. We ducked up and then, as our men drove the enemy back to cover, he continued on his way with his command.

"When our time comes, Beckwith, we'll go, and not before. There is no use trying to avoid it."

And avoid it he did not.

UNDISMAYED BY TIDINGS.

As was inevitable under such conditions as revealed in the Wilderness, reports of the vicissitudes of the engagement were numerous and contrasting. To headquarters, where Grant awaited the outcome of the second day's fight, came scores after courier bringing news of the progress of the contest from various portions of the field.

Some of these were alarmingly incorrect.

But the evil tidings didn't disturb the silent Grant. Several times during the night I visited his tent to receive or deliver messages, and found him apparently unmoved by the direful rumors.

He had done all that any commander could do to insure victory; the result was with Providence. Even with some of these disquieting tales around him, he retired to his cot to snatch a much-needed rest, the least ruffled of the group about headquarters.

The morning of the fight, a bottle upon a battlefield strewn with the wreckage of terrible fighting, but the two for midable opponents had finished writing his history of the Battle of the Wilderness. The forces of Lee had retired behind their intrenchments, the Federal troops were swalling to attach them so protected.

Orders were issued late in the afternoon for a march march of the entire army at 9 o'clock. When we reached Brock's corps, the brave fellows were lying behind their works most of them asleep, and so cautious our steps came fully along in the darkness to safeguard the recumbent soldiers.

Grant sought a brief interview with General Hancock and the twain crawled into an ambulance wagon and held converse for some time. I had been riding close behind my superior and now I dismounted and threw my bridle rein across the limb of a fallen tree nearby, while I flung myself down upon a pile of brush to await the resumption of the general. I was pretty well jagged out and a few moments rest was most welcome.

I wasn't long before the boys scented the presence of Grant, and although orders had been given to refrain from cheering, owing to the proximity of the enemy, when they learned that he was facing southward, they sprang to their feet and the rocks and woods sent back the echo of their patriotic shouts.

Some rather harsh criticism has been directed at General Grant for what seemed an unnecessary sacrifice of life in the Wilderness campaign and his alleged callousness at the wholesale slaughter of his men.

STOICISM OF GREAT CAPTAIN.

Let me, who was his constant companion during these years of the Civil War, bear testimony to the possession of a genuine humanity and manly sympathy. He was a most patient listener. Where others would fret and grieve, manifesting their anxiety in words and actions, he preserved a stern silence. But I am certain he felt as keenly as any of the ranks the misfortune and sorrow as did those about him. During the bloody days of August, his stubborn and stubborn defense in the spring of 1864 I noticed an almost childish sadness in Grant, a sort of moody reticence, that convinced me, who understood the man, that he was suffering at the destruction of so many gallant troops.

It was after the battle of Cold Harbor that I went to the general's tent to deliver a cipherogram, and found him sitting alone, smoking a cigar and evidently buried in thought. His face bore a care-worn expression that astounded sleepless nights and weary days. For a moment he was oblivious of my presence; then he nodded to me and I entered, handing him the message. After reading it he turned to me with a sigh.

"Beckwith," he said, "the hardest part of this general business is the responsibility for the loss of one's men. I can see no other way out of it, however; it is what we've got to keep at them. But it is hard, very hard, to see all these fellows killed and wounded. It means aching hearts back home." And he lapsed again into ruminating silence.

There were two occasions when I saw General Grant actually shed tears. The one was in the forepart of July of 1864, while we were at headquarters at City Point in the operations before Petersburg. A telegram came in from Gen. W. T. Sherman, who was grappling with Hood at Atlanta, GA., conveying the painful intelligence of the death of McPherson, the beloved commander of the Army of the Tennessee.

WORD OF McPHERSON'S DEATH.

This rugged and gallant leader, by his intrepid and cavalier bravery, had won for himself the enthusiastic support of his men and the unreserved confidence and admiration of Grant and his generals. It was a crushing blow, just as this time, to the hopes and aspirations of the North.

I took the dispatch to the general and he read it silently. He was hard hit. I could readily see that. His mouth twitched and his eyes closed as if he were shutting out the painful words. Then the tears came and one followed the other down his bronzed cheeks as he sat there without a word of comment. It was most eloquent silence.

The other occasion was in October of the same year, when the news of the death of Gen. T. E. G. Ransom reached us. Ransom and Grant had been comrades in arms in the West in the early days of the war, and a strong friendship had grown up between them. The loss of the young officer struck home with peculiar force at a time when he felt less more deeply than General Grant.

Perhaps the most welcome of all visitors was the Hon. Elihu W. Washburne, congressman from Illinois, and subsequently under President Grant secretary of state. He was a close and beloved friend of the Federal commander. It was Wash'burne who bestowed upon me the sobriquet of "Grant's Shadow," because, as he explained, wherever the general went I followed.

Lincoln at Gettysburg.

The cemetery grounds at Gettysburg were consecrated on November 19, 1863. Mr. Edward Everett, the noted orator being chosen to deliver the oration of the occasion, the dedicatory address being reserved for President Lincoln. "Mr. Everett had spoken for nearly two hours," says an old resident of Gettysburg, "and the people had listened attentively but in a cold, stolid fashion, but after Mr. Lincoln had spoken only a few words a wave of emotion swept over the audience and everybody was in tears." A delegation of fifty soldiers of the army of the Potomac, who were recovering from their wounds, were present, and when Mr. Lincoln began to speak they pressed forward listening intently to the president, and when he reached the well known words of that famous speech:

"The world will little note nor long remember what we say here, but it can never forget what they did here,"

great tears rolled down the bronzed faces of the soldiers. When the president finished there was a protracted silence broken only by the sobs of the women, many of whom had been widowed by the battle. Then Mr. Everett stepped forward and shaking the president's hand, said, "Ah, Mr. Lincoln, I would gladly give my forty pages for your twenty lines!"

Gardens of the Dead.

Out to the gardens of the dead,
With low-bowed heads and solemn tread,
The fair, the brave, the dear, we bear
To the last home, the last care.

Decked by the rays of springtime's sun,
Like drops of blood the dew-drops run
From warm hearts heave and throbs
And tear-drops mingle with the dew,
As memory brings the past in view,
Like rain-drops after showers.

Upon each sleeping comrade's tomb,
Then, gathered the lilac's fragrant bloom,
And blooming shrub, fair and fair,
And near each head-stone white and fair,
They place the Flag of the air,
In honor of their dead.

Long may we keep their memory dear,
Let every heart their deeds revere;
For as they fought and died,
And as those living pass away,
Let sons and grandsires keep this day,
And deck their graves with pride.

MEMORIAL DAY

IT IS quite interesting to compare the photographs of the young volunteers who went out in the stirring with those taken today. We can scarcely recognize in those ill-fitting uniforms the men who today will commemorate the deeds of valor of the comrades gone before. They were all royal a set of young fellows as ever took up musket or handled a sword in defense of civil liberty. They still wear the blue, some of them, and they look their best on Decoration day. There is a badge on each breast. The hand has grown feeble, the hair is turned gray, and with trembling steps they follow the band and the children of the schools, with their bouquets to the graves of their fallen comrades.

It is not the procession that marched down to the battle front away back yonder in the long ago that we look on today. It is but a remnant of that mighty host; but for a half century they have been keeping the folds of the old flag bright and the graves of the unforgotten heroes green, and reminding a new generation of the heroism of war, of the love of patriotism and the fidelity of the old guard for each other. It is the remnant of those who have grown hoary in the years have sped away. They have dropped out, one by one, from the ranks, some to live long with the badge upon their breasts and liberty's emblem around them. Beneath the green mounds, and the fragrance of immortelles they await the roll call on the eternal morning.

If in the bright afterwhile, some chronicler, with more than mortal prescience, were to write the achievements of the men who today occupy the place of honor in our ceremonials, there would be found written something like this: The greatest service the men of 61-65 rendered to their country was not correcty the preservation of an undivided flag, but in holding before our nation from year to year in this beautiful service the glorious ideals of civil liberty, and the

Old Glory

Behind Her Came a Colored Man.

no fighting on Christmas day. Early Christmas morning most of us went into the town of Mount Jackson, in Bent.

"My chum, a neighbor boy from Ohio, my first mate, was in about the same state of homesickness that I was. We didn't say much, but I knew he was thinking, as I was, about the family back at home, and the wind little farmhouse folded among the snowy hills.

"What a the use of Christmas without snow?" he asked me, glumly, as we strolled along.

"Mothers can make Christmas out of any sort of place," I told him. "It's mother I miss today."

"We walked along the business street, with its roofed sidewalks. It was unusually wide, and as we came out into the middle we noticed there were double rows of live oaks, their gray moss draping the red clay drive-way.

"The houses were set far back from the sidewalk, within tall true fences or brick walls, and guarded by heavy gateways. Box hedges flanked the walks to the portico. Roses vined and blossomed about the porches, orange trees gave forth their fragrance and mocking birds sang in the satin-leaved laurels.

"From the gateway of the hand-some of these homes, a girl of probably sixteen approached us. Behind her came a colored man, carrying a tray with pitcher and glasses. The girl spoke to me, probably because I was taller than my chum.

"She said, and it seemed to me I had never heard anything to compare with the music of her voice:

"'Merry Christmas, Mistah Sold-jah! my father presents his compliments and begs you to accept a glass of eggnog.'

"I'd have drunk blue vitriol if she had offered it to me, coming from such entirely as her sweet voice, and we drank heartily, raising our soldiers caps and feeling top by far many words of thanks.

"I was nineteen at the time, and I sure, wished I could linger with that girl. I hadn't set my eyes on anything feminine for months, and then to come face to face with such grace and beauty was almost too delicious long. I can see her tonight as she stood before the high, fanciful iron gates of her father's house, gracefully and unaffectedly offering his Christmas good cheer to men who tomorrow would resume the fight against his cause.

"She was a darkeyed, dark-haired little thing, with high color. I remember how dainty her feet looked in black slippers, strapped across white stockings. Her hair hung in loose curls and she wore a wide-skirted dress of some bright silk. I don't remember the color. I looked at her as long as I cared, I assure you.

"Back at camp, the Christmas day over, the weary vigil of battle once more renewed. I had a new fight on. It was with the brightest vision that had ever crossed my gray country-boy's existence. I wanted to know the name of that girl, to come back sometime to woo her and to win her.

"But I was a poor boy, as yet without the education which I meant to gain after the war, and because of the war, the training for my life work was to be behind.

"What had I to offer this bright creature who had apparently known only luxury. I had to roam myself out of that girl, and it was more of a struggle than the siege of Vicksburg.

"I might easily have found out her name, for we were encamped near town — some time, and I could have gotten leave to go there again. But I was afraid if I did know it, I couldn't keep from writing to her, and representing her or myself, as the case might be.

"Boy that I was, I saw the need of nipping this passion in the bud, so I never went again to the town, and carried the name of my dark-eyed southern beauty."

As the Line Lengthens.

Persons who have passed the half-century mark will remember how the country's story looked to them in their youth. It seemed like a bridge with the Revolution as one portal and the Civil War as the other. One stood at the beginning of things, and the other in these later days. Washington and Lincoln seemed great complementary figures, the glorious fruition of the two contrasting periods of valor.

Within the lifetime of those observers, the lines have lengthened so that both the Revolution and our Civil strife are now ancient wars. We can even foresee the time when the ill-informed will inquire which took place first, so near together will these epoch-makers of strife cluster in the lengthening perspective of the centuries. Lowell tells us in one of his essays that in his youth soldiers of the Revolution still lingered about the gathering places of life's work with freely related recollections of the brave days of old. We are nearing the time when our children should mark for remembrance the veterans of Antietam and Appomattox, to tell their descendants of a correspondingly significant observation.

KINDLY ACT OF SOUTHERN GIRL

Christmas Day Happening That Has Lingered for Many Years in Soldiers' Mind.

WE ARE sometimes visited by a tall, grizzled, square shouldered man, with looks nine eyes that send forth kindly glances from under brushy brows.

He is one of our soldier friends. A man who has made a success of living because he has kept the flower of manhood intact in his heart. Although he has many interests, and is, at seventy odd, greatly alive to present day affairs, he finds time to dwell lingingly on the memorable events of the days when he was devoting himself to his country's service.

His talk, however, is not all of conflicts on the battlefields. When last he sat at our fireside, his reminiscences took on the glow of romance. Looking into the depth of the dying embers, he said: "The day before Christmas, 1863, we were encamped near a small town in Mississippi. The order was given in camp that there would be

Vengeance First.

A young convict came singing around the corner of the big stockyard, and Judge Brilles had just made himself comfortable in an easy chair on the big house porch.

"Good morning," said he to the man. "Good morrow!"

"What are you here for?"

"Beat up a policeman."

"That is a serious offense. Now, aren't you glad you have thought better of it and intend to turn about?"

"Yes, sah."

"And what do you get out you will reform?"

"Yes, sah, I'll beat up dat policeman what sent me up fo' beatin' him up—after dat, I'm gettin' to be a difful sligah, Judge."—Pittsburgh Chronicle Telegraph.

Why He Resembled His Parents.

A bachelor friend of the young couple was being entertained at dinner, and during the evening he was presented by the proud mother to her infant son.

"Now, Fred, which of us do you think he is like?" she asked gaily, holding up the baby for inspection.

The proud viewed the tiny mite for a moment as he replied. "Well, of course intelligence has not really dawned in his countenance yet, but he's wonderfully like both of you!"—Youth's Companion.

When Housework Drags

Keeping house is hard enough when well. The woman who has a bad back, weak, nervous spells, and dizzy headaches, has a hard lot, for the family tasks pile up. Probably it's the result of kidney trouble and not the much-dreaded "woman's weakness." Strengthen the kidneys with Doan's Kidney Pills. They are as harmless as they are effective and may be used for children with weak kidneys, too.

An Illinois Case

Mrs. Geo. A. Wilson, 708 Washington St., Waukegan, Ill., says: "I had a lame back and my kidneys bothered me a lot. Doan's Kidney Pills cured me and I have had no kidney trouble since."

Dodt Must Never Be Forgotten.

The American people have been patriotic beyond the example of other nations in providing for those who left home and all its comforts, business and its prospects, life and all its ambitions, to fight for the flag, for the Constitution and the Union. This is as it should be, and until the last man who "fought that good fight" is laid away in mother earth forever we will the American people will never forget for a moment the debt they owe to the valor and endurance of those who fought the nation's battles in those days now seven score years in the memory. Their graves should be kept green with the tears of a grateful people, and as each Memorial day comes around in the near future, the gallant and bright-hued, should be strewn profusely over the graves of the heroic patriots who gave their lives that knows no waking on earth and in time.

Their Fight for Liberty.

The dead and surviving members of that grand army fought, not for oppression but for liberty, for civil liberty and power but for the perpetuation of human freedom. They cared not the mere symbol of kingly approval but the enduring gratitude of the common people.

Can it be hoped that fifty years from now a united Europe may have a day of memories for the countless dead in this titanic struggle, a day for commemoration of the principles of humanity established for all time by this sacrifice?

Ever the Same.

The thin blue line of 1861 is fading away in numbers only. It's still the same old line.

GLASS OF WATER
Upset Her.

People who don't know about food should never be allowed to feed persons with weak stomachs.

Sometime ago a young woman who lives in Mt. Ada had an attack of scarlet fever and when convalescing was permitted to eat anything she wanted. Indiscriminate feeding soon put her back in bed with severe stomach and kidney trouble.

"There I stayed," she says, "three months, with my stomach in such condition that I could take only a few teaspoonfuls of milk or beef juice at a time. Finally Grape-Nuts was brought to my attention and I asked my doctor if I might eat it. He said, 'yes,' and I commenced at once.

"The food did me good from the start and I was soon out of bed and recovered from the stomach trouble. I have gained ten pounds and am able to do all household duties, some days acting down only long enough to eat my meals. I can eat anything that agrees with me, but I still continue to eat Grape-Nuts at breakfast and supper and has it better every day.

"Nothing during that I could stand only a short time, and that a glass of water seemed so heavy." I am fully satisfied that Grape-Nuts has been everything that I said and that my return to health is due to it.

"I have told several friends having nervous or stomach trouble what Grape-Nuts did for me and in every case they speak highly of the food."

"There's a Reason." Name given by Postum Co., Battle Creek, Mich.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

The Dreamer

By H. M. EGBERT

(Copyright, 1921, by W. G. Chapman.)

"Aw, come off, Bill! I'm too old for them dreams!" said Dick Sittingwell to his fellow drummer in the train.

"No, but honest! I mean it! Why, Dick, you must be making your cool four thousand. If your firm went bust you could get as good a job anywhere. And forty-five if you're a Jay. Ain't you never had a girl, Dick?"

Dick Sittingwell moved in his seat uneasily. "Cut it out, I tell you," he answered ferociously. "Hello! Bourne Hall! Here's where I get off. So long, old man! See you next week as usual."

Dick Sittingwell had had plenty of girls when he was a young man, but somehow all his romance had come to an untimely end. And it was only within the last few years that a new romance, sweeter than any one strange, had come into his life.

He never spoke about Miss Elsie Van Nugent. It had never entered his mind that he could speak to her without profaning her. That was his sanctuary, his holy of holies. And yet he was not what he was something of which he had never dreamed.

Their acquaintance had begun by an accident. Dick, trolling up the hill on Bourne Hall on a hot summer day, with his sample case in his hand, had seen the old maid standing at the gate of her garden. He looked at the big house in the village and, taking her for the housekeeper, said:

"Might I ask you for a glass of water, ma'am?"

"I'll get you one," stammered Miss Van Nugent, and ran away, or rather hurried away with a fun, which was as clear and cold as if it had come from some Olympian spring. Dick gulped it at a draft.

"Much obliged, ma'am," he said, and raised his hat and went away. He did not imagine what a romance that was to Elsie Van Nugent.

Afterward, upon succeeding journeys, it often happened that he saw Miss Elsie at the gate. Then he would nod pleasantly and pass a remark. By degrees their intimacy increased. Dick Sittingwell would often stay as

Charples Stared at Dick in Terror.

long as five minutes, talking and looking wistfully at the big house in the cool grounds, the stately Miss Elsie seem as the hotel. She owned the place, and was the daughter of the late senator, Sir Thomas Van Nugent, and they said, maliciously, that she was forty.

IV

Elsie Van Nugent had never married, perhaps she had taken care of her fortune, which, indeed, it was thirty-seven. No opportunities came after that. Opportunities of marriage were few in New England among women whom birth has made superior to the rest of the community. And, besides, Elsie was already growing into a typical old maid. She became singular and thin, there were gray streaks in her hair, and she knew quite well that whatever beauty she had ever possessed was already gone beyond recovery.

Her life had been utterly cramped. Her bookish learning had never benefitted by contact with the world, for her father had always been a recluse, and in his last days a fretful invalid. When she met the drummer she thought him a typical man of the world.

The acquaintance was a wonderful thing to her. She felt guilty in stealing down to the garden gate when Dick was coming that way—Thursdays he always appeared in Bourne End. She invented little excuses at first to make herself in her presence there. Wistfully she thought how she would like to ask him in. But she never dared. It was not only fear of what the neighbors would say, but fear of what Dick would think of her.

It was odd that the uncouth drummer should exercise so strange a fascination over the old maid, but it was equally strange that he should find in her his ideal of womanhood. Two or three years passed, and their intimacy stayed exactly where it was. Neither dared to increase it, or to venture to speak of the feelings in the heart. Dick was becoming bolder and stouter, and Fate knew what would have been

Then came the day when Dick was amazed to see the house closed and a big "For Sale" sign in front of it. The town was buzzing with the news. Miss Elsie's lawyer, who had had charge of her property, had absconded, taking with him her whole available fortune, ten thousand dollars.

Miss Elsie had remained secluded in the house since the Monday before Dick hankered only a moment; then he went into the garden and knocked at the door.

III

Miss Elsie herself opened it and stood, watching him through her tear-stained lashes. She looked less beautiful than ever at that moment, with her reddened eyelids and her disordered hair.

"It's too bad, ma'am," said Dick. "Just heard the news, and called to say how sorry I was."

"I suppose it's what they call life," answered Miss Elsie.

"I hope, ma'am, you aren't planning to sail the place because of that?"

"I certainly am. It's all that I have left now."

"Might I ask your price, ma'am?" inquired Dick.

"Eight thousand dollars," answered Miss Elsie listlessly. "It ought to be more, but the house is very old, and that's what I'm advised to hold it for."

Dick thought hurriedly. He knew that would pinch about three thousand cash and a mortgage. Dick was worth about three thousand; he could arrange the details.

"I'll buy it," he announced.

"You!" gasped Miss Elsie.

"Yes, ma'am. You see, I've had my eye on the place for a long time, in the hopes you might some day sell."

The words struck her like a blow between the eyes. She was the source of his interest. The vanity of her dreams!

"I suppose you can have it, then," he heard her answer faintly. "Everything goes in it as it stands, lock, stock and barrel?" asked Dick.

"Why, I guess the furniture's not worth much" said Miss Elsie. "You'll have to see my brother, Mr. Van Nugent. He has charge of the matter."

"Guess if he is willing, you are!" persisted Dick.

"Yes," she replied.

Dick withdrew. He wanted to hide the elation in his heart, that set it tumultuous beat as he reflected upon his maneuver. He clenched his fists behind the lawyer's back. He had known Sharples well; the man was a convivial person at the hotel. "If I can bamboozle him, I'll break his head," he swore.

V.

"Sho, you soo, I guess I can't buy the place," said Dick to Charlie Sharples. Miss Elsie as he handed her the money.

Elsie was crying softly. "I don't know what to say or how to thank you, sir," she sobbed. "It's wonderful! It's wonderful!"

And in her happiness, more at the moment, than the interest than at the return of the money, the years seemed to fall from Miss Elsie, and there was almost a girlish blush upon her face.

Dick breathed heavily. "I guess I'm sorry; we can't carry out our arrangement," he murmured. "It wasn't the place I wanted, but the contents, as we agreed."

"The furniture? Do you really want it?"

"Yes," stammered Dick. "I wanted you."

And with amazing daring he took Miss Elsie in his arms and kissed her.

Official Jewel Calendar.

The following list of birthstones was adopted by the American National Retail Jewelers' association in convention August 8, 1913: January, garnet; February, amethyst; March, bloodstone and aquamarine; April, diamond; May, emerald; June, pearl and moonstone; July, ruby; August, sardonyx and peridot; September, sapphire; October, opal and tourmaline; November, topaz; December, turquoise and lapis-lazuli.

Taken at His Word.

Sarcastic Father—"Julia, that young man Smiley has been here three nights in a row, and he has been nearly midnight when he left. Hadn't you better invite him to bring his trunk and make his home with us?" Innocent Daughter—"Oh, papa, may I? It is just what he wanted, but he was too bashful to ask you. He'll be delighted when I tell him this evening."—Pittsburgh Chronicle-Telegram.

Swedish chemists have found a way to remove from coal tar the finely divided carbon which it holds in suspension.

Heralding the Outdoor Season

For the woman devoted to out-of-doors a sports coat model, like that shown in the picture, is a good choice for early season wear as a street coat. At the end of the season it will own her nothing, for she will have had it for many hours with her. Coats of this character are shown in great variety and they differ little from regulation sports coats. They are more quiet in color and somewhat more trim as a rule.

Not so the modish designed for street wear are in quiet colors. The citron shades are much in evidence where smartly dressed women congregate. The checked coat is a favorite for both street and sports wear and is really classed according to the size of the checks—if they are big it is of the sports sort, while very small checks are about as conservative as the more trying black.

For the young woman the coat pictured is a model that it would be hard to improve upon. It is reinforced at the front with a deep square yoke which improves its lines, giving them a straight direction at the middle front with a generous flare at the sides and back. It buttons to one side and has a collar high enough to be chic and becoming and so constructed that it can be turned back away from the neck when so desired.

Big patch pockets are furnished with a plait at the middle fastened with a button. The buttons at the front are set on in groups, and two buttons finish the oddly cut cuffs.

General Utility Suit

A suit for the street and general utility is made in a manner that appeals to young women and justifies their judgment. It is new in cut and very smart looking and it looks well in any of the fabrics—including the novel weaves—that have been used for this season's suits.

The skirt is not a new model, but it cut fuller than usual with deep, inverted plaits that extend to the waist line. These are its only distinguishing features. The coat is a novelty, simply and cleverly cut, with regular sleeves and very full fitted at the front a wide overlap coming to the hem line. The coat fastens here with a half dozen large white bone buttons. Similar ones provide the decorative feature at the front and back and on the sleeves. There is a turn over collar of the material and cuffs similar to it with a plaiting in at the top of each. As in nearly all other tailored suits an extra collar and cuffs of white linen are made detachable, recognize the advent of summertime.

White pique, white satin, embroidered battiste and lace appear in collars and cuffs, with the various dark colors used just now for street wear. In collars and revers and collars and cuffs there are occasional suits in white broadcloth courageously faces the chance of losing its creamy whiteness and being thrown into the discard. But washable stuffs are prettier, more delicate, and more popular than the heavier cloth. The silk and satin of the collar and cuffs, either in white or silk, is immensely enhanced by their freshness.

Other tailored suits, cut on lines with which we are now familiar, can claim the distinction of originality in certain details of their fashioning. One of these has what are known as saddleing pockets of formidable size set into the skirt. In their silk-braided decoration, fancy silk lining and finishing the inspiration of Spanish ideas is evident. The coat is cut with a square opening at the front, has scallloped and braided revers and a little low-cut vesting. The sleeves are finished with a soft ruffle of lace and a soft chemisette of lace appears above the vesting.

Latest Matching Blouse.

The peculiar popularity of the dark blue suit, which is even more pronounced than usual this year, is acknowledged by the blouse makers in attractive crepe Georgette and chiffon waists of various colors trimmed lightly in dark blue. These are more becoming than the all blue waist, yet have an air of belonging essentially to the suit. Flesh pink Georgette with narrow black buttons and a little heavy stitching or delicate embroidery in dark blue has delightful possibilities and the sad, blue suit with sunset shades stand the same treatment well, as do certain porcelain, Japanese and medium blues.

Scent Bags.

Clothes scented with lavender have a delightfully clean, fresh odor. Make your own lavender bags out of bits of colored chiffon. Fill three-quarters full with dried lavender flowers and sunset shades stand the same treatment well, as do certain porcelain, Japanese and medium blues.

REAL CHAMBER OF HORRORS

Attic in New York's Criminal Court Building Poor Place to Spend a Pleasant Afternoon.

Any attic is a collector of forgotten relics as thickly enveloped in associations as is dust. But in the attic of the normal household there is very little that is gruesome and much that is tender, and humorous, in its associations. The ghosts of the past which lurk under the domestic eaves are for the most part kindly, though some may be melancholy and some foolish. One finds them, on rare visits to their musty retreat, making a gentle appeal to one's heart, seeking to soften one's facial lines with dimpling smiles, coaxing a philosophical wisdom.

We dwell upon these characteristics simply to emphasize the contrast presented by the fearsome wraiths haunting the attic of the criminal courts building. A sifting housecleaning there, the first in many years of crime, has discovered among the dust-gathering contents a thousand suits taken from the bodies of murdered men, including the clothing worn by Caesar Young, by Stanford White and Herman Rosenthal. There was the trunk in which Eddie Shugo's body was found. There were gambling outfits captured in the spectacular raids of William J. Burns and Arthur Carey. There were weapons of every description, the agencies of murder and assaultive fact, an amalgamation of criminal exhibits covering a decade and more of the city's history and reading to mind a host of half-forgotten tragedies and sad failures and grim triumphs of justice.

Perhaps it is not altogether fair to call this attic a museum of horrors our criminal attic, since to be completely representative it should gather also those more wholesome relics of people's activities which eventually find their lodgment in museums. And yet until this criminal courts attic more nearly resembles in contents of association the domestic species the millinery museum would be far of to bolster about—New York Tribune.

City Bird Clubs.

It has taken more than twenty years of steady work by the National Audubon society to demonstrate the economic value of birds to agriculture, and the result is in our state laws protecting the migratory game birds. Incidentally, bird sanctuaries have been established in several places, remarks the St. Louis Post Dispatch. Henry Ford's near Detroit, and Avery island on the Gulf coast, given by Mrs. Russell Sage, are notably. Several state preserves have been set aside for the game protection. The bird club movement strives to save the birds, with objects both economic and esthetic. Bird club organizations have been formed in several of our large cities, and have created about increased attractive areas to parks and residential sections, reclaiming the wild native birds. The methods include planting trees and shrubs suitable for nesting places and bearing acceptable fruit for food, and the provision of drinking fountains for bird use. The methods have proved successful—and does anything add more charm to outdoors in a city than bird songs?

Sterilizer for School Pencils.

In many public schools where the children do not own their individual pencils, but where pencils are distributed and collected by the teachers, it has been felt that infectious diseases might easily be communicated from one child to another by the pencils. For boys and girls have a habit of chewing or sucking the ends of their pencils, and the germs of the many diseases that lurk in the mouth are thus transferred to the soft wood. Thus might any of the affections of the throat, nose and lungs to say nothing of the more serious diseases that manifest themselves in sores of the mouth, be transmitted.

It is to safeguard against this that U. S. Hanks of Hadenfield, N. J., has patented a sterilizer for pencils. These are put in a rack, then lowered by pinions into a hermetic gas, which kills any germs that may be upon them. Mr. Hanks says it will cost but a few cents to sterilize the pencils of a school with his device.

Fortune in Waste Paper Basket.

"To day when poor people may prospect for gold are pretty well past, but it seems as though a substitute, perhaps less picturesque and exciting, offers itself in the waste paper basket of business corporations.

"Not very long ago the Hemingway Paper Stock company purchased from the banking firm of Townsend, Whelen & Co., in Philadelphia, a batch of old correspondence and papers, to be used as paper pulp. The price paid was $10.

"An employee of the purchasing firm began going over the documents and letters and discovered a great number of old, foreign stamps. He reported the matter to his employers and they decided him to go through the whole lot and pick out every stamp that seemed unusual. A vast number were collected and where shown to A. F. Herrmann, president of the Philadelphia Stamp club, he appraised their value at over $10,000, thus giving the firm a profit of more than a thousand dollars on each dollar of their purchase.

Tenariffe Would Extend Trade.

The first combination of business men brought together in the Canary islands for exclusively foreign trade purposes with any one nation was organized December 29, 1916, under the auspices of "The Tenariffe-American Board of Trade." The purpose of the new trade body is to increase the commerce between the union the island of Tenariffe and business men in the U. ed States.

Needs Must.

"I think I'll go in for aquatic sports this summer."

"I didn't know you cared for that sort of thing."

"I don't, but that suburban lot I bought seems to be better adapted for boating and swimming than for anything else."

THE KITCHEN CABINET

Will the hare that you've an itch in
Be fire in the kitchen
And the little pot of love turn the
spit?

Kathleanam is essential to the proper decorative effect of any high school.

DAINTY MEALS FOR SMALL FAMILY.

As we all learn from and experience, roasts are not satisfactory bought in small quantities and so family enjoys beef, mutton or chicken three or four days in succession, neither does the frugal housewife wish to waste good food.

To make a successful entree for a small family attention must be paid to the marketing and arrangement of quantities.

If one arranges to have guests for luncheon, after having a chicken dinner, the chicken may be used in patties, or salad or as chicken croquettes. Thus one may entertain without feeling any special drain on the living expenses. A varied diet may always be given, as breaks may be made from the bones of the aforesaid chicken for the next day's luncheon, following with a dish of macaroni and cheese or spaghetti and tomato sauce, thus having a soup and an entree at slight expense.

A can of corn may be opened and part of it used as a vegetable with milk or cream, then a few days later prepare it with egg, a cupful of white sauce and seasonings of mustard, salt, worcestershire sauce and pepper into an escalloped dish, to serve either as a main dish at luncheon or as a vegetable at dinner. Such dishes as veal birds or olives are attractive and made from small bits of meat. Prepare them by binding up with a piece of bacon or salt pork and broad crumbs and a bit of onion, then add cream and simmer until tender.

Cucumbers too old for slicing may be cooked after cringing in cold water and served as one does asparagus.

Who in the world do you want to carry Tidings that annoy and harass and worry?

Stop them and drop them, a new day
dawning
Squeeze a smile from it instead of a
yawning.

—Kaufman.

VEGETABLE COOKERY.

It may perhaps have been noticed that the lack of space in our cook books to the subject of vegetable cookery. The lack shows the value we place upon them. The reason for the slipshod methods of cooking. We do not know how to cook vegetables, and cannot cook them in the proper place in food values they will no doubt continue to be wasted in cooking.

The failure of getting good results from vegetable food may be in the selection, for vegetables out of season are neither economical nor nutritious; the flavor is usually in inverse ratio to the cost. The best of cooking and seasoning cannot supply the lack of flavor.

Vegetables may be crisp and fresh when brought from the market, but by careless handling are wilted and spoiled.

In the cooking of vegetables there are a few things to remember. First to retain all the mineral matter and nutrient material, to soften the cellulose and to develop the flavor, making them more palatable.

Vegetables should be properly should be well washed and cooked without the addition of water or soda. Put little vegetable being rich in iron which is soluble in water upon the boiling water in a large amount of water be nearly valueless as a food. This is true of salads, grains and fruits, in fact, any of the delicately flavored, esculent vegetables. The seasoning is another important item; the fat, or shortening, should be added to vegetables. Usually butter, pepper and salt, not too much is the best because it is the plainest.

To accomplish these results one may use several methods; cook the vegetable whole or in large pieces, to cook with the skin on when possible, to cook in as small a quantity of water as possible without burning, to serve the water in a stock with the vegetable whenever possible, and to season after the vegetable has started cooking so that the salt does not draw out the flavor.

Cream of Peanut Soup.—Put a cupful of peanut butter into a qu

DOINGS OF THE VAN LOONS

Wealth does come handy once in a while

Burnett Insurance and Real Estate Agency business heretofore conducted by the late Mr. A. T. Burnett will be continued under the management of Mr. E. A. Burnett. Thanks for past favors, and a continuance solicited.

E. A. Burnett.

School Commissioner's Column

May L. Stewart, Commissioner

At present the big noisy rush is over and the substitute is a steady grind, looking over 232 sets of eighth grade examination papers. Of course every boy and girl is anxious to know just how he came out and we are too, but it will take some time to determine the final outcome. Everything comes to those who wait even an eighth grade examination mark.

For eighth graders who were ill confined to bed at the time of the regular examination May 15th-16th a second examination may be arranged. According to a new ruling from the state department, the child who had been unable to attend before may request the privilege of writing at a time set up by the commissioner, at the office of the commissioner, this being the only place in the county at which this second examination would be held. This does not apply to any who have already written, may be granted only special request accompanied by a physician's statement, and cannot be given later than three weeks after the regular examination.

During the past week the following requests for full year Diplomas of Honor for eight months perfect attendance without tardy marks were received from the Hoppard school, 1; Ironton, 1; from Clarion, 7; from Marion Center, 8; from Springvale, 2; from Chandler No. 1, 3. At the present time three Bells is in the lead with Chandler No. 1 second and Marion Center third.

Cream white ceilings, cream or buff walls with wood work of a deeper shade of brown have proved most restful to the eyes and the best reflector for poor lighting conditions. The department recommends it for all school houses.

Forty-nine school children have been reported to date as deserving of free tickets to the fair.

The canning demonstration by Mrs. Cowles will be held in the Peninsula Grange Hall, June 30th. Everybody come.

BANISH GLOOM IN SUNSHINE

Nothing Like Plenty of Good Daylight to Drive Away Sickness and the "Blues."

If everyone could only realize the tonic effect of a little sunshine we would be both healthier and happier. Cover some green grass with a piece of carpet for a month and note the result. The grass will have completely changed. It will have lost its color and become sickly white. This is exactly what happens to people. If you live in dark, gloomy rooms you cannot be rosy or entirely healthy.

Not only does lack of sunshine injure your health, but it affects your mental attitude. You cannot be all contented and live in a gloomy place and who wants to be a pessimist?

Many of the most devoted germs are completely annihilated by a profused application of sunshine. This is the reason all modern hospitals are built on the pavilion plan, which admits light on all sides.

Disease germs are not the only variety that dread the light.

The germs that breed discontent, nettiness, jealousy and real unhappiness are all bred in darkness.

Did you ever try a brisk walk in the bright sunshine when you seem to so considerably surefooted by all sorts of "glooms"? It is a simple remedy, not a costly one, but effective. One hour of such treatment will usually rout a whole regiment of these pests.

If you haven't the energy for a walk, put on wraps to keep you warm and sit in an easy chair in the corner of the porch. In lieu of the porch try raising a southern window and sit where the sun will shine on you. If your gloom has not vanished in an hour, you should consult a doctor who doubtless will prescribe for a sluggish liver for a sick liver will make even rosy glasses reflect a dark slow.

When Baldness Starts.

It has been discovered that if a person is going to be bald in middle life, or even in old age, the symptoms will appear between the ages of fifteen and twenty-one. Although the hair may gradually become thinner as one grows older, it will never entirely disappear unless signs of this thinning become manifest before the age of thirty-five years.

One Thing Youthful.

My small son and I were riding on the "L" the other day and just across from us sat an elderly woman who had evidently dyed her hair, for it was a bright golden brown. Billy looked at her for some time and then leaned over to me and whispered: "Mother, see dat lady. She is all old but her hair."—Chicago Tribune.

Announcement.

I hereby announce myself as a candidate for the office of county clerk, on the republican ticket, subject to the ratification of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. GRAFF.

Announcement.

To the Electors of Charlevoix County:

I am decided to be a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and I respectfully solicit your support.

M. A. McDONALD,
Eveline Township.

PECULIAR WELL IN FLORIDA

Both Salt and Ordinary Water May Be Pumped From It at the Same Time.

In their investigation of the wells and underground waters of Florida the geologists of the United States Geological survey have noted many interesting things. Among them is a well at Wekiva, on St. Johns river, from which two kinds of water are obtained.

This well is 269 feet deep. The length of the casing is 110 feet. The well was first drilled to 160 feet, and from this depth ordinary sulphur water was obtained. The drill was then carried to a depth of 269 feet, where it encountered a strong mineral water, having a disagreeable, salty taste. In order to use both the fresh water an inner tubing was run nearly to the bottom of the well. Both this and the outer casing were connected with pumps, so that ordinary water and mineral water can be pumped at the same time. A favorite trick played on visitors is to give a glass of fresh water in the first glass and to replace it with the bitter in the second.

Not more than half a dozen wells of this kind are known in the country, but there is no reason why similar wells cannot be obtained in regions where the waters in the different strata differ from those lying deeper.

Aluminum Cheapened.

While experimenting with the tetanic heat of the electric furnace Humphrey Davy discovered a metallic substance which he gave the name of aluminum. Immediately he saw preceding in isolating it. Twenty years later Frederick Wohler, in Germany, isolated this metal through the use of chemicals. In 1845 he obtained it in small malleable globules. In 1855 Deville, a French chemist patronized by Louis Napoleon, improved Wohler's process and isolated aluminum in a state almost pure. At this time the metal was valued at $90 a pound. It was produced in chemical laboratories and used largely in the manufacture of aluminum jewelry. The price has now declined to 18 cents a pound.

Fire Dangers.

Most everyone who has had any dealings with machinery knows about the liability of oily rags and waste that have been used for cleaning purposes to ignite from spontaneous combustion; but few are aware that sawdust, when soaked with oil drippings, will act to the same way. Sawdust is sometimes seen scattered over garage floors, but this practice should be prohibited. Said is the safest for absorbing drippings.

Fond Mother's Pride.

"I suppose your son now will prepared for college," said the casual friend. "Yes, indeed," replied the fond mother. "The president of the college faculty could not teach him anything. He knows everything in the college."—Richmond Times-Dispatch.

AVOID SPRING COLDS

Sudden changes, damp weather, shifting seasons cause colds and grippe, and these spring colds are annoying and dangerous and are likely to turn into a chronic summer cough. In such cases take a treatment of Dr. King's New Discovery, a pleasant Laxative Tar Syrup. It soothes the cough, checks the cold and helps break up an attack of grippe. Its already prepared, so mixing or fussing. Just ask your druggist for a bottle of Dr. King's New Discovery. Tested and tried for over 40 years.

Michigan and Dixon Avenue Lighting.

Light District No. 1.

Notice is hereby given that the plats, plans, diagrams, specifications and estimates of cost of the following described lighting district, viz: Dixon Avenue from the north line of Michigan Avenue to the south line of Pine Street, Michigan Avenue from the north line of Dixon Avenue to the south line of Lake Street, Mason Avenue from the waters of Lake Michigan east to Mentor Boulevard, Mentor Boulevard from Mason Avenue to Michigan Avenue, Pine Street from the waters of Lake Michigan east to Mentor Boulevard, Mentor Boulevard from Pine Street to Michigan Avenue, Lake Street from the waters of Lake Michigan east to the waters of Pine Lake, and Michigan Avenue from the waters of Lake Michigan easterly to the right-of-way of the Pere Marquette Railway Co. across said street, and the assessment district to be assessed for said improvements, from the above description all being in Charlevoix, Michigan, are on file and may be seen at the office of the City of Charlevoix, will meet on the second floor of said City of Charlevoix, on the 15th day of June, 1916, at seven forty o'clock p. m., at which time and place I will hear and consider any and all objections to said plats, plans, diagrams, specifications and estimates of cost of said district.

Adopted this 15th day of May, A. D. 1916.

CHARLES H. KERRY, City Clerk. ANDREW ROSS, Mayor.

Notice to Dog Owners

Pay your dog tax and avoid trouble: By order of Common Council.

F. S. BROWN, Dog Warden.

Maids Wanted!

For steamship Missouri. Apply to Miss Hazbel, house-keeper, S. S. Missouri, foot of Austin Ave., Chicago.

NOTICE.—Having fenced in my land on the lake shore between Norwood and Charlevoix, I will receive stock for pasture for the season of 1916. Apply at Norwood to A. J. Holichek, or to Edwin Cook at the James O'Brien farm.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HARSHA.

WANTED.—At once, man to do milking. Address Coulter Bros, phone 72.

WANTED.—Girl to do general housework. Address 216 Park avenue.

GIVES ADVICE TO HUSBANDS

Writer Offers the Suggestion That Men Should Occasionally Praise Their Wives.

Apparently there are some men in the world who would not be likely to be loud if by any chance they should be betrayed into praising their wives, remarks the Philadelphia Inquirer.

The man of this description is a self-sufficient creature who evidently believes that creation was obtuse, yet he is human. He is a little surprised and a good deal annoyed that things were not arranged more to his liking, but he accepts the arrangement, not because he approves of it, but because he cannot help it.

The wife of this man is a woman who is an old maid should ever marry this man when his wife is worn out and laid in the grave; if she does she will regret it to her latest day—that is, unless she has backbone enough to put the man where he belongs and keep him there. And it is never good act to any true-hearted woman to feel that she has to master her husband in order to live comfortably with him.

The man who never praises his wife will find fault with everything on every possible occasion. It is the easiest thing in the world to find fault—easier than the proverbial sliding down hill. It gets to be a habit with some men, and they are hardly conscious when they are exercising it.

Why cannot a man show his wife that he appreciates her efforts to please him? Why cannot he praise the pudding of his wife as well as the cooking of her relatives' kinfolk?

Why cannot he appreciate her feminine pie, and charitably of her sponge cake? Why cannot he say that the one her is beginning to the face of the woman who loves him?

Kind words make his wife happy, and no decent man ought to withhold them, and he will find that the peace of affairs in his household will be smoother all around.

One Way.

At a certain Welsh railway station which relieves in the name of "Llanfairpwllgwyngyll"—and about two years ago it was the talk of the town engaged.

He was only an Englishman, but meant to do his duty.

The first train came in. He tackled the name of the station, but failed miserably to pronounce more than about the first inch.

But he was a man of brains. Running along the platform, he pointed to the board which bore the longthy image and yelled out:

"If there's anybody there for here, this is it!"

MORTGAGE SALE

WHEREAS, Merritt W. Gaiff, of Evansville, Indiana, made his certain mortgage dated the 3rd day of April, A. D. 1911, to Hiram H. Gaiff, of Charlevoix, Michigan, which was recorded in the office of the register of deeds for Charlevoix County, Michigan, on the 12th day of April, A. D. 1911, at one o'clock in the forenoon in Liber 34 of mortgages, on page 500;

AND WHEREAS, the amount claimed to be due on said mortgage at the date of this notice is Twenty Dollars and no cent, and no suit or proceeding at law has been instituted to recover the debt now remaining secured thereby or any part thereof;

AND WHEREAS, default has been made in the payment of the money secured by said mortgage, and the same is now due and unpaid and the power of sale in said mortgage contained has become operative;

NOW THEREFORE, notice is hereby given that by virtue of said power of sale and in pursuance thereof and of the statute in such case made and provided, I shall foreclose said mortgage by sale of the mortgaged premises at public vendue to the highest bidder at the south door of the court house in the city of Charlevoix, in said county of Charlevoix, that being the place of holding the circuit court within said county, on Friday, the 4th day of August, A. D. 1916, at two o'clock in the afternoon of said day, the premises contained in said mortgage to be sold are: Lot 100 in Block C, of South Boyne Addition to the village of Boyne City, according to the recorded plat thereof, which is our opinion, shall be for 206 in block 21, S. & M. Third Addition to the village of Boyne City, Michigan.

Dated this 19th day of May, A. D. 1916.

HIRAM H. GAIFF, Mortgagee.
HOUGHTELING & WOODWORTH, Mortgagee's Attorneys for Mortgagee.
Business Address, Big Rapids, Mich.

Not Yet "Out of the Woods"

Talk No. 5

Some of the Accomplishments:—

We are paying our employees promptly, with a payroll of $1,000,000 per year, material and supply purchases of $4,000,000. We are paying our taxes, this year a much higher rate than we have paid up till recently—about $120,000 in two years. We are catching up on our obsolete equipment notes and will have paid $1,000,000 on them by the first of July. Receivership creditors have had 75% two-thirds of which has been paid out of earnings this year. We are keeping up the property. Our plants are in complete more than $6,000,000 for maintenance of way, maintenance of equipment, and additions and betterments. Contingent liabilities are much better. We are now at Court for our $3,000,000.

Some of the Things Yet to Do:—

We must finish paying the creditors, who more than two years ago loaned us $3,000,000 to keep the Receivership in business, but yet had all of their money. This takes $600,000. We must finish paying the receivership creditors, who have not

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

CHAPTER XXVII—Continued.

Silets had always ridden bareback, but now, why she did not know, she took down Sandry's saddle and slung it on Black Jack. Poppy followed her movements and by the time Silets had put foot in stirrup and swung up she had caught up her wide skirt and mounted. Silets flared around at her and her eyes were beginning to sparkle in a face pale with rage.

«Hmm» a word they shouted up across the lonesome valley and look to what had once been a trail in the sudding ferns. Now it was but a slight depression running amid the blackened trunks, the million bones of ashes. Poppy Ordway followed Silets, as she always followed her husband. She did not know the danger, the business of the hills.

She was saying to herself after her enticing habit of self-commission:

«I'll have my precious jacket now. I know I shall. The gods are with me I feel it.»

Once Silets turned upon her.

«Go back!» she cried fiercely, «some thing is coming!»

«You're right,» said Poppy, and for once the tone of her voice made Silets look under waves in eyes and stammer, «I'm sure I'm in at the happening.»

They spoke no more. Silets checked Black Jack for the last time, kicked stirrups said looked over the appalling avalanche of ruin. Over and by the range yet the tumbled hills, thick with heavy timber, that ran into the Silets basin. Poppy, looking at the picture, reared the mighty spine of the Hog Back with its secret trail. And south where up behind the log lack was Sandry. Claim as he was to nature, Silets shuddered as she looked upon the world of flame and smoke. To Poppy Ordway, ignorant of its mean ing and its might, it was a splendid spectacle.

Silets plunged down the ridge on the other side and the woman followed. The shadows of the smoke-filled val ley grew into an uneasy twilight. The fine light ashes made slippery going and more than once Black Bolt slipped to cause his footing, callks. They rode about and entered the fire hell itself. The dusk grew denser. The heat lay like a tangible blanket in the hollows and dips. Silets urged Black Hot. Something was calling out of the gray dimness—chilling her heart, hurrying her progress.

She had ridden for a time in deep thought when a scream from the woman behind drew her up with a start. She turned just in time to see the bay fall and go tumbling down the precipice. With the great limb he had flung his rider out of the saddle and into a pile of ashes. It was true to her nature that the girl, disentangling, ran, not to the woman but down the slope after the bay. She found him prone and groaning in a little trench, his right shoulder pinned by the white bone piercing the earth.

Poppy Ordway paused, fearfully down, for Silets had made desperate her dust covered clothes.

«Come here!» Silets cried, commanding; «come here!»

It was the same voice, whispering with primitive rage, that had compelled that craven «Sandry» from Poppy Ordway's side that night at the pump, and as the woman had obeyed then, so she obeyed now.

Silets rose, reaching in the blouse of her shirt, and brought out a gun.

Poppy Ordway shrank within as a chalk.

«What do you mean?» she cried shrilly, «what are you going to do?» Horror widened her blue eyes grey tenebrous.

«I never shot a living thing in my life,» said Poppy, trembling, «but I got to kill him. And you stand by to watch—a good while.

There was a sharp report that did not echo in the fire-darkened hills, and the good horse closed his eyes in sud den peace. Silets turned away, to where Black Jack had been tied with wonder. Coonah crouching beside him, in a swift revelation she flung the weapon far down the mountain.

She started to mount without a glance at the woman when the other spoke.

«What am I to do?»

«Do! I don't care what you do. Go home. And I hope you never reach there!»

«My God!» cried Poppy Ordway; «don't leave me like that! And look! Look there!»

At along the valley by which they had come a long, swift drift of smoke was rolling, sent out thus like a current from some newly fired cross-canyon. Its lowering pall formed a bewildering mystery to anyone save a native of the hills. A women on foot would never reach camp through its blinding darkness.

Long Silets sat turned in her saddle and looked at it. Then a thought of Sandry and his standards crowded the emotions that dominated her. There was but one thing to do.

«Come up,» she said at last, «I'll have to take you.»

CHAPTER XXVIII.

Fires Within Fire.

So it was a terrible ride that the great black horse carried into the mastery of the shrouded country. Hatred was like a well-beaten path the feet and Poppy's fingers, clinging perforce to Silets' shirt, hitched with better blow short a distance to the packet in the bagging blouse.

So they rode with smarting eyes and aching lungs, down into a dim valley and out again, between the ghostly, ghastly, towering trunks, tottering to their fall. They passed the lush sides of the long Black, a majestic crown of fire, and emerged into the shadows of the ruins of the forest. At last they saw great fires ahead and men running hither and thither.

«Where is Sandry?» Silets asked, dismounted, of a soiled

«Don't know. Haven't seen him for hours.» He hurried on and the girl rode along the line where the men were laboring with ax and spade to make a fire break. And soon she came where up behind the log lack was Sandry. Claim as he was to nature, Silets shuddered as she looked upon the world of flame and smoke. To Poppy Ordway, ignorant of its mean ing and its might, it was a splendid spectacle.

Silets plunged down the ridge on the other side and the woman followed. The shadows of the smoke-filled val ley grew into an uneasy twilight. The fine light ashes made slippery going and more than once Black Bolt slipped to cause his footing, callks. They rode about and entered the fire hell itself. The dusk grew denser. The heat lay like a tangible blanket in the hollows and dips. Silets urged Black Hot. Something was calling out of the gray dimness—chilling her heart, hurrying her progress.

She had ridden for a time in deep thought when a scream from the woman behind drew her up with a start. She turned just in time to see the bay fall and go tumbling down the precipice. With the great limb he had flung his rider out of the saddle and into a pile of ashes. It was true to her nature that the girl, disentangling, ran, not to the woman but down the slope after the bay. She found him prone and groaning in a little trench, his right shoulder pinned by the white bone piercing the earth.

Poppy Ordway paused, fearfully down, for Silets had made desperate her dust covered clothes.

«Come here!» Silets cried, commanding; «come here!»

It was the same voice, whispering with primitive rage, that had compelled that craven «Sandry» from Poppy Ordway's side that night at the pump, and as the woman had obeyed then, so she obeyed now.

Silets rose, reaching in the blouse of her shirt, and brought out a gun.

Poppy Ordway shrank within as a chalk.

«What do you mean?» she cried shrilly, «what are you going to do?» Horror widened her blue eyes grey tenebrous.

«I never shot a living thing in my life,» said Poppy, trembling, «but I got to kill him. And you stand by to watch—a good while.

There was a sharp report that did not echo in the fire-darkened hills, and the good horse closed his eyes in sud den peace. Silets turned away, to where Black Jack had been tied with wonder. Coonah crouching beside him, in a swift revelation she flung the weapon far down the mountain.

She started to mount without a glance at the woman when the other spoke.

«What am I to do?»

«My God!» cried Poppy Ordway; «don't leave me like that! And look! Look there!»

At along the valley by which they

The Gesture Come Too Late.

the west, mysterious, martial, jovial, and their burden was "Lead, Kindly Light, Lead Thou Me On."

"The Preacher!" whispered Silets. "Oh, the Preacher!"

And presently through the dim dun white of the smoke that crept with persuasive force between the crowding pines, there merged the familiar, erect form. With one accord they turned to him as he approached and Sandry for the one moment left Hampden unguarded.

It was all that was necessary. Quick as light the hand that had fired in anxiety sought his hip sought it again. There was a flash of metal, a ping in the dun effulgence, a straining of the heavy arm that used it, a spurt of flame, a shot.

But quick as the timber-man had been, the Preacher was quicker. With one leap as Hampden reached for his gun the Preacher reached Sandry, made him aside and flung himself before him, his fine cassock raised high in protest in command. But the gesture came too late.

The bullet meant for the Easterner found judgment in the gentle breast of the wandering player of hymns, and he sank down in Sandry's arms.

CHAPTER XXIX.

The Sign of the Silets.

It was Poppy Ordway who struck the first from Hampden's hand, sending it flying among the ashes.

«Well! have no murder here!» she cried.

Sandry looked at Hampden for one fleeting second as he laid his gun beside him.

«If you move one muscle,» he rapped out, «I'll make you the worst trouble the years wherein I lost you! I have kept for the Primrose that I crushed, at dawn and dusk! I have tried to atone.»

There was a pathetic, eager pathetic in the weakening voice and the odious, sullen face turned toward the last act in some forgotten tragedy of the Theatre of Life, stood in silence, unconscious of the darkening smoke clouds, the menace of the rising roar of the fire, unaware of the face the sign of the Silets women—the three bars of hatred, the bitterness and sorrow—and yet you were not of their blood, but of my own. Only Solomon knew how you came among them, wee, dark child, how they took you in and gave you a name, and he never told. You were red to me. Kahwanna—a soft-eyed creature of the wild—and you were my woman, bought with a white man's law!»

Here Sandry shrank as if at a blow, drawing in his breath with a sob. But the Preacher hurried on, as if to tell all that had lain upon his heart these many years.

(TO BE CONTINUED)

HEALTH POINTERS

The careless spitter is a public danger.

Moderation in all things prolongs life.

The air-tight dwelling leads but to the grave.

Walking is the best exercise—and the cheapest.

Unsesterized milk frequently spreads disease.

A little cough is frequently the warning signal of tuberculosis.

Bad teeth and bad tonsils may be the cause of rheumatism.

The United States public health service administers typhoid vaccine gratis to federal employees.—United States Public Health Service.

WHY SCHOOLTEACHERS AGE

Some answers—Can you guess the questions?

Bimonthly means the installment plan.

A triangle is a circle with three corners in it.

A curve is a straight line that has been bent.

A vacuum is an empty place with nothing in it.

A Mr. Newton invented gravity with the aid of an apple.

There was no such man as Hamlet. He lived in Denmark.

A mountain range is a big cooking stove used in a hotel.

The alimentary canal connects Lake Erie with the Hudson river.

The government of a country that is ruled by a king is a monkey.

A saxaphone is an instrument played on by the early Saxons.

Longitude and latitude are imaginary lines on the earth which show you which way you are going.

The torrid zone is caused by the friction of the equator which runs round the earth in the middle.

In some cities a woman can vote at a school election if she has been the mother of a child for eight weeks at least.

INSHOOTS

Unless the listener laughs the tale of your troubles is not interesting.

The girl who marries mother's model boy seldom has much of an opinion of mother.

When the sylphlike affinity of some white-aproned old scoundrel concludes to seek another angel you can witness real grief.

A handsome girl with a cigarette breath is about as attractive as a rosebud that has been picked out of a barroom cuspidor.

The man who carries his wife's picture in his watch never thinks to look at it when those street-crossing moving pictures spring in view.

STORM BEARS

Many a man's excessive check is due to toothache.

But few people want the things that are to be had for the asking.

Nine new women out of a possible ten are old women pinned over.

With the possible exception of her tongue the average woman can hold her own.

EPIGRAMMATIC WISDOM

Industry is the mother of good luck.

Blessings in disguise generate some profanity.

A glass of liquor is the toper's spiritual comfort.

There's many an untied knot in a cord of wood.

The sweetness of revenge often sours the disposition.

Fools often find opportunities, but wise men make them.

Some men, like bricks, are always hard pressed for cash.

It's difficult to keep your circle of acquaintances squared.

Samson went at a rapid pace after he got that gate on him.

Only the brink of day prevents the night from going too far.

Don't use a gallon of words to express a teaspoonful of thought.

An old bachelor says the writer of women are mostly postscripts.

Ceremony was invented by a wise man to keep fools at a distance.

There is nothing in words, unless they are properly strung together.

When it is silks with the wife it is apt to be sulks with the husband.

Solitude is better than company—when the company is not congenial.

Medicines were poisoned last year in only 22 states

Fly Poison Kills More Children Than All Other Poisons Combined

For Safety's Sake, Use

TANGLEFOOT

The Journal of the Michigan State Medical Society comments thus in a recent issue:

"Poisoning of children is reported every similar to those of children intentionally poisoned by Paris green, which, prior to its use, was responsible for a considerable number of deaths. If occurring, was attributed to chronic poisoning.

"We repeat, urging for destroying flies, the use of Tanglefoot, Tanglefoot Fly Paper, or some other adhesive substance to prevent further loss of life from their source. Our little children are too dear to be sacrificed for a little more profit on a dangerous fly paper."

Grand Rapids, Mich.

Rough Stuff.

"Shall I go over your face again?" asked the barber.

"I don't mind your going over it," replied the man in the chair, "but please don't go under the skin like you did the first time."

Easy Childrens are Sickly.

Mother Graves' Worm Exterminator Children Break up Colds in 24 hours, relieve Feverishness, Headache, Stomach Troubles, Teething Disorders, move and regulate the bowels, and destroy Worms. They are so pleasant to take children like them. 25 cents at all druggists. Dr. Peckham's FREE Address, Author Drug Co., Le Roy, N. Y.

Coming to Him.

"So they hanged old Sweeney's son at last?"

"Yep; died a natural death."

"It's a short honeymoon that lasts till the furniture is paid for.

Why That Lame Back?

Morning lameness, sharp twinges when bending, or an aching backache, each is cause enough to suspect kidney trouble. Get after the cause. Help the kidneys. We Americans go it too hard. We overdo, overeat and neglect our sleep and exercise and so we are fast becoming a nation of kidney sufferers. 72% more deaths than in 1900 is the 1910 census story. Use Doan's Kidney Pills. Thousands recommend them.

An Iowa Case

O. W. Emery, West Union, Iowa, says: "My back got so painful I could hardly stand. I had to be propped up with pillows to get any rest. Dizzy spells came on so though my kidneys were being cured. The kidney secretions were high colored and irritating. I felt tired out until I was a mere shadow of my former self. Doan's Kidney Pills restored me to good health and I haven't suffered since."

W. N. U., CHICAGO, NO. 21—1916.

"Now how under heaven did it get started up in here?"

He had spoken, aloud as he wearily shifted a clump of young spruce, and the words fell short upon Sandry's ear as he emerged from their shelter.

Before him, in a small cleared space stood Hampden of the Yellow Pines. His back was toward Sandry and he carried in his hand three candles. He was nearly as black and disreputable as any scarecrow down among the fires. He was intently watching something at the foot of a second pine. Softly Sandry moved until this object was in his line of vision.

Indeed high in a pile of timber-dry needles a fourth candle glowed brightly in the smoky gloom. With utmost cunning it had been set close against the tree where a long branch of pitch trailed down the rugged bark from far up among the branches. Upon the candle burned down to the resin-steeped needles—and a man might travel far in the mountains—the galloping flames need only to look that hanger to rush with lightning speed to the swaying, inflammable top.

For a long moment the Easterner stood, lost in wonder. Then the whole thing burst upon him and he knew. Hampden of the Yellow Pines was the power behind the holocaust!

As this stupendous knowledge forced itself into his weary brain, the other turned and strode swiftly away among the boles. The wearing climb had taken the breath from Sandry's lungs and he drew a pistol from his belt and fired over Hampden's head. Like an animal the man whirled, hand to hip, and faced him.

"I've got you at last," Sandry panted; "you got me at last!"

Hampden's heavy lips curled venomously from his short, strong teeth. "You!" he breathed, "you! You hound Easterner! You lily handed tenderfoot!"

Sandy smiled grimly.

"This is just about the blackest spot in your crooked career, Hampden," he said at last. "You blackest and the big great blunder. I can't see why you did it."

"You can't!" snarled Hampden, "oh, you can't! Well, by God, you will be down in hell before you know. You didn't know what you was gettin' up against! You and your—your Poppy Ordway. You made her fight, an' you thought you'd won! But you reckoned without me. I'm mainin' nine, an' it's a humper."

Sandry peered at the burning candles at the pine's foot and instantly she saw the plan's foot and instantly she saw the plan's end. Hampden continued, his voice growing stronger and snuffed it out with thumb and finger.

"Miss Ordway slipped down from the foamy, steaming hips of the horse to stand leaning against him, her bright eyes beginning to sparkle with the tension of the moment. At sight of her Hampden's face grew ashy beneath its grime. She was smiling at him with pleasure which she always found where men fought, or raged against dramatic scene, or worked out clever schemes, and her beauty was never so maddening to him in all his knowledge of her. His one sure dream had, in truth, reached a sorry ending Sandry said, Silets simply, "I came to you. There's danger somewhere—I don't know where or what—but there's something in the shadows."

A vagrant wind fanned up long smoke and whisting banners that hurried up to leap into the moaning canopy behind the Hog Back. The actors in this little drama were too intent to hear the heightened note.

"So you come to be in at the death!" said Hampden at last, his eyes on Poppy in anguished fury, "you done me to death an' you want to see me die! Oh, th' game's up and I don't care a damn! I'm th' smartest one of this bunch yet. An' but for th' fact that you've got them two letters you stole from the commissioner and th' account book with the records of our deals an' rakeoffs and so on, I'd a had a chance to fight an' win yet! But I knew you, Poppy—Oh, how damned well I know you!—an' I knew I'm whipped. But I'm makin a fight—you're damned right I am!"

He waved an eloquent arm around at the appalling, shrinking country which seemed to crouch in its naked pines under the shrouding smoke.

"But th' thing that cuts is knowin' that you done it all for him." A feeble dribble' thing from this East! An' they say you'll marry him! Well, go to it! Hell have to move out, for there won't be any more Dillingworth Lumber company in twenty hours. I'll be behind bars, all right, but I've cleaned him out."

As he finished with a reckless laugh Sandry turned amazed eyes to Poppy. She was pale with anger and she avoided his glance. This was the last thing she wanted—that Sandry should know of her attempt to forestall him in the "getting" of Hampden. She saw her chance to gain his gratitude by her gift drifting away. Also the revelation of her lawyer's perfidy was a mighty blow.

"Hampden," she said unsteadily, "you're the coarsest beast I know!"

"Ah right. But ain't that what it's all for? To lay me as a burnt offerin' at his feet—a sacrifice to win his miserie love! Didn't you say you'd marry him? Ain't I heard it right an' left?"

"My children," said the Preacher, "I promised to come when you should need me. I have served a need. You have your, my son, and the path of youth is fair. There are too many prisoners thereon to sacrifice one year of it. I am old—old."

Here Silets flung herself upon her knees beside him, unable to control herself, rocking to and fro after her fashion, her black swaying and a terrible anguish upon her face.

The handsome blue eyes turned wonderingly upon her.

"Daughter—little one of the tender heart—hush! I hear strange sounds and I would listen."

He closed his eyes and lay for a time in silence, the delicate tracery on his face cutting sharply against a paler spread beneath it. It was the divine record of years spent with his God in the high places, though here and there a drooping line bespoke a valor, fearless and sane.

Presently he murmured:

"The Winds of the Mighty One are upon the sounding boards of the hills! Ah!—"

Again a silence and he opened his eyes with a return to earth. But in them was still some the distant dreams, and half-remembered years and times and places.

"Daughter," he wonderingly into the dark, tear-filled face of Silets bendings over him, "I am sinking into my man lay, starting up with that look of wonder. Then a great joy broke on his face with a shining smile, and he struggled to raise himself on an arm. "Kahwanna," he said, softly, "Kahwanna!"

It was a call from a far-distant past, it thrilled that little company of listeners with an unknown thrill.

"Why—why—What have I dreamed my princess of the hills, that you have wounded my heart? Ah, I know. Ah, I have forgot! But you are here at last!"

He raised naked, trembling arms to the girl's neck.

"Do you ask from the gates of death that I fancied had closed upon you? You are back . . . And there is forgiveness in your dark eyes. Oh, so free, so free—so forgiveness."

His lips quivered and he went on so.

"Lo, I dream of the great wrong I did you, Kahwanna! Oh, have you forgiven?"

The blue eyes were tragic in their puzzled wonder, their shining joy and the voice was desperately earnest.

"Daughter—little one—I am weary. I would sleep. Lay me down in the sun. Sing to me, Kahwanna, of the lonely years that used it, a spurt of flame, a shot.

"Thank God!" cried the old man sharply, "Oh, God, I thank thee! The sun is upon my feet!"

He tried to raise himself on an elbow again.

"But how does it happen? I saw you die in the lodge of Kokawnie with the wandering player of hymns, and he sank down in Sandry's arms.

CHAPTER XXX.

The Sign of the Silets.

It was Poppy Ordway who struck the first from Hampden's hand, sending it flying among the ashes.

"Well! have no murder here!" she cried.

Sandry looked at Hampden for one fleeting second as he laid his gun beside him.

"If you move one muscle," he rapped out, "I'll make you the worst trouble the years wherein I lost you! I have kept for the Primrose that I crushed, at dawn and dusk! I have tried to atone."

There was a pathetic, eager pathetic in the weakening voice and the odious, sullen face turned toward the last act in some forgotten tragedy of the Theatre of Life, stood in silence, unconscious of the darkening smoke clouds, the menace of the rising roar of the fire, unaware of the face the sign of the Silets women—the three bars of hatred, the bitterness and sorrow—and yet you were not of their blood but of my own. Only Solomon knew how you came among them, wee, dark child, how they took you in and gave you a name, and he never told. You were red to me. Kahwanna—a soft-eyed creature of the wild—and you were my woman, bought with a white man's law!"

Here Sandry shrank as if at a blow, drawing in his breath with a sob. But the Preacher hurried on, as if to tell all that had lain upon his heart these many years.

MINK HAS VARIED TALENTS

Web-Footed Animal Can Climb Trees and Go a-Fishing; Also Is Valuable Prey.

Very talented is the animal. He can climb trees like a squirrel, swim like a fish, dig like a mole and kill prey as like a tiger. In addition he is endowed with an unusually fine fur, which makes him valuable prey for the hunter. He's more or less common along wooded streams, and altogether too common in the neighborhood of the farmer's poultry yards. We call him the mink.

Although he can dig as good a burrow as any other animal, the mink sometimes chooses to steal a muskrat's home rather than build one for himself, a writer in the Philadelphia North American states. To avoid future trouble with the owned muskrat, the mink kills and eats him.

Usually he prefers to make his home along the banks of a stream or at the foot of a waterfall. Sometimes, when his lair for poultry becomes cultivated, he will establish himself under the farmer's barn to be near his food supply. He can track his prey like a hound. Besides poultry, he has a taste for rats, mice, fish and frogs. To aid him in his fishing, the mink has partly webbed feet. His sharp claws help him in climbing trees, and sometimes he will attack birds in their nests. He is a little more than twelve inches long, has a dark brown fur and a light spot on his throat. Before smallpox became popular a single pelt of the mink was worth from $10 to $12.

Gray Kegs Off Enemies.

Man—of the tropical species of a slightly—is the only enemy of the gray rock squirrel, the Indian name for which is "chickaree." It is said that the wise squirrel with eyes and ears at the same time provided with a very efficient spraying apparatus which is used with effect to repel the attacks of that very remarkable creature, the weasel, the (nevertheless) the weasel, the (nevertheless) the weasel, the (nevertheless)

REPORT OF THE CHARLEVOIX CO. CONVENTION

THE 25th ANNUAL CONVENTION OF CHARLEVOIX COUNTY W. C. T. U. HELD IN BOYNE CITY, MAY 24-25

Mrs. Alcock, of Charlevoix, County President, led all sessions with unusual calmness and sweetness of manner. Mrs. P. J. Howard of Petoskey, District President was present and rendered most efficient help at all times. The first part of Wednesday afternoon was occupied with preliminary arrangements, business, etc.

Mrs. Sara Wilkinson led the Memorial Service for three members who have passed on: Mrs. H. McCartney of Charlevoix, Mrs. Demorest and Mrs. Hines of Boyne City. Miss Collrins gave a fine talk on Suffrage, which was appreciated as she had recently returned from California. Greetings came to us from Mrs. A. M. Burdick of Charlevoix and Mrs. Heaton of East Jordan who were unable to be present. Mrs. Howard on the topic of Nominations showed that all things work together for the good of them that love God.

The Resolutions Committee of Mesdames Clements of East Jordan and Sudman of Boyne City being unable to act Mesdames Wilkinson of Charlevoix and Burdick of East Jordan were appointed in their places. It was suggested that each member of the convention who was acquainted with Mrs. Grigsby, of Morenci, Michigan, send her a card as a token of our remembrance.

The evening program after singing Onward Christian Soldiers and devotions led by Rev. Duffy, of Boyne City, consisted of three minute greetings from Mr. Marshall in behalf of the city Rev. Gleason for the Churches, Supt. McIntosh for the Schools, Mrs. Hough ton for the Civic League. Mrs. Furman for the Federation of Woman's Clubs, Mrs. F. White for the M. E. Woman's Club and Mrs. Cory for the Local Union, all of whom spoke many helpful and inspiring words of encouragement and welcomed the convention to their hearts and homes. Mrs. Burdick of East Jordan in a few well chosen words responded to the greetings given. Miss May Stewart, school commissioner, of East Jordan gave a very fine address on The Reason Why, which contained some very remarkable views on "Why" we should have prohibition. The only regret we have is that there were so few of the male sex to hear her convincing arguments. Miss Scott of Boyne City gave a recitation, Patsy's Three Last Years. Her impersonation of the teacher and poor little crippled Patsy who has lost three years on account of the sickness of a drunken father. Miss Scott is a born impersonator and held her audience spell bound during the recitation. Little Miss Sadman gave a short recitation entitled The Sitter and the Butterfly.

Thursday morning was given over to business and the reading of two papers, "Preventives" by Mrs. O. F. Root of Boyne City convinced us that we should prepare for prohibition and some of the best methods of preparation. Mrs. Hall gave a well written paper on Purity which contained many interesting thoughts on that important subject. Good reports were read from the different unions in the county.

As this was the silver anniversary of our county organization, Mrs. Howard suggested that we make Mrs. Alcock a life member of the W. C. T. U. by the payment of ten dollars into the state treasury and it was so voted unanimously by the convention.

Afternoon life prayer by Mrs. Hall of East Jordan. Charlevoix extended an invitation to entertain the convention in 1917. We adjourned to meet at that place in one year. Boyne City has the thanks of the delegates for the abundant entertainment given them.

Officers elected for next year are as follows:

President..... Mrs. Jennie Alcock
Vice President..... Mrs. Mable Hall
Cor. Secy..... Mrs. Sara Wilkinson
Rec. Secy..... Mrs. Anne Burdick
Treasurer..... Mrs. Anna Cory

A Carson City special says that Rev. Norman L. Otis, 82 years old, one of the best known ministers of Montcalm county, died at his home in Bloomer township Saturday night and was buried today at Crystal. A graduate of Olivet college, he preached for 50 years, first as an M. E. pastor and later as pastor for the Congregational society. During the civil war he was chaplain of the Eighth Michigan cavalry. For many years he lived on the farm on which he died, and for the past 24 years has been pastor of the place. This item of news will be of interest only to the pioneer residents of Charlevoix and its environs. Thirty-five years ago Mr. Otis was a missionary preacher here, under the auspices of the Congregational church and worked in this field for two years. He was a brother of A. D. Otis, who for some time owned a farm on the west side of South Arm.

County Normal Notes

Rev. Quinton Walker visited the normal one day last week and gave a very interesting talk on the benefits of a County Normal training to young teachers.

Mrs. Stockman, the first pioneer school teacher of Charlevoix county honored the normal class and training room children with a talk of the early pioneer life in Charlevoix. We enjoyed the talk very much and we wish to thank her.

The annual picnic of the normal class and training room children was held last Friday afternoon. It was held in the normal room owing to the shower we had that afternoon.

Edna Srigley, of the class of '14, visited the normal a few minutes last Monday afternoon.

Several of the class have secured schools for next year. Some of the class are planning on taking a six weeks' course at Ypsilanti this summer.

The class day and commencement day exercises of the normal class are being held this week, Wednesday and Thursday evenings respectively, at 8:00 p.m. Everyone is cordially invited to attend.

Norwood News

Miss Roberta Ferguson is home from school for a few days.

Mr. and Mrs. Ben Pearl were in Elsworth Tuesday.

Mr. and Mrs. Walter Taylor and daughter, of Charlevoix, were guests at H. Wagner's, Sunday.

Alice Campbell and Floyd Wagner were in Petoskey Saturday.

W. H. Superneau will move his family to Grand Rapids Wednesday.

Mr. and Mrs. Dice and Mr. and Mrs. W. Richardson, of Charlevoix, were in Norwood Sunday.

Geo. H. Van Pelt and daughter, Mrs. B. Guernsey, passed through Norwood enroute to Charlevoix, where Mr. Van Pelt will spend the summer. Mrs. Guernsey returned to her home Tuesday.

Mr. Schultz, an artist from Chicago, arrived in Norwood Saturday to spend the summer.

Henry Wagner is in Cheboygan this week on business.

F. Bettes, of Charlevoix, was a business caller several days last week.

Frank Carmen is home from East Jordan for a few days.

Mr. and Mrs. Ed. Shapton visited at Ivor, Iowa, a Sunday.

Mrs. Block, of Barnard, Miles Olmstead and Miss Frances Todd, of Charlevoix, called on relatives and friends in Norwood, Sunday.

Geo. Parsons is driving a new Ford.

Frank Valentine, having spent several days in Norwood on business, left Tuesday for his home in Florida.

Beaver Island News

R. W. Paddock of Charlevoix made a business trip here last week.

Charles Roe of Harbor Springs, had a crew of men replacing the Joe Gallagher dock. Capt. Roe intends to put about 40 tons of coal on same.

Olaf Nordrum, manager of Booth Fisheries, was here on business last week.

James Pinson, of Charlevoix, was a caller here last week.

Capt. Wm. Finnegan, of Charlevoix, called on some of his old friends last week.

Mrs. R. H. Gallagher and daughter Clara, of Flint, is here visiting relatives.

John Maloney, of Chicago, is here visiting his mother also fencing the Maloney farm.

Geo. Mike sold his interest in the Mr. Hoge schooler to John Hansen of Charlevoix.

Harry Gloetzenger, of the Booth Co., was here on business last week.

Tillie Palmer returned to Charlevoix after spending several weeks here with her parents.

Miss Emma McDonald went to Charlevoix Monday.

Mrs. Gus Milike made a trip to Charlevoix last week.

Ulysses Metlamn went to Charlevoix yesterday to have some dental work done.

Charles Metlamn went to Charlevoix Saturday.

Katie Hoddy went to Charlevoix last week.

Eleanore Gallagher was hostess to a number of her little friends and playmates at her home Thursday in honor of her tenth birthday. Ice cream and cake were served and games played during the afternoon and the little folks all report a very enjoyable and merry occasion.

James Floyd and Miss Bernice Graham were married last week.

Charles Jewell is here visiting.

County School Commissioner May C. Hayward was here visiting the schools.

Mr. Moffee of Lansing is here on business.

The senior class of St. James High School gave their class day exercises Monday evening. The program is as follows:

Welcome..... Charles J. McCann
Class Song
Class Prophecy..... Patrick J. McDonough
Instrumental Duet..... Alanet Kenton

Class Poem..... Mary Walsh
Class Song..... Clementine McCauley
Class Oration..... Leonard Sullivan
Class Oration..... Loretta O'Donnell
Class Song
Presentation of Diplomas..... Rev. Michael Hanney
Parlsonian..... Mr. Old Kentucky Home..... Our Girls
Presentation of Class Pins..... Rev. R. J. Jewell

One That Came First.

High traveling name of bitter—As to how these are to be paid, I am confidently in the dark. Why—Well, there's one of them you'll have to pay or be even more in the dark—the gas bill.—Milwaukee Daily News.

LOST—Sunday afternoon, May 21st, a lady's gold watch. Finder leave at Sentinel office and receive reward. Watch is marked, Mrs. L. A. H. Henry.

LOCAL AND PERSONAL

Mrs. Albert Black, of Marion, is still seriously ill.

N. Follett, manager of the Chicago Club, arrived Saturday.

Jos. Howard is building a large addition to his Dixon avenue home.

Mrs. J. W. Kellner is still quite ill at her home on Michigan avenue.

Regular Sunday morning and evening services at the Episcopal church every Sunday.

J. R. Mead, who for a year has been at the Masonic Home, at Alma, is here for the summer.

The "Governor's Lady," featuring Edith Mynne Matthison, at Majestic Theatre, Tuesday, June 6th.

The State sanitary engineer was here Tuesday investigating sewer and water conditions with City Engineer Sloan.

Jos. Blackwood died at his home in Marion, Monday, of a lingering illness. The remains were taken to South Lyons for burial.

Mr. Percy Woolley, who has a position in Chicago, and who has been visiting his family in Marion, returned to Chicago today.

Judge Mayne has bought of Hart & Son an Oakland car, and, up to this writing is acting as his own chauffeur. Nobody hurt yet.

A. I. Creamer, manager of the Inn, arrived from the South Wednesday, and has begun to put things in shape for opening the big hotel.

Lisle Shanahan returned home from Edwardsburg Monday. While there he officiated as toastmaster at the high school alumni banquet.

Mason Rose and wife and Clinton Cooper and wife left Saturday morning in the Rose car for a six weeks' tour to Sagenaw and other points in Michigan.

Confirmation service by Rt. Rev. John N. McCormick, Bishop of Western Michigan Diocese assisted by Rev. Harris, of Petoskey, Sunday, June 4th, at 7:30 p. m.

Ben Yettaw on Saturday last sold his ice cream parlors to Louis Hoyajim, who comes here from Petoskey. Natural changes and improvements are being made in the place.

George H. Van Pelt, "our George," of Chicago and Charlevoix, has arrived for the summer, and has rooms engaged in the Harry Nicholls' cottage on the Round Lake bluff.

The first excursion of the season in this direction came from Harbor Springs on the Columbia, Sunday. There was a big crowd, and the excellent Harbor Springs band.

Albert Holmes is telling around that his cat killed a rat that was part white. Albert spent the winter in the same Florida neighborhood as Frank Hines. Calico rats and March robins go well together.

A. T. Stewart, of the Northville hatchery was in town Thursday, bringing 10,000 brook trout fingerlings and 5,000 rainbows, which came consigned to the Charlevoix Rod and Gun Club. They were planted in nearby streams.

Mrs. Geo. B. Douglass, of Cedar Rapids, Iowa, has shipped to the Chicago Club a pair of swans, which Warden Gaskin has placed in the old "upper river." And this is to give notice that they shall not be disturbed by boys as those were which Mrs. Harry Nichols placed on Round Lake.

Another Charlevoix boy "making good." John Byron Cook, son of Mr. and Mrs. John Cook, of this city, who for five years has held down a good job in a Redding drug store, was married on the 22d, at Redding, to Miss Flossie Spicer. An evidence of his success is the fact of his recent election to the office of Worshipful Master of Redding lodge of Masons.

In commercial and agricultural circles considerable interest is being manifested in Michigan's bean crop for 1916. A fear that the farmers will cease to include this crop in the annual rotation is apparently foremost in the minds of many business men who can see a "bean famine" unless the farmers put their faith to this crop as their principal cash crop for another year. The fears held by these men are based largely upon the assertions made by many farmers last fall that "the year 1915 marked the end of the career of the bean on their farms" owing to the most unfavorable season in the history of agriculture in the state.

A prominent Traverse City reporter recently gave the Traverse City Record the following information: "At the Chicago ticket office of the Pere Marquette railroad I asked about the indications for the summer season. They simply talked in the superlative degree, the first time that I ever heard them talk that way. They said that never in the history of the road have there been so many inquiries about Northern Michigan resorts. Three reasons are given in explanation of this demand: The fact that there are no national expositions to draw sightseers; the cessation of European travel because of the war; and the fact that the increased and more systematic publicity given the northern resorts is beginning to bear fruit."

BAD RUNAWAY ACCIDENT

ARTHUR SEATTIE, WELL KNOWN MARION FARMER, A VICTIM LOSES LEFT HAND, AND LEG BROKEN

The most disastrous runaway accident that has occurred in this section in many years, was that of Tuesday, in Marion.

Arthur Seattie, one of the best known and most prosperous farmers of that township, while hauling a load of brush with a team of young horses, was thrown from the wagon, when the team ran away, becoming so entangled in the wreck that when found by neighbors he was lying in a pool of his own blood.

His left hand was torn off and his left leg broken in two places, the bone protruding from the flesh. He was taken to the Petoskey hospital where his arm was amputated between the elbow and wrist.

SOMEBODY'S BACK TO THE WALL —WHO IS IT?

As will be seen by the official proceedings, the council has cut the towline between Charlevoix and Bellaire in the electric lighting matter, following a demand from Mr. Richards of an increase of one cent a kilowat over the present rate.

The matter has now resolved itself into a test of the legality of the municipal legislative act upon which Richards depends for justification. There is no doubt that the Bellaire gentleman will institute proceedings.

Superintendent Hamilton says the city is fully prepared for the emergency. Connection with the Rock Product plant will be perfected this week, the local plant, meanwhile, filling in the gap.

SUPT. H. A. CRAIG

As the school year so auspiciously closes, we look hopefully, but confidently forward.

It is a source of satisfaction to know that Superintendent Craig is to remain. He possesses in an eminent degree the essentials of a successful administrator and teacher.

The work of a superintendent of schools is most exacting and sometimes very vexing. He is confronted, at times, with the conflicting views of school boards, and at all times with public criticism, in which the views of the 1890 graduate are set up against 1916 methods. Mr. Craig has been no exception to this rule.

His relations with board and patrons he has been frank and firm, but always self-conscious and sincere. These are strong qualities, but to them are added a refined character and well developed scholarship that should equip the successful educator.

TO DELINQUENT SUBSCRIBERS

The cost of the paper upon which the Sentinel is printed has gone up almost one hundred percent in the last six months. Under normal conditions the country newspaper needs all that is coming to it, but the necessity becomes more urgent when the bills of the paper house double up.

Therefore, brethren, do not put us to the necessity of using more paper in the form of statements, to say nothing of postage. Just remit, or call in and make us glad with the spondulix. We must have it.

We are giving you a good paper, and you know it, but it takes money to do it. Respond!

MEMORIAL DAY

The weather was glorious, the spirit of the day was earnest and solemn, floral tributes were profuse, the program at the cemetery was appropriate and well managed.

It was gratifying to note, for the first time in years, the absence of sport and frivolity. The day is set apart and dedicated to the sacred memory of those who have given their lives in the righteous cause of freedom and those whose place by the hearthstone is vacant.

It is a day for tears; there are other days for laughter.

John I. Gibson, of Grand Rapids, secretary of the Western Michigan Development bureau, was unanimously elected secretary and manager of the Upper Peninsula Development bureau. It is understood that the work will begin at the expiration of his work with the western Michigan bureau this year. Mr. Gibson, at his home in Grand Rapids, declared he had not decided whether to accept the new position.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powder. Get at the root of the trouble and thoroughly cleanse the system with a treatment of Dr. Kings' New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, middle and aged. Go after a clear complexion today. 25c, at your druggist.

COUNCIL PROCEEDINGS

Council Chambers, May 29, 1916.

The common council for the city of Charlevoix met on the above date, Mayor Hess presiding. Aldermen present: Paddock, Cartier, Hiller, Gaiken and Benton. Absent: See.

Minutes of the last meeting were read and approved.

Moved by Ald. Benton seconded by Ald. Cartier, that the South Bridge street paving resolution be taken off the table. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Paddock, seconded by Ald. Benton, that the druggist bond of Bruno Herman be accepted as presented. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Hiller, seconded by Ald. Cartier, that the druggist bond of F. C. Hines & Co. be accepted. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. Hiller, that communication from the League of Michigan Municipalities be laid on the table. Motion carried.

Moved by Ald. Paddock, seconded by Ald. Hiller, that the bond of Sidney Henry, for curb and gutter State street paving be accepted as presented. Motion carried by following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Paddock, seconded by Ald. Hiller, that Alnsley and Nicholls streets be graded. Motion carried by following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Mayor ordered the matter of Nicholls street sidewalks on table.

Moved by Ald. Paddock seconded by Ald. Cartier that the balance due G. D. Hammond on Nicholls and Alnsley streets never be paid. Motion carried by following aye and nay vote: Ayes—Paddock, Cartier, Hiller and Gaiken. Not voting—Benton.

Moved by Ald. See, seconded by Ald. Hiller, that the matter of damage at foot of Alice street be referred to Streets, Sewer and Public Health Committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. See, seconded by Ald. Paddock, that the matter of South Bridge street paving be laid on table until 8 o'clock in the afternoon, May 30th, 1916. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller and Gaiken. Nays—Benton.

Moved by Ald. Hiller, seconded by Ald. Gaiken, that when we adjourn, we adjourn until 8 o'clock in the afternoon May 30th, 1916. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton.

Moved by Ald. Cartier, seconded by Ald. Paddock, that the matter of paving sewer conditions at corner of Bridge and Antrim streets be referred to Streets, Sewers and Public Health committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Gaiken, seconded by Ald. See, that all bids be rejected for street sprinkling and matter be referred to Streets, Sewers and Public Health committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Not voting—Benton.

Moved by Ald. See, seconded by Ald. Hiller, that petition of Wm. Cook et al for electric current for lighting purposes be referred to Electric Light and Water committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. Benton, that proceeds of privileges from 4th of July celebration be given to committee for celebrating purposes. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

Moved by Ald. Paddock seconded by Ald. See, that in regard to Gunson Dixon's position and salary, same be referred to Electric Light and Water committee with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gaiken and Benton. Nays—None.

There being no further business, the council adjourned.

CHARLES H. EMREY,
City Clerk.

Council Chambers, May 30, 1916.

The common council for the city of Charlevoix met in regular adjourned session on the above date, Mayor Hess presiding. Aldermen present: See, Paddock, Cartier, Hiller, Gaiken and Benton. Absent: None.

Ald. Paddock, seconded by Ald. See, moved the adoption of the following resolution:

Bridge Street Paving—South Terrace Paving District No. 15.

Resolved by the common council of the city of Charlevoix, that the grading and paving with oil macadam from the south line of Cedar street to the south line of State street, a distance of 1,000 feet, be and the same is hereby ordered, and the cost and expense of the same shall be assessed upon the lots and premises fronting or abutting on said portion of Bridge street, and the same is hereby ordered to be assessed upon the lots and premises fronting or abutting on said portion of Bridge street, in proportion to the benefits to be received by said lots and premises, and the same is hereby ordered to be assessed upon said lots and premises in the following manner, to wit:

Be it further resolved that the expense of said public improvement shall be defrayed as follows: The expense of grading and paving the roadway shall be borne by the city at large; the expense of grading and paving the roadway of the street in front of all public buildings shall be borne by the city at large; the expense of grading and paving the roadway opposite private dwellings shall be borne by the city at large; the expense of grading and paving the roadway opposite business buildings shall be borne by the city at large; the expense of the curbing shall be borne by the property fronting thereon; the expense of the crossings shall be borne by the property fronting thereon; the expense of the sidewalks shall be borne by the property fronting thereon; the expense of the grading and paving of the roadway opposite the public grounds shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the State and County buildings shall be borne by the State and County respectively; the expense of the grading and paving of the roadway opposite the Catholic church shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Methodist church shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Congregational church shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Episcopal church shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Masonic building shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Opera House shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Inn shall be borne by the city at large; the expense of the grading and paving of the roadway opposite the Dixon avenue school

The Car Rider

By Walter Delaney

(Copyright, 1911, by W. G. Chapman.)

I was for years a train rider. Do you know what that means? If you do, you are where the great majority, for the phrase is a new one and covers a calling somewhat unique. A train rider I was, with all its jar, risk and peril, and would probably be one today but for Imagination—poetics, patient, practical—sharing all my love.

A train rider is a man not listed as a railroad employee, but always on hand to compel a pay roll. He is a special officer. The pay is eighty-five dollars per month, and fifteen dollars extra for expenses. The work is rather regular nor onerous, only the train rider of a railroad division must be at the conspicuous and unalterable beck and call of the railroad at all odd, even or unusual hours.

In a word, my functions were these: to proceed on order to a certain train, to locate a special freight car and until that car left the end of the division not to allow it or its contents to leave my sight for a single moment of time. When I turned my watch and ward over to the car rider of the next division my duties were completed, all except sending in a report of any untoward incident that might attend the transmission of the car of which I was the guardian.

Sometimes it was a blooded horse, more often an opulent shipment of bullion; once a few small boxes containing watch springs. Valuables running into pieces of steel. I was amazed when I learned that this precious consignment represented nearly a million dollars.

I was notified to meet a freight at Hopston at noon one day and presented myself to find the train stationary at a switch at the end of the yard. Beyond this was a car, evidently empty, then and open country. My car was the fifth. As I recall, I saw to the seals, made a memoranda of the transit card and mounted to my cozy on the top of the car. It had a small grated window at either end, and a portable ventilator in the roof above the center of the car. I opened this and inspected the interior of the car, for it was a slow run of some eighteen hours. In case of rain I was at liberty to go inside, I flashed my electric light into down into the dark void beneath, made out what from experience I took to be a shipment of bro-

A Red-Faced, Excited Man Rushed Up.

cades and velvets and marked out the spot where I would turn if driven to shelter by the elements.

A call from the brakeman down the track sent me toward the train and after the side of the car. Just as I reached the edge of the roof to descend I drew back. A stranger, accosting, fairly forced me back. In wonderment I faced a beautiful young girl, though pale and distracted now. She was gasping for breath and directed a frightened glance back over her shoulder. She sent to the car roof as though exhausted. I noticed that the thirty dress she wore was torn as if by brambles or fence wire. She wore no hat or wrap and her hair was disheveled.

"Does—does this train start soon?" she panted out.

"Why, yes," I answered, "but not with regular passengers."

"I know, I know," she breathed hurriedly, "but couldn't I stay here and ride just a little? I wouldn't make any trouble. I'd keep real quiet," she added, with eyes full of a piteous entreaty that stirred my heart. Just then the signal whistle was repeated.

"I will be back in a minute and see what I can do for you," I said, marvelling greatly, for at a glance I discerned that this was no gull tramp or that genus and I was at a loss to assess the cause of her distraction.

When I got to the ground down near the train the conductor was waving a paper. It proved to be orders to hold road the car I was in when we reached a certain junction. Just as I completed reading it a red-faced, excited man rushed up. Pompous, irascible, I think he had the human conscience and the most treacherous eyes I have ever seen.

"You, man!" he shouted. "Have you seen anything of a girl?" and he rattled out a description of the very person whom I had left on top of my car.

"Look in the caboose—there's six way freed there," chanced the conductor, and I hurried back to my car to find no trace of the mysterious young lady who had so suddenly appealed to my chivalry and sympathy.

She was gone. I scanned the long stretch beyond the tracks, expecting to glimpse her flying form, for I dared not that she was a runaway. I pitied her if the man I had just seen was her guardian or relation.

She did not drift soon out of my mind. So vividly had she impressed me that I could reproduce her mentally with clearness. We made our run and dusk came on just as we reached the junction. As we made up a new train and got well on to the bolt spur I detectived to open the trap in the roof and feel inside and by the aid of my flashlight enjoyed the lunch I had tossed among the packages below.

We were just passing an overhead bridge when I caught a fleeting glimpse of a descending form. In a flash my suspicions were excited, and rightly. A man had dropped to the roof of the car from the girders. He bore down upon me.

Of course I realized what was doing. A gang were after the contents of the special car and here was the forerunner of the group. He made for me and we collided. I went flat, and he, too. He was intent on throwing me off the car and later cast the profane freight to confusion awaiting him farther down the line.

I slid and, lying extended, seized the rod of the brake wheel. He would be upon me in another moment, when he uttered a sharp cry. Turning, I saw a figure beside the open trap. I saw the ashen of my enemy seized. He was swaying backwards and then securely over the side of the car into space.

The girl in a flashing second I understood. I saw she had got down into the car hours before, doubtless frightened into hiding from the man who was looking for her. She had thrown back the scuttle cover just in time to save the freight and myself.

And now, having shown the courage of a true woman, she became timid and reticent. I could not influence her to explain her attack. "Only to get away from persecution!" she uttered more than once, and shuddered. "Only to find some secluded home, a shelter, a safe retreat for a single month!"

I won upon her confidence during that strange night journey. When we reached the terminus I took her to the home of my sister. She told her everything, but the information was not imparted to me then.

The company traced the man who had been baited so summarily in his scheme to loot the special car. They found him a cripple for life and broke up his thieving gang.

By the end of the month my mystery girl became my true love. In another thirty days I was ordered by this imperious little tyrant to abandon hard work and peril.

"For I am an heiress, you see," said Elvira, "and the cruel guardian I was escaping from, been on forcing me to marry his son, has no further power over your loving and happy wife." So I ceased to be a car rider, but blessed the day ever that made me one, whereby I gained the love of the dearest little woman in the world.

APT DESCRIPTION OF AIRMAN

Secretary's Bright Thought Abruptly Put an End to the Troubles of the Toastmaster.

"The toastmaster was preparing for the dinner. He looked over the list of speakers.

"Here is Von Soar," he said to his secretary. "He's the crazy airman. you know—the fellow who does acrobatic stunts in mid air. I'd like to introduce him in some original sort of way. Can you think of anything?"

The secretary straightway looked up.

"How would it do to call him the lark of the loopthe-loop?"

"Don't like it."

"The soaring tumblebug?"

"No, no."

"The swine of the somersault?"

"I don't think that's the season."

The secretary looked more thoughtful.

"What does he really do?"

"Why, he flies upside down and cuts figure 8's."

The secretary brightened up.

"Figure 8's, I've got it! Call him the Flying Pretzel.

"Fine!" cried the toastmaster.

A Day's Work.

What constitutes a day's work?—Harvard's Enterprise. Up in the morning, dress, shave with a cheap razor, bring in enough coal for the day, hold the baby while breakfast is being prepared, eat hurriedly, rush to town, work fiercely at your job till dinner, then walk hurriedly home, hold the baby while the middle meal is being put on the table, then after eating hurry back to the job. After which, work till 6:30 and go home for the evening meal, and hold the baby while the cook and the housewife are preparing the meal. After supper put the baby to sleep, bring in some more coal, shut the water off, if it's a threatening night bring the flowers in, put the cat out, and poke up the fire. If that isn't a day's work it is because it takes part of the night to finish your tasks.—Montgomery Advertiser.

Violins Keeping Time.

The best violin makers use timber which has been seasoned for many years, sometimes centuries, buying beams from ancient buildings for the purpose. Changes in the grain of the wood caused by shrinkage, or weathering, will affect the tone of a violin very much. The Italian school of makers invented varnishes which were believed to have preservative qualities and to prevent changes in the timber. If your violin is made of perfectly seasoned wood, and is well treated with a good varnish, it should preserve its tone all right.

Children Find Viking Relics.

An interesting find of Viking relics of the ninth century was recently discovered at Vallen, in the island of Lewis, by schoolchildren. The relics consisted of a pair of large oval brooches of a noted Scandinavian type, a small penannular brooch, a disk-headed dressmaker with a conical boss and a decoration of interlaced torque, a small buckle, part of a bronze chain, probably used to connect the large oval brooches, and a single big amber bead.—London Globe.

Common American Birds

Interesting information about them supplied by the Bureau of Biological Survey of the United States Department of Agriculture

Kingbird

(Tyrannus tyrannus)

Length, about eight and one-half inches. The white lower surface and white-tipped tail distinguish this flycatcher.

Range: Breeds throughout the United States (except the southwestern part) and southern Canada; winters from Mexico to South America.

Habits and economic status: The kingbird is a pronounced enemy of hawks and crows, which it vigorously attacks at every opportunity, thereby affording efficient protection to nearby poultry yards and young chickens at large. It loves the open country and is especially fond of orchards and trees about farm buildings. No less than 35 per cent of its food consists of insects, mostly of a harmful nature. It eats the common rose chafer or rose bug, and more remarkable still it devours blister beetles freely. The bird has been accused of eating honeybees to an injurious extent, but

there is little ground for the accusation, as appears from the fact that examination of 614 stomachs showed only 61 bees in 22 stomachs. Of these 51 were useless drones. On the other hand, it devours robber flies, which catch and destroy honeybees. Grasshoppers and crickets, with a few bugs and some cutworms, and a few other insects make up the rest of the animal food. The vegetable food consists of fruit and a few seeds. The kingbird deserves full protection.

Nighthawk

(Chordeiles virginianus)

Length, ten inches. Not to be confused with the whippoorwill. The latter lives in woodland and is chiefly nocturnal. The nighthawk often flies by day, when the white bar across the wing and its nasal cry are distinguishing.

Range: Breeds throughout most of the United States and Canada; winters in South America.

Habits and economic status: This bird lives on the edges of woodland, in groves, orchards, parks, and even in shaded village streets. It is some-

times known as rain crow, because its very characteristic notes are supposed to foretell rain. The nighthawk is active was a at night, moving on the beaches or flits from tree to tree, and is much more often heard than seen. Unlike its European relative, it does not lay its eggs in other birds' nests, but builds a nest of its own. This is, however, a rather crude and shabby affair—hardly more than a platform of twigs sufficient to hold the green-ish eggs. The cuckoo is extremely useful because of its insectivorous habits, especially as it shows a marked preference for the hairy caterpillars, which few birds eat. One stomach that was examined contained 250 American tent caterpillars; another, 217 fall webworms. In places where tent caterpillars are abundant they seem to constitute a large portion of the food of this and the black-billed cuckoo.

Yellow-Billed Cuckoo

(Coccyzus americanus)

Length, about twelve inches. The yellow lower part of the bill distinguishes this bird from its near relative, the black-billed cuckoo.

Range: Breeds throughout the United States and southern Canada; winters in South America.

Habits and economic status: This bird lives on the edges of woodland, in groves, orchards, parks, and even in shaded village streets. It is some-

times known as rain crow, because its very characteristic notes are supposed to foretell rain. The cuckoo is active was a at night, moving among the beaches or flits from tree to tree, and is much more often heard than seen. Unlike its European relative, it does not lay its eggs in other birds' nests, but builds a nest of its own. This is, however, a rather crude and shabby affair—hardly more than a platform of twigs sufficient to hold the greenish eggs. The cuckoo is extremely useful because of its insectivorous habits, especially as it shows a marked preference for the hairy caterpillars, which few birds eat. One stomach that was examined contained 250 American tent caterpillars; another, 217 fall webworms. In places where tent caterpillars are abundant they seem to constitute a large portion of the food of this and the black-billed cuckoo.

No Commendation.

"You seem to think a great deal of that candidate."

"How do you arrive at that conclusion?" asked Senator Sorghum.

"Why, you have not condemned him."

"Yes; but a public man's attitude toward a candidate may be that of the family toward the head of the house, who, when asked his opinion of the conduct of a man because you've got to support him."

Pat to the Rescue.

The New York homeseeker engaged an Irishman fresh over from a remote district of his native land as general factotum. Pat gave much satisfaction, as he was quiet and smart, and always cheerful and obliging. Only one thing bothered him, and that was the master's telephone, and many a suspicious look he gave it when in his master's study. One night they were awakened by a cry of "Fire!" and Pat, hastily dressing himself, hurried down stairs, and rushing to the telephone shouted: "Hey, mather, tread better come out of that, or you'll be burnt to death."

Evidently Is Dangerous.

Whooping cough, which destroys annually 10,000 persons and renders 100,000 ill, frequently is not listed as an infectious disease.

The Cuban government will erect a lighthouse at Santiago powerful enough for its light to serve as a beacon for mariners 50 miles away.

HANDICRAFT FOR BOYS AND GIRLS

By A. NEELY HALL and DOROTHY PERKINS

(Copyright, by A. Neely Hall.)

A HOMEMADE DESK WITH A PICTURE SCROLL.

Every boy can own a desk, because it is one of the simplest pieces of furniture to build. I have designed a great many desks for boys to make, but I believe that the one shown in Fig. 1 will be the most popular. This desk is made out of a small packing-case, or a grocery box. Select the best-looking box you can find. Get

the cover boards, too, because you will need them for the hinged drop-leaf. The first thing to do is to reinforce the nailing of any board's which show signs of coming loose. Then prepare the pigeonhole partitions. Fig. 2 shows the inside of the desk. Partitions A should be fastened seven inches each side of the center of the board, and 9 or 14 inches apart and shelves B should be so spaced that there will be a small top and bottom pigeonhole and a larger one between. Make C in partitions A (Fig. 3) by providing for the "shape of the scroll" to turn in. Bore the upper one about three inches below the upper end of A, and place the lower one two inches or so below it. Nail partitions A to the end of shelves B, then stand these assembled pieces in the box, set a temporary brace between partitions A to hold them in the right position, and drive nails through the ends of the box into shelves B

and through the top and bottom of the box into the ends of partitions A. Cut the scroll pulleys D (Figs. 4 and 6) from pieces of broom-handle 3 inches shorter than the distance between the partitions A, and get four large spools, such as cotton-spool cones on, for the end knobs E (Figs. 4 and 6). Rollers D turn on the pulpivots F (Fig. 6), which must be long enough to run through the spool knobs E through holes bored in partitions A, and half an inch into the ends of the rollers. The spools must be glued on by the nails. Wrap nails F with paper, and in each end of the paper will glue so the spools will stick fast.

A tough wrapping-paper should be used for the scroll, so that you can find a store dealer who has a roll of paper from which you can get the length you want in one piece. Tack the ends of this paper to the scroll rollers (Fig. 7). Be careful to get the

cover boards, too, because you will need them for the hinged drop-leaf. The first thing to do is to reinforce the nailing of any board's which show signs of coming loose. Then prepare the pigeonhole partitions. Fig. 2 shows the inside of the desk. Partitions A should be fastened seven inches each side of the center of the board, and 9 or 14 inches apart and shelves B should be so spaced that there will be a small top and bottom pigeonhole and a larger one between. Make C in partitions A (Fig. 3) by providing for the "shape of the scroll" to turn in. Bore the upper one about three inches below the upper end of A, and place the lower one two inches or so below it. Nail partitions A to the end of shelves B, then stand these assembled pieces in the box, set a temporary brace between partitions A to hold them in the right position, and drive nails through the ends of the box into shelves B

paper square on the rollers, so it will roll up evenly. The pictures should be put on before the scroll is pasted in the desk. Cut out and paste them in place.

Fig. 4 shows how the box-cover boards are fastened together by means of the end knobs E and how the pair of hinges are placed for hinging this drop-leaf to the desk. To support the outer edge of the drop-leaf, when the desk is open, a pair of chains must be provided. Screw screw-eyes into the drop-leaf and the other side of the desk, to attach the chains to.

Paint all joints and nail holes. Then a coat of stain, or two coats of paint or white-enamel, will complete the job. Set the spools in place, put screw-eyes into the top, the desk may be suspended from a picture-molding, or it may be hung upon a pair of long hooks screwed into the wall.

HOMEMADE CANDLE STICKS.

The candle stick in Fig. 1 has a base made of a small cardboard box (Fig. 2). In this box is fitted a piece of cardboard having its edges turned

down and a hole cut through its center to receive a candle (Fig. 2); give the turned edges glue to the sides of the box. Fig. 3 shows how to fold a cardboard strip for the handle. One end of this is stuck through a slot in one side of the box and is glued to the box bottom; the other end is slipped into the box and glued to the side.

The candle stick in Fig. 4 is of a more ornamental design. A pill box forms the top. Fig. 5 shows how a hole is cut through the center of the box bottom for the candle to slip through, also how slots are cut through the bottom to receive the ends of the four supports. A pattern for the supports is shown in Fig. 6. Fig. 4 shows the relative proportions of the box top and the supports. The two slots A (Fig. 6) are provided for the cross strips to stick through. Fig. 4 shows how these cross strips connect and brace the supports. The upper pair of braces support the candle. Glue the ends of the crosspieces to the sides and glue one crosspiece to the other at their intersection.

In Fig. 7 we have a candle stick with a simple shade. The base is a small cardboard box, turned bottom side up (Fig. 8). The center post mounted upon the base is in reality a

beat for the covering. The supports for the shade are a pair of cardboard strips (Fig. 12). Glue the upper end of these to the inside of the shade; stick the lower end through a pair of slots in the base (C, Fig. 8) and glue to the box sides.

On Safe Ground.

"The Dubwatters are taking about taking a trip to the Orient when the war is over."

"Why don't they run down to Palm Beach for awhile? There's nothing to prevent their taking a trip of that sort."

"I guess that's just the reason why they don't talk about it."

HEAL SKIN TROUBLES

Stop the Itching, Burn and Disfigure by Using Cuticura. Trial Free.

The Soap to cleanse and purify, the Ointment to soothe and heal. Rashes, eczemas, pimples, dandruff and sore hands yield to treatment with Cuticura Soap and Ointment. Relief is immediate and lasting, in most cases, complete, speedy and permanent.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. 1a, Boston. Sold everywhere.—Adv.

Broke Prison for English Food.

A remarkable story was told by Karl Burkhardt, who was recanvassed as an alien the other day. He said that he served in the German army for 17 months, was captured by the French and sent to a prison camp on the coast. He escaped and became a stowaway on a ship at Dieppe, bound to have a more food in England.—London Globe.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.—Adv.

More Expense.

"Mr. Rose has promised to donate a new lectern to the church."

"Yes, and I suppose he'll expect the rest of us to chip in and buy somebody to play the blamed thing."

Quite Fitting.

"What fed has Fannie on hand now?"

"I believe it is palmistry."

FITS, FLITTER, FALLING SICKNESS permanently cured. No fits after first dose. Marvelous results. Send for FREE $2.00 BOTTLE and TREATISE. DR. KLINE, 931 Arch St., Phila., Pa.

The Natural Course.

"My boat was arrested by the incoming waves."

"Then why didn't you bail her out?"

Easter Duds.

"Smith looks as if he had just got something off his chest."

"I guess it's his new spring lid."

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for Infants and children, and see that it

Bears the Signature of *Chas. H. Fletcher*

In Use For Over 30 Years.

Children Cry for Fletcher's Castoria

Hadn't Finished the Other Day.

The manager of a factory had instituted a system of fines—fines for being late, fines for mistakes, fines for spoiled work and so on. Happening to awake one morning very early he went to the factory a little after starting time. As he got out of his motor car he saw a pale haggard, hollow-eyed man walking wearily through the gate.

"Ahah, Johnson!" he shouted angrily. "Ten minutes late, eh? Well, you're fined. Not a word now; that's the rule!"

"Take your time, gov'nor," answered Johnson. "I ain't knocked off from yesterday yet!"

Very Sudden.

It was the second half of the fourth inning, and the home team had three men on bases and nobody out. The next man up was the best batter on the team. If not in the entire league, he was second to the plate swinging three bats and wearing a confident smile on his face. The stands were in an uproar of enthusiasm.

Suddenly the umpire stepped forward and held up his hand.

"Game called on account of darkness," he announced.

He leaves a widow and three children.

It's the man who makes a fool of himself that seldom beats of being self-made.

A woman seldom brags of her good judgment until the man proves it.

MEALTIME CONSCIENCE.

What Do the Children Drink?

There are times when mother or father feeds the youngsters something that they know children should not have. Perhaps it is some stimulant, but more often it is tea or coffee.

It may not be a question of the health of the child, but you can take yourself and feed to your children, conscious that it will help and strengthen, but never hurt them.

A Yorkstate lady says: "I used coffee many years in spite of the conviction that I knew it was nervous system and produced my nervous headaches. While visiting a friend I was served with Postum and I determined to get a package and try it myself. The result was all that could be desired—a delicious, finely flavored, richly colored beverage. Since I quit coffee, Postum has worked wonders for me.

"My husband, who had suffered from kidney trouble when drinking coffee, took up Postum and now he drinks it with me and since drinking Postum he has felt stronger and better, with no indication of kidney trouble.

"You may be sure I find it a great comfort to have a good drink at meals that I can give my children, with a clear conscience that it will help and not hurt them as coffee or tea would."

Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms:

Postum Cereal—the original formerly boiled. To end 25c pkgs.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

Both forms are equally delicious and cost about the same per cup.

"There's a Reason" for Postum.

—Sold by Grocers.

The Actress and the Role.

"Playing Katherine in 'The Taming of the Shrew' brought me much satisfaction, but a very bad impression for tempo," Ada Rehan said.

"I have often been amused at seeing the effect that a first performance of the Shrew' in a strange place produced on the employees of the stage. They shunned me as something actually to be feared.

"During a long run I have heard it said that I hated my Petruchio. I looked upon this as a compliment."

Far-Fetched Ideas.

"Care much for astronomy?"

"Not a great real," replied the slightly pessimistic man. "But some phases of the science interest me."

"For instance?"

"There are the Martians, you know. They are said to be farther advanced than we are. Since the war in Europe began I have had such a poor opinion of humanity in general, that I like to think there are people somewhere in the universe whom I can regard as superior beings."

SCIENTISTS WILL WIN THE NEXT WAR

NIKOLA TESLA, electrical scientist, says not armies alone but whole populations will be destroyed by use of wireless currents—His own air torpedo deadly

NIKOLA TESLA

IN THE science which man has spun out of his brain he has created a monstrous Frankenstein, which is now rending him limb from limb on the battle fields of Europe. But one of the fatal qualities of science is that it always progresses. What part will it play in the next world war? With inventive intellect by then allowed free rein, compared to the Stone Age implements of today, will be as the 47-centimeter gun is to the two-handed sword of the Roman legions? Yes, early in the present war it based on chemistry; but future warfare will wield the enormously more gigantic power of destruction provided by electricity, according to a writer in the St. Louis Post-Dispatch.

There will not be a question of the annihilation of armies; it will be one of the extermination of whole populations. It will not be a matter of demolishing cities and fortresses, but of wiping whole nations at one stroke from the face of the earth. The scientists, in fact, offer us one ultimate alternative: Either man must conquer his baleful instincts and cease from war, or else in the end the human race will perish in a universal act of suicide such as Schopenhauer foretold—self-slain by the unspeakable agencies of destruction with which science will inevitably arm us.

For five years, gunpowder and its derivatives have ruled the destinies of mankind. A flash from the pestle on the scientist-monk Roger Bacon, blew feudalism off the globe, and made possible the coming of democracy. Gunpowder gave to the European races sway over the whole world; it subjected to them America, Asia and Africa. Little did Bacon dream of these consequences from his experiment with saltpeter and sulphur. Perhaps as little do we today realize the possibilities of the wireless current which in an instant bears the spoken word from Arlington to Honolulu.

In the immediate future, the greatest to the world today there is a vision of a machine with a key by means of which a wave of electricity will be flashed through the air to explode the enemy's bombs, torpedoes, cartridges and magazines. The man who first perfects this device will go down in history—if any historians are left to write it—as a greater man than Roger Bacon, for his invention will make feudalism and bloric acid obsolete, and will send rifles, cannon and dreadnaughts to the junk heap.

Only one scientist so far makes a claim to have advanced some steps toward the perfect electric man-killer. But that man is no other than Nikola Tesla, electrical wizard, who has just been awarded a part of this year's Nobis prize for physics. In an interview the other day he laid down these prophecies:

1. This is the last war in which the explosive power of chemicals will decide the issue

2. In the next war electricity will be the force of organized slaughter.

The confidence with which Tesla speaks of his invention, which he says he has just completed, but the details of which he is for the present jealously guarding, for fear they might be worked out by one of the belligerents in the present war, is shown in his statement:

"It is, of course, possible," he said to a representative of the Post-Dispatch Sunday Magazine a few days ago, "to produce electrical effects at a distance by means of wireless energy. There is insurmountable difficulty thus far has been to aim an electric wave in one direction only, with all of its force concentrated at a given point.

"I will go so far as to say that after twenty years of application to the problem of transmitting energy by wireless, I have just made a valuable advance in this direction. The stage has been reached where to an extent it is practicable to use this force in war, and to predict such a development as will make electricity supplant cannon in battle.

"It is impossible to give details at this time, but in a general way my invention can be used in three methods.

"In the first place, it will be possible to send an explosive body through the air—an aerial torpedo flying many times faster than an aeroplane—and to direct this projectile to the spot desired, where it can be exploded by wireless. It will be possible to guide the projectile by wireless after it has passed beyond the range of the eye, and the aim is so accurate that it is possible to reduce the error to a few feet in a thousand miles.

In the second place, it is possible to provide with this apparatus to produce effects at a distance which will interfere with the enemy and tend to make him ineffective.

"In the third place, it promises to be able to produce at a distance such effects of destructive tension as will jeopardize life and property.

The inventor declined to go into specific details, saying that it is safer to be specific after the fact. But one would gather from the words he did speak that he has contrived a torpedo of the air flying under its own power as a torpedo swims in the water, which can be directed by wireless and exploded by the same force. Such a projectile would have a range not of some twenty miles, like the highest power cannon, but one limited only by its own flying endurance. It would be harder to hit with shell and rifle fire than an aeroplane, because of its smaller size and swifter velocity, and it would not be manned by a crew who would be exposed to death at every instant.

Such a missile, aimed according to the mathematical formulae used today by gunners whose target is beyond the range of eye and telescope, could be dispatched for the destruction of a battleship long before her own guns would be able to come into play. Safe from the shell of the greatest ordnance, it could start from a point miles beyond their range and destroy the batteries without the possibility of their fire.

The second and third methods of which Tesla speaks are phrased in rather cryptic terms, but leave the inference that he believes himself already able, in some degree, to produce at a distance by wireless an electric shock similar to that received by touching a charged wire. Or, he can think of no other way in which effects perilous to life and property could be obtained with electricity.

With this idea worked out to its ultimate perfection, one might foretell such appalling events in warfare as this. An entire army in its trenches, is without warning seized with the death agonies of a stretch in the electrical chair, and is exterminated to the last man by a silent agency, as by bullets of a given moment, every living thing in a great city is struck dead as if by lightning, by means of a current transmitted

DOINGS OF THE VAN LOONS

There is one person at least that Mother won't neglect

THE OLD RELIABLE

ROYAL BAKING POWDER

Absolutely Pure

MADE FROM CREAM OF TARTAR

Notice!

Burnett Insurance and Real Estate Agency business heretofore conducted by the late Mr. A. T. Burnett will be continued under the management of Mr. E. A. Burnett. Thanks for past favors, and a continuance solicited.

E. A. Burnett.

School Commissioner's Column

May L. Stewart, Commissioner.

Picnicing everywhere. A restful vacation to all.

Pleasant Valley boys a new drinking fountain.

The Walker school is going to get there. Plans are under way and motion carried to make their school a model school. "The Standard Plate" will follow as an after thought.

Miss Muriel Kerry will teach in Pleasant Valley next year.

Miles school closed with a picnic, May 28th.

Teachers having students not absent or tardy for the last three months should mail their names in at once to the commissioner or to Mr. Dwight Wilson, Secretary of the Fair, East Jordan, Mich.

Miss Ethel Crowell has been engaged to teach in Afton next year.

Mr. Frank Osborne will be principal in west side school of East Jordan.

The Tainter school closed May 19th with a picnic dinner and evening program. There is no doubt but that everyone had a good time, but the commissioner regrets the invitation arrived too late for even an aeroplane to make the grade.

Miss Marcia Gow of the County Normal class has been secured to teach the Star school the coming year.

Mr. Earnest Howe will return to Heart Lake.

Rock Elm closed Tuesday, May 23 with a program and neighborhood gathering. The social center idea is grown a rapidly here.

The new office stationery is headed with the motto "For our Boys and Girls, the Future of Tomorrow."

The Slaughter school picnic was May 26th. Another good time goes by and a treat that couldn't keep.

The Mountain school has also added two indoor chemical sanitary toilets.

Advance school picnic May 26. Say, you ought to have seen that travelers' race. As a token of appreciation of her years work the district presented Miss Hensey with a beautiful gold ring set with amethysts and pearls.

Reports of Mr. Coffey's visits sent out by the state to the schools contain a duplicate of each report retained in the commissioner's office.

Boyne Falls village school plans on correcting its heating system and adding new windows as soon as school closes. Tenth grade commencement exercises this week. Mr. Tate of Ypsilanti will be superintendent next year.

The county normal class day exercises follow the vocational idea and are representative of normal work. We are glad to greet Miss Becker as the county normal commencement speaker. Miss Becker met a number of our citizens in her capacity as a state standard school worker last fall.

Still plodding away on the eighth grade papers. There's loads of work behind the scenes.

We are all sorry to lose Miss Himes from our county. She has been an active rural school worker and will continue in school work elsewhere. But we all believe in pulling out to the mighty deep and Miss Himes will be a Chicago University student next year.

Census must be completed May 31st. Is yours finished?

HOUSE FOR SALE—A modern seven room house on South Bridge St., heating plant, bath and garage. Mrs. W. H. Graham. Telephone 197. 6-1-tf

S. Orlowski & Son's last Saturday Cash Special Prices are good next Saturday. Look these over. It means a great saving to you.

Citizens Find Viking Relics.

An interesting find of Viking relics of the ninth century was recently discovered at Vallow, in the island of Lewis, by schoolchildren. The find consisted of a pair of large oval brooches of a noted Scandinavian type, a small penannular brooch, a disc-shaped ornament with a central boss and a decoration of interlaced loops, a small bottle, part of a bronze chain, probably used to fasten the large oval brooches, and a single big amber bead.—London Globe.

No Escape.

A Long Island girl proposed to a baker and he accepted her. Then she discovered that he already had a wife, so she caused his arrest. Some get criminal records thrust upon 'em.—Detroit Free Press.

Hold Fast to Friendship.

It is not right to estrange in a moment a friend whom it takes a lifetime to secure.

Equal Suffrage Notes

Lansing, M. Hinds, Pulaski, Gladwin Co. woman's county Equal Suffrage Association.

The "solid South" is breaking away from tradition on the suffrage question. Tennessee republican convention adopted a suffrage plank by a vote of 2 to 1 in favor.

Women are the heaviest taxpayers. It is they who do the family marketing and the beef trust, the oil trust, the coal trust and the ice trust, tax women all the time."—Mrs. Emmy Evald in Woman's Journal.

Professor Hugo Munsterberg says: "Men of affairs select women as secretaries because women are more loyal. They serve their employer's business with more devotion than a man's egotism will permit him to display."

"A housecleaning is needed in politics and it is the hand that has held the broom for generation that best knows how to do it. In Illinois the women closed 1,000 saloons at the first election after they got the ballot and last month they closed 200 more."—Mrs. Emmy Evald in Woman's Journal.

Only about one man in ten voted at the presidential primaries in Vermont. No one argues that because nine-tenths of the men did not vote that therefore the others should not. Yet some claim that until all the women ask for the ballot it should not be granted to any of them. Does this sound logical?

It is expected that 40,000 women will be in the great suffrage parade in Chicago, June 7th. The republican party may not need any persuasion to put a suffrage plank in its national platform but if it does need convincing each woman in the long line of march will count more than many petitions.

"The decision of national issues will be, after the war, in the hands of women as well as men," says Principal Gilbert Slater, of Oxford University. "The survival of the nation depends on the utilization of the energies of women together with the strength of men. Women will count more and more."

The Chicago Herald says: "Chicago has learned to treat the political woman with respect. When suffrage came probably only a minority of men approved it. But three years of experience have convinced this city. Today nobody opposes woman suffrage who hasn't some sound reason for fearing the decency of the woman vote."

Women can keep a secret! The Minneapolis Journal says: "As a matter of fact, women are the real receivers of confidence. The secrets are all in their keeping. The proof is not in what they keep, but in the surprisingly few things, out of all they know, that they disclose. Where one man is discreet, modest or ruined by a women's tongue, a hundred one to woman's reticence their welfare."

In Georgia the earnings of the wife belong to the husband and he has the right also to will the children away from the mother. He may require them to work in a factory, if they are over twelve years of age, and their earnings belong to him. Only the father has the right to sue for the injury or death of a child. In other words the wife and child are the property of the man in the state of Georgia in which boasts of its southern chivalry.

In Arizona, where women vote, public drinking fountains, rest rooms and comfort stations have been established thru the efforts of the women in every city and town of the state. In Pinnacle, N. Y., where woman suffrage was defeated last fall, the women have worked for years to secure simple civic improvements. Seven years they worked to get the town's waste paper cared for. Fifteen years they have urged without success that covered garbage carts be used and the women offered to pay for the carts.

Panama's Ready Rise.

Panama is rising three feet in each century.

WILL MY CHILD TAKE DR. KING'S NEW DISCOVERY?

The best answer is Dr. King's New Discovery itself. Its a pleasant sweet syrup, easy to take. It contains the medicines which years of experience have proven best for coughs and colds. Those who have used Dr. King's New Discovery longest are its best friends. Besides every bottle is guaranteed. If you don't get satisfaction you get your money back. Buy a bottle, use as directed. Keep what is left for Coughs and Cold insurance.

Announcement.

I hereby announce myself as a candidate for the office of county clerk, on the republican ticket, subject to the ratification of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. Graff.

Annouacement.

To the Electors of Charlevoix County:

I have decided to be a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and I respectfully solicit your support.

M. A. McDonald,
Eveline Township.

SEE WHAT DRINK DOES

Who Makes Paupers? If the Saloon Is Not Guilty Who Is?

County poor houses of Michigan now known as infirmaries, furnish universal evidence that liquor is responsible for more than half of poverty.

Statistical tabulations showing the effect of the license and no-license systems in individual counties of Michigan are of little value as evidence. Many inmates of infirmaries are permanent occupants, whose entry or exit bears no direct relation to social conditions. A lapse of years, possibly of a whole generation, would be necessary to produce any radical change in pauperism as a class following the abolition of saloons.

Two facts stand out: One is that the authorities and citizens in dry counties are unanimous in their opinion that from the standpoint of the county poor the regime is far superior. The other fact is that many counties report the existence for about three-fourths of the poverty which requires county aid to individual or family, to date to the use of alcoholic beverages.

Official statements written by superintendents of the poor include the following:

"This county is in the dry column, and we find that while the cost of everything is much higher, the expenditures are not called upon to furnish as more money now than they did when the county was wet."—C. C. Hallenbeck, Huron County.

"We are pleased to inform you that there are so few cases in this county which are receiving relief that have been caused by alcoholic beverages, we have a clear slate, are now dry and expect to remain so."—O. O. Prick, Oceoda County.

"Midland County has been dry eight years and people like it. Two old timers in all we have left in the county house whose condition is due to drink".—K. McKay, Midland County.

Confidential statements to the same effect, are as follows: Drink is the almost universal cause of poverty while for temporary assistance it is probably the main factor in at least one half the cases. In my best judgement about 50 per cent of poverty in this county can be attributed to the use of drink if not more. In fact, nearly all the cries we have can be laid to the same cause.

"I am quite sure that three-fourths at least are caused by the liquor traffic".

Following are a few more definite statements:

Alger County: "About 75 per cent."

Genesee County: "About 70 per cent from liquor directly or indirectly."

Huron County: "Most of the inmates of the county farm here have come to the institution because of intemperance and the use of liquor."

Mason County: "At least 60 directly and 20 per cent indirectly, or 80 per cent of all paupers in our county is caused by alcoholic drink."

Iron County: "Ten years ago poor commissioners leads me to say that fully 95 per cent of male inmates at our county farm have come here either directly or indirectly because of liquor."

Kent County: "Of 500 families assisted during the year ending March 1, 1916, 35, nor was the direct cause of poverty in twenty five families and an indirect cause in fifty-three families. Of 103 persons in Kent County Detention Hospital last year, at least one half were caused by intemperance. In Kent County Home were 184 persons, of whom 85 per cent can easily be traced to intemperance as a direct cause."—L. De Puyter.

"To the best of my judgment, I would say that 80 per cent of the poverty is caused by alcoholism. It would be a number of years after the passage before we could get the full benefit of state wide prohibition. The effects of the past years would stay with us until the rising generation took its place."—V. H. Billings, Montmorency County.

"Four or the six men in our poor house were forced to come here on account of drink".

Oakland County: "70 per cent or more of the cases here are due to drink. We are going through the second dry time and we find it helps very much. I hope for state wide prohibition."

Tom May Works for the Drys

Tom May of Detroit, noted in may states as the leading cartoonist of Michigan, has been added to the staff of the Michigan Dry Campaign committee. Although his services were sought by the liquor dealers, Mr. May declined their overtures and at financial sacrifice, accepted a proposal made to him by the dry workers.

The cartoon is one of the greatest campaign features of the day, every modern newspaper uses it in some form. It carries an appeal to the average reader which often strikes home more quickly and deeper than columns of argument. Newspaper publishers are glad to use cartoons when they decline to accept special plans put in other forms.

There is no doubt that the Tom May cartoons which will begin running soon after May 1st, will become one of the striking features of the campaign.

Worth Taking a Chance.

"Going to Smith's wedding" asked his friend. "Not I," returned the other. "He cut me out with that girl." "Well, you may get a chance to hit him in the jaw with an old shoe!"

Beetle Used as Food.

A beetle found extensively on the high plains of Mexico roasted like chestnut, is eaten by the natives of that country.

Notice to Dog Owners

NEAR DEATH AT BAPTISM

Preacher and One He Was About to Immerse Ventured Too Far.

Redlands, Cal.—The waters of the Santa Ana River came near claiming two victims now here lately, when eight converts of the Mentone mission on Herald street were baptized in the icy waters.

Rev. Francisco Lorenzo, the minister of the church, and one of the converts ventured out too far in the swift stream and the current threw them off their feet.

While the terrified members of the little church looked on they battled desperately for their lives and finally succeeded in reaching the bank. The minister proceeded with the service and baptized the remaining converts, although it was done nearer the shore.

HE DIDN'T BELIEVE THE SIGN

Burglar Got $50 From Box That Bore Notice It Contained No Money.

Fresno, Cal.—"This safe is not locked and does not contain any money. Please do not blow it up."

This sign greeted a burglar last night in a store at Parlier. He opened the safe door, however, and found $50. Then he went across the street and broke into the store conducted by E. J. Moncrief. He found a strong and substantial strong box. It was locked. The burglar carried the strong box to a vacant lot, pried it open and found some unsigned checks and a copper cent.

Looking Ahead.

"I don't see how in the world Edith can marry that old Mr. Rockaby."

"I do. It's the only possible way she can become his widow."

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Ernest Ravenscroft and Hattie Ravenscroft, husband and wife, of Nicholls, Antrim County, Michigan, to Frank Hodges, of Charlevoix, Michigan, dated the 3rd day of April, A. D. 1911, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan on August 17th, 1911 in Liber Forty-Seven of Mortgages on page 1 of Charlevoix County Records, which said mortgage has been claimed to be due at the date of this notice, for the sum of Two Thousand Five Hundred and Ninty Dollars and Sixty-Three Cents ($2,590.63) principal and the sum of Fifty-Three Dollars and Fifty-Two Cents unpaid taxes and interest on same on the date hereof, and no suit or proceeding at law or in equity has been instituted to recover said mortgage debt, or any part thereof or for any money paid for taxes secured on said described property.

Now, therefore, by virtue of the power of sale contained in said mortgage and the statute in such cases made and provided, notice is hereby given that on the First day of August, A. D. 1916, at ten o'clock in the forenoon, the undersigned, will sell at public auction, to the highest bidder, at the place where the Circuit Court is held, sell at public auction, to the highest bidder, the premises described in said mortgage or so much thereof as may be necessary to satisfy the amount due on said mortgage and for taxes if any, with interest as in said mortgage and the costs and expenses of sale, which said premises are in said mortgage described as follows: Lots one (1) and two (2) and three (3) and the southeast quarter of section three (3) township thirty-four North of Range Seven (7) West, containing one hundred and twenty (120) acres according to the Government Survey of the Pere Marquette Railway Co. across said premises.

Dated, Charlevoix, Michigan, June 1st, 1916.

Nicholls, Buttars and Bridge, Attorneys, Business Address: Charlevoix, Michigan.

CHARLEVOIX SENTINEL.

VOLUME 47 — Charlevoix, Michigan, Thursday, June 8, 1916. — NUMBER 8

Thrift Campaign 1916.

This movement has been planned in every community in our nation. You will see it advertised in the newspapers; the schools; the factory, store and office; the moving picture houses and elsewhere. The plan adjusts itself automatically to large and small cities, counties and agricultural communities.

Many people do not always figure on how much they can save but more often figure for it in advance; how they can spend their income. The active season in our city is rapidly approaching and the money making time is coming. We desire to regenerate a great number of New Savings Accounts and see the regeneration of countless numbers already opened.

You are urged to participate. If you have not been Saving with any degree of regularity, start in now. $1.00 will open an account in our Savings Department and you can add to it weekly or as often as convenient.

4% Interest paid on all Savings Deposits.

THE CHARLEVOIX STATE SAVINGS BANK

J. L. CRANE, President. W. J. BACHOW, Cashier.
H. S. HARSHA, Vice President.
ARCHIE LIVINGSTON, Assistant Cashier.

"They Certainly Don't Look Like Dollar Waists."

ON SALE TODAY

Nor are they Dollar Waists as this expression is ordinarily understood, but Waists which we alone in this city can sell for just $1.00.

They Are The WIRTHMOR

This in itself is the highest recommendation as to correctness of style; as to the fineness of fabric; as to the daintiness and prettiness of trimming; of excellence of workmanship and perfection of fit; in fact all that goes to make a Waist desirable.

If everyone knew how good they were, everyone would buy them when wanting inexpensive Waists

The models illustrated will go on sale today. Better come in early if you do not want to court disappointment.

Sold here Exclusively

THE NATIONAL CONVENTION

GREAT PARTY GATHERING IN CHICAGO BEGINS ITS GRIND TO-DAY

As we write these lines (Wednesday evening) the national republican convention is in the preliminary throes of organization.

Probably before this paper goes to press again the man who will lead the republican hosts in the forthcoming campaign will be named. This will be a few scattering "favorite sons" in the field for trading purposes.

We firmly believe that the American people are just now giving much earnest thought to principles and policies for which Theodore Roosevelt stands, and a stampede of the convention to the Colonel would not be surprising.

Pitiless Publicity.

A soft answer turneth away wrath. But harsh words stir up bumptious.—St. Louis Globe-Democrat.

NEW LIGHT AND POWER SOURCE

ROCK PRODUCT ELECTRIC PLANT NOW SUPPLYING CITY WITH CURRENT

Last Sunday noon the line work and connections were completed at the Rock Product Co. plant, and at three o'clock the machinery was started and the current was pouring through the brick house on the beach into the city lighting and power system.

A careful and unprejudiced observation of this fields demonstrates that superiority over those under the Bellaire system. The light is much stronger and steadier. The transmission line of one and one-half miles is so perfectly constructed and insulated that escape is reduced to a minimum. An important feature of the new system is future immunity from interruptions caused by storms. On the Bellaire line deficient insulation often caused short circuits. With the latest improved insulators and a strong system of lightning arresters interruption is stingetor all.

The motive power of the plant consists of a 550 horse-power cross compound Corliss engine, supplied by ample boiler capacity, and a 400 horse-power, 300 kilowatt generator. Experts state that the present summer "load" could be safely increased 100 percent.

As to the financial phase of the question, all is silence at this writing. There is nothing permanently binding in the Rock Product contract. In thy Bellaire case, a compromise is possible, but not probable. The city is willing to arbitrate, but it will not stand the increased rate demanded. Mr. Rieblandi's case is in the hands of Attorney Bailey, of Bellaire, and Attorney Hanson, of Petoskey. The case of the city is in the hands of City Attorney Shanahan, and Dallas Boudeman, of Kalamazoo.

IN ON THE GROUND FLOOR

ALVA L. COULTER WILL NOT BE COMPELLED TO HUNT FOR A CONVENTION TICKET

We know Alva Coulter went to Chicago, and we have registered hot on the trail of the big Michigan bunch after a convention ticket—a thing very hard to get at this distance.

But ambition is "made of sterner stuff" than this, and instead of a session ticket Coulter landed the appointment as an assistant sergeant at arms, and he is on the ground floor with authority to shoot at or imprison a too boisterous delegate from the blue grass region of old Kaintuck.

MARINE RAILWAY

GROWING NEED FOR INCREASED SHIP YARD FACILITIES IN CHARLEVOIX HARBOR

It is a well known fact that from Alpena, around the tip of the state, and the entire east shore of Lake Michigan, there are no facilities for hauling out or docking any vessel larger than a fish tug.

Manistee had "boxes," but they were unsatisfactory, and are out of commission. Everything on this shore or at the islands is compelled to go to Sturgeon Bay or Milwaukee for the docking of anything over 60 tons registry.

This condition of things give rise to the query: What is the matter with Charlevoix? With our magnificent harbor, our unexcelled location closely adjacent to straits, bays and islands, Charlevoix is the ideal location for a marine railway. The nearest facility of this kind is at the Soo.

Something will be done somewhere on this shore sometime. With everything in our favor we will wait, like Micawber for something to turn up, or start something doing. We can think of no industry to which Charlevoix is so well adapted as shipyard work. Secondarily, but perhaps of equal importance, is the machine and foundry work that is necessarily an adjunct.

The SENTINEL has often called attention to this matter, and we are of the opinion that it should not be lost sight of in our efforts for a greater Charlevoix.

JUST A WORD, PLEASE

The time for the city authorities to set to the matter of automobile speeding is now! The ordinance should be enforced or repealed.

There is not a day in the week that the ordinance is not flagrantly violated on all streets, especially Antrim.

When an accident occurs we shall wake up. Within the past week we have personally seen cars running on city streets at a speed of not less than 35 miles per hour.

It means danger!

"THE AUCTION BLOCK"

What Newspaper Reviewers Say of Our New Serial Story By Rex Beach.

"The Auction Block," by Rex Beach, stands out by the virtue of the humor which he finds in the wicked metropolis. It is a story that is especially American and especially worth while.—Cincinnati Enquirer.

In its healthy optimism, which includes the ability to squeeze a joke out of many a tight corner, "The Auction Block" is especially American.—Minneapolis Journal.

Those who have had personal experience in the society of which the author speaks, admit that he comes very close to hitting the nail on the head. The readers, to whom the whole thing is merely fiction, are entertained by the well-known Rex Beach style of telling things.—Burlington (Ia.) Hawkeye.

SAILOR DROWNS OFF CHARLEVOIX

WALKS OVERBOARD DURING STORM

LIGHTENING BLINDS HIM FOR A SHORT WHILE AND COSTS HIM HIS LIFE—WAS WATCH ON SCHOONER MINERVA

During a fierce storm when the schooner Minerva was about fifteen miles northwest of Charlevoix the crew went up "Man overboard."

It was about 3:30 in the morning when Captain John Leonard while below, having just turned in after being on watch all day was notified, and with all hands a boat was lowered.

The mate was on watch at the time and Fred Hanson, one of the crew, went forward to inspect the pumps, and in the blinding flashes of lightning walked overboard amidship.

The drowning man cried out to those aboard and life buoys and lines were thrown over as was also some lumber with which she was loaded. The men in the life boat searched the boiling waters of the lake for about three-quarters of an hour but no trace of the man could be found. He had on his oilers and rubber boots which must have soon carried him to the bottom.

The captain of the Minerva ran to Petoskey Tuesday to make his report and wired Thomas Hanson of Chicago the drowning news. The schooner Minerva was bound from Neenah, Wis., to Buffalo with lumber. Captain Leonard says that Hanson was unmarried.

THE CITY PARK

A BEAUTY SPOT IN HEART OF CITY THAT IS A SOURCE OF PRIDE TO OUR PEOPLE

About thirty years ago the village of Charlevoix bought of Amos Foy the entire tract of Macatawa Park along the beach south of the river for a half-mile. It was in a primeval state of nature, let the same now, except that nature has been aided in its work of growth and embellishment. Its topography has never been disturbed or changed.

The village paid $900 for the property, on the stipulation that it should be used as a park only. Strange as it may seem, there were those who voted against the bending proposition, on the ground that it was a waste of public money.

To-day there cannot be found a person who will not acknowledge that it was the wisest expenditure the village or city ever made. Looking at it from a mercenary point of view, if it were possible to cut it up and sell it for resort purposes, it would yield the city $50,000.

A landscape engineer could not devise a public park that would embrace a greater combination of attractive features than the Charlevoix park possesses. Its magnificent stretch of Lake Michigan beach; its beautiful trees and clustering shrubbery; its shaded paths along the bluffside and through the deep valley, all combine to make it ideal in attractiveness.

Without question, it is the finest public park in Northern Michigan, and becomes more beautiful as the years pass.

Daily Thought.

If men from their youth were wearied of that saunntering humor, whereto none, out of custom, but a good part of their life run listlessly away, they would find time enough to acquire skill and dexterity in handcrafts of things.—Locke.

DOES SLOAN'S LINIMENT HELP RHEUMATISM?

Ask the man who uses it, he knows. "To thank I suffered all these years, when one 25 cent bottle of Sloan's Liniment cured me," writes one grateful user. If you have Rheumatism or suffer from Neuralgia, Backache, Soreness and Stiffness, don't put off getting a bottle of Sloan's. It will give you such welcome relief. It warms and soothes the sore, stiff painful places and you feel so much better. Buy it at any Drug Store, only 25 cents.

GLEANERS AND MERCHANTS

DINE TOGETHER AT IRONTON THURSDAY EVENING EN JOYABLE TALKFEST

Growing out of recent events in local history, in which some friction developed between the city of Charlevoix and the Gleaners of contiguous territory, the Gleaners of Ironton and vicinity invited the Charlevoix Commercial Association to meet them Thursday evening, and talk over matters concerning which there has been mutual misunderstanding.

Private automobiles were brought in to requisition, and about twenty business men went to the Ironton school house. The dinner was a pronounced success, and the exchange of views resulted in a harmony of understanding that cannot fail to result in mutual good.

This paper has, from time to time, pointed out the fact that the Gleaner organization condemn any semblance of the boycott in the commercial relations existing between farmer and merchant; on the contrary it advocates co-operation, to the end that local market facilities may be improved and local trade relations bettered.

Mr. Magnet, the Gleaner organizer, in his talk at Ironton, elaborated these facts lucidly, and left with the merchants the assurance that they had nothing to fear from the Gleaners. There were talks by several merchants, which were equally assuring, and the meeting closed with perfect understanding and cordial good feeling.

THE ROCK PRODUCT CO.

LOCAL INDUSTRY APPROACHING SAFE FINANCIAL CONDITION—PLANT TO BE COMPLETED

The affairs of the Charlevoix Rock Product Co. have so long been, like Mahomet's coffin, "between heaven and earth," that the public mind has become skeptical concerning the progress of that concern toward ultimate financial stability.

But these facts have been manifest: The inexhaustible raw material supply was there, and the means of transforming it into merchantable products, so far as installed, were modern and well operated. But there came a time when increased facilities for successful operation became necessary. An unfortunate condition growing out of certain stock-jobbing operations followed, which caused embarrassment to the legitimate and conscientious promoters to the end that it was thrown into the U. S. Court.

After a season of storm-stress the corporation, by the court's action, came into the present Butters-Bridge receivership, and last week the court authorized the issue of enough receivers' certificates to complete the plant and put it into full operation. When it is known that these certificates are preferred over all other obligations the situation is made clear.

Mr. Buttars returned from Detroit and Grand Rapids Saturday, after having liquidated unpaid accounts that were checking operations. The coal yards, which have been on the ground for some time, will be installed at once, and active operations commenced.

RE-ORGANIZE PERE MARQUETTE

LET MICHIGAN MEN HAVE CONTROL OF ROAD

WOULD TRY AND OPERATE EN TIRE SYSTEM FOR BEST INTERESTS OF TERRITORY THRU WHICH IT PASSES

Plans for a complete re-organization of the Pere Marquette railroad, including the issuance of new stock and bonds for the purpose of exchanging the new securities with all present security holders, to the complete control of the road in the hands of voting trustees composed of Michigan men or men friendly to the interests of Michigan and a definite proposal to maintain the system without dismembering it into small branch lines, was presented to the state railroad commission last Thursday.

Paul H. King, operating receiver of the Pere Marquette, and the general counsel, Seward L. Merriam, represented the railroad. Benjamin S. Hatchett, of Grand Rapids, appeared as the Michigan representative of a committee composed of Frederick Strauss and Beekman Winthrop, of New York City, and Eugene V. R. Thayer, of Boston. The last named committee was recently appointed by the board and security holders to perfect some plan for re-organization. Edmund C. Shields, of Lansing, appeared as counsel for the committee.

Robbing Your Own Pay Envelope

—The password and key to lasting success lie in two little words, "work and save." Many learn the password "work," but those who use the through ticket of "save" are few and far between.

—"I've earned it, and I am going to spend it as I please," say so many young men and women, blindly and thoughtlessly.

—When the pinch of want comes the lesson of thrift comes too late. Once down and the world forgets the man who wasted his opportunities and neglected to save against a rainy day.

—Young man—young woman, are you robbing your pay envelope for pleasure and amusement which in later years will deprive you of the comforts and necessities of life?

—Take $1.00 from your pay envelope this week and open a savings account with this strong bank. Then plan to lay aside a certain percentage of your income every payday thereafter.

CHAPTER XXIX—Continued.

—6—

"You would have followed me across the world upon your knees, and you never use this a word. And I—I repaid you with a white man's coin! I left you to break your pride and your heart! Ah, Sandry, I am worse than it! But she Winds of God blow upon my conscience and my heart and I returned. Your face and your faithful eyes, waiting, waiting, brought me back from the far cities—only to see you die in the lodge of Kokwanis with my babe on your breast! Or—you say I but dreamed, Kokwanis?"

With falling spirit the speaker tried to pierce the mystery, gazing at Sliets. "I had dream of death and retribution—and of Kokwanis, who—bent above the babe to put that sign upon her face? I struck his hand away when it had set but a fraction of this fatal bar—the sign that said you were wild, that forbade you to the stallion cities, that made you a white man's toy! You—you—Kokwanis—ah, I have forgot. What is it I would remember?"

The eagerness left the Preacher's eyes, they became suddenly calm and mild.

With a cry that cut high above the steady sounds of the wind and the free Sliets sprang to his side to bear her lips, where the sign of the Sliets stood out—broken in its fearful—

"My father!" she cried pitifully, "oh, my father!"

Sandry was breathing heavily, a mist in his eyes and a sadness upon his heart. His victory over Hampden had lost its savor.

But the past with its pitiful shadows "had drifted away from the Preacher forever and the look of gentle tenderness had returned.

"My daughter," he said softly, "why do you weep? Ah—the night closes down and it is dark. I have lost my way. What is the path?"

Joy surged groped blindly for the flute.

"What is the way out of the labyrinth of youth—and sin—and primrose? Ah, I have forgot."

With a sudden inspiration Sandry stopped and picked up the instrument. He had played a bit at college, Biffy, silversly, the joyous notes began, "Je-sus, Lover of My Soul," to go on to that ancient plea of trusting faith. "Other refuge have I none. Hangs my helpless soul on thee," a strange voice of glory amid the death and danger, the sin and stress of the moment.

A holy peace spread on the white features.

"Why, certainly!" whispered the traveler of the hills, "how could I forget? That is the way out!"

And then, "Hush! The murmur of many wings. Ah! It is God's hand! I go—de profundis! Gloria in excelsis!"

With that last whispered word the wandering player of hymns, the preacher to the lost, the backslider and the lover of humanity fumbled stiffly at his habit's waist. Sandry watched his pocket fell therein and brought out a small bible of a long-past day. Its edges were thin and frayed and greatly worn. Its still back with the age-black, raised lettering had long since lost its corners. He knew it instantly for the counterpart of that which Sliets stood in the little south room. It and many openings of its form, and it fell apart, first at the psalms and then at a passage whose beginning caught his eye as he gazed. It in the loving hands that made to grasp its familiar bulk—and he read. The sheet of words whose solemn forecast had scarcely him once wiped or sought for some close to the Preacher. Identity now seemed to ring in his ears, a very strange, resolute for the nameless high souled, drifter from the wavesofman who had went to blame—Lo! He is faithful statement for a shadowy wrong.

Who shall answer into the hill of the Lord? Or who shall stand in his holy place? He that hath clean hands and a pure heart; who hath not lifted up his soul unto vanity, nor sworn deceitfully.

The Preacher was of that past which he had so long forgotten and which Destiny had decreed should flash back to him for one revealing moment.

CHAPTER XXX.

"The Night Wind Is Not Afraid to Die."

Sandry laid the Bible under the fire-place, looked about desperately for something to cover the glorified face between its white cotts, and finding nothing but the tall form gathered an armful which he spread over the body.

Then he faced Hampden in deadly quiet.

"I had meant prince," he said, "now I mean the eleventh—death."

The other laughed.

"Mean an be damned!" he said in solemnly, "you'll never send me there."

His burning eyes were covering the chimp of form that held his son, but Sandry went over and picked it up.

He stood a moment considering. A hot, wild impulse whipping up the dips on every side and Black Bolt was slipping uneasily, pointing anxious ears this way and that. Coonsah had crawled to where Sliets knelt, weeping, with her hands over her face.

He crouched low to the ground and laid his heavy mantle against her boot, whining dolorously.

Suddenly, in the momentary silence, Poppy Ordway spoke. Her face was flushed like an April dawn. Chance and the courage of the last throw lent it the last touch of ravishing charm.

"Rissa!" she said, "I am the only one who wins in this game! Hampden, you're right. I've bought you with your own coin. And let me tell you Hampden, that you were disgustingly easy."

The timberman winced at the bruising words.

His florid face darkened with rage.

"Ah, yes! So you won his love with your pretty detective work! You'll marry him an' settle down."

There was the crucial moment presented to Poppy Ordway all suddenly, and she recognized it instantly. It sent a chill to her daring heart, then fired it with that love of chance, that ability to cast great stakes on a single throw, which in a better nature would have made her great.

She felt with a flash of her genius the drama of the situation, the tense readiness of the moment for wild fantastic things, and accepted it at once.

"Yes!" she cried, "yes! I offer Sandry you—and myself!"

With a beautiful gesture she stepped toward Sandry and held out both hands, her golden head up, her slumbrous blue eyes sensuous and black with excitement, her whole attitude a lure—with the almighty power of love in her face.

Spread Arms Over the Body.

quisite body a lure with the mightly abandon of her passion and her rock like will.

"Waiter," she said tremulously, "I have said there is no law for a woman I say it again. I can save your life—and I give you myself! Stand with it, because I love you! Oh, you can never know how I love you!"

Her golden voice rose with the force of the emotion that shook her, broke and failed, and she stood pantingly.

"Will you not take my hands, Waiter?" she almost wailed. "I have done it all for love of you!"

Sandry, his eyes upon her face, as if in fascination, did not move. It was as if a could not, though every fiber in his jaded body answered to her call.

"For love!" breathed Poppy Ordway, "for great love!"

Across her words there cut a shrill "She lies!"

Sliets had sprung to her feet, both hands feeling wildly in her empty bosom.

Miss Ordway swung heavily toward her.

"Hush!" she said warningly.

She slipped a hand inside her own gown and showed a corner of the soiled packet of proofs that Sliets had guarded for so many days, the packet that she knew instinctively meant harm to Sandry, that must never go out!

It was then that Sandry was to behold the iron in this creature of softness of faithfulness and of service. With a cry that chilled his blood in its savage wildness, the girl leaped across the silent form in the shabby habit, tore Sandry's gun from his hand and fired twice before he could seize her and wrest the weapon from her. Both shots went wild.

"What would you do?" he cried aghast.

Sliets fought for the gun like a wild thing. Then, as he held it high above her reach, she fell on her knees, clasped his limbs, her face upturned and transfigured with the lust for blood.

"Kill them!" she panted desperately. "kill them both! Hound the Preacher and she would ruin you. Shoot them, Sandry, shoot them—or give me the gun!"

Shuddering, Sandry covered her savage eyes with his hand. Their reversion sickened him. But she shook him loose, crying for death.

"Kill them both, for they will ruin you if they go free! She's got the packet. Kill her and get the packet!"

"What's this?" he cried fiercely.

"Things she has written about you—letter to a man by the name of Musseldore!"

Slowly Sandry's face went white beneath its grime as he raised his eyes and looked at Poppy Ordway. She returned his gaze.

Then—"True," she said. "That's why I went east. I cannot lose you, Walter. There was danger from that old creature there. Though you did not know it, and I was determined to make sure. Fair game or foul—I must win. And there's no law for a woman. I know and you know that you love me."

"Guilty!" he said, throwing up his head.

Then Sandry dropped his eyes to Sliets, and spoke as if he obeyed some compelling power, some urge to justify himself before her.

"I answer to the Right Law. I obeyed the ancient Right Law, little Sliets, and I have no regrets.

"I know!" cried Sliets. "I know! the smoke was so dense that the smoke of this drama could scarcely see each other's faces, but they took no note of it. The climbing roar had shut them apart in a sound made silence and they did not know it. Only Hampden, edging sideways, was alive to the possibilities of the moment. He saw the gun hanging in Sandry's hand, forgotten. He saw Sliets discovering his face with her blazing eyes of passion. He saw his moment and took it.

With one great bound he flung himself high in the air, leaped the space between and came down with his great weight upon the shoulders of the other man, clutching for back and throat, drawing the one to him in a grip of iron, pushing the other away.

Sandry went down like a reed, and as his knees buckled under him there was an ominous snap. The bone of his right leg, newly healed and fragile, gave way under the strain.

As the two men fell, both guns, the one in Sandry's hand and the one in his trousers' band, tumbled loosely apart. Sliets, clinging still to Sandry's kisses, was borne down with them. As they rolled over she bore herself from under them and with two sweeps of her outspread hands gathered the guns. Then she sprang up, drawing back a pace, her eyes like fire, and deliberately sought for a chance to kill Hampden.

"Sandry," she cried, "lie flat! Lie flat!"

From under Hampden's arm that was choking the breaks from his lungs the owner saw that slim figure of doom and strove to cry out. At last he got his voice for a moment—"Sliets!" he rasped, "don't shoot, I command you. don't—kill—! But she had the gun drawn to his ear, and she was firing around them.

With the first shot Hampden, remembering the guns that he had failed to get, felt his flesh rise on his body as he loosened his hold, shoved off Sandry and got to his feet, panting, fighting mad, his eyes red and awful.

With the courage of the raging bull he made straight for Sliets, who fired point blank at him. He took the ball in his shoulder and spun half round. The girl pulled the trigger again, got an empty snap, threw the weapon away and raised the other

"Sliets!" shrieked Sandry from the ground, "for my sake stop!"

It was a command, a cry of ownership, and it went straight to that part of her nature which had obeyed for generations. She hesitated, holding the man across the barrel.

As for Hampden, he stood, swaying drunkenly, chuckling in his throat, a thing of horror in his malevolence.

"Well," he sneered, "I'm sorry I'm just as well. I'll have you to my pleasant dreams. I sail for Panama—Hawaii—the Yukon. I'm done."

He turned on his heel, to stride away into the hall of smoke toward the north. In one moment he came rushing back to run down to the west.

For the first time the three people had come together remembered the fire, saw the thickened smoke, heard the roar that had made their escape their tragic words, unconsciously, for the last half hour.

It was all around them, that pouring mass of smoke, and it was black, as if the fires were near. Hampden's huge figure tore past them toward the narrow point of the ridge, then came turning back, a long red streaker staining his bedraggled shirt.

"My God!" he shouted hoarsely. "We're hemmed in! It's on every side! We'll burn like rats!"

His face was turned to the dusky heavens. Poppy Ordway found her voice.

"Who Wins Now?" He Said. "Brains —Brains!"

mounted upon him, again with that subtle suggestion of the tiger race, stripping his arm with fingers of steel.

"What do you mean?" she cried.

"I mean that we've been playin' our own little game out to its conclusion like fools. We've a bigger one has been playin' itself out. We're in a cup—winds."

There was something sinister about that last word.

"When this damned wind sucks up a little harder it'll draw its fires together an' we'll crawl alive."

He ceased, panting, moistening his lips. They presented a hideous grin distorted features.

"Who wins now?" he said. "Brains —brains! An' extreme ability—cunnin'! I guess I win at last!"

From somewhere up behind the low ridge came a rumbling thunder drowned his words, as if all the rocks of the tortured hills were split asunder in the heat. When it had died away he turned to Sandry and laid a pale under his grime, a prey to a hideous fascination.

"I've heard you like poison ever since I first clapped eyes on your Johnny Eastern face. I'll wager you had my best—and so did she," he jerked his head at Poppy, "but I'm great a force for both of you. She's good enough for me—I'm a bad lot—an' I'm glad I've got her like—that I loved her."

There was infinite pathos in his heavy voice for the moment.

"But to play's over. Th' curtain's drop in thirty minutes—forty or fifty at most—an' I'm the winner at last! You'll never marry her! But how I had you on th' hip—eastern lawyers! Ha! Ha!"

"An' old Frazer—clumsy fool! Found your East theft deed unrecorded, didn't you? Laid it to him. Why didn't you lay it to Hampden, who had or looks an' the power of the whole country? It was recorded all right, but I owned th' recorder same as I owned th' commissioner. Fools, all of you! An' I win at last!"

He was again the East and the West that Sandry saw with aching eyes in the two women who took Hampden's news of their fate. Miss Ordway raised pained hands and let them drop while she stared with eyes of frightful horror. Sliets moved never a muscle.

"I told you to go back!" she cried, "that big things were about to happen, and you would not. Now I shall pay you for all things—for what you would do to Sandry. Also I pay him—for that." She pointed to the still form under the fires.

"There is a way out—the secret trail which only I know and which we take."

She sprang and caught Black Bolt's bridle, dragging him with one motion to sandry's side. She bent to aim with arms of loving service exerting all her strength.

"Quick!" she commanded. "climb quick! We can make it yet!"

But Sandry looked into her blazing dark face that was like the peaks in storm, as wild was it, as thrilling, as beyond comprehension, and shook his head.

"What would yo do?" he asked.

"Do? Go down the trail across the big rock. Then leave no trace behind. If he is sure-footed, and Black Bolt will go where I put him. Come! He's laded a bit but he'll carry us both."

"And—they?"

"Let them! from brow to throat with unholy joy

"Leave them!" she cried savagely, "leave them to burn with their proofs and their schemes and their wicked sons! It is the right law!"

"No," he said, "it cannot be. If there is a way you must go—you are a woman—and you must take her with you."

"What!" cried Sliets in anguish.

"That is the way of the outside world, Sliets—the way of the Preacher."

He saw the free leap and flicker in her eyes, felt the tension of her hands upon his arms. Here was a force as wild and untamable as the great lions in the forest, and he knew not how to handle it. Then came the words of one who was like a god out of his difficulty.

"The three bars—of Bonsage, of Faithfulness and of Service."

"You are my woman," said the young man sternly, "is it not so?"

"Yes," answered the girl simply, "I am your woman."

"Then I command you to go—and take her with you."

The girl dropped his shoulders and sprang.

"I will obey," she said.

A change was working in her. The thing in her ears was growing faint. She was coming into the open country where Sandry lived his life, even as he had gone for a moment into the fastness where hers was said.

"Come," she said to the startled woman, "there is a way out. You need not die."

As the words forced themselves into the swaying brain of the other they stripped her of every rag of civilization. With a shriek she threw herself forward, caught at the saddle, clawed at its trappings like one demented.

But Sliets flung her back.

"A pit for a girl," she cried. "I give you your world of life. Give me the secret."

The woman tore the papers from her breast, thrusting them in frenzy at the girl and again tried uselessly to mount Black Bolt. Hampden came forward, lifted her gently in his strong arms, and set her upon the horse. She leaned down and snatched at the reins, but Sliets held them away.

"Quick!" screamed Poppy Ordway, "do you want me to burn you alive?"

In silence the girl snapped her fingers to Coonsah and the mammoth responded to her call. She tied the end of the long reins securely to his collar. Then she turned to Hampden.

"Go," she said, "get up. He will carry you both and you must hurry. Coonsah knows the secret trail. Urge your mount to the south. Don't look down; and hold her, or she will scream and go mad."

Sandry, raised on his knee, beheld this thing aghast.

"Hilliap!" he cried, "you disobey!"

She shook her black head.

"I send her out. I stay. It is my great sacrifice."

She laid slim fingers against the brown sign beneath her eyes.

"A woman serves and is faithful—if she loves," she said softly, "and I love my master."

For a precious moment Hampden stood in doubt and dismay. But here of the woman, the glimmer of distant shores, mayhap with her—who knew?—was too strong. He turned from the two and leaped on behind the saddle, striking a heel into the flank of the mettled black who bounded forward, dragging the girl to her feet.

But Coonsah hung back upon the rein, turning sagaciously, adding, upon his one idea. The girl stooped and caught his long ears, lifting his writhed face.

"Go home!" she cried, commanding. "Coonsah! Go home!"

"Why love so well?" she finished in jargon, and the huge, shambling, faithful creature turned from her like the smoke to disappear toward that secret trail which only she knew and which led after over the rearing spine of the Hog back. He strained at his rein in odor and black Bolt broke into a stumbling, hurrying gait, overhung with smoke.

And the girl turned to the despairing man upon the ground.

"Oh, my dear," she said, "I cannot die," she said gently, "and she is Sandry's woman."

"Oh, my God!" groaned the man, "what have you done?"

(TO BE CONTINUED.)

FEEL CHARM OF CORNWALL

Artists Fond of Depicting Beauties of Scenes in That Picturesque English County.

It has been said that of the two hundred or more cameras dispatched each year from Cornwall to London twenty-eights have been pitched at Newlyn or St. Ives." Certainly, in the tangled streets of the little town, wherever a window gives upon the sea or some an easel stands. St. Ives gets its name from an Irish princess, St. Ia, who floated thither upon a leaf and landed on Hoodown, the rocky headland which St. Ives calls the harbor. Its town sits on a smooth circle of sea into which a tongue of rocky land thrusts a half curved protection, leaving an inner harbor in the great sweep of the bay. Up the street, flanked by gray stone houses, the villas and cottages and hotels that hold up to the sun about the town. As the roads slipped gracefully, as but four daughters of Dorset, the lanes are sunken and black with excitement, her whole attitude a lure—with the almighty power of love in her face.

Spread Arms Over the Body.

quisite body a lure with the mightly abandon of her passion and her rock like will.

"Waiter," she said tremulously, "I have said there is no law for a woman I say it again. I can save your life—and I give you myself! Stand with it, because I love you! Oh, you can never know how I love you!"

Her golden voice rose with the force of the emotion that shook her, broke and failed, and she stood pantingly.

"An' old Frazer—clumsy fool! Found your East theft deed unrecorded, didn't you? Laid it to him. Why didn't you lay it to Hampden, who had or looks an' the power of the whole country? It was recorded all right, but I owned th' recorder same as I owned th' commissioner. Fools, all of you! An' I win at last!"

He was again the East and the West that Sandry saw with aching eyes in the two women who took Hampden's news of their fate. Miss Ordway raised pained hands and let them drop while she stared with eyes of frightful horror. Sliets moved never a muscle.

"I told you to go back!" she cried, "that big things were about to happen, and you would not. Now I shall pay you for all things—for what you would do to Sandry. Also I pay him—for that." She pointed to the still form under the fires.

"There is a way out—the secret trail which only I know and which we take."

She sprang and caught Black Bolt's bridle, dragging him with one motion to sandry's side. She bent to aim with arms of loving service exerting all her strength.

"Quick!" she commanded. "climb quick! We can make it yet!"

"Climb!" she commanded. "climb quick! We can make it yet!"

But Sandry looked into her blazing dark face that was like the peaks in storm, as wild was it, as thrilling, as beyond comprehension, and shook his head.

"What would yo do?" he asked.

"Do? Go down the trail across the big rock. Then leave no trace behind. If he is sure-footed, and Black Bolt will go where I put him. Come! He's laded a bit but he'll carry us both."

"And—they?"

"Let them! from brow to throat with unholy joy

"Leave them!" she cried savagely, "leave them to burn with their proofs and their schemes and their wicked sons! It is the right law!"

"No," he said, "it cannot be. If there is a way you must go—you are a woman—and you must take her with you."

"What!" cried Sliets in anguish.

"That is the way of the outside world, Sliets—the way of the Preacher."

He saw the free leap and flicker in her eyes, felt the tension of her hands upon his arms. Here was a force as wild and untamable as the great lions in the forest, and he knew not how to handle it. Then came the words of one who was like a god out of his difficulty.

"The three bars—of Bonsage, of Faithfulness and of Service."

"You are my woman," said the young man sternly, "is it not so?"

"Yes," answered the girl simply, "I am your woman."

"Then I command you to go—and take her with you."

The girl dropped his shoulders and sprang.

"I will obey," she said.

A change was working in her. The thing in her ears was growing faint. She was coming into the open country where Sandry lived his life, even as he had gone for a moment into the fastness where hers was said.

"Come," she said to the startled woman, "there is a way out. You need not die."

As the words forced themselves into the swaying brain of the other they stripped her of every rag of civilization. With a shriek she threw herself forward, caught at the saddle, clawed at its trappings like one demented.

But Sliets flung her back.

"A pit for a girl," she cried. "I give you your world of life. Give me the secret."

The woman tore the papers from her breast, thrusting them in frenzy at the girl and again tried uselessly to mount Black Bolt. Hampden came forward, lifted her gently in his strong arms, and set her upon the horse. She leaned down and snatched at the reins, but Sliets held them away.

"Quick!" screamed Poppy Ordway, "do you want me to burn you alive?"

In silence the girl snapped her fingers to Coonsah and the mammoth responded to her call. She tied the end of the long reins securely to his collar. Then she turned to Hampden.

"Go," she said, "get up. He will carry you both and you must hurry. Coonsah knows the secret trail. Urge your mount to the south. Don't look down; and hold her, or she will scream and go mad."

Sandry, raised on his knee, beheld this thing aghast.

"Hilliap!" he cried, "you disobey!"

She shook her black head.

"I send her out. I stay. It is my great sacrifice."

She laid slim fingers against the brown sign beneath her eyes.

"A woman serves and is faithful—if she loves," she said softly, "and I love my master."

For a precious moment Hampden stood in doubt and dismay. But here of the woman, the glimmer of distant shores, mayhap with her—who knew?—was too strong. He turned from the two and leaped on behind the saddle, striking a heel into the flank of the mettled black who bounded forward, dragging the girl to her feet.

But Coonsah hung back upon the rein, turning sagaciously, adding, upon his one idea. The girl stooped and caught his long ears, lifting his writhed face.

"Go home!" she cried, commanding. "Coonsah! Go home!"

"Why love so well?" she finished in jargon, and the huge, shambling, faithful creature turned from her like the smoke to disappear toward that secret trail which only she knew and which led after over the rearing spine of the Hog back. He strained at his rein in odor and black Bolt broke into a stumbling, hurrying gait, overhung with smoke.

And the girl turned to the despairing man upon the ground.

"Oh, my dear," she said, "I cannot die," she said gently, "and she is Sandry's woman."

"Oh, my God!" groaned the man, "what have you done?"

(TO BE CONTINUED.)

IS HOME LESS ATTRACTIVE?

Every Member of Family Nowadays Seems to Find Entertainment Elsewhere.

The average American home seems to be losing its attraction for the household, Anne Gladden writes in the New Orleans Times-Picayune. The home is frequently only a place in which to sleep and eat. The children coming home from school stop at home long enough to deposit their books and go off in pursuit of entertainment. The mother entertains her visitors by shopping or visiting the picture show. The evening callers are treated to a musical entertainment or a theater party. The call of outside attraction is strong. Nowadays the home should have its attractions and be satisfying to both old and young. Only in this manner can the home be made attractive to the rising generation, and a tin can pile is a poor substitute. Home should be covered with vine, when window boxes add a touch of nature to the house and grass covers the lawn, and when this is done it is a pleasure to the household who find pleasure in the task, the home will have increased attraction and the household still want time to linger and enjoy the development from day to day.

An Easier Job.

Harry Dickson tells of an old negro preacher who was kept from indulgence by the white women who gave her occasional odd jobs to do. Mrs. Dickson, the writer's mother, had found some housework for the old darkey, but after working for her for two Mondays said she must quit.

"I done have to go out collectin' for a missionary society," she explained. "But I have work for you to do," said Mrs. Dickson, "and you need all the money you can get."

"I know, sah! I sho' is mammy. But I done had to collect for de missionary society."

"What do you get paid for collecting?" asked Mrs. Dickson.

"I don't get paid, sah! Mandy, 'I'll give you what I collects.'"—Green Book Magazine.

Question of Tongue.

Some amount of confusion is caused by the pronunciation of the name of the town Kupruln or Veles, in Macedonia. The difference in nomenclature is attributable to the conflict of tongues. Kuprulu, Kopruln or Koprili, is the Turkish equivalent of the Slavonic Veles and the Greek Valesa, all of which refer to the same town in the highland was it was under Turkish rule) of Salonikk. The ancient Greek historian Polybius speaks of it as a town of Pelagonia, and it is believed that the Bulgarian and modern Greek kingdoms contained part of this Turkish town, with slight modifications. In the catalogue of a family of statesmen who flourished from the sixteenth to the eighteenth centuries.—London Chronicle.

The Cause.

First Chauffeur—Bills's been a sheet four ten years and never run over no body yet.

Second Chauffeur—Well, Bills is a sense-minded cuss. He's always thinking of something else.—New York Globe.

HANDICRAFT FOR BOYS AND GIRLS

by

A. NEELY HALL and DOROTHY PERKINS

(Copyright, by A. Neely Hall.)

A CAMP WAGON.

First you must get two pairs of wheels. If you haven't say, you will most likely find a boy who is willing to sell his wheels or make a trade. By looking at the picture you can easily determine the proportions necessary for a wagon to sleep in. The iron axles that belong to your wheels will probably be too short. To lengthen them, get a piece of iron pipe just

large enough for them to slip into. Go to the blacksmith and have him bend and the iron pipe to two pieces of the width of the wagon box, and then rivet the axle halves in the ends of the pipe (Fig. 1).

Fig. 7 shows the wagon bed. Fasten the boards together by means of the two-by-four crosspieces A and B. Then cut the side boards C and D and nail them to the edges, and the end boards E and F to fit between. Fasten end E between the end and side grooves by means of the strips G (Fig. 5) for the end F to drop into. Dark board H is of the same size as E (brace it with the brackets I.

The wheel axles must be stayled to the two two-by-fours J and K (Fig. 6).

Make these pieces of the length of wagon box, as shown in Fig. 7. Nail 2 to crosspiece A, and pivot K at its center to crosspiece B with a carriage bolt long enough to extend through K, B, and the wagon bed. Enlarge the hole in K so the bolt head will sink down flush and allow the iron axle to pass over it. In bolting on the front wheels, slip an iron washer over the carriage bolt so that it will come between crosspiece K and J, and place another neat to the bolt nut.

Fig. 2 shows the wagon with the frames for the top covering in position. Separate the ends of four barrel hoops (Fig. 4) for the arches and bend them in place. To fasten them in place, then turn the funnel sideways and slide it off the end of the hoop, the bunnie is blown with a lemonade straw.

If you have two clay pipes, you can blow two bubbles at one time by bringing them together cause them to unite in one large bubble (Fig. 10).

Fig. 11 shows the pipe required to blow a bubble over a spool. After

when the frames are nailed to the wagon box sides, they should be painted outward (Fig. 3).

Make the front seat out of a board, with the nails across its under side (Fig. 6) to fit cleats against the sides of the wagon box. This board is removable if you intend to use the wagon to sleep in.

Figs. 1 and 2 show how to attach lines to the axles, and carry them around the sides, through screw eyes, to the back, for steering when pulling the camp wagon. Another pair of lines may be provided for pulling the wagon.

Concrete to Hold Duck Water.

Concrete will be extensively made use of in the future in the revetment work on the shores of the Mississippi river, taking the place of the willow mats which have been used for some time with considerable success. There is little effective enough in protecting the banks against the action of the current, but they are difficult to fix and time-consuming to weave and sink in place. The cement processes has been developed by investigators of the United States Bureau of standards, who have found that a four per cent addition of calcium chloride to the mixing water increases the strength of the concrete at the age of one day by 100 per cent or more. In some cases the strength of the concrete in which the calcium chloride was at the age of two days was 75 per cent or more of the strength normally attained in one month. This rapid hardening is what has made the concrete available for the work of confining the wandering Missouri river to its banks.

SOAP BUBBLE FUN.

It is not necessary to have special soap or a patent blower to blow bubbles successfully. There is nothing better than castile or ivory soap for a solution, and a clay pipe like that in Fig. 1, which can be bought at a drug store, is as good as any blower on the market. But for large bubbles, the finest sort of a blower is a tin funnel about 3½ inches in diameter (Fig. 2). Probably your mother has one in her pantry. Another blower which you will find handy is a short lemonade straw (Fig. 3).

To make up the solution, shave the soap into a pan of warm water, pulling in as much soap as the water will dissolve.

To make a bubble with the tin funnel, place the end into the solution,

then lift it out gently, and if it is covered with a film blow upon the small end and a bubble will appear. Steps A, B and C (Fig. 4) indicate how to release the bubble by inverting the funnel and tossing the bubble on of it.

Fig. 5 shows how to bounce a bubble upon your arm. By dropping your arm slightly as the bubble descends, as indicated by the dotted lines, the bubble will land with less shock.

Fig. 6 shows how you can drop tacks into the funnel spout without bursting the bubble.

Place several glass tumblers upon a table, and blow a bubble upon each

(Fig. 7), then add other tumblers and see how many bubbles you can blow before the first one bursts.

Fig. 8 shows how to blow one bubble within another. First blow a large bubble on a pie tin having a depth of half an inch or more. Then let it inflow the bubble as you raise the funnel, then turn the funnel sideways and slide it off the pan. The bunnie bubble is blown with a lemonade straw.

Fig. 9 shows the wagon with the frames for the top covering in position. Separate the ends of four barrel hoops (Fig. 4) for the arches and bend them in place. To fasten them in place, then turn the funnel sideways and slide it off the end of the hoop, the bunnie is blown with a lemonade straw.

blowing this bubble you can place a smaller one inside on top of the spool (C, Fig. 11). A small doll's head can be fastened in a bubble, as shown in Fig. 12, and there are many other tricks which can be carried out.

Fear Causes Disease.

An eminent medical authority once made the statement that a great deal of contagion is due largely to nervous apprehension and fear. Terror causes radical changes in the secretions and nerve cells, and while the possibility is not the direct cause of disease it certainly is sufficient to put the person in the proper condition to be attacked by the prevailing malady. It is a well understood fact that nervous fear has been developed by investigators of the United States Bureau of

Common American Birds

Interesting information about them compiled by the Bureau of Biological Survey of the United States Department of Agriculture

Robin

(Planesticus migratorius)

Length, inches.

Range: Breeds in the United States (except the gulf states), Canada, Alaska and Mexico; winters in most of the United States and south to Guatemala.

Habits and economic status: In the North and some parts of the West the robin is among the most cherished of our native birds. Should it ever become rare where now common, its joyous summer song and familiar presence will be sadly missed in many a homestead. The robin is an omnivorous feeder, and its food includes many insects, with an very pronounced preference for any. It is very fond of earthworms, but its real economic status is determined by the vegetable food, which amounts to about 44 per cent of all. The principal item is fruit, which forms more than 31 per cent of the total food. The fact that in the examination of over 1000 stomachs the percentage of wild fruit was found to be five times that of the cultivated varieties warrants that berry-bearing shrubs, if planted near the orchard, will serve to protect more valuable fruits. In California orchards years it has been possible to save the entire crop from hungry robins only by the most strenuous exertions and considerable expense. The bird's general usefulness is such, however, that all reasonable means of protecting orchard fruit should be tried before killing the birds.

Crow Blackbird

(Quiscalus quiscula)

Length, twelve inches. Shorter by at least three inches than the grackles with

Ladies' Under-Muslins.

M. A. LEVINSON & COMPANY

Northern Michigan

Boyne Citizen: Mrs. Lucretia Mitchell Batchelor, widow of the late C. C. Batchelor, passed away Saturday morning, surviving her husband less than a year he having passed away last July. The body was brought to the home of her daughter, Mrs. R. S. Deane, S. East street, where funeral services will be held tomorrow morning at 10:00 o'clock. Rev. Duffey will conduct the services. Mrs. Batchelor, who was 68 years of age came to this city with her husband thirty-eight years ago. She has been in an enfeebled condition for some years and the end comes as a shock but not a surprise.

Bellaire Independent: The community was shocked this morning to learn that Arthur T. Bodle was dead, his body having been found lying in the road near the home of J. D. Fox northwest of town at an early hour. Dr. Bodle had been called to the home of Wm. Hill and when he did not arrive when expected Mr. Hill called the Bodle residence by phone and found that he had been on the way more than long enough to reach his destination. Going in search for him Mr. Hill found the body as mentioned above. Sheriff Kittle was notified, also Dr. C. V. Hinman, and they at once repaired to the scene and the body was brought to town. Death had apparently been instantaneous, caused by heart failure. Dr. Bodle left his car stuck in the sand 200 rods of the Forest Home Grange hall and continued his journey on foot and the over exertion thus caused brought on the fatal attack. Dr. Bodle had been a resident of this community for many years and was one of the most widely known members of his profession in this region.

FISHERMEN'S LAW POINTS

From May 1st until August 31st, anglers are permitted to fish for trout.

While fishing the sportsmen will do well to bear in mind the laws as they apply to trout fishing this season, for a number of changes have been made in the statutes recently. Here are some of the things which will be unlawful to do:

Unlawful to have in possession under seven inches in length.

Unlawful to have in possession more than thirty-five in one day.

Unlawful to have in possession more than fifty in any one time.

Unlawful to buy or sell at any time or ship beyond the boundaries of the state, except that licensed non-residents may ship one day's legal catch out of the state by attaching license coupon to package.

Unlawful to have in possession during closed season.

Unlawful to take big or small mouth black bass except from June 16 to March 1.

Unlawful to take more than ten in one day or to have more than ten in possession at any one time.

Unlawful to buy or sell at any time.

Wall-eyed pike may be taken from June 16 to March 1.

Unlawful to take of a less length than ten inches or more than twenty-five in one day.

Unlawful to take except with hook and line.

Unlawful to buy or sell when taken from inland waters.

Unlawful to take perch of a less length than six inches.

Unlawful to take more than a total of twenty-five in one day.

Unlawful to buy or sell at any time.

BUSINESS AND BEAUTY

A Trip Into the Ancient Indian Reservation Country.

If you want to banish or reduce your grouch, turn the curdled milk of your nature into fragrant attar of roses, or build the little blue devil that roosts on the top of your desk or the foot of your bed, no matter, go with me out into Hayes township, into the region where the Duke of Susan Lake exercises benevolent sway.

The Duke,—that's Dick Hammett—owns a 300 acre estate along the bank of Greensky Hill, a good portion of it along the shore of the beautiful lake that gives the Duke his title. His grace is a farmer *par excellence*, as his work in Hayes fully demonstrates.

In Hayes he raises about everything, except what he raises in Charlevoix—and you know what that is. The estate has many fertile fields, a productive orchard, and all under the practical supervision of Mr. Hammett, who keeps a few chickens and ducks and turkeys, and a farm-house that would grace Park avenue.

But the charming grovers fairly takes our breath. There are beauty spots in which you long to linger until twilight-peewits sing their evening song. The "Boy City," of fragrant memory, is nearby, but don't mention it in the presence of the duke. A part of the estate is the Indian camp ground, and there it is the half-century-old log Indian mission church, still in use. Near it is the Indian cemetery with its wood "bradstones" upon which the settler descendants that took him back in the long days when he helped to "manipulate" the Indian vote.

Entrancing landscape vistas away over yonder beyond the lake; the broad stretch of Pine Lake and Oyster Bay, and then, from the crest of Greensky Hill the water-tower and the city spring into view.

OLD SETTLERS WILL MEET AT BENZONIA

The 35th annual meeting of the Old Settlers' association of the Grand Traverse region will be held Wednesday, June 21, at Benzonia, says the Traverse City Record. The people in and near that place are alive with enthusiasm for the event and that section will surely be well represented. Equally strong is the interest shown in other sections of the region.

Plans are being made to arrange for automobile service to Benzonia. The trip is by no means a lambkin, as it is but an hour and half run from here. Those preferring to go by train can leave here on the 5:40 morning train, leaving Benzonia at about 4:00 o'clock on the return trip. W. L. Case of Benzonia is president, and W. S. Anderson of Traverse City, secretary, and if information is wanted on any point, the inquiries should be addressed to Mr. Anderson.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powder. Get at the root of the trouble and thoroughly cleanse the system with a treatment of Dr. King's New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, middle and aged. Try them. Clear complexion today. 25c, at your druggist.

LOCAL AND PERSONAL

The Gelken tug Caroline is hauled out for minor repairs to her hull.

"Boulder Farm" (Miss Martha Wilson) has received a new Ford truck.

Robbin Morrison, who spent the winter in Oklahoma, is home again.

Oswald Ecker, of Chicago, is here visiting his sister, Ida Ecker, and friends.

A large new band organ was installed at the roller skating rink last Saturday.

"Are You a Mason," featuring John Barrymore. At Majestic Theatre, Tuesday, June 13.

V. E. Shwab, and family, of Nashville, have arrived at their cottage on the Belvedere side.

Capt. O. E. Wilbur left Monday night for a few days' visit with friends and relatives in Chicago.

Mrs. J. P. Wilson, of St. Louis, Mo., is visiting her sister, Mrs. Kellner, of Michigan avenue.

Chas. Whitford, a Charlevoix pioneer, who spent the winter in the West, is here again for the summer.

Wm. Finucan, Jr., of Cheboygan, spent two days this week under the parental roof in this city.

Mrs. J. L. Crane and Miss Helen Crane leave for Chicago Wednesday evening to visit relatives and friends.

A. T. Stewart was again a visitor Monday. He came this time to plant a few thousand baby black bass in Twin Lakes.

The Steamer Illinois arrived from Chicago Sunday night, returning from the straits, south bound, early Tuesday morning.

The Congregational Sunday school will have its annual basket picnic next Wednesday. Full particulars will be given Sunday.

A large delegation of East Jordan Pythians visited Charlevoix lodge last Thursday night, conferring the third degree on two candidates.

Next Sunday is Children's Day. Appropriate exercises will be held by the Congregational Sunday school at the morning church hour.

The St. James tug McCann came over last Thursday and went to Upper Bay to look up the matter of raising the wreck of the steamer Hearse.

Will Driggett, Jr., who has a good position in the Ford works, Detroit, was married at the home of the bride's parents, East Jordan, last Thursday, to Miss Cleo Thorn.

The first freight to be shipped over the new four million dollar Chicago municipal pier was 300 barrels of tarvia for Charlevoix, part of which came on the Missouri Saturday.

Ed. Seaman last week bought the Traverse City roller skating rink, and will open it Saturday. Mr. Seaman raises canaries for the Charlevoix rink with Hazen Hurkett as manager.

Mr. and Mrs. Nicholas R. Wall, of St. Louis, have taken the Crane residence, on Park avenue, for the season. Mr. Wall is one of the pioneer members of the Charlevoix Summer Home Association.

General Passenger Agent Wolfender, of the Pere Marquette, came up on the first resort special, which arrived Saturday morning. Mr. Wolfender kept the number of passengers was double that of the first train last year.

Children's Day will be observed at the Congregational church next Sunday at the morning service, 10:30. The children of the Sunday school will present an especially choice program, and the Cecilians will sing. The parents and the general public are cordially invited.

The steamer Missouri arrived from Chicago Saturday morning on her first northern trip of the season. Capt. Geo. Johnson, last season master of the Minnesota is this year in command of the Missouri. Capt. Bright, last season in the Missouri, goes in the Minnesota on the Chicago-Buffalo run.

Petitions are in circulation in this city and vicinity asking the legislature to make the township instead of the county the unit in local option elections. It should require no great amount of petitioning to see in this move an effort on the part of the liquor interests to capture a line of dry trenches. Don't let them fool you.

"Carrying coals to Newcastle," hauling one small cargo of pine lumber imported from Canada by the Charlevoix Lumber Co. several years ago, the first cargo of lumber shipped into this port was a load of hemlock brought in from Harbor Springs last week by the Schooner Sion Beale, for the same concern.

The new serial story soon to begin in the SENTINEL—"The Auction Block"—by Rex Beach, should engage the special interest of Northern Michigan readers, as the author, now one of the more distinguished novelists of his day, was born twelve miles south of Charlevoix, and, up to his twelfth year, lived near Atwood. It will be of special interest to the editor of this paper, as, at his home, Rex was frequently a guest with his mother. The writer often trotted Rex on his knee.

D. S. Fayton, of East Jordan, was in town Tuesday.

Stanley Widdifield, a student of the Ferris Institute, is home for the summer.

Judge Collingwood, of Lansing, is holding a special term of court here. The Boyne City malpractice case of Mosher vs. Marshall is now being tried.

Mrs. J. M. Harris, of Boyne City, celebrated her birthday Tuesday as the guest of Mrs. Harry Widdifield. She was accompanied by Mrs. E. A. Rieggsegger.

A "presidential preference" election was held last week at the Epworth League business and social meeting with the following result: Teddy 25, Wilson 2, Taft 2, Bryan 2, Hughes 1.

KITCHENER DROWNED

BRITISH WAR MINISTER AND STAFF GO DOWN WHEN CRUISER IS SUNK

Following last week's reverse for the British fleet comes the news, just as these columns are closed, that the cruiser Hampshire, with Lord Kitchener and staff on board, has been struck by a mine or torpedo. All on board were lost.

Kitchener was on his way to Russia to confer with the Czar.

Norwood News

The ladies' aid society will give an ice cream social at the town hall Wednesday evening.

Miss Estes Palmer of Central Lake is visiting at the home of Rev. Roods.

T. Pearl and wife of Charlevoix visited relatives in Norwood Sunday.

A. D. Superaw and family returned to their home in Traverse City Wed.

Frank Richardson and family spent Saturday and Sunday at H. Wagner's.

Wilbur Seymour, who was quite ill last week, is much better.

Mrs. Peter Block, of Bernard, visited at Allen Campbell's Tuesday.

Miss Drusilla Richardson entertained several of the young ladies at a party Friday afternoon and evening.

Barnard Doings.

Mr. and Mrs. John Cooke spent the week end with Mrs. Clarke's parents, near Ellsworth.

The Royal Oakes spun a pleasant evening at the home of Clyde Smith Thursday, and enjoyed a potluck lunch.

The I. T. class entertained the Epworth League social at the M. E. church in Charlevoix Monday night and report a great time. George Beck and Miss Shapton chaperoned the crowd.

Mrs. Wm. Burns entertained the Lyric Bible class Wednesday afternoon. The class voted to pledge $5.00 toward the painting fund. Very dainty refreshments were served by the hostess, eleven ladies being present. At six o'clock Mrs. Burns had as guests for tea, the Mesdames Peter Block, Wm. Shapton, George Ager, Edmund Shapton and Lewis.

Miss Lottie Ager was hostess to her S. S. class Tuesday afternoon. The girls enjoyed the games, and refreshments were served on the lawn. The class will meet in two weeks with Beth Shapton.

June Lewis visiting friends and relatives in Boyne City this week.

Miss Barbley has been secured to teach the Clarke school for the remainder of the term, to fill vacancy caused by the resignation of Mr. Hilliard.

Mr. and Mrs. Will Burns motored to Ironton Sunday and spent the day with relatives.

George Willis, of Barnard, and Miss Charlotte Hull, of Charlevoix, were quietly married at the Baptist church by Rev. Vineyard, Saturday evening. They were attended by Mr. and Mrs. Henry Ager. A host of friends join in congratulations and best wishes. They will make their home with Mr. Willis' parents for the present.

(Received too late for last week's issue.)

The Misses Dorothy Beattie and Louise Lewis attended the Northern Michigan Field Meet at Boyne City, Saturday.

The Royal Oakes will be entertained at the Clyde Smith home this week, Thursday.

Mr. and Mrs. Jerome Cole and Harold, former residents of this place, are enjoying an auto trip to Three Rivers, Mich.

Miss Ethel Shapton arrived home Saturday, having spent several weeks in Flint.

Laurence Ross is the happy owner of a new ford.

Messrs. Peter Block, Joe Clarke, Henry Block and Aubrey motored to Glen Haven Sunday.

Leslie Arnold, of East Port, is now employed on the Armstrong farm.

Debt World Owes to the Press.

In normal times, under ordinary everyday conditions, the press has the immense advantage. Its facilities are incomparable. It sweeps the whole world and every day keeps alive in us a sense of common interest in the affairs of our community.—Jr. Albert Shaw.

Cooking is a Pleasure---when you cook with a New Process Oil Stove.

A New Process Oil Stove will simplify the cooking question. They are so easy to use, so clean, so safe, so economical and reliable that all the old time stove worries are banished. No hot summer kitchens. The New Process is ready when you want to cook to give as much heat as you want, right where you want it—in the cooking, not out in the room. Heat is always quite perfect control. Costs less than a half cent an hour per burner. You can keep one or all burners at an intensely hot flame or merely simmering. Heat is easily regulated. The oil supply is automatically constant. The glass reservoir holds one gallon of oil, you can easily see at all times the amount of oil in the reservoir.

A sale of a New Process Oil Stove means a satisfied customer.

BRITAIN CLAIMS GERMANS LOST 18 WAR VESSELS

Admiralty Says That Statement Issued by Berlin Government is False.

GRAND FLEETS IN ACTION

Kaiser Alleged to Have Lost Two Battleships, Six Cruisers, Nine Destroyers and a Submarine in Great Naval Battle.

Berlin, June 5.—Replying to British reports that several German dreadnaughts and battle cruisers were destroyed in the sea fight off Skagerrak, the German admiralty officially reiterated that all the German losses had been announced.

"No German naval units were lost except those mentioned in the official communique," says the official statement.

The communication adds that no Zeppelin was lost during the battle.

London, June 5.—A statement issued by the British admiralty confirming previous accounts of the battle between the British and German fleets, reiterates that the German accounts of the German losses are false, and that, although the evidence is still incomplete, enough is known to justify stating that the German losses were greater than the British, "not merely relatively to the strength of the two fleets but absolutely." It is disclosed the Germans lost 14 warships.

There is the strongest ground for believing, the statement adds, that the German losses include two German battleships, two dreadnought battle cruisers of the most powerful type and two of the latest light cruisers, in addition to smaller craft, including a submarine.

Admiral Beatty, it is declared, also returned safely to port and is the hero of the great conflict. In the face of overwhelming odds he made a standup fight until Jellico came to his rescue. Admiral Beatty's wife is a daughter of the late Marshall Field of Chicago.

The first reports of the heavy loss of life have not been revised. Great Britain mourns for more than 4,000 of her best seamen, and the whole nation is oppressed with sadness, which is reflected in the faces of all the people of London.

Rear Admiral Honorable Horace Lambert Hood, second in command to Vice-Admiral Sir David Beatty, and Captains Sowerby, Cay and Prowse were lost, with many others whose names are not yet known.

Seaman Tells of Battle.

On the East Coast of England, June 5.—The following story is told by a seaman who was in the battlemelee which shared with the main cruiser squadron in the heaviest fighting in the Skagerrak engagement:

"The first warning came just after three o'clock in the afternoon, when we got the order which sends every man to his post for action. Then there was a very trying time of waiting. At last the word went round that Admiral Beatty's flagship, the Lion, which was leading our line, had signaled that the enemy was in sight, and it was not many minutes after that the Lion fired the first shot. It was all very long range, but we were going at full speed and gradually getting nearer the German line. Presently others of our ships joined in the firing and then for five hours we were at it hammer and tongs. We were shaping our course zigzag all the time. Most of the fighting was done at a range of about 5,000 yards and it was deadly.

Gas Shells Disagreeable.

"The Germans outnumbered us, but that would not have mattered if they had not also had the benefit of the better position. Not a good part of the battle the sun made it difficult to aim our guns on their ships. They could see us, but we could hardly see them. Shells dropped around us like hail. Some hit us, but luckily none did vital damage or even put a gun out of action. Several denied our armor and one plate had a dent six inches deep, but without a break in the steel. The really disagreeable thing was the gas shells which sent out poisonous gas. However, we came through the battle with only a few men killed and wounded.

Saw Ships in Flames.

"I saw two or three other ships burning. I believe an Invincible was one and I also saw the Queen Mary blow up suddenly. Our destroyers managed to take up some of the men from the ships, but they themselves were fully occupied in dealing with the German destroyers and screening the battle ships of our fleet from torpedo attacks.

"The Germans may have been accompanied by Zeppelins, but personally I saw none. If the airships were covering their old cruiser's retreat to given word of the approach of the British main battle fleet. When our big ships did come up about four hours after the fight started the Germans had a taste of what is it to be outnumbered. They did not like it and turned and ran for the shelter of their mine fields and harbors. In less than half an hour after the arrival of our battle ships the pitched battle was over."

Sustenance in Nettles.

Nettles good human food? Of course! They have been known as such immemorially in thrifty Switzerland and other careful countries. There is no better rival to spinach in the whole vegetable kingdom. And the tender count to be utilized, it does so abound. It is the one weed, almost the only one, that grows in all countries under the sun, so say gardeners who fight it year by year and have never taken the right revenge of eating it.—London Chronicle.

COUNCIL PROCEEDINGS

Council Chambers, June 5, 1916.

The common council for the city of Charlevoix met on the above date. Mayor Ross presiding. Aldermen present: See, Paddock, Cartier, Hiller, Gelken and Bigelon. Absent: None.

Minutes of last meeting were read and approved.

Moved by Ald. Gelken, seconded by Ald. Hiller, that the druggist bond of Frank Metcalf be accepted as presented. Motion carried by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. See, that the electricians bond of Wood Rose, with the Aetna Accident and Liability Co. of Hartford, Conn., be accepted and approved. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Paddock, seconded by Ald. See, that the Workingmen's Compensation policies be referred to Finance, Purchasing and Printing committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller and Gelken. Nays—Benton.

Moved by Ald. Paddock, seconded by Ald. Benton, that matter of electricity for Argo Milling Co. be referred to Electric Light and Water committee, to report in full at next meeting. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Ald. Cartier, seconded by Ald. Benton, moved the adoption of the following Resolution:

Bridge Street Paving, South Terrace Paving District No. 15.

Resolved by the Common Council of the City of Charlevoix, that the following described lots and parcels of land be and the same are hereby made liable for the payment of the cost and expense of defraying that part of the cost that the Common Council decides should be paid and borne by special assessment of the cost and expense of the improvement of Bridge Street, from the south line of Fair Street, to the south line of the south line of East Garfield Avenue, including the cost and expense of all necessary curbing, guttering, sodding, seeding, sewerage and appurtenances, in accordance with plans and specifications on file in the office of the City Clerk, and

Be it further resolved that Friday, the 23rd day of June, A. D. 1916, at two (2) o'clock in the afternoon be and it is hereby appointed and assigned by the Common Council and Board of Assessors as the time and place when and where said assessment shall be made.

Be it further resolved that the clerk of the City of Gelken shall publish and post in the office of the Common Council and Board of Assessors as above provided, be given for publication for two weeks in the Charlevoix Sentinel, a newspaper of said City, as required by section 1888, of the Compiled Laws of 1915, and that he post, as required, "All Ayes to Order for the improvement of Cities of the Fourth Class."

Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Attest: Andrew Ross, Mayor.

William H. Fennimore, Clerk.

Resolution adopted at a regular session of the common council the 5th day of June, A. D. 1916, by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. See, seconded by Ald. Paddock, that the Finance, Printing and Purchasing committee be instructed to borrow $6,000.00 for thirty days at lowest possible rate. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

The Finance committee submitted the following report: Having examined the Clerk's bill, report the same correct and recommend that they be allowed out of the several funds as herein stated:

Moved by Ald. Cartier, seconded by Ald. Benton, that the report as read be accepted and the Mayor and Clerk be authorized to issue warrants on the City Departories for $7,206.38, and the Clerk be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. Paddock, that the Mayor's appointment of Charles Hyers as a regular police, be confirmed. Motion carried.

Moved by Ald. Hiller, seconded by Ald. Gelken, that the matter of shooting gallery be referred to Police, Fire and License committee. Motion carried.

Moved by Ald. Hiller, seconded by Ald. Paddock, that the repainting and marking of the auto speed signs be referred to Police, Fire and License committee, with power to act. Motion carried.

Moved by Ald. Gelken, seconded by Ald. See, that matter of lighting wood-en policemen be conferred to Streets, Sewers and Public Health. Motion carried.

Moved by Ald. Benton, seconded by Ald. Cartier, that the water trough at corner of Antrim and Bridge streets be removed to east end of Antrim street, not less than fifty feet east of Bridge street. Motion lost by following aye and nay vote: Ayes—Cartier, Hiller and Benton. Nays—See, Paddock and Gelken.

Mayor referred question of water trough to Streets, Sewers and Public Health, to report next meeting.

Moved by Ald. Cartier, seconded by Benton, that the Chief of Police be paid for extra services fifteen dollars per month for six months, beginning June 1, 1916. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Gelken, seconded by Ald. See, that $50 cents be paid to Dog Warden for each fee collected. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald See, seconded by Ald. Hiller, that all laterals not connected to State street sewer, be constructed from sewer to curb. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

There being no further business, council adjourned.

Charles H. Emrey, City Clerk.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H.S. Harris.

MARGUERITE CLARK IN "GRETNA GREEN"

Marguerite Clark, the dainty and fascinating stage and screen favorite, is certain to add appreciably to her astounding popularity in the Famous Players Film Co's four-part picturization of the celebrated comedy romance "Gretna Green," by Grace Livingston Furniss. This quaint and picturesque play possesses all the varying elements essential to the successful screen drama—love, sacrifice, humor, mystery and thrill—and is laid in the charming period of the early nineteenth century, when daring elopements to Gretna Green, a lovers' haven in the north of Scotland, added a dash of excitement to many true love matches, when hearts twanged over the marts of commerce, just before the prose of business usurped the poetry of romance.

At the Majestic Theatre, Friday eve. June 9.

Northern Michigan

Boyne Citizen: Mrs. Lucretia Mitchell Batchelior, widow of the late C. C. Batchelior, passed away Saturday morning, surviving her husband less than a year ne having passed away last July. The body was brought to the home of her daughter, Mrs. R. S. Isaacs, S. East street, where funeral services will be held tomorrow morning at 10:00 o'clock. Rev. Dudley will conduct the services. Mrs. Batchelior, who was 63 years of age came to this city with her husband thirty-eight years ago. She has been in an enfeebled condition for some years and the end comes as a shock but not a surprise.

Bellaire Independent: The community was shocked this morning to learn that Arthur T. Bostic was dead, his body having been found lying in the road near the home of J. D. Fox northwest of town at an early hour. Dr. Bostic had been called to the home of Wm. Hill and when he did not arrive when expected Mr. Hill called the Bostic residence by phone and found that he had been on the way more than long enough to reach his destination. Going in search for him Mr. Hill found the body as mentioned above. Sheriff Kittle was notified, also Dr. C. V. Hinman, and they at once repaired to the scene and the body was brought to town. Death had apparently been instantaneous, caused by heart failure. Dr. Bostic left his car stack in the sand this side of the Forest Home Grange hall and continued his journey on foot and the over exertion thus caused brought on the fatal attack. Dr. Bostic had been a resident of this community for many years and was one of the most widely known members of his profession in this region.

FISHERMEN'S LAW POINTS

From May 1st until August 31st, anglers are permitted to fish for trout.

While fishing the sportsman will do well to bear in mind the laws as they apply to trout fishing this season, for a number of changes have been made in the statutes recently. Here are some of the things which will be unlawful to do:

Unlawful to have in possession under seven inches in length.

Unlawful to have in possession more than thirty-five in one day.

Unlawful to have in possession more than fifty at any one time.

Unlawful to buy or sell at any time or ship beyond the boundaries of the state, except that licensed non-residents may ship one day's legal catch out of the state by attaching license coupon to package.

Unlawful to have in possession during closed season.

Unlawful to take big or small mouth bass base except from June 16 to March 1.

Unlawful to take more than ten in one day or to have more than ten in possession at any one time.

Unlawful to buy or sell at any time.

Net-caught pike may be taken from June 16 to March 1.

Unlawful to take of a less length than ten inches or more than twenty-five in one day.

Unlawful to take except with hook and line.

Unlawful to buy or sell when taken from inland waters.

Unlawful to take perch of a less length than six inches.

Unlawful to take more than a total of twenty-five in one day.

Unlawful to buy or sell at any time.

BUSINESS AND BEAUTY

A Trip Into the Ancient Indian Reservation Country.

If you want to banish or reduce your grouch, turn the curdled milk of your nature into fragrant attar of roses, or kill the little blue devil that roosts on the top of your desk or the foot of your bed, my masters, go with me out into Hayes township, into the region where the Duke of Susan Lake exercises benevolent sway.

The Duke,—that's Dick Hammet—owns a 500 acre estate along the lake of Greensky Hill, a good portion of it along the shore of the beautiful lake that gives the Duke his title. His grace is a farmer *par excellence*, as his work—in Hayes fully demonstrates.

In Hayes he raises about everything, except what he raises in Charlevoix—and you know what that is. The estate has many fertile fields, a productive orchard, and all under the practical supervision of Wm. Burns and wife. There are chickens and ducks and turkeys, and a farm-house that would grace Park avenue.

But the charming groves fairly takes our breath. There are beauty spots in which you long to linger until the whippoorwills sing their evening song. The "Boy City," of fragrant memory, is nearby, but don't mention it in the presence of the duke. A part of the estate is the Indian camp ground, and near it is the half-century-old log Indian mission church, still in use. Near it is the Indian cemetery with its wood "headstones," upon which the scribe read name that took him back to the happy days when he helped to "manipulate" the Indian vote.

Entrancing landscape vistas sway over yonder beyond the lake; the broad stretch of Pine Lake and Oyster Bay, and then, from the crest of Greensky Hill the water-tower and the city spring into view.

OLD SETTLERS WILL MEET AT BENZONIA

The 35th annual meeting of the Old Settlers' association of the Grand Traverse region will be held Wednesday, June 21, at Benzonia, says the Traverse City Record. The people in and near that place are alive with enthusiasm for the event and that section will surely be well represented. Equally strong is the interest shown in other sections of the region.

Plans are being made to arrange for automobile service to Benzonia. The trip is by no means a hardship, as it is but an hour and half run from here. Those preferring to go by train can leave here on the 6:40 morning train, leaving Benzonia at about 4:00 o'clock on the return trip. W. L. Cate of Benzonia is president, and W. S. Anderson of Traverse City, secretary, and if information is wanted on any point, the inquiries should be addressed to Mr. Anderson.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powders. Get at the root of the trouble and thoroughly cleanse the system with a treatment of Dr. King's New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, adults and aged. Go after a clear complexion today. 25c, at your druggists.

LOCAL AND PERSONAL

The Gelken tug Caroline is hauled out for minor repairs to her hull.

"Boulder Farm" (Miss Martha Wilson) has received a new Ford truck.

Robbin Merriam, who spent the winter in Oklahoma, is home again.

Oswald Eider, of Chicago, is here visiting his sister, Ola Eider, and friends.

A large new band organ was installed at the roller skating rink last Saturday.

"Are You a Mason," featuring John Barrymore. At Majestic Theatre, Tuesday, June 13.

V. E. Shwab, and family, of Nashville, have arrived at their cottage on the Belvedere side.

Capt. O. E. Wilkur left Monday night for a few days' visit with friends and relatives in Chicago.

Mrs. J. F. Wilson, of St. Louis, Mo., is visiting her sister, Mrs. Kellner, of Michigan avenue.

Chas. Whitford, a Charlevoix pioneer, who spent the winter in the West, is here again for the summer.

Wm. Finucan, Jr., of Cheboygan, spent two days this week under the parental roof in this city.

Mrs. J. L. Crane and Miss Helen Crane leave for Chicago Wednesday evening to visit relatives and friends.

A. T. Stewart was again a visitor Monday. He came this time to plant a few thousand baby black bass in Twin Lakes.

The Steamer Illinois arrived from Chicago Sunday night, returning from the straits, south bound, early Tuesday morning.

The Congregational Sunday school will have its annual basket picnic next Wednesday. Full particulars will be given Sunday.

A large delegation of East Jordan Pythians visited Charlevoix lodge last Thursday night, conferring the third degree on two candidates.

Next Sunday is Children's Day. Appropriate exercises will be held by the Congregational Sunday school at the morning church hour.

The St. James tug McCann came over last Thursday and went to Oyster Bay to look up the matter of raising the wreck of the steamer Beaver.

Will Driggett, Jr., who has a good position in the Ford works, Detroit, was married at the home of the bride's parents, East Jordan, last Thursday, to Miss Cleo Thorn.

The first freight to be shipped over the new four million dollar Chicago municipal pier was a car-load barrels of lime for Charlevoix, part of which came on the Missouri Saturday.

Ed. Seaman last week bought the Traverse City roller skating rink, and will open it Saturday. Mr. Seaman recently sold his interest in the Charlevoix rink with Hazen Hurlburt as manager.

Mr. and Mrs. Nicholas R. Wall, of St. Louis, have taken the Crane residence, on Park avenue, for the season. Mr. Wall is one of the pioneer members of the Charlevoix Summer Resort Association.

General Passenger Agent Wolfenden, of the Pere Marquette, came up on the first resort special, which arrived Saturday morning. Mr. Wolfenden says the number of passengers was double that of the first train last year.

Children's Day will be observed at the Congregational church next Sunday at the morning service, 10:30. The children of the Sunday school will present an especially choice program, and the Cecilians will sing. The parents and the general public are cordially invited.

The steamer Missouri arrived from Chicago Saturday morning on her first northern trip of the season. Capt. Geo. Johnson, last season master of the Missouri is this year in command of the Missouri. Capt. Bright, last season in the Missouri, goes in the Minnesota on the Chicago-Buffalo run.

Petitions are in circulation in this city and vicinity asking the legislature to make the township instead of the county the unit in local option elections. It should require no great amount of intelligence to see in this move an effort on the part of the liquor interests to capture a line of dry trenches. Don't let them fool you.

"Carrying coals to Newcastle," Barring one small cargo of pine lumber imported from Canada by the Charlevoix Lumber Co. several years ago, the first cargo of lumber shipped into this port was a load of hemlock brought in from Harbor Springs last week by the Schooner Rose Belle, for the same concern.

The new aerial story now begin in the SNYPOSIL—"The Auction Block"—by Rex Beach, should engage the special interest of Northern Michigan readers, as the author, now one of the most distinguished novelists of his day, was Born twelve miles south of Charlevoix, and, up to his twelfth year, lived near Atwood. It will be of special interest to the editor of this paper, as, at his home, Rex was frequently a guest with his mother. The writer often trotted him on his knee.

Mr. and Mrs. John Clarke spent the week end with Mrs. Clarke's parents, near Ellsworth.

The Royal Oakes spent a pleasant evening at the home of Clyde Smith Thursday, and enjoyed a potluck lunch.

The I. T. class attended the Epworth League social at the M. E. church in Charlevoix Monday night and report a great time. George Block and Miss Shapton chaperoned the crowd.

Mrs. Wm. Burns entertained the Ladies' Bible class Wednesday afternoon. The class voted to pledge $5.00 toward the painting fund. Very dainty refreshments were served by the hostess.

Twelve ladies being present. At six o'clock Mrs. Burns had as guests for tea, the Mesdames Peter Block, Wm. Shapton, George Ager, Edmund Shapton and Lewis.

Miss Lottie Ager was hostess to her S. S. class Tuesday afternoon. The girls enjoyed the games, and refreshments were served on the lawn. The class will meet in two weeks with Beth Bennet.

Jane Lewis visiting friends and relatives in Boyne City this week.

Miss Barkley has been secured to teach the Clarke school for the remainder of the term, to fill vacancy caused by the resignation of Mr. Hilliard.

Mr. and Mrs. Will Burns motored to Petoskey Sunday and spent the day with relatives.

George Willis, of Barnard, and Miss Charlotte Hall, of Charlevoix, were quietly married at the Baptist church by Rev. Vineyard, Saturday evening. They were attended by Mr. and Mrs. Henry Ager. A host of friends join in congratulations and best wishes. They will make their home with Mr. Willis' parents for the present.

(Received too late for last week's issue.)

The Misses Dorothy Ruttle and Louise Lewis attended the Northern Michigan Field Meet at Boyne City, Saturday.

The Royal Oakes will be entertained at the Clyde Smith home this week, Thursday.

Mr. and Mrs. Jerome Cole and Harold, former residents of this place, are enjoying an auto trip to Three Rivers, Mich.

Miss Ethel Shapton arrived home Saturday, having spent several weeks in Flint.

Laurence Bess is the happy owner of a new ford.

Messrs. Peter Block, Joe Clarke, Henry Block and Aubrey motored to Glen Haven Sunday.

Leslie Arnold, of East Port, is now employed on the Courtney farm.

Debt World Owes to the Press

In normal times, under ordinary everyday conditions, the press has the immense advantage, its facilities are incomparable. It avenges the whole world and every day keeps alive in us a sense of common interest in the affairs of our community.—Dr. Albert Shaw.

Cooking is a Pleasure---

when you cook with a

New Process Oil Stove.

A New Process Oil Stove will simplify the cooking question. They are so easy to use, so clean, so safe, so economical and reliable that all the old time stove worries are banished. No hot summer kitchens. The New Process is ready when you want it—cook to give as much heat as you want, right where you want it—in the cooking, not out in the room. Heat is always under perfect control. Costs less than a half cent an hour per burner. You can keep one or all burners at an intensely hot flame or nicely simmering. Heat is easily regulated. The oil supply is automatically constant. The glass reservoir holds one gallon of oil, you can easily see at all times the amount of oil in the reservoir.

A sale of a New Process Oil Stove means a satisfied customer.

BRITAIN CLAIMS GERMANS LOST 18 WAR VESSELS

Admiralty Says That Statement Issued by Berlin Government is False.

GRAND FLEETS IN ACTION

Kaiser Alleged to Have Lost Two Battleships, Six Cruisers, Nine Destroyers and a Submarine in Great Naval Battle.

Berlin, June 5.—Replying to British reports that several German dreadnaughts and battle cruisers were destroyed in the sea fight off Skagerrak, the German admiralty officially reiterated that all the German losses had been announced.

"No German naval units were lost except those mentioned in the official communique," says the official statement.

The communication adds that no Zeppelin was lost during the battle.

London, June 5.—A statement issued by the British admiralty confirming previous accounts of the battle between the British and German fleets reiterates that the German accounts of the German losses are false, and that, although the evidence is still incomplete, enough is known to justify stating that the German losses were greater than the British, "not merely relatively to the strength of the two fleets but absolutely." It is disclosed the Germans lost 18 warships.

There is the strongest ground for believing the statement adds, that the German losses include two German battleships, two dreadnaught battle cruisers of the most powerful type and two of the latest light cruisers, in addition to smaller craft, including a submarine.

Admiral Beatty, it is declared, also returned safely to port and is the hero of the great conflict. In the face of overwhelming odds he made a stand-up fight until Jellico came to his rescue. Admiral Beatty's wife is a daughter of the late Marshall Field of Chicago.

The first reports of the heavy loss of life have not been revised. Great Britain mourns for more than one of her best seamen, and the whole nation is oppressed with sadness, which is reflected in the faces of all the people of London.

Rear Admiral Honorable Horace Lambert Hood, second in command to Vice-Admiral Sir David Beatty, and Captains Sowerby, Cay and Prowse were lost, with many others whose names are not yet known.

Seamen Tells of Battle.

On the East Coast of England, June 5.—The following story is told by a seaman from one of the battleships which shared with the battle cruiser squadron in the severest fighting in the Skagerrak engagement:

"The first warning came just after three o'clock in the afternoon, when we got the order which sends every man to his post for action. Then there was a very trying time of waiting. At last the word came round that Admiral Beatty's flagship, the Lion, which was leading our line, had signaled that the enemy was in sight, and it was not many minutes after that the Lion fired the first shot.

"It was at very long range, but we were going at full speed and gradually getting nearer the German line. Presently clouds of our ships joined in the firing and then for five hours we were at it hammer and tongs. We were shaking our guns nearly all the time. Most of the fighting was done at a range of about 15 miles and it was deadly.

Gun Shells Disagreeable.

"The Germans outnumbered us, but that would not have mattered if they had not also had the benefit of the better position. For a good part of the battle the sun made it difficult to sight our guns on their ships. They could see us, but we could hardly see them. Shells dropped around us like hail. Some hit us, but luckily none did vital damage or even put a gun out of action. Several dented our armor and one plate had a dent six inches deep, but without a break in the steel.

"The really disagreeable thing was the gleaming steel shell sent out from our guns. However, we came through the battle with only a few men killed and wounded.

Saw Ships in Flames.

"I saw two or three other ships burning. I believe the Invincible was one of them. I also saw the Queen Mary blow up suddenly. Our destroyers managed to take up some of the men from the lost ships, but they themselves were fully occupied in dealing with the German destroyers and screening the bigger ships of our fleet from torpedo attacks.

"The Germans may have been accompanied by Zeppelins, but personally I saw none. If the airships were scouting they did not seem to have given word of the approach of our British main battle fleet. When our big guns did come up about four hours after the fight started the Germans had a taste of what it is to be outranged. They did not like it and turned and ran for the shelter of their mine fields and harbors. In less than half an hour after the arrival of our battle ships the pitched battle was over."

Sustenance in Nettles.

Nettles good human food? Of course! They have been known as such immemorially in thrifty Switzerland and other central countries. There is no better trial to splash in the whole vegetable kingdom. And the nettle could to be utilized. It does so abound. It is the one weed, almost the only one, that grows in all countries under the sun, so say gardeners who fight it year by year and have never taken the right weapon of cutting it.—London Chronicle.

COUNCIL PROCEEDINGS

Council Chambers, June 5, 1916.

The common council for the city of Charlevoix met on the above date, Mayor Ross presiding. Aldermen present: See, Paddock, Cartier, Hiller, Gelken and Benton. Absent: None.

Minutes of last meeting were read and approved.

Moved by Ald. Gelken, seconded by Ald. Hiller, that the druggist bond of Frank Metcalf be accepted as presented. Motion carried by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. See, that the electricians bond of Wood Bros. with the Aetna Accident and Liability Co. of Hartford, Conn., be accepted and approved. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. Paddock, seconded by Ald. See, that the Workingmen's Compensation policies be referred to Finance, Purchasing and Printing committee, with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller and Gelken. Nays—Benton.

Moved by Ald. Paddock, seconded by Ald. Benton, that matter of electricity for Argo Milling Co. be referred to Electric Light and Water committee, to report in full at next meeting. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Ald. Cartier, seconded by Ald. Benton, moved the adoption of the following Resolution:

Bridge Street Paving, South Terrace Paving District No. 15.

Resolved by the Common Council of the City of Charlevoix, that the roll of special assessments made by the Board of Review, covering the purpose of defraying that part of the cost and expense of the improvement should be paid and assessed upon the lands for the grading and paving with oil macadam on the South line of Bridge Street, from the East line of the north line of East Garfield Avenue thirty-five feet, and the South thirty-five feet thereof, covering said lots, blocks, parts of lots, walks, sewerage and approaches, be received and filed in the office of the City Clerk and be confirmed.

Resolved further that Friday, the 23rd day of June, A. D. 1916, at one (1) o'clock in the afternoon be and it is hereby appointed and set apart for the hearing of all persons who may wish and desire said assessment at the Council Room.

Resolved further that the notice of filing of said assessment and of the time of the City Clerk and the time of the meeting of the common council and of Knowing as above provided, be given for publication for ten days in the Charlevoix Sentinel, a newspaper of said city as prescribed by section thirty-four of chapter twenty-four of Act No. 215, Public Acts of 1909, the Act to Provide for the Incorporation of Cities of the Fourth Class, and that the same was adopted this 5th day of June, A. D. 1916.

Attest: ANDREW ROSS, Mayor.

CHARLES H. KINSEY, City Clerk.

Resolution adopted at a regular session of the common council this 5th day of June, A. D. 1916, by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

Moved by Ald. See, seconded by Ald. Paddock, that the Finance, Printing and Purchasing committee be instructed to borrow $6,000.00 for thirty days at lowest possible rate. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Gelken and Benton. Nays—None.

The Finance committee submitted the following report: Having examined the following bills, report the same correct and recommend that they be allowed out of the several funds as herein stated:

The Golden Hope

By GEORGE E. COBB

(Copyright, 1916, by W. G. Chapman.)

"Where did you get me?"

"Outside of the Dew Drop, tossing your money to a crowd of loafers and bragging that you had come back to Greville to show people how it's done."

"That's me!" observed Rufe Glidden, sitting up in bed and staring curiously about the dainty orderly room he was in. "And you took me in, the Good Samaritan, eh?"

"I was sorry for you, Rufe, and I didn't forget that you gave me a grub stake five years ago, when you left Greville."

"Forget that!"

"I never have. The claim, low grade ore, that I staked out for you, a living back to the family in the East, and when my kid died I brought my daughter and the little ones out here. I've saved two thousand dollars. When I double that, I'm going back to the old home town, buy a modest little business and live on the kids. Breakfast is ready."

"I've got quite much appetite," said Rufe, and as he sat up about as he said it. Then, left to himself, he got up and dressed. His first move was to search his coat. Yes, there was a pipe for the missing stem! He regard d the dirty stuff glutinally. Then his eye chanced to rest upon the big box opened. A dozen dainty female toilette accessories showed. A delicately embroidered sachet sent out a sweet perfume. Beyond the closet door a pair pretty dress showed. The man observed. An odor of sanctity seemed to spread to his manliness.

"Hm-m-m-m!" he mused aloud. "she gave it up to me! Hah! they came to know me better and to see the good kernel! Through!"

He gave the door flask a violent fling through the open window, its contents following, some wonderfully pretty effects in less expensive designs. They are patterned after useless in organic edition that are very flimsy and beautiful. One of these crepe designs is shown in the picture, worn over a petticoat of flowered taffeta. It is made with a skirt of plaited crepe and blouse bodice, with shawl drape of wide shaded lace. A big rosette-bow of satin ribbon, with ends a half yard long, is chosen in a color to match the color prevailing in the neighbor. Many pale green, rose, blue, and pink are liked best, and some of the lavender and orchid tints are exquisite. The color is chosen with reference to the petticoat, or the petticoat with reference to the color.

In the picture a pretty cap matches the negligee in color and is made of crepe and lace in the crown. Narrow ribbon is used for a ruffle and band trimming. Silk stockings and boudoir slippers of satin or ribbon finish a costume as alluring as any the wearer is privileged to own.

When Planning for the Negligee

Boys' Rompers in Stanch Fabrics

STORIES from the BIG CITIES

Revolutionary Army Huts Uncovered in New York

NEW YORK—Hundreds of New Yorkers gathered about an excavation near Two Hundred and Fourth street, two blocks west of Broadway, to watch Reginald F Bolton and four associates unearth relics of the Revolutionary war from huts used by both British and Americans 140 years ago.

The searchers had uncovered 47 huts. A great variety of utensils, coins, buttons, and other articles were recovered. In a cache at the side of a squat-stone fireplace in one of the huts were found 12 regimental buttons of the Fifty-second British Regiment of Foot, now the Oxford light infantry. The buttons are of pewter with steel eyes and gilt edges, and are well preserved. Mr. Bolton thinks some soldier was saving them to take home to England, when the fortunes of war separated him from his knapsack.

Mr. Bolton and his associates are primarily seeking material for the restoration of the old Dyckman mansion, one of the huts will be reconstructed at the rear of the house and will be made historically correct. Many of the articles found in the excavation will be placed in it.

The tops of the huts are almost level with the slope of the hill which overlooks them. The huts are about twelve feet high, said, Mr. Bolton, and were occupied in 1776 by the American army under Gen. William Heath, and later by Hessians and English. Many Hessian coins have been recovered, a number being dug up recently. Among the relics are some from the Coldstream guards, Seventeenth Leicestershire foot, Fourteenth Buckinghamshire, Twenty-ninth Worcestershire, Twenty-eighth, Fifty-second, and Forty-second Black Watch regiments, Invalid Hilling regiments, and others.

Asked to explain why the huts of 140 years ago were covered with from four to seven feet of earth, Mr. Bolton said that when the British had to leave them they set fire to the huts, which had been built into the side of the hill so that the roofs were on the ground level the back was air or seven feet below the surface of the hillside. The wooden roofs and sides burned and fell upon the stone foundations, leaving a hole where each of the huts had stood. It is his theory that after the war ended the Dyckman family carted earth into the holes on the hillside, filled them level, and planted an orchard over the camp site. A number of ancient apple trees grow now over the huts that have not been excavated, and tree roots have been found in several of these dug open. Mr. Bolton said the presence of the stone foundations caught earth washed down the hills by rain and tended to put the huts farther underground.

Suffrage Orator Yielded to a Chicago Newsboy

CHICAGO—There was a conflict the other day between suffrage and commerce, and commerce won. It was chiefly a matter of vocal supremacy. Miss Elsie Hill of the Congregational Union for Woman Suffrage staged a street meeting at Michigan avenue and Van Buren street. She took a position on the running board of an automobile, which stood beside a news stand, and the following dialogue ensued:

At the present moment the suffrage situation is very . . .

"Just out. Score 1 bill same . . . opportunity, no bother. Lucky Y. Sherman and the other politicians . . .

"Pooper, latest scoopes . . .

. . . are anxious to declare themselves with what the voter wants, and the Congressional situation is . . .

"I got 'em. I got 'em. I got 'em. The latest" . . .

. . . more than anxious to let them know what the people . . .

"All about it. Pooper, the latest . . .

. . . really want. The women are will . . .

"Forsaw'journ' mer'cin." . . .

. . . to make any sacrifice, to help the cause of political . . .

"Yo!, Yo!, Yo!, the latest, the latest."

The crowd crowded around the news stand, and the newsie lost his temper. He commenced to push the people away from the stand.

"Are we interfering with your business, sir?" said one.

"D'ye see me selling any pollpers?" returned the newsie.

"I believe." Miss Hill continued, "that I am interfering with this man's business. I am going to move down out of his way."

She took a position on the skirt of an electric and continued her speech. As she spoke the other members of the organization sold the journal which the Congressional union publishes. They carried yellow, white, and blue banners.

Unemployed in Gotham Are Mighty Particular

NEW YORK.—There is plenty of work here for the unemployed, but the trouble is, according to the city's employment bureau, there are too many men looking for white-collar jobs. While the girls expect to break into offices dressed for afternoon tea. There are men who prefer to do chauffeur work in the overalls and sail right into old man work, just as I may expect to give him a regular run for his money. They all expect to land jobs in one jump in a reasonable time. It is the case of the times. Everybody's been reading about the money being cleaned up down in Wall street in the last year and only a few are willing to consider employment that doesn't carry a $1000 salary, soft rugs and luxurious office hangings. Chippendale desks and things. An old-fashioned job requiring jumpers, dirty hands and a lunch pail has about the same appeal as a hard bump on the funny bone.

All New York is running for the big stakes. The entrants in the little overnight selling events could be easily counted on the extended digits of a man with his fist closed. It's a fat job or no job—a good, clean, easy-going job with a salary that you would have to have a moving van back up to the office door to cart away. If the price cuts and cuts that used to bring the unemployed on the run for four dollars a week have all disappeared with the times they are being left for the janitor to sweep out in the morning cleanup. None of the little jobs are left for Knickerbocker.

The same goes for women out of work. The heads of the public employment bureau say that extra working girls are too much impressed with the idea of breaking into offices all dolled up in the latest fashion—short skirts, high heels, etc., just as though they were going to an afternoon tea. In some of these few handicaps the city bureau is widening its activities. Employers are sending in for help and good jobs are being obtained for those who show a desire to perform real work.

Alabama Bailiff Orders Bees Arrested by Name

BIRMINGHAM, Ala.—Becoming involved in a dispute over a trivial matter by two citizens of Montgomery county struck a snag in the law when a swarm of bees owned by one of the men left the other's orchard. This resulted in a street meeting at Midnight avenue and Van Buren street. She took a position on the running board of an automobile, which stood beside a news stand, and the following dialogue ensued:

At the present moment the suffrage situation is very . . .

"Just out. Score 1 bill same . . . opportunity, no bother. Lucky Y. Sherman and the other politicians . . .

"Pooper, latest scoopes . . .

. . . are anxious to declare themselves with what the voter wants, and the Congressional situation is . . .

"I got 'em. I got 'em. I got 'em. The latest" . . .

. . . more than anxious to let them know what the people . . .

"All about it. Pooper, the latest . . .

. . . really want. The women are will . . .

"Forsaw'journ' mer'cin." . . .

. . . to make any sacrifice, to help the cause of political . . .

"Yo!, Yo!, Yo!, the latest, the latest."

The crowd crowded around the news stand, and the newsie lost his temper. He commenced to push the people away from the stand.

"Are we interfering with your business, sir?" said one.

"D'ye see me selling any pollpers?" returned the newsie.

"I believe." Miss Hill continued, "that I am interfering with this man's business. I am going to move down out of his way."

She took a position on the skirt of an electric and continued her speech. As she spoke the other members of the organization sold the journal which the Congressional union publishes. They carried yellow, white, and blue banners.

YOUNG WOMEN MAY AVOID PAIN

Need Only Trust to Lydia E. Pinkham's Vegetable Compound, says Mrs. Kurtzweg.

Buffalo, N.Y.—"My daughter, whose picture is here with, was much troubled with pains in her back and sides every month and they would sometimes be so bad that it would seem like acute inflammation of some organ. She read your advertisement in the newspapers and tried Lydia E. Pinkham's Vegetable Compound. She praises it highly as she has been relieved of all these pains by its use. All mothers should know of this remedy, and all young girls who suffer should try it."—Mrs. MATILDA KURTZWEG, 539 High St., Buffalo, N. Y.

"Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

If you know of any young woman who is sick and needs helpful advice, ask her to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. Only women will receive her letter, and it will be held in strictest confidence.

Your Liver Is Clogged Up

That's Why You're Tired—Get of Sorts —Have No Appetite.

CARTER'S LITTLE LIVER PILLS will put you right in a few days. They do their duty gently but thoroughly. Biliousness, Indigestion and Sick Headache stand without a rival. CARTER'S LITTLE LIVER PILLS. SMALL PILL. SMALL PRICE. Genuine must bear Signature

Brent Good

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Relieve Feverishness, Constipation, Colds and worst disorders of children. Used by Mother Gray, nurse of Children's Home, N.Y. Sold everywhere, 25c. Sample mailed FREE. Address Mother Gray Co., LeRoy, N.Y.

HOYT'S HEADACHE AND NEURALGIA COLOGNE

A luxurious and refreshing remedy that quickly relieves headache, neuralgia, nervousness, insomnia, fatigue, and all pain. Insist on Hoyt's. Sold everywhere.

HELP THE EGYPTIAN WOMEN

Christian Missionaries Are Doing a Wonderful Work in the Country of the Pharaohs.

For the girls of Egypt the schools open the door into a wider and bright world. But this is not possible for the women in the homes, hence the gospel message must be brought to them. And this is being done by the missionaries, married and unmarried, and by the more than fifty Egyptian and Syrian Bible women under their direction, who go from house to house, teach the women to read the scriptures, give a simple message suited to the understanding of the women, or conduct simple prayer meetings, and in every way possible try to reach their hearts with the message of salvation. The wives of the Egyptian pastors, and the teachers in the girls' schools are also doing a good work for the women in the various congregations. The doctors and nurses in the hospitals of the mission are doing much to alleviate the physical suffering of the women and children, and time permits them in the little weekly prayer meetings and monthly maternal meetings furnish instruction and training in Christian work for the members of the church. In these various ways faithful effort is being made to reach the salvation and uplift of the women of Egypt.—Rev. C. C. Adams.

When Mr. Wibbles Scored.

Really Mr. and Mrs. Wibbles were very happy together, except when an argument arose. Then Mrs. Wibbles contradicted her husband firmly and as a matter of principle. One evening they were discussing the question of superiority of man over woman, and the lady's temper was heated. "At any rate," said her husband pacifically, "there is one good, sweet and perfect thing which a man can have, but which is barred to woman!" "Never!" cried Mrs. Wibbles passionately. "I don't!" "You also asked courtesy. What do you mean?" "A wife," was the calm retort.

Nice Distinction.

Bert, who was fond of a young man who was home on his vacation from a medical college, listened a bit hard quite severally, and his mother told him to go over and let Jack—the student—know all. The little fellow said: "Shall I call him doctor, or just Jack?" Then quickly he added: "Oh, I know, if he has on an old clothes I'll say Jack, but if he has on his good clothes and is all fixed up, then I'll say doctor."

Thief Shows Originality.

Thieves are not common in Alaska, but when one does appear he generally exhibits an originality of conduct difficult for less accomplished folks to comprehend. As an instance of this characteristic a thief broke into a store at Douglas recently and stole all the tinfoil, as provided for pioneer dogs, thus subjecting every canine in town to the danger of being taken up by the dog catcher.

Rufe and Ward Visited the Abandoned Diggings.

watched it shatter to pieces on the ground. "Then he went down and John Ward was reading a newspaper.

"Has been, old friend, give me a scrap of paper and a pencil, will you?"

"After breakfast, yes."

"No, too, impatient." Rufe peremptorily. His hand was shaking, as the scratches recorded. He dashed off a little scrawl.

"There," he said, signing his name to the pledge—"the first I ever gave and the last, for it shall last for all time. Two witnesses, you and—"

"My daughter, Mr. Glidden," interrupted Ward, ceremoniously and gravely as a charming young girl entered the room. "Rose, you have heard me speak of my best friend."

"Make a time father," was the earnest reply and the grave face of her grateful welcoming eyes sent a thrill through the object of her interest, and as well made him shamefaced.

"He is a good friend to everybody but himself. I wish you would save you, Rufe!" he challenged lightly. "Rising to meet the challenge, the daughter, and here is a little doctor business he wants you to witness with me."

"Yes," burst forth Rufe impressibly, as the fair girl signed her name, "and if only out of respect to you, I never scorn to be a witness to a good deed."

"You are a good man," she said, simply and severely.

Rufe was charmed with the comfort and welcoming atmosphere of the little home. It was not until noon that he left its peaceful, soaking influence. When he left the house he traced mingled anxiety and tenderness in the tones of Rose, as she said.

"You have quite captivated the two children. They will be expecting you home early to tell them some more of those exciting stories of years. Mr. Glidden."

"I certainly shall not disappoint them," assented Rufe, and his heart beat fast at the underlying token of genuine interest on the part of a new woman.

Rare enough, long before dark he came down the road from the town. His eye was bright, his step elastic. He seemed like one buoyed up by some new energy and interest in life.

"My old friends had programmed a sort of a reception for me in the town," reported Rufe, after a pleasant evening with the little ones, "but I shut them off on the happy water end of it. Now then, friends—for you are that—I've got some business to talk over with you. I took a good deal surprised when I got inquiring around, to find that the Golden Hope never had petered out."

"Ten, two years ago," nodded Ward. "The vein ran short—not until they had taken out a little fortune, though."

"So I hear," said Rufe, "and I found the runway going to ruin and the stamp mill rusted and broken. Do you know that the old owner of the mine offered it to me for a thousand dollars?"

"I know it's gone begging, and no one would touch it at any figure," remarked Ward.

"Well, I'm going to buy it," announced Rufe. "Don't think I've gone out of my senses," he added, "Will you stake me?"

"You mean, will I loan you a thousand dollars?"

"Just that."

"Rose, bring my bank book," directed Ward, without a moment's hesitation.

"Not so fast, dear old partner!" interrupted Rufe. "The money will do tomorrow. I want you to help me—will you do it?"

"You mean work with you?"

"Yes."

"Rufe old friend," spoke Ward, "I wouldn't give five cents for the Golden Hope. You're buying it for a thousand dollars. I never knew you to make a miss in the mining game. I don't know your plan, but I do know that you know your business. You use. With you for the leader, I follow."

"Thank you, Ward," replied Rufe with palpable emotion—"you shan't miss it."

The Golden Hope mine was located out of the traversed trails. For a solid month every day, quietly and keeping their own counsel, Rufe and Ward visited the abandoned diggings. Every day Rose brought them their dinner. What a new glorious life—what a mighty throbbing secret those three talked over, worked over, dreamed over! And every day the two ardent hearts undergoned one added tie. Rose, the little doctor of the week Rufe-Glidden drove out of town with a hired wagon and two horses. He returned, with a cover over the heaped-up wagon box, in triumphal Welsh fashion. A crowd gathered. The rumor spread like wildfire that Rufe Glidden had found a chest of pure gold at the old mine.

"By gold, boy," he admitted boyishly—"but it came from no pocket. Can't you guess what I've been doing lying before your eyes in the clear open ever since the Golden Hope closed down?"

And then he explained:

"You see, the careless old workers let grease drop onto the quicksilver plate, and the corrugations let about as much gold slip into the tailings as they really got. We've simply worked the dump—and panned it, found by pound. If we don't get a clear fifty thousand dollars out of the clean-up, I'm a tenderfoot!"

He was a tender lover to Rose, and that was all of his life, and he went back to the States her proud, loyal bridegroom.

"The treasure we found in the Golden Hope," explained John Ward, when he showed his new neighbors a minted bar of the products of the tailings of the abandoned mine.

"The treasure worth more than all the wealth in Gotham, Rose ever held!" added Rufe Glidden, his arm encircling bonny, contented Rose.

New Use of Ostrich.

The return of ostrich feather trimming was so entirely confined to the use of small lightly curled tips that for a time it was thought no other variety would be used, but an exhibit of new hats for summer wear in New York just before Easter had a number of plumed trimmed hats. The feathers were very broad and full and slightly curled and the colors were light. Many plumes were encountered with right little bunches of flowers all along their length and one had a broad soft crêpe, had a feather held around its edge like a fringe. The flowers on the hats were clipped and in their place was a spray of lilies of the valley.

Satin Sports Skirt.

The vogue for satin sports skirts is on the increase, but it is only fair to be warned that this sport skirt will bear but a limited amount of cleaning and it does not come through the wash with distinction. Upon the whole it is a very expensive sports fabric in questionable taste.

Shoes of Ostrich Leather.

If one has nothing of more importance to do, the chambray and gingham, everyday play clothes for the little boy of five or so may be made at home. But clothes of this kind are manufactured, as well and so cheaply that there is no economy in doing the work at home.

In buying material there is economy in getting enough for several suits and cutting them out at the same time. Plain and striped or checked patterns are used together, as shown in the illustration. The pieces left after the garments are cut serve to make the pockets, cuffs, collars, bands etc., and those of the plain fabric are used on the checked or striped suit, or those of the checked on plain suits.

Just now suits made with plain pants with striped and belted Russian blouses are much the fashion for little boys, worn with leather belts in black. Bright red, blue, green or brown make the stripes against a white unbleached ground, demonstrating that even the tags of the youngest athletes take some one of the fad for sports clothes. But the stands smallness of old and tried fabrics, like those shown in the picture, always give these tots a place in the collaboration of manufacturers.

The rompers shown at the left of the picture may be had in chambray, coarse linen or heavy cotton weave. The body and pants are set together at the front under a belt of checked gingham. The belt buttons at one side and the pocket and cuffs to match it finish this useful garment neatly. The suit at the right shows the regulation sailor blouse with a sailor collar of white linen, the blouse being finished with a band of the checked material. The pants are of the same material as the blouse, and are finished with a band at the knee. The cap is of the checked material.

Tailor Suits for Little Boys.

Tailor suits for little boys are made of the same material as the men's suits, and are cut on the same lines. The coat is single breasted, with a roll lapel, and is fitted to the boy's form by a few seams in back and side seams. The sleeves are cut with a slight curve to fit the arm, and are finished with a band of the material. The pants are cut with a slight flare at the bottom, and are finished with a band at the knee. The cap is of the material, and is a plain affair, with a visor.

Unemployed Women Are Plentiful.

**Women who are looking for work in the city of New York are not the only ones who are unemployed. Men who are looking for work are also in the same predicament. Women who are looking for work

DOINGS OF THE VAN LOONS

And Angeline meant so well, too

Notice!

Burnett Insurance and Real Estate Agency business heretofore conducted by the late Mr. A. T. Burnett will be continued under the management of Mr. E. A. Burnett. Thanks for past favors, and a continuance solicited.

E. A. Burnett.

Announcement.

I hereby announce myself as a candidate for the office of county clerk, on the republican ticket, subject to the rulings of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. GRAFF.

Copper-Producing States.

Alaska and nineteen states of the Union produce copper.

CANAL TO OPEN IN THE FALL

Major General Goethals Makes Statement While on Way to New York.

Kingston, Jamaica, [illegible]—Major General Gorthals arrived here on his way to New York. He said he expected the formal opening of the Panama canal to take place next fall. The West Indians who helped build the canal and wish to return to their native land, he said, will be repatriated.

WILL MY CHILD TAKE DR. KING'S NEW DISCOVERY?

The best answer is Dr. King's New Discovery itself. It is a pleasant sweet syrup, easy to take. It contains the medicines which years of experience have proven best for coughs and colds. Those who have used Dr. King's New Discovery longest are its best friends. Besides every bottle is guaranteed. If you don't get satisfaction you get your money back. Buy a bottle, use as directed. Keep what is left for Cough and Cold symptoms.

WILSON URGES WORLD PEACE

Outlines Creed to Bring an End of World Wars in Address at Washington.

HINTS OFFER OF MEDIATION

Will Insist Upon Freedom of Seas as One of Principal Peace Terms—To Insist Upon Sovereignty of Small States.

Washington, [illegible]—President Wilson, in an address before the League to Enforce Peace, indicated in a guarded way that he is seriously considering the offering of his services as mediator in the European war and outlined to some extent the basis upon which he thinks the warring nations should make their settlement.

His statement was taken by many of those who heard him to mean that Mr. Wilson may in due time offer his services as a peacemaker on his own initiative instead of waiting until he has received a formal request to do so from one or more of the belligerents a point by which he has guided his attitude regarding mediation in the past.

America Must Take Part.

There were two sentences in the address which were taken to indicate the president's intention. They follow:

The death of the whole world now turns eagerly toward the hope of peace and there is just reason why we should take our part in the counsel upon this great theme. It is right that I, as spokesman of our government, should attempt to give expression to what I believe to be the thought and purpose of the people of the United States in this vital matter.

Our own rights as a nation, the privileges and property of our own people have been profoundly affected. We are not more disconnected look. The longer the war lasts the more deeply do we become concerned that it should be brought to an end and the world permitted to resume its normal life and course again.

Broad Principle of War.

Mr. Wilson laid down a broad principle of right upon which he would seek to have the world guided.

He first stated that "every people has the right to choose the sovereignty under which it shall live."

He asserted that the small states have the right to enjoy the same respect for their sovereignty and territorial integrity as the larger, and said that the world has the right to be free from every disturbance that has its origin in aggression.

Applying this to Europe, he, however, endorsed the idea of Belgium, the restoration of Belgium, the independence of Poland, and permission for the little states to select their own form of government.

Plans to Enforce Peace.

Agreement by the world league of nations to present any war in violation of treaty pledges or begun without submission of the causes to the judgment of the world.

President Wilson was introduced by former President William H. Taft who is head of the League to Enforce Peace, and many of the nation's most notable men heard him speak. Other speakers were President A. Lawrence Lowell of Harvard, Shaler Matthews, president of the federal council of churches, and Senator Henry Cabot Lodge.

"T. R." AT CHICAGO TONIGHT

Leaves New York as Climax of Campaign for Nomination.

New York, [illegible]—Col. Theodore Roosevelt left New York at 5:30 o'clock Sunday evening for the West, full of fight and determination to put every ounce of energy into the last lap of the long campaign which has been mentioned to obtain the nomination by the Republican national convention. He was enthusiastic over the demonstration staged at Sagamore Hill on Saturday, when 2,500 pilgrims demanded his leadership, and he was dismissed more than ever to carry the fight on to the end.

Colonel Roosevelt refrained from any direct statement on a third ticket and devoted his time to plans for his fighting tour of the middle West, which will begin at Chicago tonight.

Optimistic Thought.

Insolvency cripples a great spirit.

TIRES

Absolutely Puncturepoof GUARANTEED 6500 MILES

Buy your tires direct from our factory and save from 20 to 30 percent.

These tires are twice as thick through the tread as ordinary makes and are a combination of the best brands, such as Goodrich, Goodyear and Firestone. They are strongly built and reinforced by a new, superior method, making a finished product unequalled for hard usage and pleasure purposes. Used by individuals and business concerns.

Don't delay but order today and do away with your tire troubles. To introduce in your territory we offer the following prices:

30x3	$8.50	34x4	$17.25
32x3	10.75	35x4	17.50
30x3½	10.75	35x4½	22.50
32x3½	11.50	37x4½	24.50
31x4	14.25	36x5	25.25
33x4	16.25	37x5	27.50

All other sizes also furnished.

TERMS: Cash with order. Make remittance by certified check, draft or P. O. money order. When ordering be sure to state whether clincher, quick detachable clincher or straight side bead is desired.

For 5 days we offer 5 percent discount where two or more tires are ordered at one time.

PIQUA TIRE & RUBBER CO.
PIQUA, OHIO.

TELLS RIGHT WAY TO COUGH

Physician's Directions Would Certainly Prevent Becoming a Nuisance to Companions.

The following directions as to how to cough are given by a physician in the Journal of the Outdoor Life:

"Fold your handkerchief so that it is about five inches square. Place it flat in the right hand if you are right handed, and with this hand hold it tightly over the mouth. Press the hand on the mouth, as to hold it loosely over the mouth will not accomplish the purpose. Now instead of coughing and trying to muffle the sound in your throat or mouth, muffle it with your handkerchief. Practice it until a person ten feet away cannot hear you.

"The sound made in coughing is due partly to air passing over the vocal cords, partly to air going through the bronchial tubes and trachea, and partly to the resonance produced in the chambers above the trachea. This sound can be almost wholly avoided and the irritation to the lungs and air passages prevented by keeping the air passages open and letting your handkerchief do the muffling. Now instead of expelling 120 cubic inches of air at each expiration, you will expel a smaller amount, with more comfort to yourself and to those around you and with much less harm to your lungs."

GOOD FOR THE WILY EDITOR

Some Method in His Instructions as to How One Might Achieve Long Life.

The famous writer for the Belt Line series of yellow journals and author of monster stories and popular lectures, whose name was a household word, sat him down in response to a passionate demand from 4,000,000 readers and wrote the following:

MY RULES FOR LONG LIFE:

I am seventy five years of age and I am married and successfully gotten rid of four wives and never have had a day's illness. Anyone can do as I have done by observing the following rules:

Eat plenty of bananas.

Drink plenty of pure distilled bottled water between meals.

Wear linen underwear.

Rub the body dry with horsehair mitts twice a day.

Breathe deeply through any good breathing tube.

Don't worry.

Then, having sent a bill for advertising on the banana trust, the bottle trust, the linen underwear trust, the horsehair mitt trust, the breathing tube trust and the Don't Worry Publishing company, he went out to take a much-needed auto ride.—Life.

Announcement.

To the Electors of Charlevoix County:

I have decided to be a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and I respectfully solicit your support.

M. A. McDONALD.
Eveline Township.

Notice to Dog Owners

Pay your dog tax and avoid trouble. By order of Common Council.

F. S. BROWN, Dog Warden.

WANTED.—Girl to do general housework. Address 216 Park avenue.

First publication April 27, 1916.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Ernest Hutton and Bridget Hutton, husband and wife, of Hutton and Bridget, Copartners, conducting as Jolly Nobody, Appellants and Albert F. Bridge of the City of Charlevoix, Michigan, Appellee, bearing date the 3rd day of September, 1913, and recorded in Charlevoix county, Michigan, on August 11th, 1913 in Liber Forty-five of Mortgages on page 365, on which mortgage there is claimed to be due at the date hereof the sum of Twenty Thousand Five Hundred and Five Dollars and Sixty-Three Cents (20,505.63) principal and interest, and Fifty Dollars (50) attorney fees and Fifty Dollars (50) insurance premium, and no suit or proceeding having been instituted to recover the money now remaining secured thereby, or any part thereof; and

WHEREAS, default has been made in payment of the money secured by said mortgage, and the power to sell contained in said mortgage has become operative; and

NOW THEREFORE, notice is hereby given that by virtue of said power of sale and in pursuance thereof and of the statute in such case made and provided, the premises described in said mortgage, or so much thereof as may be necessary to satisfy the amount due as aforesaid, and all legal costs, charges and expenses of sale, including an attorney fee of Fifty Dollars (50) as provided in said mortgage, will be sold at public vendue, to the highest bidder, at the front door of the Court House in the City of Charlevoix, in said county of Charlevoix, State of Michigan, on the 15th day of June, 1916, at ten o'clock in the forenoon of said day of June, 1916, at ten o'clock in the forenoon of said day of June, 1916, at ten o'clock in the forenoon of said

THE FARMER'S TEN BEST BIRD FRIENDS

They are the night hawk, killdeer plover, chimney swift, bluebird, downy woodpecker, phoebe, chickadee, barn swallow, purple martin and chipping sparrow

By Edward O. Clark

PHOTOGRAPHS FROM U.S. BIOLOGICAL SURVEY

SENNINKNI American ornithologist recently was asked to name the ten most beneficial birds of the United States. Without a moment's hesitation he replied: Nighthawk, killdeer plover, chimney swift, bluebird, downy woodpecker, phoebe, chickadee, barn swallow, purple martin and chipping sparrow.

Having given the names of the ten birds over whose good deeds man should ponder the ornithologist said that the list is longer than any other bird lover could offer them, that work as hard or nearly as hard for man as those which I have named. However, 20 and 40 species there is small room for choice, but let the ten stand because the list perhaps cannot be improved upon."

Later the scientist wanted to hedge a little, but he said that there were some birds of prey which at least should have a place side by side with the familiars in orchard and garden to which he had given first rank. The cause of the birds of prey, however, has been pleaded before. The barn owl, the sparrow hawk and some others have been given their credit marks, but it is to be doubted, perhaps, if anything which can be said in behalf of a predatory one which occasionally picks up a chicken will serve to save its life when it is caught in the act of arrest. Not one of the birds in the Table of Ten is a thief. Honest, well-meaning, cheerful, and for the most part neighborly, they go through their lives working, which means eating, in order that man more fully may reap what he has sown.

It is admitted by scientists that some students of the habits of birds may dispute the accuracy of the list as it is given, but it is not likely that anyone who has watched the daily operations of these friends in feathers from nightfall to chipping sparrow will be able to prove that so much as one black mark should be entered on the daily records of their lives.

Fastidious as we shall know them. A bird is good or bad from the agriculturists' viewpoint according to its food habits. Not that this is a plain tale of the birds' bill of fare. It is likely, perhaps, for the sparrow hawk to eat of the tuneless ones, that the birds of the best habits of life are well known by sight to all Americans. The troubles that the bird protectors have found free almost wholly in the fact that the habits of birds are not as well known as the birds themselves.

It was Dr. A. K. Fisher of the Biological Survey who named the ten most useful birds. He is in charge of "economic investigations" in the Bureau of Biological Survey of the Department of Agriculture. In the bureau are best bird records, are known the agents from which in part read like the catalogues of a seed store and the collection like an entomologist. Dr. Fisher say of the birds that seeds and insects "form the chief of their food."

To go to the mammals for a figure of speech it has taken years of closest work and field work to separate the sheep from the goats. In the bird world there are many more sheep than there are goats, but the job of separation has been hard. In the little flock of best friends of the farmer there are only two birds which, perhaps, are not well known to all suburban dwellers. They are the killdeer plover and the yellow-billed cuckoo. The killdeer, which heads the list, is or ought to be known to everybody. Of course it is known at all and the manner by which it is known in the Northern states, has hurt it. Paradoxically, it might be said, "Give a bird a bad name and it will stick it." In the Southern states the mammoth is known as the bustard. In the fall and winter it is killed ruthlessly and to no purpose except that of so-called sport, for it is unsuitable for food, being tasteless.

Nighthawks are wholly insectivorous. They do no damage to crops. F. E. L. Beal, who has made field studies for the Biological Survey of the distribution of virtually all the commoner birds, says of the food of the nighthawk, "Tree bugs, moths, flies, grasshoppers and crickets are important elements of its food. Several species of mosquitoes, including the transmitter of malaria, are eaten. Other well-known pests consumed by the nighthawk are Colorado potato beetles, cucumber beetles, rice, cloverleaf and cotton-boll weevils, June bugs, bark beetles, squash bugs and moths of the cotton worm."

The killdeer plover is one of the noisy birds. Part of its Latin name is "Vociferus," which speaks for itself. While the killdeer ordinarily is accounted a good bird it is poor eating. The good that it does should save it from persecution, but gunners are not apt to discriminate, and so the killdeer frequently suffers. This bird lives in the open country. More than 95 per cent of its food consists of animal matter. The Sacred ibises, Florida, 57.56 per cent; other ibises, at spoonbills, rail, coot, clubbies, sora, gallinules, grebes, glossy ibis and two-winged flies, 94 per cent, and other invertebrates as crawfish, crabs, spiders, ticks, oyster worms, earthworms, snails, crabs and other crustacea, 21.12 per cent, vertable matter consumes 31.26 per cent of the total food, and is chiefly made up of weedseeds, such as smartweed, pigweed, knotweed, and nightshade. The alfalfa weevil, a new and destructive pest, has been proved to be a favorite food for the killdeer.

The chimney swift, almost always called the chimney swallow, although it is not a swallow at all, is sometimes looked upon as a nuisance because in the summer time it sets to make more or less of a racket in the chimneys leading from bedrooms in which lived folk are trying to sleep. This swift winged bird never lights upon the ground, it is building. Its only resting place is on sooty bricks in the dark interior of a chimney or on the inner wood of some hollow tree in a wilderness that knows no chimney. All of the swift's food is captured on the wing. It eats thousands of mosquitoes, gnats and other noisome winged insects. It hunts from daylight to dark, and all its hunting is in the interest of man. The swift gathers its nesting material while on the wing. It has a curious habit, while in flight, of dipping of the tips of dead twigs, and so quickly and neatly is the thing done that the eye barely can follow the operation.

The bluebird, with its "violet of song," is loved wherever it is known. Luckily bluebirds are prolific creatures, for about twenty years ago a severely cold winter made such inroads on the tribe that it was feared the birds might never come back into their own. They came back, and now there are as many as ever and they are continuing a warfare against man's enemies with no unofficial to the land to interpose objection.

The bluebird is given third place in the list of the ten most beneficial birds of America in order to be kind. Nearly nine hundred bluebirds met death so that the scientists might prove that they are useful to man. An examination of the stomachs of the martyrs showed that 42 per cent of the food consisted of insects and their allies, while the other 32 per cent is made up of various vegetable substances found in the stomachs of birds fed on "insect."

The chickadee appealed to Ralph Waldo Emerson. The bird has a philosophy of its own and Emerson recognized it. It stays in the north country all winter, for no cold can shackle its activities nor chill its cheer. Emerson met the chickadee on a blustery winter day and wrote:

Here was this atom in full breath
Hurling defiance at vast death;
This scrap of valor just for play
Fronts the north wind in wasteout gray.

A favorite food of the chickadee consists of the eggs of the two species of tent caterpillar moths which are among the most destructive of insects. In winter it eats larvae, chrysalids and eggs of moths, varied by a few seeds. The bird's bill of fare is made up for the main part of insects, nearly all of which are known to the farmer or fruit raiser as pests.

The barn swallow and the purple grackle, cousin swallows, are familiar to all dwellers in the country. There are five other common species of swallows found within the United States and all of them are of beneficial life. Swallows take all of their food, or nearly all of it, while on the wing. Virtually all of the insects which they destroy are either injurious or annoying, and the government scientists say that the number of the pests destroyed by swallows are not only beyond calculation, but almost beyond imagination."

Wordsworth might have asked the American cuckoo, as he did its European cousin, whether it was a bird or but a wandering voice. There are two fairly abundant species of cuckoos in America, the yellow-billed and the black-billed. Their habits are much alike. These two birds are ventriloquists. One hears their voices where they are not. The cuckoos thread their way through the tangles of branches, gliding after the manner of ghosts. The bird eats what most other birds disdain. It has a special fondness for the great hairy destructive caterpillars, and when it finds a nest of the tent caterpillars it will not move on until the destruction of the pests and their home is complete. The cuckoo's food habits are called the rain crow. It has no place as a songster, however, for it is not apt to be especially vociferous in the dryest times.

In the list of the ten best birds there is only one bird of the downy. These little birds nest in the current bushes, in the vines which climber over the porches of the houses which bound the dooryard domain. Sparrows are known as seed eaters, and this might carry an implication that they are destroyers of grain. Some of them are, but we have the scientists as authoritative food habits of the chipping sparrow, row, the bird which comes to your doorstep for crumbs, are all good. It has been written of it that it is "well worthy of the kindness and protection which it everywhere receives."

It must not be thought because six birds have been named as the best friends of the farmer that there are not scores of others whose daily work is for the good of man. The less excellent of the others strive with them throughout their short lives to work as well as they do, but for the good of man who too often, misunderstanding their intentions, becomes their persecutor.

SAFE FROM BARBED WIRE.

One of the most trying tasks incident to transfitting has been considerably lightened by the appearance in the British trenches of gloves made of a fabric which is said to be impervious to barbed wire pedals, says Popular Science Monthly. The fabric is made up into mittens, with the first finger and thumb separate. The fabric is waterproof and in addition the gloves are insulated for stripping electrically charged wires.

The same material is applied to the manufacture of sleeping bags, which, when opened, may be thrown over a barbed wire entanglement to allow a soldier to climb over the sharp points without injury. When made up into sleeping bags the fabric is strong enough to turn shrapnel splinters or even a bullet when it has lost part of its momentum. The interlining is antiseptic, so that if a bullet goes through it takes into the wound enough antiseptic wool to prevent poisoning.

The materials used in the manufacture of this remarkable fabric have been sedulously kept secret this far.

Everybody's Mission

By REV. HOWARD W. POPE of the Moody Bible Institute of Chicago

"WHY—we are now large a letter I have to write—and I have not time to write a long one," said Kitty.

Few people realize how much Christian work can be accomplished by letter writing. In some cases a letter is better even than a personal call. It can be read and pondered at one's leisure. Henry Clay Trumbull says that he was led to Christ by a personal appeal from a friend in a letter. What preaching and the ordinary daily work of a church work had not accomplished for him was done by a few sentences in a note. As he reflected upon what he had been to reason the importance of individual work for individuals, and all his life long he engaged in this form of effort.

A prominent business man in Worcester, Mass., Mark Cousens, once said that he would like to unite with the church. When asked how long he had been a Christian he replied that he had taken the step only a few days ago, and that he had been led to do this at the request of a lady who had written him on the subject. He said that sermons had not made much impression on him, but that the letter from a person whom he hardly knew appealed to him so strongly that he could not resist it.

A little mission Sunday school in Connecticut organized a prayer meeting. One of the workers wrote to a friend who was living in the town of Canada, far from any church, and asked if she would not like to join their home department. The reply was favorable and the literature was sent. Soon the friend in Canada wrote saying that she thought she could get some of her neighbors to join the Cousins school if she had the proper literature. In a short time she succeeded in getting 27 more members, all of whom became identified with the little mission school in Connecticut, three or four hundred miles away.

They were so pleased with their work that after awhile they organized a Sunday school of their own. Soon they outgrew their accommodations and raised money and built a chapel. Then they said, "We ought to have a Christian Endeavor society," and soon that, too, was organized. This went on for a time, but the more they said led the little the more hungry they grew, and by and by they organized a church and secured a pastor. And all this came from one letter written by an enterprising worker in a Sunday school several hundred miles away.

Wordsworth might have asked the American cuckoo, as he did its European cousin, whether it was a bird or but a wandering voice. There are two fairly abundant species of cuckoos in America, the yellow-billed and the black-billed. Their habits are much alike. These two birds are ventriloquists. One hears their voices where they are not. The cuckoos thread their way through the tangles of branches, gliding after the manner of ghosts. The bird eats what most other birds disdain. It has a special fondness for the great hairy destructive caterpillars, and when it finds a nest of the tent caterpillars it will not move on until the destruction of the pests and their home is complete. The cuckoo's food habits are called the rain crow. It has no place as a songster, however, for it is not apt to be especially vociferous in the dryest times.

In the list of the ten best birds there is only one bird of the downy. These little birds nest in the current bushes, in the vines which climber over the porches of the houses which bound the dooryard domain. Sparrows are known as seed eaters, and this might carry an implication that they are destroyers of grain. Some of them are, but we have the scientists as authoritative food habits of the chipping sparrow, the bird which comes to your doorstep for crumbs, are all good. It has been written of it that it is "well worthy of the kindness and protection which it everywhere receives."

It must not be thought because six birds have been named as the best friends of the farmer that there are not scores of others whose daily work is for the good of man. The less excellent of the others strive with them throughout their short lives to work as well as they do, but for the good of man who too often, misunderstanding their intentions, becomes their persecutor.

ALL RACES CROWD ZANZIBAR

Fast African City is Easily One of the Most Cosmopolitan Places on the Earth

"When Zanzibar plays the finis half African finale," says an old Arab proverb, Zanzibar is not as important today as it was when that saying was coined, but the island city is still dominant over the trade of a vast stretch of territory. It lies just a few miles off the shores of what was, in July, 1914, German East Africa, but the name of the country and the future prosperity of Zanzibar both depend on the upshot of the little argument now being waged in Europe between Germany and the allies. Zanzibar is now a British protectorate.

It is not a beautiful town, though from over the water it has a certain exotic charm of its own. The sea is very clear and rich in tints of green and blue. The dense tropical vegetation through the city which boasts of the city peep out, the vivid flares of color where some royal ice cor with flowers, are more like an impressionist canvas than a city of wood and stone. Zanzibar does not impress on other acquaintance, though. You land on a wide quay and fight your way through a small but energetic gathering of coaxing peddlers, who sell carved ebony, boston silver, trinkets of ivory, wares from Japan and native sapphires. Then you plunge into the place where Arab and native houses, with narrow, twisting streets and a comprehensive assortment of smells.

Zanzibar has a large assortment of everything. Mark Cousens now yearns for fruit that you never heard of before. Natives and Europeans suffer from a long and diversified list of tropical diseases, the commerce and industry of the town includes a little of everything. The people are the most mixed of all.

There are consuls from half a dozen countries in the harbor. Bazaars abound. The English are here in force, with the mixture of conventionality and eccentricity that is characteristic of the Jamaica to Nairobi. There is a big Indian population, and it is very dirty. Black natives from the mainland abound, some of them are the sons of the great big strong Brownies to take charge mats of us. They are going to have quite a time doing it, but they are about to be of service to the Fairy Queen."

"As Professor Coconut finished his speech along came a great big Caravan, made of birch bark. It was drawn by one hundred Elves. And as soon as they came to the Coconuts they all hurried them into the Caravan.

"The Coconuts had never been off on a trip before. To be sure many of their family had gone to the cities, to shops and then to houses—but they were having such a whole trip. To be given as food and drink to the Fairies, Gnomes, Elves and Brownies! Well, they were so happy.

"After a rather rough but exciting trip they all reached the woods where the Dinner Party was being given. Then they saw the strange Brownies with their sharp pointed sticks ready to cut each one in half, each one—one for an air hole and the other for the Fairies to drink out of. And they saw the Fairies, the bigger Brownies with their axes to take away the rind, and the Gnomes in wear around them.

"And then the feast of the Fairies, Elves, Gnomes and Brownies did have. Those who had never been eaten before, were fine reward, and the guests were happier than they had ever been to the hosts. Such a new kind of party. Why, they thought it was a splendid idea to have to take drinks out of the coconut nuts, and then eat delicious fruit.

COCONUTS AT THE PARTY.

"The Fairies gave a Party for the Gnomes the other day," confessed Daddy as he saw both Nick and Nancy were all ready to hear their usual bedtime story.

"And their chief pride in the Party was that they only needed one sort of food and drink—at least one kind did for all.

"That sounds very mysterious, Daddy," said Nick. "How could that be?"

"You see," continued Daddy, "they invited the Coconut family to come to the party to be the food and drink for the Fairies and their Guests, the Gnomes. Well, the Coconut family were as proud as proud could be.

The Fairy Queen Took a Bite.

"Old Professor Coconut, who sees all the little Coconuts grow up in just the right way, came to talk to them. This is what he said to Coconut talk.

"'Listen to what I have to say now, how important it is to be brought up well. Here are all our family going to the Fairies' Party. The Fairies for the Gnomes—fine little creatures they say these Gnomes are.

"'Well, to continue—which means to go on, for Professor Coconut always stopped to explain what everything meant—you see we are worth while to have a party. We don't need to have food and drink all separate, for we are food and drink. But now it is time to be off, and they are going to take our mats away, for the Fairies have heard some of the great big strong Brownies to take these mats off us. They are going to have quite a time doing it, but they are about to be of service to the Fairy Queen.'

Old Professor Coconut.

"And just before Professor Coconut was ready to start my son Nick took both a drink and a bite out of him, so he was the grandson old professor you ever heard of in all your days."

CHICKENS PERCHED ON ROOST

Tommy Figures It Out That Some Would Be Perchers and the Others Would Be Roosters.

"What is a roost, dad?" asked Tommy.

"A roost, my son, is a pole upon which chickens sit at night," replied his father.

"And—that's a perch, dad?"

"A perch is what chickens perch on."

"Then, I suppose, dad, a chicken could roost on a perch?" came the further inquiry.

"Of course," was the smiling reply.

"And they could perch on a roost?"

"Why, yes," answered dad.

"But if chickens perched on a roost, that would make the roost a perch, decided Tommy, and just after some chickens had perched on a roost and made it a perch, some more chickens came along and roosted on the perch and made it a roost, then the roost would be a perch and the perch would be a roost, and some of the chickens would be perchers and the others would be roosters, and—"—Tit-Bits.

Small Brother Was Wise.

"What's twins, mamma?" asked four-year old Bessie. "I know" ex claimed her small brother before the mother could answer. "Twins is two kids just the same size, three's triplets, four's quadruples and five's centipedes."

When Sammy Grows Up.

"I'll be glad when I get big enough to wash my own face," said small Sammie.

"Why, dear?" asked his mother.

"Cuse I won't wash it," he replied.

Old-Fashioned American Women.

Not all American women are impatient, hysterical, weak sentimentalists, or members of "strict neutrality" leagues. These vociferous ladies have attracted much attention, but it is a overlook that great majority of quiet women, the descendants of those noble women who were over ready to suffer and offer sacrifices to the cause of liberty and independence. In the days of the Revolution, in the War of 1812 and in the Civil War.

Some of this brand of women have resulted if it was not their husbands and take some action for the honor and safety of their country, and so a number of women organized "to arms" "to arouse the women of America to a sense of their danger from the immediate preparedness for war."

If the war in Europe, they say, "the more instinct of self-preservation directs that women, too, should prepare to meet the overwhelming sorrows of liberty, peace and honor."

Well, this is a practical and patriotic talk is very refreshing amid all the sentimental twaddle we have heard from women—Baltimore Sun.

American Money in Spain.

Dr. Charles A. Vedder, of the United States consulate at Malaga, Spain, where he made an extended investigation into the industrial and commercial situation, yesterday with regard to the opportunities for the investment of American capital in the industries of the Spanish government and business world toward American enterprises in Spain.

One of these is a proposed fast direct steamship service between Malaga, the French frontier to Madrid to enable Spanish people to visit Paris with a round-about route and offers to assist from that of the other European ports.

It is announced that as a result of conferences between the largest banks in New York is considering the possibility of establishing branch banks in Spain and also in Portugal.

Dress Wounds With Powdered Sugar.

Powdered sugar dressing for surgical wounds is recommended as being a thorough treat in the German army and has proved highly satisfactory, according to Dr. F. Herzber, who reports to the Berechner Medizinische Wochenschrift the experiences of himself and 50 other surgeons in the use of it. He has used it in more than 1,000 cases.

Doctor Herzber says that powdered sugar acts as a disinfectant, is tender on a wound, as it causes such a profuse outpour of fluid that the wound is copiously washed from within. Its efficacy is due mainly to its stimulation of secretion, and this dilutes and washes away the pus.

The Changeful Sex.

"The Contrary Dame" is a curious thing. Before—immediately longer than men.

"The Chemist—speaking from experience, sir, I should say that women are much more changeable than men."—Old—London Opinion.

Cause of Gastric Ulcer.

As a result of experiments on dogs, Dr. W. E. and E. L. Burgess of Urbana, Ill., announce in the Journal of the American Medical Association that ulcers of the stomach are caused by the decreased resistance of a certain specified area of the stomach to the digestive action of the gastric juice, and the spot is partially digested by the pepsin.

Optimistic Thought.

It is good to labor, also to rest from labor.

Kitten Travels to Indianapolis in a Piano Box

INDIANAPOLIS.—She did not have a ticket or any money, and she did not have a lunch box, and there was no diner attached to the train on which she came to Indianapolis, but possibly the lack of these usual adjuncts to travel

Old Professor Coconut.

of a piano, but this piano box, as it stood in the freight depot, gave forth a very lively mewing when anyone came near it, and so the kitten was discovered. They might best be described as feline sob stuff.

A conductor who had made in the box by some of the employees at the depot, and there came forth from some small nook where the piano did not quite fill the box, a kitten. She was not much of a kitten as to size, and still was so to weight, but even her "meow" was embarrassed inspired, for she had been in the box without food and water for three days.

The kitten was discovered by the time the train in New York was not disclosed. She did not report who she was by mail. But the fact that she did not have a ticket or money did not bring on her small head any reproaches from the detectives who guard the depot. They dined her on milk and other delicacies suitable to a very small kitten, and took her in as an honored guest.

"Sitters' Island" in New York Is a Popular Place

NEW YORK—At the intersection of St. Nicholas and Seventh avenues in Manhattan there is a triangular patch of ground that has most, called "Sitters' Island." Too small for a city "square" as similar patches downtown are dubbed, it is nevertheless treated as one. There are just seven "park" seats there—placed at the request of the nearby residents. So "Sitters' Island" will accommodate—seated—just 21. Its length is about 70 feet. It is the unique "square" of the city.

There is always a waiting list for a seat on "Sitters' Island." The warmer the day and evening the longer the list. The benches are anchored to the benches lest back and watch the automobiles go rolling by, and feel first rate with themselves. At a quarter to one the other morning a policeman found a man and woman seated there and gently intimated that it would be a good idea to move on.

"But, officer, it's no use here," expostulated the young fellow, "and we only got the seat an minute ago after waiting a chance since supper time."

"Oh, all right, all right," growled the cop as he took up patrol again.

TAKEN FROM EXCHANGES

Indoor horseshoes has this winter been the official recreation at Metz, this Metz being in Tennessee.

Michigan, with 41 automobile factories, leads the United States; New York is second, with 40 factories.

The very creditable stage world in New York City confined to the Hebrew race and using the Yiddish tongue is again brought to notice by the recent celebration of Bessie Wiseman's 25th year on the Jewish stage. More than 1,000 persons, including many high in official life, attended.

David S. Francis, ambassador to Russia, began his business career as a messenger boy on the floor of the St. Louis Exchange. His boyhood ambition was to drive a stage coach.

By a new French process aluminum can be so substantially nickel-plated that the metal can be hammered and bent without cracking.

GATHERED FACTS

France is stimulating attention to potatoes.

Persons with blue eyes are supposed to be immune to snow blindness.

Visiting cards made of sheet iron are one of Baron Krupp's specialties.

It is said that a single drop of ether, if one will kill a rabbit in three and a half minutes.

A watch requires 175 separate parts, more than 2,400 operations being necessary in its manufacture.

Electrical engineers taking current from a tight socket has been invented by a French scientist to purify the air in a room by literally pumping it into a reservoir and washing it.

To enable his automobile to run over deserts and sandy roads a California man has equipped it with camel's feet, which revolve on the axles like wheels, providing smooth traces.

A new race for toothbrushes has taken in front in which can be found artist stalks showing the names of the owners of the brushes.

POSTSCRIPTS

The phonograph and telephone are used in a South Carolina invention for a automatic fire alarm that calls up a central operator and tells her where a blaze is starting.

Mechanism consisting of a series of jointed strips or lowering several ventilators at once by manipulating a single lever.

An electric light reflector has been invented that can be used for either direct or indirect lighting.

Tales of GOTHAM and other CITIES

Gotham Has a Most Remarkable Beggars' Club

NEW YORK—This city possesses one of the most remarkable beggars' clubs in the world. Its members gather every evening in a rather quiet chop suey restaurant in midtown almost under the Elevated. A

stranger might enter, eat his ravioli or chicken omelet, and depart without noticing anything unusual. But if one lingers and engages in conversation it is not difficult to get acquainted with the gilded panhandlers. Here are some of the more remarkable members:

The president of the club, He is dressed immaculately and in good taste. He might be taken for a "Wall street man." He chooses his victims often, but has a favorite. Approaching a stranger with a confident smile, he politely requests a few minutes' conversation. He is a civil engineer and has come to the city with a liberal check in his pocket to take charge of a big job. He has dined and wined not wisely but too well. In fact his last cent is gone. Could you help him to get in touch with his friends and lend him enough to keep him for a few hours? Glad to take your address and hope someone will do the same for you some day. Thank you again, good day. Working this and similar schemes this beggar prince has made his way from coast to coast many times, always living on the fat of the land.

A typical Westerner. He is tall, well built, about thirty-five years old, and wears a flannel shirt and a large broad-brimmed hat. He takes his stand near a railroad station and tells his victim of his ill luck prospecting for work. He can't find a friend in New York and is stranded and without money. He only he had stayed in Montana, or perhaps New Mexico!

A man in a faded khaki uniform. He, also, is well built, well built, and strong looking. He is clean shaven and his uniform fits him like a glove. His "spiel" has the beggars' lingo dobe it, tells of twelve years in the army and an honorable discharge. Here he is, a man who has served his country well and, if he had been injured, would receive a pension. But nobody wants a man without a trade. In three days of hunting he has not found a job.

A soft-voiced, well-dressed, ingratiating woman of middle age. She frequents hotels and restaurants, always between well, and is never ousted because the detectives can't "put anything on her."

A deformed cripple. At least he appears so when he drags his misshapen body through the crowds. But a moment later he emerges from a side door a sprightly man, who briskly steps to a table and orders a good meal. It is his remarkable double scam which do the trick. He is a cripple when he wants to be and has a pitiful story of elevated railroad stairs or like places and holds out his cap, with a few cheap pencils clutched beside it. He is really out-of-date though, and few coins are dropped into his cap while he is crippled.

The begging brothers have the city carefully mapped in their minds as to the revenue-producing possibilities. For instance, Broadway from Fortieth to Twenty-third street is worth 35 cents to 40 cents an hour; from Twenty-second to Fifty-ninth street 75 cents to $1.

European War Makes Philadelphia Boys Thieves

PHILADELPHIA.—It is stated that the European war is indirectly causing a 100 per cent increase in juvenile delinquency in the city of Philadelphia. Boys ranging in age from seven to sixteen years have been tempted by crooked junk dealers to steal articles of all kinds to supply the demand of members and other industrial plants. These junk men realize huge profits by selling at high prices the copper, brass and other metals which their little victims bring to them for a few cents.

Bands of boys have been operating in every section of the city, despoiling empty houses, churches and shops. Many of the boys brought into court declare that their "fences" have furnished them with files to cut pipes, spigots, valves, and wires.

LEFT IN A HURRY

BILL NYE TELLS HOW HE SAVED HIS GOOD NAME.

As an Honest, Unsophisticated Youth, Humorist Was the Victim of Heartless Practices Practiced by His Employer.

Boys should never be afraid or ashamed to do little odd jobs by which to acquire money. Too many boys are afraid, or at least seem to be ashamed when asked to do chores, and thus earn small sums of money in order to appreciate wealth we must work it ourselves. That is the reason I labor. I do not need to labor. My parents are still living, and they certainly would not see me suffer for the necessities of life. But life is that way world not have the keen relish that it would if I earned the money myself.

Sawing wood used to be a favorite pastime with boys twenty years ago. I regretted the fact myself. I ever earned was by sawing wood. My brother and myself were to receive $1 for sawing five cords of wood. We allowed the job to stand, however, until the weather got quite warm, and then we decided to hire a foreigner who came along that way one fine summer day when all nature seemed thrilling and we knew that the fish would be biting. He was hired the foreigner, and while he sawed, we would be with him on critical "dead sure things" until he got the wood sawed when he went away owing us 50 cents.

We had a neighbor who was very wealthy. He inherited it, but he earned our own spending money, and he rewarded us in the end by giving us. So he told the boy that he was going away for a few weeks and that he would be with us. He would be gone long enough to make the wood. He wanted to teach the boy how to saw and split chairs, etc. He, when the old man went away, the boy secured a colored man to do the job at $1 per cord, by which process the youth pocketed $1. The wood was piled in cribs, meeting his father at the train in a new summer suit and a speckled cane. The old man said he could see by the sparkle in the boys eyes that he was that healthful exercise was what boys needed.

When I was a boy I frequently acquired large sums of money by carrying coal up two flights of stairs for wealthy people who were too fat to do it themselves. This money I invested from time to time in bonds issued by our sociological attractions.

One day I was in a coal cart back up and unload itself on the walk in such a way as to indicate that the end of a trip had to be manually elevated inside the building. I waited till I thought I could see the cart back up and embarrass the like a prodigal son. I did so, and then I was left stranded half all over me. His glittering phaetons disappeared. My pants were in tatters and rested tightly on the pit of my stomach. I could feel the pavia bone in the small of my back. The room was dark, but I did not light the gas. I knew it was the sacrifice of a lady or gentleman, I never knew. I thought for the sake of my soul I would not. I would not remain. My good name was at stake. I pulled for home home all that I had at that time.

So I went home. Afterward, I learned that the man who owned the coal carried upstairs for nothing this job I had tried to get rooms two flights further up in the building, so that the boys would have further to go when they asked for a gratuity.—From "Bill Nye's Red Hook."

Bell the Cat, Save Birds.

Mrs. Eugene J. Corrigan of Portland, Ore., would save song birds from cats by attaching a small bell to a collar or string tied around the feline neck. The bell, she explains, would give the bird warning of the cat's approach and enable it to get away.

"I have two pet cats," says Mrs. Carrigan, "and last summer I knew there cannot be any doubt but they killed many birds. They would ignore a mouse any time to get a bird, and the pussies' the latter the better they seemed to like it.

Nature herself will endeavor to start a nationwide movement in behalf of birds by inducing owners of cats to employ the bell as a means of giving warning when attack is contemplated by cats.

Great Project Possible.

Italian engineers have reported engineering a projected tunnel from Venice to the island of Lido, which will be two miles long and in places 17 feet beneath the sea.

Secured a Church.

A fine old church in Boston, which was threatened with destruction if it was built in 1810, has recently been secured from top to bottom. The removal of the old yellow and gray paint revealed a finely laid masonry, much better to look at than its last coverings.

Many Lack Adequate Food.

It is probable that less than one-third of the earth's population get what we Americans call a "square meal" three times a day.

THE KITCHEN CABINET

LITTLE ECONOMIES.

The mind is master of the man. And as they can who think they can.

A dime at mean can always find service. A bar can never.

Cut stale bread into lengths the size of the finger, dip into milk and put into a strained tin to bake in the oven until crisp. Spread with marmalade or jam after putting on a thin coating of butter and serve hot.

To keep the baby off the floor and yet give him exercise, place two table leaves on his bed, cover with a carpet and he will be able to sit or stand with no fear of a fall or a rolls.

When putting a casserole into the oven see that there is no moisture on the outside, as carelessness in this matter often causes chipping and cracking.

A good brown cake recipe may be made by using cocoa instead of flavoring. To two cupfuls of sifted flour add a heaped cupful of sifted raisins, a teaspoonful of cinnamon, one-fourth of a teaspoonful of cloves, one-half of a teaspoonful of allspice. Into a cup put a teaspoonful of soda and a pinch of salt and one and a fourth cupfuls of flour, sifted with two tablespoonfuls of powdered sugar, a piece of butter the size of a teaspoonful of salt. Drop in gem pans and bake.

Pineapple Pudding.—Dry three slices of stale bread until crisp, then roll or put through a coarse sieve. To the bread crumbs add one cupful of flour, one tablespoonful of butter and one-half cupful of sugar, one cupful of milk, one-half cupful of grated pineapple juice, and two slices of the fruit with two teaspoonfuls of baking powder, combined in the order given, pour into a buttered dish and bake 20 minutes. Serve with a sauce made by cooking together two tablespoonfuls of butter and four and a cupful of pineapple juice and a tablespoonful of lemon juice, a cupful of water and a gerling of nutmeg.

Spice Pudding.—To two cupfuls of graham bread crumbs add one and a beaten egg, one pint of sour milk, one teaspoonful of soda, one cupful of sugar, a cupful each of chopped dates and nuts, one tablespoonful of butter and spices, salt and cinnamon to moderate oven and serve with whipped cream.

OUT OF THE COOKY JAR.

Charcoal is built out of eleven-twelfths of the weight of the wood, twelfths one more bulky palatable, wholesome and nutritious food.

Oatmeal in various forms is good for children, and when made into simple porridge is wholesome and nutritious. A point to be remembered when using oatmeal: If it is to be well digested it must be well cooked, and therefore it takes to bake small cakes containing oatmeal is not sufficient to cook the meal so it will be digestible. Take a cup of meal to a good, strong heat in the oven, stirring it as you would corn in the old days, when it was browned a little. After this good baking it will be slightly brown. Then put it through the fine cutter of the meat grinder, and it is ready to use in cakes, and it will not be too much cooked if used in natural form.

Scotch Cookies.—Take 2½ cupfuls of oatmeal, prepared as for the breakfast, one two cupfuls of flour, add another half cupful to use for rolling, salt, one teaspoonful of soda, and two eggs well beaten, three tablespoonfuls of lard, three tablespoonfuls of sugar, a teaspoonful of salt, one-half cupful of butter, combined, of a cupful of hot drippings, one teaspoonful of salt, one tablespoonful of spices, cinnamon, nutmeg, cloves and allspice. Mix as usual and set aside on ice, or, even better, let stand over night before rolling out. A sharp cutter is needed for cutting.

Oatmeal Drops.—Take a cupful of butter and other shortening, mixed and softened; add a cupful of sugar, two eggs, two cupfuls each of flour and rolled oats, five tablespoonfuls of milk, a teaspoonful of cinnamon, one-half teaspoonful of clove, one-half teaspoonful of salt and soda in ice, or, even better, let stand over night before rolling out. A sharp cutter is needed for cutting.

Oatmeal Drops.—Take a cupful of butter and other shortening, mixed and softened; add a cupful of sugar, two eggs, two cupfuls each of flour and rolled oats, five tablespoonfuls of milk, a teaspoonful of cinnamon, one-half teaspoonful of clove, one-half teaspoonful of salt and soda in ice, or, even better, let stand over night before rolling out. A sharp cutter is needed for cutting.

WAYS WITH VEGETABLES.

Eat fruit and vegetables in season.

Make your potatoes more fine With the work I first would do. Let the potato be well washed, Let no one think it is wicked.

John G. Whittier

Place a heel of a loaf of French bread, rubbed with a slice of onion on

A Spanish onion seasoned not make a pretty salad dish: also a cabbage head halfboiled and then filled and garnished with nasturtium flowers placed on the plate with the cabbage.

Beautiful and wonderfully attractive are the salads for a wedding served in the cups of a white rose, garnished with rosebuds and twigs and leaves. The white meat of chicken would seem to be the only appropriate salad for such an elysian feast.

Fish salads are usually marinated, that is, soaked in dressing for an hour or more before serving.

Wine, gingerbread, cottage cheese and apple sauce are delicious together.

Cut cheese in 2-inch pieces and split in narrow strips, cut nearly to the center, from both ends. Throw into ice water and let them curl. Use these as a garnish for a whole tomato salad.

A tablespoonful of butter makes butter pats of good size.

Garnish butter pats with sorrel, cicory or buttercups.

Fresh fruit served with a pyramid of powdered sugar in the center of the dish is a most attractive arrangement. The powdered sugar may be molded in a small glass, by pressing it, then carefully unmolded.

Popovers may be used as shells for entrees of various kinds.

Strawberries should be parboiled in water with a bit of lemon juice or vinegar.

QUICK WIT SAVED BURGLAR

One Can Imagine Police Officer's Feelings When He Realized How He Had Been Fooled.

The up-to-date burglar is a quick-witted criminal, and nothing delights him more than to be "too many" for the constable, says the London Mail. To accomplish this he sometimes exhibits a good deal of wit and daring. Here is a case in point.

A constable, during the rounds of his beat a few nights ago, noticed a light in a house from which the family and servants had gone to the country. After pulling the bell several times a man put his head out of the bedroom window to say that he would be down in a few minutes. He came down in a dressing-gown and carrying a candle in his hand.

The constable explained his suspicions, whereupon the man stated that he had just run up to town to see this will was right. After chatting for a little, he invited the constable to have a glass of wine. He lit the dining room gas and produced a bottle of port. After they had drunk each other's health he let the constable out and bolted the door after him.

The man had no time in getting the "swag" together, and left the house by a other exit.

Highly Dramatic.

Backward and forward he paced, his arms wild and waving, his face haggard. As the minutes passed his agitation increased.

"Was she never come? Will she never come?" he wailed wildly. "Already it is 15 minutes past the appointed time, and yet she is not here."

He pressed his hands to his forehead and wailed. He tried to sit in vain, and still waited. He gazed sadly through the window and went on waiting.

At last! Ah! The sounds of little footsteps on the stairs. He turned to the door, eager, excited.

Yes, it was she!

"You have come, then?" he gasped, dizzy with delight, as he grabbed his hat.

Yes, the stenographer had come back and it was now his turn to go out to luncheon.—Pittsburgh Chronicle-Telegraph.

Dirt Roads in United States.

Two million miles of dirt roads have been built in the United States. The total length of public roads of all kinds in this country is estimated at 2,260,000 miles.

Roads as Indicators.

If a country is disgusted, the condition of the roads will indicate the fact; if a people have no roads, they are savages.

The publication fee for this notice is $6.

NOTICE OF HEARING CLAIMS BEFORE COURT

STATE OF MICHIGAN, The Probate Court for the county of Charlevoix.

At a session of said court, held at Alanson in said county, on the ninth day of June, A. D. 1916.

Notice is hereby given that 4 months from the 9th day of June A. D. 1916, have been allowed for creditors to submit their claims against the estate of Jacob Bennett, late of Bay township, in said county, and that all creditors of said deceased are required to present their claims against said estate to said court at the office of Charlevoix in said county on or before the 9th day of October A. D. 1916 and that such claims will be heard by said court on Friday the 9th day of October A. D. 1916, at 10 o'clock in the forenoon.

Dated June 9th A. D. 1916.

PERSETTA A. CORBELL, Judge of Probate.

REPUBLICAN CONVENTION ---CHICAGO

Written for the Sentinel.

Hail Theodore! "The gift of God!"
Men follow you with feet of clay!
Nobody but back the way you trod
You blazed the trail to the sun-lit way!

Hide bare! A coward's cunning
Forsooth of the common
Can discriminate to gilded lures,
With you will come beyond!

With public officers bear with those
Who you choose from time to time
Desert in shadows prowling foes,
Leave the power with them, honest!

The 50th year been to gain
Wise counsel to mark, to sell, with me
Down forward the sound for clash
Then sorrow cannot beyond their ken.

To whom we turn for advice
We will make remember your proud fame
Long hence, when we be dead
Not now, not now, we write a will sinister.

Board of Education

Charlevoix, Mich., June 6, 1916.

Regular meeting of the Board was called to order by President Hamilton.

Trustees present: Hampton, Bridge, Nordrum and Hiller.

Absent: Gilchrist.

The Treasurer's report shows a balance on hand of $1215.86.

The following bills were presented and read:

TREASURER'S FUND ORDERS

43 Bond Nordrum, Sec. and Treas.	25 00

Moved and supported, that the bills as read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

Moved and supported, that the Superintendent's report on the back account be accepted and placed on file. Motion carried.

Moved and supported, that the bid of the Hardware Hardware Co. for building and installing the ventilator for the laboratory at $52.50, be accepted. Motion carried.

These minutes were read and approved, and on motion, the Board adjourned until Tuesday evening, June 13th, at 7:30.

E. J. HILLER, Secretary.

FOR SALE.—New Edison Phonograph and 76 new 4-minute records. Inquire at H. L. Brady's Fish House, Belvedere avenue.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powder. Get at the root of the trouble and thoroughly cleanse the system with a treatment of Dr. King's New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, adults and aged. Go after a clear complexion today. 25c, at your druggist.

LOCAL AND PERSONAL

Supt. Craig spent a few days the past week fishing at Beaver Island.

The regular meeting of the O. E. S. will be held June 21, at 7:30 p. m.

Everything so far points to a successful celebration of the 4th in Charlevoix.

J. H. Cutler left yesterday for a two weeks' visit with his daughter, at New Hampton, Iowa.

Fritzi Scheff in "Pretty Mrs. Smith" at the Majestic Theatre, Tuesday, June 20. Don't miss it.

Noted military romance "The Commanding Officer," at Majestic Theatre, Friday, June 16.

Arrange to spend your 4th in Charlevoix. The eagle has been holding up a scream for several years.

A Salem Masselman, the Oriental Rug man, arrived this week, and will open his store about July 1st.

Henry Sherman has accepted a position as second engineer of the steamer Mackinac, of the Arnold fleet.

A silo on the farm of James Adams, in Marion, was blown down during the high wind of last Wednesday.

Rev. C. E. Taggart left Monday for Richmond, Ind., where his son Leslie graduates from Earlham College.

Mr. and Mrs. Geo. D. Swinton returned home Tuesday from Calumet, where they have been visiting relatives and friends.

Mr. and Mrs. W. J. Bachow are at Flint this week, attending the annual convention of the Michigan Bankers' association.

The regular services at the Baptist church next Sunday will be in care of our young people, who have arranged interesting programs.

Hon. A. Buttars, president of the Charlevoix County Bank, is in Flint attending the annual meeting of the State Bankers' Association.

Warden Gaskin, of the Chicago Club, again calls attention to the running of hounds on the club grounds. If this nuisance continues the dogs will be shot.

We have been shown a copy of the "Weekly Almanian," the official publication of Alma College. Miss Edna Ward, of this city, is the editor-in-chief.

Mrs. "Mack" Neveaux and daughter, of Sylander, Wis., accompanied by Miss Neveaux, of Manistique, are the guests of Mrs. Neveaux's sister, Mrs. Bonthron.

In circuit court Friday, in the malpractice case of Mosher vs. Marshall, the judge directed a verdict for defendant. The case of M. J. Bonner vs. Citizens Realty Co. was discontinued and put over to next term.

The Charlevoix Boy Scouts, under the command of Rev. Mr. Vineyard, scoutmaster, went into a ten days' camp near Holy Island Monday morning. The boys have their uniforms, and have a very soldierly appearance.

John Clarke and wife entertained a few friends at tea Sunday evening in honor of their first wedding anniversary. Mrs. Maria Meggison, of Charlevoix, arrived at the home of Henry Gornell Monday, and will assist this summer with the care of Mrs. Gornell.

Children's Day exercises will take place Sunday, June 25th.

"Jack" Ackert, formerly of the Ivy Drug Store, has accepted a position to travel for the A. H. Lyman Co., a wholesale drug concern of Manistee. Mrs. Ackert will remain here this summer, but they will move to Manistee in the fall.

Leo See received a letter Tuesday from his sister, Mrs. Ed. Chaloupka, dated at Cheyenne, Wyo. Mr. and Mrs. Chaloupka are on their way to Charlevoix from their home at Mecca, Oregon, in their Cadillac car. They expect to remain in Charlevoix indefinitely.

The northeast gale of last Wednesday blew down the high kitchen chimney of the Hallett Hotel. The roof was crushed in, and the heavy mass of brick went through the upper floor and into the kitchen, smashing up things generally. Luckily no one was injured. Glaubert at once put a large force of men on the job, and as we write the damage has been thoroughly repaired.

At the regular meeting of the Board of Directors of the Charlevoix State Savings Bank, held June 9th, Mr. E. F. Foley was made a director for the balance of the year, to serve out the unexpired term of the late Peter D. Campbell, who died in April. Mr. Foley is a banker, a business man of high degree, and always ready to be of service to the institution which he and Cashier W. J. Bachow headed some years ago, and which has done a great service to the community and grown in resources each year.

Public Notice

The Street committee of the city of Charlevoix requests all citizens not to throw their lawn cuttings into the street, as it closes the catch-basins and causes much trouble, and extra expense.

STREET COMMITTEE,
City of Charlevoix.

Yesterday was Flag Day.

Perry Smith has accepted a position with a candy and ice cream concern, and will be located at St. James for the summer. His business will be between the Harbor and the head of the island.

An excursion will be run to fisherman island for church and scout camp leaving Charlevoix at 2 o'clock both by land and water. Pot luck supper after church.

Harry Nichols and Dick Hammel pulled out with Gen. Van Felt in his Chandler car to try the new roads being built between here and Boyne City and East Jordan. Van is still talking concrete or brick roads as being cheaper than the present plan. He surely is convincing and refers to the concrete road put in at the south end of Bridge street, opposite the Hotel Bronson, ago. He says "go and look at it" then look at the roads we are now building two years from now. He said—oh well, we can't do it justice, no use to try.

DIBBLE-WHITING

Married, Wednesday morning, June 14th, at the home of Mrs. Dr. Bon, Park avenue, this city, by Rev. Quinton Walker, Mr. Wm. L. Dibble, of Sheppard, Mich., to Miss Elida Whiting, of Charlevoix.

The bride, who has for several years been one of our most popular and efficient teachers, was the past year the critic teacher of the high school.

The groom is a prominent merchant of Sheppard, where Mr. and Mrs. Dibble will reside.

Barnard Doings.

Mrs. Arthur Beattie, Dorothy and Forest, Lucile Lewis and Marguerite Smith relatives to Detroiter Thursday and visited Mr. Beattie at the hospital. Mr. Beattie is a most patient sufferer, but is doing nicely.

Miss Gertrude Shapton delightfully entertained her Sunday School class Tuesday evening at her home. Music and games furnished a jolly time, and very dainty refreshments were served. Miss Edna Shapley and Cleo Crampton were also present.

Leslie Shapton is at home for the summer vacation, and will assist his father with the farm work.

The Ladies' Aid Society held their regular meeting at the home of Mrs. E. Shapton, although a stormy afternoon, about sixteen ladies were present. At the business meeting it was voted to meet every two weeks for the summer, the extra meeting to be a 10 cent affair. A very delicious repast was served by the hostess and Miss Ethel Shapton, after which music was enjoyed by those present.

Miss Maude Shapton will return this week from Albion College for the summer vacation.

Mrs. Reid see Clarke, of Detroit, is expected this week for an extended visit with her parents and other relatives.

Mrs. Peter Block will entertain the Ladies' Aid Society June 21.

E. V. Smith, of Boyne City, and Mr. Olney, of Petoskey, have been tuning pianos in this neighborhood the past week.

John Clarke and wife entertained a few friends at tea Sunday evening in honor of their first wedding anniversary. Mrs. Maria Meggison, of Charlevoix, arrived at the home of Henry Gornell Monday, and will assist this summer with the care of Mrs. Gornell.

Children's Day exercises will take place Sunday, June 25th.

SPECIAL SALE—On 5 and 7 tooth Cultivators, by Chas. Zeitler, all this week.

Norwood News

Hazel Richardson, of Charlevoix, is visiting at the home of her grandparents, Mr. and Mrs. A. Richardson.

Ted Pearl and wife, of Charlevoix, are spending a few days at Ben Pearls.

Irving McGowan and family, of East Jordan, spent Sunday at H. Carmen.

Jim Block, of Barnard, was in Norwood on business Saturday.

C. H. Ferguson and wife spent several days in Charlevoix last week.

George Holscheck, wife and son visited at Joe Holscheck's Sunday.

Mrs. John McCall and children are visiting at her parents' home, Mr. and Mrs. Frank Richardson.

Mrs. M. O. Patterson returned to her home in Chicago Friday.

Ben Pearl is confined to his home with an attack of pneumonia. Dr. Beuker, of Ellsworth, is attending the case.

The Misses Drusilla Richardson and Faye Wagner attended the graduating exercises at Charlevoix last week.

Mrs. Empey and sons, of Atwood, spent Sunday at H. Wagners.

The ice cream social was well attended—proceeds $9.75.

Mrs. John Rhinehart and children are spending a few days at Henry Carmens before going to Detroit, where they will make their home.

Mrs. Julia Moore is visiting at Henry Wagners.

Cooking is a Pleasure---
when you cook with a
New Process Oil Stove.

A New Process Oil Stove will simplify the cooking question. They are so easy to use, so clean, so safe, so economical and reliable that all the old time stove worries are banished. No hot summer kitchens. The New Process is ready when you want to cook to give as much heat as you want, right where you want it—in the cooking, not out in the room. Heat is always under perfect control. Costs less than a half cent an hour per burner. You can keep one or all burners at an intensely hot flame or merely simmering. Heat is easily regulated. The oil supply is automatically constant. The glass reservoir holds one gallon of oil, you can easily see at all times the amount of oil in the reservoir.

A sale of a New Process Oil Stove means a satisfied customer.

MOOSE LEADERS DELAY DECISION

National Committee Adjourns Without Reaching Agreement on Hughes.

TO MEET AGAIN JUNE 26

John M. Parker of Louisiana Makes Address Following His Nomination for the Vice-Presidency—Murdock Sees Fourth Party.

Chicago, June 12.—No decision was reached at the meeting of the Progressive national committee held immediately following the adjournment. For four hours the members stayed behind closed doors in the south parlor of the Auditorium hotel, and then adjourned to make a general rush for the railroad stations.

They were silent on what had happened. Everyone referred the newspaper men who swarmed about the door to O. K. Davis, secretary of the committee, who, they said, had a statement.

Will Reconvene June 26.

Mr. Davis led the newspaper men to his office, where he dictated a statement saying that the committee had met, elected officers and would reconvene in Chicago June 26.

Victor Murdock of Kansas was again made chairman of the committee with Matthew Hale of Massachusetts, vice-chairman; O. K. Davis, secretary, and E. H. Hooker of New York, treasurer. The new executive committee is composed of George W. Perkins of New York, William Flinn of Pennsylvania, Matthew Hale of Massachusetts, Harold L. Ickes of Illinois, William Allen White of Kansas, Frank Wight of Louisiana, Chester H. Rowell of California, Everett Colby of New Jersey and G. D. Pope of Michigan.

Reach No Agreement.

Although none of the committeemen would discuss the affairs of the committee, it was known that most of the time had been spent in the discussion of the Hughes statement and the question of whether or not the Progressives could support him.

The committee could come to no agreement and finally adjourned to go home and give the Republican candidate a chance further to declare himself.

The second Progressive national convention adjourned sine die on Saturday. Less than five minutes before Chairman Raymond Robins proposed the final word he read a telegram from Theodore Roosevelt, who had been nominated unanimously as the Progressive candidate for the presidency.

Declines Conditionally.

In it the man of Sagamore Hill declined conditionally the proffered nomination. Colonel Roosevelt asked that he be permitted to await Justice Hughes' formal statement. If that be satisfactory the former president announced he would withdraw as a candidate.

An hour previously the Progressives had nominated John M. Parker of Louisiana as their Vice-Presidential candidate. To Mr. Parker was given the only happy reception in a long day filled with acrimonious fighting, passionate outbursts of despair and charges of betrayal.

Gov. Hiram Johnson of California, Raymond Robins, Meyer Lisnstock of Kansas and John M. Parker, the vice-presidential nominee, spoke out frankly and bitterly.

Sees Four-Cornered Fight.

Victor Murdock foresaw a four-cornered fight. He said that Bryan and Ford would head a Prohibitionist-Pacifist ticket, and he paid a tribute to Mr. Bryan, who was greeted thunderously by the delegates as the only courage of his convictions. The Kansan referred to the Republican nominees as "that accidental ticket of the Arctic circle—Hughes and Fairbanks."

MEXICANS RAID U. S. RANCH

American Cavalrymen Pursue Bandits Across Line.

San Antonio, Tex., June 12.—The third American punitive expedition was ordered into Mexico following the long-expected raid into Zapata county, Texas.

The main body of Mexican bandits, probably under the leadership of Luis de la Rosa himself, crossed the Rio Grande at Hidalgo, 35 miles from Laredo. They rounded up 80 horses and drove them back across the border. No shots were fired and no casualties occurred.

General Funston, on receipt of the news, immediately ordered a cavalry detachment to pursue the bandits across the border, the third punitive expedition sent in Mexico since the Columbus raid.

TO SETTLE CONTESTS TODAY

National Committee Will Take Up District of Columbia Cases.

St. Louis, Mo., June 12.—A contest over six seats from the District of Columbia in the convention will be taken up at a meeting of the Democratic national committee today. The committee also will decide two contested seats on the national committee—one from Texas and one from the District of Columbia.

Great Soldier's Idiosyncracy.

Marshal Joffer, who was as handsome as he was brave, is said never to have a speck on the field of battle until he was dressed with scrupulous elegance and his beard carefully curled and perfumed. When he was led out to execution he was as cool as though going to a dance.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HAMILTON.

COUNCIL PROCEEDINGS

Council Chambers, June 12, 1916.

The common council for the city of Charlevoix met on the above date. Mayor Ross presiding. Aldermen present: See, Paddock, Cartier, Hiller, Geiken and Benton. Absent: None.

Minutes of last meeting were read and approved.

Moved by Ald. Cartier, seconded by Ald. Paddock, that the matter of lights on Mercier Boulevard be referred to Electric Light and Water committee with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. See, seconded by Ald. Geiken, that the petition as presented by Rudolph C. Korth and sixty-two others, relatives to amending the Dog ordinance be referred to Police, Fire and License committee to investigate and report next meeting. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. See, seconded by Ald. Geiken, that the petition as presented by Rev. Walker, in regard to permit a garage to be built on Methodist parsonage property be granted. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Mayor referred matter of connecting laterals to sewer on Hurlbut avenue to Streets, Sewers and Public Health committee.

Moved by Ald. See, and seconded by Ald. Hiller, that the Streets, Sewers and Public Health committee's report be accepted in regard to removing septic tank from Bridge street, near Antrim street, eight feet east of northeast corner of Antrim and Bridge streets. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Cartier, and seconded by Ald. Benton, that the matter of repairing water trough on Bridge street near Park avenue, be referred to Streets, Sewers and Public Health committee with power to act. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. See and seconded by Ald. Paddock, that a crosswalk be constructed, beginning at southeast corner of Lincoln street, running thence east, crossing Nebecker street. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Paddock and seconded by Ald. Hiller, that a four-inch water pipe be laid on Lewis street, from Dixon avenue to Petoskey avenue; also, That the matter of placing a fire hydrant be left to the direction of Electric Light and Water committee. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller and Benton. Not voting—Geiken.

Moved by Ald. See and seconded by Ald. Benton, that the matter of alleged shortage in Lloyd Gregory's pay be referred to Streets, Sewers and Public Health committee. Motion carried.

Moved by Ald. See, and seconded by Ald. Paddock, that the report of the Finance, Ways and Means and Fire committee, relative to Workingmen's Compensation Insurance be accepted and the bid as presented by Bridge, Buttars and Mohrmann be accepted. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Cartier, seconded by Ald. See, that City Engineer be authorized to furnish septic tank drawings to State Sanitary Engineers as request ed by them. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Paddock and seconded by Ald. Cartier, that the resolution of the Michigan avenue and Dixon avenue lighting system, lighting District No. 1, adopted the 10th day of May, 1916, and recorded on pages 36 and 37 of council proceedings, be and is hereby rescinded. Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Geiken, seconded by Ald. Cartier, the adoption of Ordinance No. 132, an Ordinance to amend Section Eight of Ordinance No. 116, "Entitled, An Ordinance to Regulate the Use of Public Streets, Highways and other Public Places of the City of Charlevoix: The traffic thereupon, the transportation of goods, wares, merchandise, persons and passengers, and the operation of vehicles of all kinds thereupon." Motion carried by following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Paddock and seconded by Ald. Benton, that the matter of purchasing new furniture for council chamber be referred to Public Buildings, Parks and Bridges committee, for their selection. Motion carried by the following aye and nay vote: Ayes—See, Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Hiller and Seconded by Ald. See, that when we adjourn, we adjourn until, June 19th, A. D. 1916, at 8:00 in the afternoon.

There being no further business the council adjourned.

CHARLES H. EMREY,
City Clerk.

School Commissioner's Column

May L. Stewart, Commissioner

Of the twelve county normal graduates more than half have been placed in good schools for the coming year.

Norwood No. 2 and Marion No. 3 have not yet received the report of the state official visit to their schools. This delay is due to the fact that these two schools were visited by the city instead of the rural inspector. The plans must go first the rural department before being returned but will be better for a second revision.

Miss Grace Gallagher returns to the Garden Island school for another year.

The Hoppard school, Hayes No. 5, was visited by Mr. Coffey on May 26th, while he was enroute to Petoskey. The return report of the visit was mailed to the director this week.

The Board of Examiners met Saturday, June 3rd, to determine the outcome of the state eighth grade examination. 234 students had written the complete test. 69 seventh grade students had written the physiology and geography test. A few wrote on several other subjects of their choice. This made a total of 2,540 examination to look over. Each paper contained from 2 to 10 pages of composition to be indexed and graded according to state standards.

One hundred fourteen diplomas were granted, and 115 credits were allowed in physiology and geography to be carried over to the 1917 examination. The members of the Board of Examiners sincerely hope that every holder of an eighth grade diploma will enroll in high school work in September, and that all whose work failed in any respect will prove their pluck by appearing again in 1917 with more determination than ever before.

The winner in the special examination and the highest average in the county will be determined in the near future.

The departure of Miss Hinze caused a vacancy in the Board. Tuesday, June 10th, Supt. Craig, of Charlevoix, was appointed to fill the vacancy.

The Keep, Bay Shore and Murray schools closed with a picnic during the past week.

Miss Marion Worth will teach in the Nowland district next year.

Miss Grace Howard will teach the Slaughter school, Boyne Valley, No. 7, fr., next year.

Miss Phyllis Shephard will teach in the Howard school, Melrose No. 2.

Blanks of acceptance for district officers and oaths of office to be filed with the senior member of the board will be mailed to every director before the annual meeting.

Has your district established a district library by a vote at a district meeting? Well, why don't you do it? It doesn't cost you a cent. Just vote that you would like to receive your share of the county fund, and that you will spend this money on books for the school library. This is so your teacher will have something to work with. If you don't do this, why the other districts get your share, that's all.

Mr. Lindman, state agent for club work spent Wednesday, the 7th, in and around East Jordan. A few of our club members have fallen by the wayside but a number have already planted their corn and started a report of the cost of labor in the preparation of the soil.

The Canning Demonstration Program is something now under the sun. It will be printed next.

Beaver Island News

Fr. Hayes is at his cottage. He has a new Ford.

Miss Clara Bailey of Mackinac island is visiting her aunt, Mrs. Angus Cameron.

A. Powers and wife, of Charlevoix are here. Mr. Powers is working on the Hayes cottage.

Tom Saunders and wife went to Charlevoix Monday.

Jane McDonough went to Escanaba on a visit.

Katherine Floyd went to Grand Rapids Thursday.

Mrs. Patrick Kelly was at Charlevoix last week visiting friends.

Tom Hoyle went to Chicago last week.

Bernice Stephens is here on a visit.

High Hoyle went to Chicago last week.

Winnie Lafreniere is home on a visit from Petoskey.

Charles Jewell went to Grand Rapids on Saturday's boat.

The ball game Sunday between the harbor boys and the upper town boys was won by the harbor boys 3 to 1.

Lena O'Leary visited friends here this week.

Mrs. Ava Smith of Charlevoix is here on a visit.

E. B. Smith of Manistee is here buying Northcutt's new gas boat.

Perry Smith was a caller here Tues.

Wm. Fanning is here on a visit.

BAPTIST PROGRAM FOR JULY FOURTH

The Baptist church parlors will be open to the public all day on the 4th of July and will provide a pleasant resting place.

Meals will be served at both the dinner and supper hours at popular prices and other comforts provided.

ORDINANCE NO. 132

An Ordinance to amend section Eight of Ordinance No. 116, entitled "An Ordinance to Regulate the Use of Public Streets, Highways and other Public Places of the City of Charlevoix: The traffic thereon, the transportation of goods, wares, merchandise, persons and passengers, and the operation of vehicles of all kinds thereon."

ORDAINED:

Section Eight of Ordinance No. 116 entitled "An Ordinance to regulate the use of public streets, highways and other public places of the City of Charlevoix: The traffic thereon, the transportation of goods, wares, merchandise, persons and passengers, and the operation of vehicles of all kinds thereon," is hereby amended so as to read as follows:

Section Eight. No person shall drive a team or team of horses, or any other animal or animals, or any motor vehicle or horseless vehicle upon any sidewalk or crosswalk within the limits of the City of Charlevoix.

Section 2. A violation of any provision of this ordinance shall be deemed a misdemeanor, and shall be punished by a fine not less than $5 nor more than $25 for each offense.

Section 3. This ordinance shall take effect from the 1st day of June, in the year 1916.

Section 4. Publication of this ordinance in the Charlevoix Sentinel shall be deemed sufficient publication.

Approved June 12, 1916.

CYRUS ROSS,
Mayor.

CHARLES H. EMREY, City Clerk.

WELL CHILDREN ARE ACTIVE

If your child is dull, pale, fretful and wants to be coaxed, the chances are it is suffering from worms. Kickapoo Worm Killer, a pleasant candy confection, liked by all children is what your child needs. You only give one pill to one teaspoon at a time and you get human-like results. Every mother should have a box on hand. 25c, at all druggists.

The Last Leaf

By FRANCES LANYON

(Copyright, 1916, by W. G. Chapman.)

"He's not coming back—I feel it. I know it," sighed Ida Wells. "I hope Janet don't take on!"

The old man breathed hard amid his mournful soliloquy. He was carrying a leaf of the dining room table up the attic stairs. They were crowded and he was not supple or nimble. He groaned a trifle as a narrow turn irked upset him. Finally, however, he reached the top of the stairs, dragged the heavy black walnut board after him.

The last leaf!" he voiced solemnly, and set it up against the slanting rafter. Then he rubbed his eyes and stood viewing the board and its accompanying solemnly.

"All good wood," he murmured. "It had to come, I suppose; but Joel—I thought he'd stick it out. There is Nellie, of course, but she is like an own daughter and always counted on making her home with us. And now—she's just as heartbroken as we are."

The last leaf of the dining room table and three companions. Once all four had been in use—but that was in the long ago. Madge had married and she and her husband and his sister and later, the two little ones, with Tom, the eldest, had made the old house ring with joy and laughter. Always was there a merry, happy table full. Then the sixth—Joel had married, and one last came out. Then Madge and her husband and their two children had gone to Canada, and two more followed.

Only six months since there had come the final break. Joel had gone nothing to Mr. and Mrs. Wells. She was in a rare flutter when she went over to the house one morning and, for some inscrutable reason, remained there chatting, an unusual occurrence, for Nellie was an energetic worker.

Then, at the sound of carriage wheels, she ran out to the front door.

"Oh, folks! hurry, hurry!" her voice rang out. "Some one has arrived."

The "someone" was Madge, and with her Mr. Waldron and the children. It seemed to the worn, weary father and mother as though paradise had been restored to them. "Of course it was a visit." Oh, yes, Madge needed a change, and Mr. Waldron's business had allowed of his leaving it, and the children were so happy, and Joy reigned supreme.

One—two—three—for Nellie must stay to dinner, sure!" piped Mr. Wells, hopping about like a patriarch rejuvenated. "Five, and the two little ones that means seven. Three leaves will give us plenty of room, oh, wife!"

"Hold on, I'll help you," suggested his son-in-law, as Mr. Wells started for the attic.

The old man chattered like a magpie; he ambled up the stairs, down the stairs, chuckling, laughing, infused with new life.

"There, I'm all do!" he cried, cheerily, as he carried the third of the table leaves into the dining room.

"There's another, isn't there?" interrogated Mr. Waldron with affected indifference, as the leaves were fitted into place.

"Yes, but we don't need it."

"But we may," submitted Mr. Waldron. "Look here, father, I want to tell you a story."

"Fire away, son."

"There's a fellow came up to Canada and told us how lonely and desert-ed our last place looks where Joel William died and I felt homesick. We sold our home and business. We're here to stay."

"Glory!" shouted Mr. Wells. "And who was the fellow?"

"Look your son."

"Joel!"

"Exactly. He'd made a strike with a mining partner. He's got enough to live a gentleman on eight hundred dollars he was worrying about. He's got enough left after that to go into business with me, right here in town, and marry Nellie, and settle down, right here at home."

The old man sat aghast, trembling all over.

"Son," he gasped, "it's too good to be true."

"It isn't," asserted Robert Waldron. "In fact, Joel sent me ahead from town to prepare you for a steady boarder. He's made good and has come back. He'll be here within an hour."

"Mother!" cried the old man in a delirious joy. "Tell her, son!"

And Mr. Waldron repeated his story.

"To think of it!" almost sobbed Ida Wells. "All hands back in the old home nest. Oh, I'm so overcome I—Don't know what to do!"

"Father" suggested his wife, smiling through her tears, "suppose you go upstairs and bring back the last leaf!"

"All Gone Now," He Murmured.

Gas Works in Japan.

For a nation accustomed to lamps and candles for centuries, the fact that nearly 2,000,000 people in Japan now use gas for lighting purposes, is worthy of notice. Despite the charge for gas, higher than in Europe or America, the per capita consumption has increased on the increase. In time a more developed condition of the industry will permit of a lower rate through the production and sale of dyes, coal tar and other by-products. Superstition and ignorance were the reason of numerous accidents at first, but the results have not been so unfortunate as in many foreign countries. This is principally due to the fact that the rooms of Japanese houses are not so nearly airtight as the houses of this country. The amount of capital now invested in gas works in Japan amounts to about $20,000,000, with about 700 miles of piping. The concerns engaged in the enterprise have on the whole done well from the standpoint of profit, the dividend yields being about 10 per cent annually. The hydroelectric industry in Japan, however, is overcrowding fast, where may cause the gas companies to suffer somewhat.—Philadelphia Commercial Museum Notes.

Culture.

Culture is not a useless thing for ornament. Culture is service, growth. Culture is the full stature, the highest development of life. Without culture of this kind there can be no successful agriculture. The lack of culture means idleness and waste of the field as well as of the human intellect. Plant food in the soil becomes available, assimilable, only by culture. Bacterial life in the soil becomes most active and productive under culture. Culture, properly guided, is vision realized. Nowhere is there a higher or more useful culture, than in the development of plant and animal life. A trained mind is a cultured mind. A highly productive field is a cultured field. The farm is nature's culture garden. There is culture in agriculture, and agriculture is culture in a highly intensified form.—Breeder's Gazette.

The Unfair Sex.

"Walt a minute," said Mrs. Jones to Mrs. Knox, who was making a neighborly call. "I want to show you my new Easter bonnet."

"I think I saw it," replied Mrs. Knox. "You had it on, didn't you, when I did you not?"

"Yes," replied Mrs. Jones. "By the way, how did you like it?"

"Oh, it was just lovely," replied Mrs. Knox. "I'm sure dear, it looked as well as it did last year."

Only a female of the species could say a thing like that and say it so sweetly that honey would taste sour in comparison.

Fewer Deaths From Diphtheria.

The number of deaths due to diphtheria has almost numerically decreased during the last 15 years, and at present is less than one-half that of 1900.

Reclaiming an Empire

ON THE DESERT PLATEAU

THE SHRILL whistle of the engine at the power plant at Elephant Butte, New Mexico, echoed and re-echoed down the canyon one a recent afternoon at four o'clock. While the same shrill call had made similar music innumerable times before during the last five years its toot-ing that day had peculiar satisfaction. It gave vociferous and prolonged notice that the last bucket of cement had just been placed in its proper niche in the parapet wall and the greatest dam dam in the world had been finished.

In two important essentials the Elephant Butte dam ranks all other concrete masonry storage dams of the American reclamation service, viz., cubical contents and capacity of reservoir. In the latter particular it ranks every other irrigation dam in the world. When the floods of the Rio Grande begin to drip over the spillways, the Elephant Butte reservoir will contain twelve times more water than the combined storage of all the reservoirs for Boston and New York. There will be more water by one-third than is impounded by the $10,000,000 Assuan dam in Egypt. Spread out, the Elephant Butte storage would cover Delaware more than a foot deep. Confined in a pipe four feet in diameter, it would encircle the globe seventy times. Expressed in layman's measure, it will hold 865 billion gallons.

The material in the dam if placed on a city lot 25 by 125 would make a solid block of concrete lacking only 10 feet of being a mile high. Its weight is more than 1,100,000 tons. Transported by rail, it would require 22,000 of the largest freight cars or a train 211 miles long.

In the dam are twelve openings or passages, six for future power development, four for delivery of irrigation water, and two for sluicing purposes.

Reclaiming an Empire

The Elephant Butte dam, while the largest, is only one of the numerous structures contemplated for the reclamation of the fertile empire which lies below it in New Mexico and Texas. Mr. McIlvrainth, the irrigation engineer, thus tells about it.

"The Rio Grande project lies in the valley of the Rio Grande between San Marcial, New Mexico and Pabens, Texas. The project as proposed is for the irrigation of 160,000 acres of the rich valley lands both in New Mexico and Texas, and by the convention between the United States and Mexico signed May 21, 1906, about 20,000 acres will be irrigated in the republic of Mexico.

"The source of water supply is the Rio Grande, which is a stream of extreme fluctuations, varying from no flow to a flow of over 30,000 cubic feet per second. It is necessary, therefore, to the efficient development of this project, to provide storage reservoirs and diversion dams for the regulation of the flow. The plans as developed consist of one large storage reservoir and at least four separate diversion and irrigation systems. The four systems are necessary on account of the topography of the irrigable lands, which lie in four distinct valleys, the Palmas, the Hinson, the Mesilla and the El Paso valleys, between these valleys the river flows through canyons and narrow gorges. Three of the diversion dams have been built and are now in use. They are the Leasburg diversion dam, the Mesilla diversion dam and the Mesilla diversion dam. The Leasburg diversion dam is located at the head of the Mesilla valley in New Mexico one mile north of the international boundaries, and diverts water for use on the upper part of the Mesilla valley. This dam was the first work constructed by the reclamation service on the Rio Grande project. The Mesilla diversion dam is located near Mesilla Park, New Mexico, about the middle of the Mesilla valley, and furnishes water to lands on both sides of the river in the lower part of the Mesilla valley. This dam has just been completed. The Mexican dam is located at the upper end of the El Paso valley just above the city of El Paso, Tex. This dam was constructed a number of years ago by the Mexican government to divert water both to the lands on the American side in the El Paso valley and to lands on the Juarez, Mexico, side of the Mexican side. From these diversion dams several canal systems are built.

Aborigines Used Irrigation.

"Before the middle of the sixteenth century the Spaniards experienced the valley of the Rio Grande and found in these valleys Pueblo Indians cultivating the land and irrigating it by means of sewages from the river, some of which are still in use. How long these Indians had been on the ground is unknown, but even at that time they were considered old inhabitants and raised not only grain and fruits but even flowers. The descendants of these Indians and the Spaniards have continued to cultivate portions of these valleys up to the present without much change in methods.

"While the Spaniards first entered the valley from Sonora and the Gulf of California, the first attempts at colonization were made from El Paso Mexico having extended by that time to the Rio Grande. In 1600, Paso del Norte (now called Juarez) was an important town, and records are in existence nearly three hundred years old which refer to the Acequia Madre of Paso del Norte as being then in use.

"The present system of the Mesilla valley have been in use for about six years, but there are evidences of older canals that have been abandoned.

"The reclamation service began investigations on the Rio Grande March 1, 1905, considering especially the dam site at Elephant Butte. Elephant Butte is an extinct volcano arising from the east bank of the Rio Grande to a height of five hundred feet above the river, the few birds in our mind, as a base, the Spanish conquest of Mexico having extended by that time

ELEPHANT BUTTE DAM

Common American Birds

Interesting information about them supplied by Bureau of Biological Survey of the United States Department of Agriculture

Yellow-Bellied Sapsucker

(Sphyrapicus varius)

Length, about eight and one-half inches. Only woodpecker having top of head from base of bill red, combined with a black patch on breast.

Range: Breeds in northern half of the United States and southern half of Canada; winters in most of the states and south to Costa Rica.

Habits and economic status: The yellow-bellied sapsucker is rather silent and suspicious and generally manages to have a tree between himself and the observer. Hence the bird is much better known by its work than by its appearance. The regular girdles of holes made by this bird are common on a great variety of trees; in all about 250 kinds are known to be attacked. Occasionally some trees are killed outright, but more loss is caused by stains and other blemishes in the wood which result from sapsucker punctures. These blemishes, which are known as bird pecks, are especially numerous in hickory, oak, cypress and yellow poplar. Defects due to sapsucker work raise an annual loss to the lumber industry estimated at $1,000,000. The food of the yellow-bellied sapsucker is about half animal and half vegetable, but the vegetable relishes slightly in its favor. It eats also wasps, beetles (including some injurious species), ants, grasshoppers, flies, bugs, and spiders. The two most conspicuous of the vegetable food are wild fruits of no importance and cambium (the layer just beneath the bark of trees). In securing the cambium the bird does the damage above described. The yellow-bellied sapsucker makes amends, however, thus does comparatively little good and much harm.

Rose-Breasted Grosbeak

(Zamelodia ludoviciana)

Length, eight inches.

Range: Breeds from Kansas, Ohio, Georgia mountains and New Jersey, north to southern Canada, winters from southern United States to Costa Rica.

Habits and economic status: This beautiful grosbeak is noted for its sweet, melodious warbling, which is poured forth in generous measure. The rose-breast sings even at midday during summer, when the intense heat has silenced almost every other songster. Its beautiful plumage and sweet song are not its sole claim on our favor, for few birds are more beneficial to agriculture. The rose-breast eats some green peas and does some damage to fruit. But this mischief is much more than balanced by the destruction of insect pests. The bird is so fond of the Colorado potato beetle that it has earned the name "potato bird," and no less than a tenth of the total food of the rose-breasted grosbeak consists of potato beetles—evidence that the bird is one of the most important enemies of the pest. It vigorously attacks the smaller beetles and many of the scale insects. It proved an active enemy of the Rocky mountain locust during that insect's recent outbreak, and among the other pests it remainers are the spring and fall cankerworms, orchard tent and forest tent caterpillars, tussock, gipsy, and brown-tail moths, plum curculio, army worm, and chinch bug. In fact, not one of our birds has a better record.

Purple Martin

(Progne subis)

Length, approximately eight inches.

Range: Breeds throughout the United States and southern Canada, south to central Mexico; winters in South America.

Habits and economic status: This is the largest as it is one of the most beautiful of the swallow tribe. It formerly built its nests in cavities of trees, as it still does in wild districts, but learning that man was a friend it soon adopted domestic habits. Its presence about the house can not be secured by erecting houses suitable for nesting sites and protecting them from usurpation by the English sparrow, and every effort should be made to increase the number of colonies of this very useful bird. The males should be at a reasonable height, say 15 feet from the ground, and made inaccessible to cats. A colony of these birds on a farm makes great inroads upon the insect population, as the birds not only themselves feed upon insects but rear their young upon the same diet. Fifty years ago in New England it was not uncommon to see a colonist of 15 pairs of martins, but most of them have now vanished for no apparent reason except that the martin houses have decayed and have not been renewed. More than three-fourths of this bird's food consists of wasps, bugs, and beetles, their importance being in the order given. The beetles include several species of harmful weevils, as the cleverhead weevils and the red weevils, the lacer bugs, leaf beetles, flies, moths, May flies, and dragon flies.

Cooper's Hawk

(Accipiter cooperi)

Length, about 20 inches; inches. Medium sized, with long tail and short wings, and without the white patch on rump which is characteristic of the marsh hawk.

Range: Breeds throughout most of the United States and southern Canada, winters from the United States to Costa Rica.

Habits and economic status: The Cooper's hawk, or "blue darter," as it is familiarly known throughout the South, is preeminently a poultry and bird-eating species, and its destructiveness in that direction is confined only by that of its larger congener, the goshawk, which occasionally in autumn and winter enters the United States from the North in great numbers. The Cooper's hawk offers no defense against birds of prey is largely due to the activities of these two birds, assisted by a third, the sharp-shinned hawk, which in habits and appearance

might well pass for a small Cooper's hawk. These birds usually approach under cover and drop upon unsuspecting victims, making great inroads upon poultry yards and game coverts favorably situated for this style of hunting. Out of 123 stomachs examined, 38 contained the remains of mammals. Twenty-eight species of wild birds were identified in the stomachs, including 18 of game birds. The hawk, together with its two near relatives, should be destroyed by every possible means.

Patience Needed for Success.

The advertiser who loses his patience loses his money.—Exchange. Mail order journal.

DAIRYING IN WESTERN CANADA

Accompanying Industries Also Prove Highly Profitable.

The cheese industry throughout western Canada today is in a highly flourishing condition and is bound in a very short time to become much more important. The war has created a great demand for that article, and its use abroad has given it a lot of useful advertising. The article known as Canadian cheese is now sought not only by the soldier in the trenches, but by the ordinary civilian consumer, who, having used it, is quick to appreciate its value. This means that after the war there will be a demand created for it that would not otherwise have been. Up to the present the war needs have limited the local supply, but with the increased effort that is now being put forth it is hoped that this will be met. As a matter of course the prices are high and the farmers who contribute to the cheese factories are making money.

The cheese season is now fully open and there is every prospect of an excellent year because the high prices which obtained last year will undoubtedly be maintained this season. Western Canada has all the natural resources for the making of cheese, the feed and the cool nights, two things essential, and in time it is bound to become one of the finest cheese countries of the continent.

The lower foothills of Alberta, and only at the present time as a dairy or for no purpose, will in time produce cheese in great quantities, and doubtless will soon equal the famous uplands of Denmark.

The cool nights mean the better keeping of milk and cream and consequently the better quality of the industry, especially when combined with cleanliness, which cannot be said to exist on the long slopes from the Rockies eastward.

The dairy market, which may be classed as an adjunct of farming, is an exceedingly good one, and the low cost at which the feed can be produced, coupled with the high prices realized, make this industry very profitable.

One of the first thoughts that occur to the mind of the average prospective settler in the Canadian West is suitable markets. In this connection the following table will be of interest. It is compiled by the P. Burns Company, packers and exporters, of Calgary, and shows the average monthly price paid for hogs for the six years 1910 to 1915 inclusive. When one considers the low initial cost of the land and the small overhead cost of maintenance and feed, these prices challenge comparison.

	1910	1911	1912	1913	1914	1915
January	7¾	8¼	7¾	8¼	7¾	$8.71
Feb.	7¾	8¼	8¼	8	6.95	6.95
March	7¾	8¼	8¼	7¾	7¾	6.95
April	7¾	8¼	8¼	7¾	7¾	8.06
May	7¾	8¼	8¼	7¾	7¾	8.06
June	7	8¼	8	6.85	8.30	
July	7¾	8¼	8	8.12		
Aug.	8	8¼	8¼	7¾	8.56	
Sept.	8	8¼	8¼	7¾	8.56	
Oct.	8	8¼	7¾	7¾	8.00	
Nov.	7¾	8¼	8¼	7¾	8¼	
Dec.	7¾	8¼	8¼	7¾	8¼	8.70½

A farmer of Monarch, Alberta, claims the distinction of having the first in the province to sell a carload of hogs at the high price of $8.70 per cwt. The last barrier was made a short time ago at Calgary, and at that time was a record, although prices have since gone so high as $11.15, per hundred liveweight. With such prices available for hogs the farmer has a market for everything he farms produces, as there is practically no farm product which cannot be converted into good hog flesh. The uncertainty of results which attends farming in the fertile belt is somewhat obviated by the fact that the market is always good, and in spring, summer, autumn and winter enters the United States from the North in great numbers. The Canadian dairyman's stock is not the stock farmer is as sure of success as anyone can be.—Advertisement.

Didn't Think Much of Pa's Job.

Shortly after Sir Edward Carson had relinquished the post of solicitor general he was speaking of the methods of examining candidates for the service and told the following story: "I had a son that went through that ordeal and when it was over asked him what had been said to him.

"'A lot of rot!' he replied. 'They asked me if my father was the solicitor general and when I said that he was they asked me why I didn't follow in his footsteps. I told them that I had enough sense to know that I had all this job.'"

New Cause of Delay.

"Good gracious! Wife! We'll be late for the theater! Aren't you nearly ready?" shouted the husband from the foot of the stairs.

"I'm coming as fast as I can," came back the reply.

"Have it take all this time to put your hat on?"

"Oh, I've had my hat on for a long time."

"Well, what on earth detains you?"

"I'm waiting on my spats!"—Yonkers Statesman.

Family Secret Exposed.

Some people drop out of sight in the other world, and the flattered hostess did her best in the limited space she had to make them a good show at the supper table.

But she had only just begun to flatter herself that things were passing off swimmingly when her youngest daughter, aged six, remarked to the gentleman next to her:

"Aren't these cake jumblers we've got Mr. Dixey? They all came from the grocer's full of marmalade. Didn't they, ma?"

A woman never misses an opportunity to boost her influence over some man.

THE HEART OF NIGHT WIND

A STORY OF THE GREAT NORTH WEST

By VINGIE E. ROE

ILLUSTRATIONS by FRY WALTERS

COPYRIGHT, BY DODD, MEAD AND COMPANY

CHAPTER XXXI.

—Ile—

The Red Death.

So they were left: these two—the East and the West—alone upon the misty eyrie of the jumbled peaks. Only the forbidden sense of the Hog Back, running like a great thin blade high between the red tort creeping at its base, carried a passage out of the roaring death. Steers had planned that the splendid black should make it first.

Now she turned back to the two men she loved—the Preacher, silent under the shielding form with his Bible and his flute, Sandry prone upon the earth, his face in the pine needles, his hands clasped above the back of his other. Her eyes were dim with the old look of caution, the hated look the wolfish face and gazed long upon it. The call of blood had ever held her to this man mysteriously, though both were ignorant of the vital tie between them, the Preacher because of the dreamy blank in his mind since the tragedy of this forest day, Sandry because Kelawnie, wise beyond his generation, had seen how blood taken on the wrong side of the sheets. She loved her mother and had tried to make her happy, though she was the white a wolf of the old frontier, and he had seen her break her heart and die.

Therefore, after silent hours by the Grim Tower he had accepted the mandate of Destiny and had taken the babe. If Jim Broken Spoke had given her to the only white woman he would trust, Ma Dally, who took her with her questions and her fears, he would not tell her history. So now Blistr looked for the first and last time confidently upon her own. Presently she leaned over and kissed him softly, replaced the forms and rose.

Beside Sandry she stopped, stood a moment gazing accord at the pine boles (last loomed like fearful ghosts in the smoke, and sat down beside him, tucking her feet with the agnold motion of the blanket-wearers beneath her skirt, so deeply had she absorbed the ways of the dusky people whom she loved.

She did not speak.

When at last the man, his faceform out of all semblance, to stare, raised his eyes to her she was calm as the hills before the fire. He leaned at her, raising himself on his elbow, looked long while Knowledge was born in him.

So this was the West, the world he had once thought so romantic. It was the wild, the untaught, the crude—this slim forest creature who served him without question because he had bought her with a kiss, who asked nothing, who stayed by him to do because she loved him! Who asks, believed in her despite that other's description that she was promised wife! And yonder went his world, his cultured, polished East, riding down to life and safety, her loss forgotten in the face of danger! Yonder went what he had thought "the best blood of the land!"

Nay, he had been wrong! It was here beside him, in the forest, in spite of ft weakness, the savagery hidden in its dim black eyes! The last barrier went down in Walter Sandry, the last last strand of prejudice broke with a snap. He rolled over and caught the hem of her ragged skirt.

"Little Sister!" he said brokenly, "oh, Little Sister! What am I that you should save done this thing?"

She looked down at him and the rare smile curled up the corners of the lips above the pearls.

"You are my man," she said softly, "the king of the whole world! You are the light on the mountains, Sandry, the mist in the valleys, the path to the God of Good. Only I look out between the ends."

A tender whitishness rang in her voice. She fell silent after her fashion when great emotions stirred her. Sandry's eyes smarted under blinding tears. His chin was quivering with the sharp emotions that swelled his heart to bursting and his scorched and blackened hands clung, trembling, to Sister skirt.

"See, little one! I come at last to your God above the law!" Take my hand that we may go together, and pray."

But the girl raised a calm face to the unspeakable heavens—a face in which all struggle had been stilled, where there was no other hope nor fear, only great content.

"No," she said, "I cannot pray for I have no soul. I have lost it as the eagle has wings."

The man could not speak and she answered his look in his look.

"We will go together. You have had no God. I have forsworn mine. We go to-gether! It is the right law—the sure and just wage of sin," she was falling into the stately little language, taking on the simple dignity of the Preacher's way and manner, "but we will go together. I give my soul to you."

Lifting his ashen lips Sandry rose on his knees and gathered her into his arms. He held her to him with all the yearning of his breaking heart and buried his face in her throat.

The dull rumbling again broke through the howling of the storm or the fire that was fast ringing in with the cup among the peaks.

"Hear it, Sandy!"

Behind the Hog Back running out from the jumbled peaks, a blade between them, the Preacher stood, swiftly, beating up the light ashes in his pipe, and the instrument, heavy with rollcall and accounting, there came first astounded exclamation, then a cry, as the man, at the forest road way, a mighty cheer that rent the forest aisles, then a heavy clap of thunder shook the hills.

"The rains!" they cried, "the rains! The fire-rains!"

And it was even so. Nature took a hand and was fighting the forest from the favor of her carnival. The elements came to a decision.

Among the mountains the effect was indescribable. The thing that took place was not fire, nor rain, but was greater than the fires had been alone.

Long sheets of rain swept down the world, slanting from some titled sea of the infinite. They dashed in among the canyons, placed along the ridges, lashed slope and ledge and valley. The smoke was beaten into the earth in a blanket that spread over a hundred miles and more. It writhed and twisted and was lost in the clouds of steam that fed, hissing, high above the hills. The gods played with the Coast country. Dally turned his face away from my man and the general went to the little south room in the cook-shack for unaccustomed prayer.

The world turned blue with rain as it had been white with smoke.

And the preacher, men, who had fought so long and failed, tossed their hands in triumph and shouted—with the last of their voices.

For an hour, two, it rained, until the black spikes on the devastated slopes were blotted out.

"It's mighty unusual, a rain's hard's this—especially the first rains," said a man from Toledo, earnestly. "I'm over remember one's hard. Dyos, yup!" and Bill didn't.

Presently, in the second hour of the downpour, a strange procession loomed out of the gray-blue sheets, startling men who were out in the open and to shirk its worst, standing like ducks in the submind.

It was a long, shining body of a giant dog, still tugging at the reins of a big collar, a dripping black horse, tired to the point of falling, and a woman who had taken off the coat with strips of broadcloth, and whose face was not good to look upon. Her upper lip was twisted as if in too much horror.

They drew up around her with cheers and eager hands, and questions that tumbled over each other. But John Dally threw them all aside to seize her wrist and demand word of Sandry and Sister.

"They're—up behind—the Hog Back," she answered, as she spoke that name. "We found Hampden—setting the—fire—with candles."

Here there was a sved murmuring.

"He—shot the—Preacher. He said—we—lost—his dog—was—dead—all right—but that—he owned—the recorder."

She seemed dully bent on straightening out some tangle. Sandry is—a man—despite all. Get Hampden—if—he's alive. No. I don't mean—that. Sandy—sent—him down. The horse was—near done." As she slid down into Dally's arms she said with her last ounce of strength but with such commanding spirit that he knew she was in deadly earnest: "Get me—a conveyance—at once. I want to be in Toledo—for the night—call."

Thus it came, that as night closed down the wet rain over the tortured country, two things of import to the fortunes of the Dillingworth and its owner were taking place. Poppy Ordway stood on the platform of the dreary station at the lost little town on the backwater, bound for the outside world and the far cities.

At the same moment yet one more procession was coming slowly down from among the peaks, a line of men—a long line, for weary as they were dozens had followed the foreman into the wrecked, mud-dent forest—who bore tenderly among them two slings. It was a significant fact that scattered along that successive line was every man of Sandry's old crews who had gone over to Hampden.

In one sling there swung gently the still figure of the Preacher, its cloak upon its breast, its martial fists beside it, its glimmerings of the Past forgotten, its wistful searchings ended.

In the other lay Sandry, his right hand clasping two small dark ones whose owner trudged faithfully beside him refusing all offers of assistance.

A body jerk was in his heart: his lips moved noiselessly in the rolling Latin

A Great Black Horse Carrying a Double Burdan.

sea of smoke long red streamers inked up toward them and blazing torches lighted them like searchlights. But the dog pulled ahead on the long reins, as he was bidden to do. He was going home, faithful, wistful by brid that he was.

And the horse was of that fine mettle which, at the sight of the forest danger. Therefore he shook himself slightly, gathered his feet and stepped out carefully on the narrow path. Almost fainting, the woman in the saddle shut her eyes and clung to the saddle horn, every nerve in her body stretched to the utmost and her breath held hard.

Once she swayed, opened her eyes unconsciously, and saw the pine tops far below where a crossgust of wind blew the smoke aside.

CHAPTER XXXII.

The Blessed Rain.

At camp at the upper railway John Dally was unusually busy in the crowds of silent, exhausted men for trace of Sandry, of Blistr and of Miss Ordway.

His face was ghastly, for love tore at his heart with double force.

Ma Dally had not seen him for two days and when she met him she sat straightly.

"Stick went into th' fire, son, after Sandry! Yer mind on th' lady, Ma's th' Jezebel woman went, too."

That was the hardest smack of the big man's life and he came near not taking it standing. He staggered as his arms and looked away to the inferno they had left at the northwest end of the canyon that covered the sky.

Then he started on a wavering run among the men, calling for volunteers, stricking hoarsely that two women were lost up there and that he was going after them. As he ran, looking on someone's horse, from the hidden heavens and splashed upon his face. It stopped him in his tracks. Then another fell and another in the falling drops that struck him like stones in their patter. They thickened swiftly, beating up the light ashes in my path, and the instrument, heavy with rollcall and accounting, there came first astounded exclamation, then a cry, as the man, at the forest road way, a mighty cheer that rent the forest aisles, then a heavy clap of thunder shook the hills.

"The rains!" they cried, "the rains! The fire-rains!"

And it was even so. Nature took a hand and was fighting the forest from the favor of her carnival. The elements came to a decision.

Among the mountains the effect was indescribable. The thing that took place was not fire, nor rain, but was greater than the fires had been alone.

Long sheets of rain swept down the world, slanting from some titled sea of the infinite. They dashed in among the canyons, placed along the ridges, lashed slope and ledge and valley. The smoke was beaten into the earth in a blanket that spread over a hundred miles and more. It writhed and twisted and was lost in the clouds of steam that fed, hissing, high above the hills. The gods played with the Coast country. Dally turned his face away from my man and the general went to the little south room in the cook-shack for unaccustomed prayer.

The world turned blue with rain as it had been white with smoke.

And the preacher, men, who had fought so long and failed, tossed their hands in triumph and shouted—with the last of their voices.

For an hour, two, it rained, until the black spikes on the devastated slopes were blotted out.

"It's mighty unusual, a rain's hard's this—especially the first rains," said a man from Toledo, earnestly. "I'm over remember one's hard. Dyos, yup!" and Bill didn't.

Presently, in the second hour of the downpour, a strange procession loomed out of the gray-blue sheets, startling men who were out in the open and to shirk its worst, standing like ducks in the submind.

It was a long, shining body of a giant dog, still tugging at the reins of a big collar, a dripping black horse, tired to the point of falling, and a woman who had taken off the coat with strips of broadcloth, and whose face was not good to look upon. Her upper lip was twisted as if in too much horror.

They drew up around her with cheers and eager hands, and questions that tumbled over each other. But John Dally thrust them all aside to seize her wrist and demand word of Sandry and Sister.

"They're—up behind—the Hog Back," she answered, as she spoke that name. "We found Hampden—setting the—fire—with candles."

Here there was a sved murmuring.

"He—shot the—Preacher. He said—we—lost—his dog—was—dead—all right—but that—he owned—the recorder."

She seemed dully bent on straightening out some tangle. Sandry is—a man—despite all. Get Hampden—if—he's alive. No. I don't mean—that. Sandy—sent—him down. The horse was—near done." As she slid down into Dally's arms she said with her last ounce of strength but with such commanding spirit that he knew she was in deadly earnest: "Get me—a conveyance—at once. I want to be in Toledo—for the night—call."

Thus it came, that as night closed down the wet rain over the tortured country, two things of import to the fortunes of the Dillingworth and its owner were taking place. Poppy Ordway stood on the platform of the dreary station at the lost little town on the backwater, bound for the outside world and the far cities.

At the same moment yet one more procession was coming slowly down from among the peaks, a line of men—a long line, for weary as they were dozens had followed the foreman into the wrecked, mud-dent forest—who bore tenderly among them two slings. It was a significant fact that scattered along that successive line was every man of Sandry's old crews who had gone over to Hampden.

In one sling there swung gently the still figure of the Preacher, its cloak upon its breast, its martial fists beside it, its glimmerings of the Past forgotten, its wistful searchings ended.

In the other lay Sandry, his right hand clasping two small dark ones whose owner trudged faithfully beside him refusing all offers of assistance.

A body jerk was in his heart: his lips moved noiselessly in the rolling Latin

A Huddled Heap Lay at Its Base.

of a "Te Deum." This was the hour for which he had carelessly learned it at college.

Unashamed he acknowledged the existence of that Power to which he once denied to Sister.

And the little maid who had lost her soul for love lifted wondering eyes toward the west ridge, hidden in the rain. Blistr, where her sanctuary, the seven-foot fir stump, waited in vain for her rites of worship.

There was a wistful pathos in her face as acceptance of the mighty power which had been asked of her, and yet she was content. She had offered both her soul and body, exalted, glorified, in that she might serve this man.

Where her soul had been there was a sweeping, burning, glorious passion which tightened her clasp on Sandry's hand. Neither she nor the young owner realized that they had exchanged places on the path of life.

The procession, headed by John Dally who carried one end of Sandry's sling and was filled with a generous joy in that he had found these two alive, wound slowly down from the cup behind the Hog Back, penetrating that fringe of pines at its foot which had formed the trap. They were now but hideous blackened shafts, monsters that towered frightfully into the rain, their bases smoking here and there where a boulder shielded stubborn fires.

Close along the face of the giant cliff they pressed, taking the shortest way.

Suddenly, without warning, they came full upon a huddled heap that lay at its base. It was pitifully flat and broken, as if it had fallen from a great height, and it bore upon a shoulder a dreary crimson stain, wasted and widened by the rain.

Dally halted and sent a cry along the line.

They touched the thing with awed amaze, turning up its face to behold the heavy face of the Yellow Plane owner.

Hampden, with the aid of the towering spine and the sheer depths had found a way to undertake to carry his secret with him.

And with the passing of the wondrous face under the disheveled gold hair had gone his last curse.

They hastily constructed another sling and added one more burden to the procession.

So at last and forever Walter Sandry came home his own. There was yet timber in the Coast country. The last fell was all but free of the dead. Some old hidden records should be unearthed through Hampden's aid, or he would file on it legitimately himself, for that confession of Hampden's recorded deed would invalidate the O'Conn-t filing.

His enemy was gone—in shame and wretch disgrace. He had well fought fight.

That old crime, done in poetic justice under the Hight Law of primal man, troubled him not at all. He had given the glory of his father's face head back (Fig. 4).

Fig. 3 shows the necessary measurements for cutting and assembling the parts. Place two uprights A and B upon the floor with their ends at the distances apart specified on the diagram. Then place C and D across them, and mark the positions for the notches. Cut the end notches in A and B with a saw, and the center notch in C with a saw and chisel. Be careful to make the notches no wider or deeper than necessary, so the joints will be snug and flush. Before nailing the crosspieces in place, cut one end of each to fit the slant of upright A; also mark and cut off the ends of upright A and bevel the top edge as shown. Crossplece E is a 1-by-4-inch board of the length of C, and is nailed to the edges of A and B as a support for the seat boards.

After the pair of end frames have been nailed together, connect them with the one by four inch boards F and H (Fig. 3). The length for these will be determined by whatever length you have decided to make your porch seat. Nail boards F to the frame work, first; then nail the top board H to upright A, and afterward the other three boards H. Crossplece G is the size of piece E, and is fastened halfway between the ends to support the seat boards at the center.

Fig. 5 shows how the seat boards are fitted around the uprights, and nailed to the framework members.

Hot hinges and chains of hardware store for supporting the porch seat. Get very long hooks like those shown in Fig. 5, with long screws that will screw in at least 1 inch into the seat uprights and porch ceiling joists, and select heavy iron chains. Fig. 1 shows how to join each pair of end chains several feet above the seat arms so but a single end chain will connect with each of the two ceiling hooks.

When you have completed the carpenter work on the porch, take two sheets of red rosin paper, all rough portions, putty nail holes and joints, and give the woodwork two good coats of paint.

WHY MILK REFLECTS LIGHT

Consisting of Minute Droplets of Fat, it Throws Back Rays in Every Direction.

One is often apt to forget that color is merely a reflection of light, and that anything which reflect light perfectly will be the color of that light. The most nearly perfect form to reflect is a sphere. The moon is bright because it reflects the sun. The earth is bright for the same reason, as one can see at the time of new moon, when the part of the moon hidden from the sun by the earth shines faintly from reflected earth light.

Milk is like a collection of moons. It is liquid filled with minute droplets of fat, each of them a perfect sphere. When the light strikes these, it is reflected at every angle, reflected on to other droplets of fat and by them reflected on and on, until from every point in the milk the white light that strikes on the outside is reflected.

Think of marbles made of looking glass, but so small that several thousand could be put on the head of a pin, and you will see the reason for the reflection, or the white color of milk.

When, in the case of milk, the number of droplets of fat becomes fewer, grows smaller, then the light is not reflected so much, and reflection grows more transparent. Absence of fat in fraction makes milk less white, or, in lesser, nearly perfect form to reflect, approaches a blue sky, and of water blue sea.

GREEK WOMEN STILL DRUDGE

Modern Emancipation of the Sex Has Not Yet Arrived in That Country.

The position of women in modern Greece him is sentimental, to say the least. While the great Balkan states are taking big active social

Announcement.

I hereby announce myself as a candidate for the office of county clerk on the republican ticket, subject to the ratification of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. GRAFFY.

How Raindrops Make the Lightning.

An English scientist declares that the splitting of raindrops in falling through the ascending air currents, which are characteristic of thunderstorms, is the source of the lightning. The small drops with negative charges go up with the wind while large ones with positive charges stay below. Thus during a thunderstorm there is usually a region of positive electricity between the positive earth and the negative upper portion. When the charge has become sufficient a series of direct current discharges usually take place along approximately the same line and these produce what we see as a lightning flash.

WILL MY CHILD TAKE DR. KING'S NEW DISCOVERY?

The best answer is Dr. King's New Discovery itself. Its a pleasant sweet syrup, easy to take. It contains the medicines which years of experience have proven best for coughs and colds. Those who have used Dr. King's New Discovery longest are the best friends. Besides every bottle is guaranteed. If you don't get satisfaction you get your money back. Buy a bottle, use as directed. Keep what is left for Cough and Cold insurance.

Northern Michigan

A disastrous fire came near wiping out the village of Mackinaw City, Tuesday forenoon. The fire destroyed four business places and did $10,000 worth of damage and caused the death of S. H. Chamberlin, an aged merchant, who lost everything and died of heart failure from excitement.

Cheboygan Tribune: The fishing tug Josephine of Charlevoix, has been added to the fleet making Cheboygan her headquarters. The Josephine arrived here in command of Capt. A. Graham who set his nets at Spectacle Reef. Her owner, Charles Henrickson, is also in the city and is looking for a house, expecting to remain in Cheboygan for this season.

St. Ignace—New machinery is knocking out the longshoremen which is proving loss in effect. For instance, 2,500 tons is being shipped here from the Newberry furnaces to be transferred to the steamer Cicona for water shipment to its destination. The Cicona was purchased last year by the Charcoal & Iron company and is equipped with three electric cranes. Each of these cranes has a powerful magnet with a lifting power of 1,500 pounds. The cranes are operated by the regular boat engineer from a dynamo in the engine room and the rest of the work is done by the deck hands. It is said this the one can be loaded by this arrangement for 12 cents a ton.

East Jordan Enterprise: Fred Smith of Ellsworth, one of the best known men in this vicinity, was buried on Monday last. He had lived at Ellsworth for many years and we believe had the first power boat on the Intermediate Lake. A number years ago he designed and patented a device for an adjustable propeller for small power boats plying in shallow grassy waters. Later he bought the sawmill at Ellsworth, which burned a few weeks ago with no insurance. A few days ago he went to Detroit to seek work and on Friday last died there from the effect of being struck by a scantling while working in a lumber yard the previous day. The body was brought to Ellsworth.

Preparations are being made by the Grand Traverse Fruit and Produce exchange to handle 100,000 crates of cherries during the coming season and this together with the other fruit that will be handled will keep the organization busy. Manager Kerr will take a trip to many of the largest cities before the fruit season opens in order to make sure of a market for this large quantity. C. C. Blaker, an experienced fruit salesman, has been engaged by the exchange as its traveling salesman for the season. He has traveled for several seasons for the association at Hartfield, Wis., and knows the trade well. Hugh Moody of Bald Knob, Ark., has been retained as chief inspector for the cherry season and this will insure a standard grade and pack for all fruit sent out by the local association.

Petoskey News: There now seems a good chance of having the affairs of the old Beulah Home association, at Boyne City, closed up as there will be a meeting of the board of directors in Detroit Monday, June 19, at which every effort to clean the slate will be made. The property at Boyne City was traded some time ago for Detroit real estate and this has increased steadily in value until that which has been sold has brought enough money to pay off all the debt of the institution. The remaining property will be sold and the money will be made a part of the Herman Swift estate and will go to Mrs. Swift and son. Many of the members of the board of directors have died and the first work of the board will be to hold an election. Then the other business can be looked after and the board dissolved.

The massacre at old fort Mackinaw occurred one hundred fifty-three years ago June 4. In commemoration of the event the Sunny Day children's club at Mackinaw City held interesting services on the old fort grounds Saturday afternoon. The children, between eighty and ninety in number, gathered at the school house and marched in a body to the Fort Michilimackinac State Park. They were attired in Indian and early French and English costumes and each carried an American flag. At the park entrance they saluted the flag, run up on the flag pole by Caretaker George Marshall in honor of the occasion. Grouped about the stone of the very spot where the massacre occurred, the children listened to a patriotic address by Rev. Joseph Sleenkoper, who made a strong point of the protective qualities of the stars and stripes.

Reports of agricultural distress in northwestern Michigan seem to have been exaggerated. Letters offering confidential aid to farmers hit by last autumn's early frosts were sent to the eighty-two supervisors in the counties of Emmet, Benzie, Charlevoix, Antrim, Leelanau and Kalkaska by John I. Gibson, secretary of the Western Michigan Development Bureau. Of the eighty-two only eighteen responded and of these replies only three supervisors enclosed requests for seed for their constituents. These orders were filled promptly, funds being provided by a generous Grand Rapids financier, distribution being made through the supervisor and the recipient's note without interest being accepted until after harvest. The supervisors' letters, however, reveal how the sturdy Michigan farmers in the counties mentioned rallied from their discouragement of last year. Some of them had seed husbanded from 1914. Others were forced to borrow and the county banks, it is stated, stood loyally by their districts. Speaking for their townships everyone helped his neighbor as far as he was able, the majority of the supervisors testified that their people could pull through without aid; a few might be pinched, but they preferred to stand the gaff rather than accept a confidential loan.

HOUSE FOR SALE—A modern seven room house on South Bridge St., heating plant, bath and garage. Mrs. W. H. Graham. Telephone 197. 6-1-tf

Whence "Gringo."

In Spanish "gringo," pronounced greengo, means gibberish or unintelligible chatter. American Spaniards applied it to Americans and Englishmen in contempt because their language sounded like gibberish to the Spanish lands. Now the term is applied in contempt to Americans in the same way that Americans speak of Mexicans as greasers.

FOR RENT--

TIRES

Absolutely Punctureproof
GUARANTEED 6500 MILES

Buy your tires direct from our factory and save from 20 to 30 percent.

These tires are twice as thick through the tread as ordinary makes and are a combination of the best brands, such as Goodrich, Goodyear and Firestone. They are strongly built and reinforced by a new, superior method, making a finished product unequalled for hard usage and pleasure purposes. Used by individuals and business concerns.

Don't delay but order today and do away with your tire troubles. To introduce in your territory we offer the following prices:

30x3	$8.50	34x4	$17.25
32x3	8.75	35x4	17.50
30x3½	10.75	35x4½	22.50
32x3½	11.00	37x4½	24.50
31x4	14.25	38x5	25.25
33x4	16.25	37x5	27.50

All other sizes also furnished.

TERMS: Cash with order. Make remittance by certified check, draft or P. O. money order. When ordering be sure to state whether clincher, quick detachable clincher or straight side tread is desired.

For 5 days we offer 5 percent discount where two or more tires are ordered at one time.

PIQUA TIRE & RUBBER CO.
PIQUA, OHIO.

Announcement.

To the Electors of Charlevoix County:

I have decided to be a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and respectfully solicit your support.

M. A. McDONALD.
Eveline Township.

FOR SALE—Resort cottages well located. Houses and lots in any part of the city, also 14 acres close to city. Apply to H. S. Harsha.

FOR SALE— at less than first cost, three (3) Fine Lots in Crouter's Addition. Parties interested, apply to H. S. HARSHA.

Tarnished Silver.

Tarnished silver is easily cleaned with powdered whiting mixed to a paste with ammonia and water. Rub the paste on with one leather and another leather to polish it off again.

When Corks Allow Leakage.

After corks have been used a while they sometimes become so compressed that the contents of the bottle leak out. This may be remedied by putting the corks in boiling water and leaving them there until the water cools. They will then be as good as new and fit just as tightly.

Humility's Power.

A woman once came to the oracle of sage who was renowned for his profound analysis of her sex.

"Father," said she, "let me sit at your feet a while. I am but a woman—faulty and foolish and weak—but I would fain be the pupil of your learning and the disciple of your virtues."

And the sage, secure in his wisdom, consented.

Then he laid himself down to sleep in the shade of a rock, out of the glare of the sun. When he awakened he was blindfolded and bound hand and foot.

He had protected himself against every feminine weapon except the most dangerous one—humility!—New York Evening Sun.

Beginning of Jury System.

The jury system with twelve men comes down to us from the time of viking invasions of England, those people customarily dividing their lands into cantons, and each canton into twelve portions under twelve chiefs. Twelve caused judgment on the more serious criminal and civil cases and the custom has outlasted all the intervening centuries.

Final publication May 27, 1916.

MORTGAGE SALE

Default has been made in the conditions of a mortgage made by Nicholas Sobecki and Eleanor Sobecki, husband, to Nicholas Sobecki, Architect Bureau and Allen Sobecki, dated the 3rd day of April, A. D. 1913, and recorded in the office of the Register of Deeds for the Charlevoix county, Michigan, on the 5th day of April, A. D. 1913, in liber 78 of mortgages, on page 28, and contained in said mortgage the sum of Twenty-Five Hundred Dollars ($2500) and an attorney's fee of Fifty Dollars and Fifty Cents ($50.50) in the event of default in payment of said property which said sum the mortgagee claims is due and payable at the date of this notice, and no suit or proceeding has been instituted at law to recover the debt secured by said mortgage or any part thereof; Notice is hereby given that by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, the First day of August A. D. 1916, at 10:00 o'clock in the forenoon, at the Boyne City, Charlevoix County, Michigan, is the place of the circuit court in said county, and the place where the circuit court is held, will be sold at public vendue, to the highest bidder, the premises described in said mortgage, or so much thereof as may be necessary to pay the amount so aforesaid due on said mortgage, and for taxes for which mortgagors are liable to pay, and for all sums of money paid by the mortgagee, and for all taxes and insurance which may be paid by the mortgagee before the time of sale, and for the attorney fee and the sum of Twenty-Five Dollars, and no suit or proceeding at law has been instituted to recover the debt secured by said mortgage or any part thereof. Lot one (1) and ten (10) acres in the southeast quarter of section nine (9) in township thirty (30) north, range seven (7) west, containing forty acres, more or less, excepting the Right of Way of the Grand Rapids & Indiana Railway.

Dated, Charlevoix, Michigan, April 24, 1916.

MORTGAGE SALE.

WHEREAS, Martin W. Smith, of Evansville, Indiana, made and executed a certain mortgage bearing the 9th day of April A. D. 1913, to Charles Hemrick, of Boyne City, Michigan, which was recorded in the office of the Register of Deeds of the county of Charlevoix on the 9th day of April A. D. 1913, in liber 78 of mortgages on page 29, and contained the sum of Twenty Dollars ($20) and an attorney's fee of Twenty-Five Dollars ($25) in the event of default in payment of said property which said sum the mortgagee claims is due and payable at the date of this notice, and no suit or proceeding at law has been instituted at law to recover the debt secured by said mortgage or any part thereof;

AND WHEREAS, default has been made in the payment of the money by said mortgage secured and the power to sell contained in said mortgage has become operative;

NOW, THEREFORE, notice is hereby given that by virtue of said power of sale and the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the premises described in said mortgage, to-wit: Lot one (1) and ten (10) acres in the southeast quarter of section nine (9) in township thirty (30) north, range seven (7) west, excepting the Right of Way of the Grand Rapids and Indiana Railway, at the front door of the court house in the city of Charlevoix, in said county, on the 10th day of August, A. D. 1916, at 10 o'clock in the forenoon, which said place is the place of holding the circuit court in said county, and the place where the circuit court is held, will be sold at public vendue, to the highest bidder, the premises, the description of which said premises is contained in said mortgage, or so much thereof as may be necessary to pay the amount so aforesaid due on said mortgage, and for taxes for which mortgagee is liable to pay, and for all sums of money paid by the mortgagee, and for all taxes and insurance which may be paid by the mortgagee before the time of sale, and for the attorney fee and the sum of Twenty-Five Dollars, and no suit or proceeding at law has been instituted to recover the debt secured by said mortgage or any part thereof.

Dated June 6th, A. D. 1916.

The AUCTION BLOCK

A NOVEL OF NEW YORK LIFE

By REX BEACH

ILLUSTRATIONS by F. PARKER

Author of "The Iron Trail" "The Spoilers" "The Silver Horde" Etc.

Copyright, by Harper & Brothers

Here we have the tale of a young woman who, in the heat of her greedy and lazy family into a world of human vultures to win a fortune with her personal charms. But she surprises them all with her fine traits of character. Her struggles and constant danger are frightening, but she brings help and happiness to men and women who need it much. This is a story with strong pulse.

CHAPTER I.

Peter Knight flung himself into the deep-cut armchair beside the center table and growled:

"Isn't that just my luck? And me a Democrat for twenty years. There's nothing in politics, Jimmy."

His son James smiled resolutely with a tempting offering of hospitable amusement and contempt.

"Politics is all right, provided you're a good player," he said, with all the suavity of twenty-two. "But you fell off the wagon side of the fence, and you're sore. These country towns always go for the party that's out of office. If you'd listen to me and

city that was entirely lacking in her mind, and she was generally recognized as the source of what little prominence the family attained.

"Yes, we're going to make a change," she repeated. "I'm glad, too, for I'm tired of housework."

"You don't have to do your own work. There's Lorelei to help."

"She's too pretty," said the mother. "You don't realize it; none of us realize how beautiful. Where she gets her good looks from I don't know."

"What's the difference? It won't hurt her to wash dishes. She wouldn't have to do it up forever, anyhow; she can have an, fellow in the county."

Mrs. Knight began slowly, mildly: "You need some pain, pa; I know. I don't often tell you just what I think, but I'm going to now. You're just like your father; you've spent twenty years pretending you're a gentleman, and you have got to show for it? Nothing. The reformers are in at last, and you're out for good. You had your chance and you missed it. You're a Democrat. You know it, and so does the party."

The spirit of this address swelled pompously; his cheeks deepened in tone and distended; but while he was searching words for a defense his wife ran on evenly.

"The party owl you find as long as you could deliver something, but you're done and you may as well face it. Your friends want Fourth office to pay his debt, and I'm not going to refuse him Lorelei.

"I suppose you think you could have done better? You'd love to see your boss appointed. He was angry, you know, embezzlin' right out his office and throwin' the blame on a clerk. Those words struck home. "That's the opinion of it. You kick because we're poor, and then what do you do? Make it worse by trying to be a big man."

"Better the salary! It will keep us going as long as necessary."

"Oh?" Mr. Knight looked thank.

"I'm thinking of Lorelei. She's going to give us our chance."

"How?"

"Yes. You wonder why I've never let her go out to dances and I've scrimped to give her pretty clothes and taught her to take care of her figure and made her associate with young people. Well, I knew what I was doing. It was part of her schooling. She's old enough now, and she has every thing that any girl needs but a fortune. She's going to do for us what you never have been and never will be able to do. Peter Knight, I'm going to make us rich. But she can't do it in Valley."

"Ma's right," declared James. "New York's the place for pretty women; the town is full of them."

"If it's full of pretty women, what chance has she got?" inquired Peter. "She can't break into society on my fifteen hundred."

"She won't need to. She can go on the stage."

"Good Lord! What makes you think she can act?"

"Do you remember that Miss Donahl who stopped at Wattle Lodge last summer? She's an actress."

"No!" Mr. Kulnat was amazed.

"She told me a good deal about the show business. She said Lorelei wouldn't have the least bit of trouble getting a position. She gave me a note to a manager, too, and I sent him Lorelei's photograph. He wrote right back that he'd give her a place."

"Really?"

"Yes; he's lookout for pretty girls with good figures. His name is Bergman."

Jim broke in exultly: "You've heard of Bergman's show, pa. Wal ya know last summer, remember? Bergman's big follow."

"That show? Why, that was—not ten. It isn't a very decent life either."

"Don't worry about she's actress, Jim. "She can take care of herself, and she'll grab a millionaire sure. Lorelei's got more than a pretty face; she's got brains, too. Other girls are doing it every day—why not her? Ma's got the right idea."

Impassively Mrs. Knight resumed her argument: "New York is where the money is—and the women live in with money. It's the market place. Here in their society? Jimmie is quired. "Wake up! This is your chance to turn into the real nobs. In New York politics is a vocation; so here it's a vacation—everybody tries it once, like music lessons. If you've been hooked up with Tammany instead of the state machine you'd have been taken care of."

At this juncture Mrs. Knight, having finished the supper dishes and set her bread to rise, entered the shabby parlor. Jim turned to her, shrugging his shoulders with an air of washing his hands of a disagreeable subject. "I'm a weakened again," he explained. "He won't go."

"Me, a clerk—at my age!" mumbled Peter.

His wife spoke with brief convincingness.

"I wrote and thanked Senator Forgerty for his offer and told him you'd accept."

"You—what?" Peter was dumfounded.

"Yes"—Mrs. Knight seemed oblivious of his wrath—"we're going to make a change."

Mrs. Knight was a large woman well advanced into that indefinite turning point of middle age; in her usual tractive frock was none of the easy good nature so unmistakably stamped upon her husband's. Peter J., notwithstanding had prayed and faltered, what had once been a measure of good looks was hidden now behind a flabby indefinite mediocrity which an unusual carefulness in dress could not disguise. His wife, was of a totally different stamp, showing evidence of unusual force. Her thin lips, her chin set now betokened purpose; a pair of alert, unpleasant gray eyes of a musical activity that was entirely lacking in her mate, and, we was generally recognized as the source of what little prominence the family attained.

"Yes, we're going to make a change," she repeated. "I'm glad, too, for I'm tired of housework."

"You don't have to do your own work. There's Lorelei to help."

"She's too pretty," said the mother. "You don't realize it; none of us realize how beautiful. Where she gets her good looks from I don't know."

"What's the difference? It won't hurt her to wash dishes. She wouldn't have to do it up forever, anyhow; she can have an, fellow in the county."

Mrs. Knight began slowly, mildly: "You need some pain, pa; I know. I don't often tell you just what I think, but I'm going to now. You're just like your father; you've spent twenty years pretending you're a gentleman, and you have got to show for it? Nothing. The reformers are in at last, and you're out for good. You had your chance and you missed it. You're a Democrat. You know it, and so does the party."

The spirit of this address swelled pompously; his cheeks deepened in tone and distended; but while he was searching words for a defense his wife ran on evenly.

"The party owl you find as long as you could deliver something, but you're done and you may as well face it. Your friends want Fourth office to pay his debt, and I'm not going to refuse him Lorelei.

"I suppose you think you could have done better? You'd love to see your boss appointed. He was angry, you know, embezzlin' right out his office and throwin' the blame on a clerk. Those words struck home. "That's the opinion of it. You kick because we're poor, and then what do you do? Make it worse by trying to be a big man."

"Better the salary! It will keep us going as long as necessary."

"Oh?" Mr. Knight looked thank.

"I'm thinking of Lorelei. She's going to give us our chance."

"How?"

"Yes. You wonder why I've never let her

6:30 Young People's Union. Our delegates to the International Convention will speak of what they expect to bring back with them.
7:30 Afternoon—Rev. Roberts will speak at Burgess. All welcome.

COULTER NOW A HOOSIER—JUST THINK OF IT!

We take the following from the Chicago Herald:

"A. L. Coulter, formerly of Charlevoix, Mich., has been appointed Indiana state agent of the Southern Surety Company, succeeding C. E. Flowers, who has been forced to retire temporarily because of an injury to his knee."

We are delighted to learn that our George is here and that he will bring Mr. and Mrs. Garnsey and they will occupy the old homestead down at Norwood about the fourth of July. Mr. Garnsey and his son Charles will motor up from Joliet and Mrs. Garnsey and the rest of the children will come by train. We presume the object in Van's bringing the family here is incidentally to have them recuperate, and for the little girl who has recently recovered from a severe attack of pneumonia to recover her health, but principally to educate the whole 5—e family to talk good reads. Our George has been doing this for the last thirty-four years and the writer has a very distinct recollection of the first time he struck the town George is on the water wagon three days. Possibly we ought not to mention the fact, but when the writer took him to be introduce him to Dr. Crouter and invited him to take a cigar, his reply was, "I don't smoke—I have only two appetites and they are both for drink." We are glad to welcome the family here.

MASONIC

Charlevoix Lodge No. 382, F. & A. M., will attend divine service at the Episcopal church on Sunday morning next, in commemoration of the Festival of St. John the Baptist.

Members and visiting brethren requested to assemble at lodge room at 10 o'clock a. m.

The Eyes of the Blind

By H. M. EGBERT

(Copyright, 1916, by W. G. Chapman.)

Lydia entered the sunny room as Mr. Barnold's little timidly. When she had answered the advertisement she had never dreamed that the answer would come from anything but a business office. She was still more bewildered when the tall man wearing the blue glasses groped rather helplessly forward her and indicated that she should sit down where there was no chair.

"Miss Ford, I received something like fifty answers to my advertisement," said Harold Barnold. "Many of them were clearly illiterate. Hoffman's course impressed me most as my wife read it to me. I wish I could see your face. Won't you speak?" he continued, a little irritably.

Lydia, quite discomfited, murmured something.

"Yes, I have a mental picture of you now," answered Barnold. "You are twenty, or thereabouts, and your quiet voice denotes a gentle temperamentality. Is that correct?"

"I hope so," murmured Lydia, totally at a loss and wishing a strong temptation to flee.

"Well, now—you have sat down, haven't you?" said Barnold, finding his chair. Barnold. Has that name deceived in Lucas Devine. You may have heard of it?"

"I certainly have," said Lydia warmly. "I have read—"

"There's your interrupted Barnold. "The trouble is that my sight is good for only six months according to the best eye specialist in New York. Amaurosis, he calls the trouble. I could see well enough to look off these glasses, but I am husbanding it. So, you see, my five or six thousand a year, my wife's future and my own look very dark sometimes."

Lydia watched the pain the figure before her with a sense of vast pity.

"But I don't give up," Barnold continued. "I have a good many literary friends and I am going to make them. I have six months to train a pair of eyes for me—your eyes. Do you see that instrument?" he continued, pointing to a piece of mechanism in a corner near his desk. "That is a dictaphone. I am going to dictate my stories to you. That other mechanism is for shaving the wax records afterward.

"My plan is to practice dictating to you until I am able to dictate logical and coherent stories. I shall use my six months of eyesight to train you as to punctuation. You will learn from the tones of my voice just when to put a comma and when a semicolon or period. In short, by the time my sight is gone I shall hope to have an excellent substitute, and I shall then offer you, in addition to your salary, a share in my profits. You are not—pardon me—ugly enough, I suppose?"

"No," answered Lydia, glad that he could not see her blush.

"Nor over will be?"

"I don't know—I don't think so."

"It's one of the risks of life," said Barnold. "Marriage is the penalty."

And so their association began, and Lydia soon learned why Barnold had spoken so bitterly of marriage. He ever there was an incongruous couple it was Barnold and his wife. Barnold was cold, gentle, thoughtful, and perhaps, a little irritable upon occasion; Mrs. Barnold was flirtatious, calculating and evidently a source of continual distress to her husband. What the life of the couple could be like when she was not present Lydia could very well understand from what she saw while she was there.

And from the first Lydia seemed to become the object of Mrs. Barnold's hostility. She guessed that the wife, too selfish to take the place she should have done as her husband's assistant, resented her as one who, nevertheless, Mrs. Barnold shrewdly realized that her return as well as her husband's lay at Lydia's mercy.

At the end of three months Lydia could take her employer's stories expertly on the typewriter from the dictaphone, punctuate to please him, and even ventured to make suggestions which he sometimes adopted. That was the beginning, in fact, of a very happy partnership. These hours were the happiest in Barnold's life. Gradually their intimacy grew and Mrs. Barnold was not slow to perceive it.

Barnold's blindness seemed to have become quite progressive. Its progress was very about the room now like one sightless, and Lydia, not daring to mention him, felt her eyes fill with tears as she saw his helplessness.

She came each morning at nine and spent the day there. And she had come to live for those days. She did not realize the fact that Barnold himself was the cause until one day.

He was at work on a serial novel, and, from the beginning something had told him that it embodied a great deal of his own life. Delicately disguised though she was, Lydia knew, too, that Mrs. Barnold was the woman who had wrecked that life. And then, suddenly, Lydia realized that the boiling spirit within entered was—herself!

How she knew she could not imagine, for the girl was depicted as totally different from her. But she knew, and her hand fell suddenly from the typewriter keys, and somehow Barnold's frown at such checked upon it. And without a word being spoken Lydia knew that their love was mutual, was the dearest and the most sacred thing in all the world.

Then, looking up with a guilty start, Lydia saw Mrs. Barnold standing in the doorway. A cold smile played about her lips; she had seen and understood.

She said nothing, and the next day Lydia spoke to Barnold of the resolution to which she had come.

"You asked me when you engaged me whether I was engaged—in another sense," she said, with a touch of affected embarrassment. "Or whether I expected to be. I did not, but—but someone has come into my life, and I am going to learn you."

The blind Barnold start in amazement, and then a look of bitterness crossed his face. He knew what that look meant. He had given her the unspoken message of his love, and she had accepted it while her heart was another's.

Through though that love had been, there were many elements to justify it. Lydia's aim in accepting the position in Lucas Devine. You may have heard of it?"

"I'm sorry, but—of course, it must be so," he said. He asked no questions.

It was his wife who made the objections. She hated Lydia with all the intensity of which her cold nature was capable; but she knew that if Lydia went her own future was considerably lightened. Lydia was not blind, with her clever brain and skillful fingers they might become partners.

"If you want more money you can get it. I'll see to that," she said.

"Money would make no difference," said Lydia resentfully.

Mrs. Barnold laughed shortly. "Don't pose as an angel," she answered. "Youth and marriage isn't what it's cracked up as being."

Lydia had given Barnold a month's notice, and offered to stay another month, if necessary, to train her successor, but Barnold did not allowed for a new assistant. Wondering, Lydia finally left her affairs to urge him in this direction repulsed with a sort of brutality.

The blow grew that she had wounded Barnold to the core by the new tone of his work. Filled it was, but cynical, and all at once the realization came to her that it was she who had contributed to the sweetness in Barnold's nature. What had survived the disillusionment of marriage had been destroyed utterly by her action. And before she went she felt that that tie must be made white.

She closed the dictaphone for the last time and covered the typewriter. She turned to him.

"I may say something to you," she began. "When I told you that I was leaving because I was engaged to be married I was telling an untruth. I am not engaged to be married."

The blind man leaned toward her. "Then—then why are you leaving me?" he asked in unsteady tones.

Her heart rose and fell swiftly; she could not answer him. But he knew, because had not played him false, as he had supposed. He knew—as she did.

With a laugh he sought her and held her in his arms, and their lips met—once—then only then, but with the pain losing of years.

Then he released her and took off his glasses.

"I will be frank, too," he said. "Lydia, I have been blind for three months past. I deceived you—for years I wanted you to stay. Because life was unbearable without you. I hoped we might be happy—just in the work. But it was not to be."

She rose and he took her hands in his.

"I shall always remember you," he said softly.

"And I you," she replied.

It was two years later that the sudden telegram summoned Lydia back to the house. Mrs. Barnold was dying of an incurable disease. It was she who had sent for the girl.

She sailed through her pain as Lydia stood at the bedside.

"I have come to see clearly at last," she said. "I know that I have bitterly wronged my husband, and I want to make amends, the only possible amends."

She placed Lydia's hand in that of her husband. And with heads bowed they stood beside the dying woman.

Apparelled for the Boudoir

Recently Launched Summer Styles

Feminine daintiness and love for beautiful color may be indulged without restraint within the walls of the boudoir. There is no excuse, for any sort of ugliness there. Lingerie grows more and more airy and dainty, and no negligees the prettiest fancies of designs are interpreted in any extreme fits. Satin and chiffon, thin crepe and fine laces, are the alluring materials with which the artist works out her dreams. Ribbons and little moire flowers add touches that bring her delight in the work she undertakes.

Color is such an important factor in apparel for the boudoir that the less expensive sheer fabrics, in the same colors as silk stuffs are used with as good results. Voiles, mull, lawn and thin mercerized cottons are made up with laces and trimmed with ribbons to make negligees that are as captivatingly colorful and dainty as any others. But they cost a fraction of the price of sheer silk materials.

It makes one long for midsummer, for the glory of June weddings, or even for graduation days, to view the new thin white dresses which have recently been launched upon the sea of summer fashions. They are a froth of frills and frounces and looks as cool and unsubstantial as white clouds in the spring sky. These models of the utterly feminine in summer clothes are repeated in pale tints that are mere reflections of pink or green or blue. Occasionally illusive figures appear on them usually in the form of lace applique in motifs that are applied to an under pettticoat or to the underside of the skirt.

Organdie and other sheer crisp materials are better adapted to dresses of this kind than softer fabrics. Lawns and voiles are used for them, and it almost goes without saying that the frequent ruffles are made very full always but fullest in the softer goods.

A frock of white organdie is shown in the illustration given here. It reveals the cleverest sort of management of style and material, each helping out the other. The skirt and bodice are in one set together with a plain belt of white moire. There is a panel down the front of the skirt which is then graduated in width. They are plaited in the narrowest of plaits and extend from the square neck to the bottom of the skirt. Two wide and very full flounces over the remainder of the skirt. The hem of these flounces is trimmed into scallops and hemstitched at the edges.

The elbow sleeves are covered with four plaits frills and widen at the elbow. There is a quaint little cape about the shoulders, edged with a frill, and it falls over the shoulders in the trimmed frill on the sleeves. The bodice is plain and is hemmed at the sides in a scalloped hem that falls over the panel at the front. It fastens at the side with invisible fastening of small flat buttons and loops.

A negligee worn over a combination with pantalettes, is shown in the picture. The pantalettes are substituted for petticoats and worn under dainty frocks or under negligees. They are of silk or lingerie cloth, cut in the form of tails and lace. Wide val lace is carded down the sides in ruffles that edge the skirt bottom. Just above the ankle the fullness is gathered on a band of cord that forms a narrow frill. This combination is supported by ribbons tied at the shoulders.

Chiffon and Tuggusy lace make the lovely empire coat worn over this combination. It is hand-tucked from bon in three widths, the widest forming a border about the bottom. Wide lace flounciing is draped in the effect of a mantle, falling over the sleeves and covering the upper half of the coat. It fastens at the waist line under two little bouquets of chiffon flowers made of tiny roses and ribbon foliage.

Julia Bottomley

BE MODERATE IN ALL THINGS

It is Good to Think, Act and Talk on All Occasions Carefully and Sanely.

The best of things, the best qualities of character, may be turned to evil by excess, remarks a writer in the Philadelphia Journal. The deepest sorrow is not expressed by the loudest wailing, nor the fulsome joy found in immoderate laughter. Lack of moderation in eating and drinking carries its own punishment. Let your desires be moderate and your disappointments will be few.

Be moderate in your praise of another even if you think him a hero worthy of some of this world. Should you too loudly sing his praises, others will be the more ready to pick flaws in him. If he is found to exceed your commendation rather than fall below it the effect is better. One's partiality leads to magnifying the good and overlooking the evil, even to making plausible excuses. Still more desirable is it that you should beware of excess in condemnation. You may have conceived a false impression of him. You may not know all the extenuating circumstances. By voicing your dislike or disapprobation you may be doing an injustice.

At the best you are not helping to right the wrong. Let the world know by your conversation and conduct that you believe in truth, justice and kindness, but be careful how you put others under a ban as failing in these things. Excess in love is likely to carry jealousy, suspicion and selfishness in its train. Even religion may be carried to an excess that makes one intolerant of others, and such excess makes the cause upheld unlovely to those. Leary condemnation and you will make fewer mistakes.

Thinks your own thoughts, and express them, but do not endeavor to force them on others by too strenuous insistence.

Funny Man of Japan.

The "Tuba" Eid Fishera, and Gold beras are not all confined to the realm of the comic supplement. The Japanese, too, says a writer in Cartoons Magazine, have their funny men and women. The endeavors of these men, he says, show a striking similarity to those of the world's funny men. The popular contemporaries. Clean, wholesome fun, quite of the order that one finds in such series as the Katzenjammer Kids and "The Adventures of Willie Nigbodon Edison Smith," predominates in the Japanese pictures. There is no doubt, however, that the element which to the American mind makes a large proportion of Gibson work risque and vulgar. The humor is childlike, possibly, even more so than our own, but it has the crowning virtue of having cleanliness without being prudish or insipid.

The Japanese have not created a new style of comic cartoon. On the contrary, they have remained thoroughly true to their proclivity for imitation and have simply gone and have copied the American strip closely and made some gallant efforts to them for this trait more than almost any other. few persons will wonder at this.

No Full Moon for Columbus.

Anybody who says there was a full moon the night before Columbus discovered America isn't automatically or illustrically accurate. And anybody who quotes Longfellow to the effect that a full moon in it is open to the critism of folk who are finicky about details.

So it is that one of the pictures in the American paintings at Philadelphia finds itself being made. The painting represents Columbus' caravel the night before the big find. There is a full moon just above the horizon, while the reflection of the setting sun is seen on the ship's sails.

A critic opened a controversy, and Dr. Eric Bennitt professor of astronomy at the University of Philadelphia, settled it. The critic said he didn't think there was a full moon that night. Doctor Doolittle, consulting his charts, proved the critic wrong.—Philadelphia North American.

Effects of Baking Powders on Bread.

That modern methods of milling remove from wheat the most of the vitamines that are now believed to be an essential to health is made certain by Drs. Carl Voegtlin, M. X. Sullivan and C. V. Myers in a recently issued public health report.

Another point of importance in flour rises in the chemical properties of dough made from those highly refined more make necessary the use of much baking powder. Plain bicarbonate of soda is often used as such, but the experiments conducted by the authors prove that in baking this separates, discharging carbon dioxide gas and remaining as carbonate in the bread. The carbonate of soda is highly alkaline, and the alkali destroys the vitamines. If, however, buttermilk or tartaric acid be combined with the bicarbonate of soda, it neutralizes the alkali and protects the vitamines.

Cut Lived Nineteen Years.

Halloween, a cat belonging to Mrs. C. H. Osborn, died in Ida, Ohio, ordinary age of nineteen years.

The Baboons owns the animal for fifteen years and know it from a kitten, so there is no doubt concerning its age.

The cat became too feeble to walk. It was carried to the doorstoves in the lean. "But it knew every member of the family until its very last hour and seemed never content unless some of them were in its sight.—Sacramento (Cal.) Bee.

Cat Trying to Raise Family of Foxes.

Daniel Wiggins, who lives near Gibraltar, N. C., failed a trap on his place a day or two ago, and discovered that a mother fox and family had been dug out of their home by the mother of the roots. The old fox was killed. It was the mourning that accepted the substitute babies with seemingly perfect satisfaction.

FARMER'S GREAT OPPORTUNITY

Demand for Canadian Cattle After the War.

The opportunities that Western Canada offers to the farmers have time and again been placed before the public through these columns. The cheap price at which the best lands can be purchased, and the advantage that is to be had in securing one of the free homesteads of 160 acres has appealed to a great many and they have embraced them. Many, in fact most of those who have done so are today giving testimony to the good fortune and the timely foresthought that led them to go to Western Canada, and embark in an era of farming that has placed them away beyond the pinch of want and given them reason to look into the future with a hopefulness that they had not had the courage in the past to forecast.

No, only have they been able to secure good lands at low prices and on easy terms but if their desire they have been able to add to this 160 acres of land free, on conditions that are easy. A resident in the Lloydminster district in Saskatchewan who had been farming in the States for some time, took up a homestead in 1910, and commenced breaking with 4 oxen. The years ago he bought an adjoining quarter section and now has over 100 acres under cultivation. He says: "As my circumstances improved, I sold my oxen and now have six head of horses, twelve head of cattle and have always a bunch of hogs on hand.

"On average I have had yields of 35 bushels of wheat, 65 bushels of oats, and 45 bushels of barley to the acre, and last season from a field of 18½ acres, I threshed 1100 bushels of wheat. I have made a success of mixed farming and would have no hesitation in advising other continentals making a new home to come to this district. I am now buying a separator, cream Creamery here, and find at all times a good market for live stock and dairy produce.

This is but a modest statement of what a moderate man can do in Western Canada, and could be repeated of hundreds of others.

Scores of cases could be recited where much more has been accomplished, and it is believed that with moderate investment at the present time, the western country of Western Canada, will pay large interest.

The Minister of Agriculture of Saskatchewan, a few months ago, ventured the prediction that the Saskatchewan farmer will be developed land along the lines of general stock breeding would make much more money than he has been in the habit of doing his efforts in ten years' time than the average farmer has succeeded in doing and primarily to grain raising. This was the opinion given by a representative of the stockman and it was up to the Saskatchewan man to get in on the ground floor and prepare himself for the coming demand.

The close of the war would undoubtedly see a great demand for live stock in Europe and it was only reasonable to expect that the demand would have to be filled almost wholly by Canadian cattle, both in Canada and the United States. Europe was largely draining its rural districts of only of its beef and dairy animals but was also using the finer breeding animals and the end of the war would see a condition of affairs which would render necessary almost the reproduction of the domestic animal kingdom in that continent.

The opportunity of Western Canadian stockmen, therefore, lay in being prepared for this demand when it arose. In view of these facts which must be patent to every student of economic conditions as related to the stock industry, he hoped to see within the next three years the stock raising industry in Saskatchewan given an immense impetus forward, which would put it in the forefront of the producing provinces of the Dominion.—Advertisement.

Horse Has Ragtime Taste.

A horse has an ear for music. A Cleveland horse has a preference for ragtime. When he heard the notes of a popular song from a phonograph the other day in a store he forcefooted right across the sidewalk, dragging a Wells-Fargo express wagon after him.

The wagon became wedged in the door, and the animal, unmindful of the screams of women and shouts of clerks, set his cars forward and limbed to the song, allowing himself to be led away by Joseph Davis, the driver, only when the phonograph had been shut off.

The Jar.

John D. Rockefeller was congratulated on his 77th birthday on his recent gift of $1,275,000 to education.

"It must be a fine feeling," said the reporter, "to give away millions."

"You get used to it," said Mr. Rockefeller. "You stop feeling that way. I'm afraid I'm like the retiring business man who said the first day of his retirement:

"Father, what's the matter? You look so worried."

"Well, no wonder I'm worried," said he. "I've never before had nothing to worry about."

Jaybird Robs Mail Box.

Anniston federal officers are working on a theory that a jaybird is responsible for the numerous thefts from mail boxes in the vicinity of Anniston, Ala. A "nothing" is said bunch of Jaybirds recently stole a letter in the box of Dave Young, Twenty-first and Noble streets, and then flew away as he came to look it out. If the jaybird can be identified the case may come before the next session of the federal grand jury.—Anniston (Ala.) Dispatch to Atlanta Journal.

No Wonder.

"I know a man who always charges cut rates for his work."

"Who is he?"

"The man who trims our trees and hedges."

Poverty is not a crime—but that isn't the reason so many people are poor.

HOYT'S HEADACHE AND NERVE PowDERS are a safe and refreshing remedy that quickly relieves headache, neuralgia, nervousness, "nervous exhaustion," sleeplessness, hysteria, dizziness, etc. Sold everywhere. Sample free. Hoyt's Chemical Works, Jersey City, N. J.

ABSORBINE TRADE MARK REG. U. S. PAT. OFF. Will reduce any inflammation or swelling, heal boils, bunches or blisters quickly. Does not blister or remove the hair. Pleasant to use. Lasts long. $2.00 per bottle, delivered. Book 4 R free.
ABSORBINE, JR., the antiseptic liniment for mankind, reduces Varicose Veins, Wens, Sprains, Bruises, Weals, Cuts, Boils, Bites and Stings. Pleasant to use. $1.00 per bottle. All druggists or delivered.
W. F. YOUNG, P. D. F., 310 Lyndale St., Springfield, Mass.

DAISY FLY KILLER Stock growers and dairymen, protect your herds and save milk and butter profits. Kills all flies. Lasts all season. Ready to use. Will not injure anything. All dealers or sent express paid for $1.00.
HAROLD SOMERS, 150 De Kalb Ave., Brooklyn, N. Y.

$3,000 A YEAR is the average income of our graduates in Pharmacy, Chemistry, Medicine. Cost Only Three Months. Cost: Tuition $250, living $30, outfit for practice $50, call and $100 to be earned. School established 23 years. CHICAGO MEDICAL COLLEGE, 2100 Prairie Avenue, Chicago, Illinois.

W. N. U., CHICAGO, NO. 24–1916.

UNCLE SAM OPENS COLVILLE INDIAN RESERVATION WASHINGTON

"Go Great Northern" and Register at Spokane, Wenatchee, Colville, Republic or Omak—July 5th to 22nd, inclusive

350,000 acres of desirable agricultural lands of the south half of the COLVILLE Indian Reservation—located in the Columbia River and Okanogan Valleys of Northwest Washington—will be opened to homestead entry. "Go Great Northern" and have your choice of five registration points *including Omak, only registration point actually on the reservation that reaches only by the Great Northern Railway.*

Low Round Trip Fares

Round Trip Homeseekers' Fares to all registration points named will be in effect June 30th, July 4th and July 18th. Summer Tourist Fares to North Pacific Coast points, on sale every day, permit stopover for sightseeing at Spokane and Wenatchee. Both fares allow stopover enroute at Glacier National Park either on going or return trip.

Send Now for Colville Circular 19

Full and return rates and maps, and letter, for detailed information, map folder and folder.

IN THE CITIES

Angleworms Were Guests at a Chicago Wedding

CHICAGO—Though his shape is the shortest distance between two points, the angleworm never was cut out for a wedding. Nature intended and fashioned for a single destiny—to sit on a hook. No one knew his value any more than John D. Rockefeller, except perhaps Henry Ericson, former building commissioner, or John Brunner, wallkrown civil engineer of Evanston.

Mr. Brunner and John Ericson, city engineer, were guests of Henry Ericson last fall at the bungalow on Lake Pleasant. And the worms petered out just when the fish were biting furiously. Mr. Ericson felt the ignominy of the situation keenly.

"When I have my garden made next spring," said Mr. Brunner, "I will instruct my gardner to save the angleworms, and I'll send you some."

Our day recently many moths hummed at the end of the Ericson home for the wedding of Miss Florence Ericson to Fred W. Prather. The house was filled with guests. Another machine swung up and a man with a box under his arm ran up and for Mr. Prather.

Mr. Ericson's eldest son explained that a wedding was responsible for the numerous guests. The visitor appeared started to begin to glance nervously at the box which he had left on a stand in the hallway.

"A wedding?" he said hoarsely.

One of the household happening upon the box started to open it. The owner began to fulge indifference.

Presently there were a series of shrieks and a staccato patter of slipper heels and the box was all alone with its writhing population.

From the stairway came a sudden hail. "Why, hello, Brunner. Where are my worms?"

Mr Brunner pointed, saying nothing.

Preparedness of Castle Clinton Powder House

NEW YORK.—The powder magazine that served Castle Clinton during the War of 1812, according to a report of the ordnance expert of the metropolitan section, is in a condition of preparedness. Castle Clinton that was the Aquarium that is now the Battery, is ready, as to general structure, but the public and spies are not supposed to know anything about the powder magazine.

To get to the powder magazine you start at the lobster tank, move north by west to a point opposite a chart. There open a door and turn sharp to the right. A narrow passage is here seen. Follow this passage as it curves like a letter U for a few feet and the opening to the powder magazine is reached. The magazine is a vault arched overhead, and in its original condition was without a window. The walls of the magazine are 11 feet thick, being of stone part of it, the rest of brick above. Considered from the viewpoint of the present-day needs of the Aquarium, the magazine is admirably adapted for a cold storage plant. Cold storage is used these days as a food station for the fishes. John Kelleher, the Aquarium chief, has a chopping block right where the passers used to stand, and he is busy all day chopping mackerel into bits for the fishes' delicate and shocking claws. The fish are fed every other day. Sixty pounds of chopped herring and 200 clams is one service for the boarders.

Castle Clinton was built in 1812 for the defense of New York by Col. Jonathan Williams, who also built the fort on Governor's Island, which was named Castle Williams, for the same and off by mistake. The colonel was the first superintendent of the West Point Military academy.

Minneapolis Teacher's New Method of Discipline

MINNEAPOLIS, MINN.—An unusual exchange of courtesies occurred the other day in one of the Minneapolis grammar schools when a young principal was "whipped" by a twelve-year-old pupil of the school. The youngster

teacher, of whom he is an object slave, in spite of his numerous disciplinary measures with her. She produces a strap and proceeds to give him a real thrashing. Then she handed him the strap and told him to return the compliment.

"You have no notion how it makes me feel to have to whip you," she said.

Jack disobedibly refused. His parents came to the office with tears, protesting he would rather go to jail or Red Wing reformatory or do anything than whip her. The teacher insisted in spite of his appeals, and finally, after more than half an hour, he took the strap and stretch her across the desk. The blows were lacking in interest. He has not transgressed since.

Boston People Again Take Up Horseback Riding

BOSTON—Movies and the war have given such an impetus to horseback riding that it is now a fashionable pastime. Hundreds of people own horses are at a premium. Bridle paths about the city's park system are well populated daily with riders, especially women. Officials of riding schools say a marked increase is noted in the number of pupils.

Thousands of people daily view their favorite movie actors and actresses in heroic roles on horseback or gaze on the screen at a healthful game of pony polo, and naturally adopt this form of sport for their own pastime. The business dealers, officials of the park riding school say that while horseback riding decreased with the advent of the motor car, it is rapidly coming back. Judging from the growing interest, they say it will soon regain its place among the foremost outdoor sports.

The "preparedness" movement during the last few months has also stimulated horseback riding, dealers declare. The sight of troops of the militant sight of the cavalry officers on dashing mounts has done considerable to reviving interest and accentuating the healthful value to the country. Others claim that the war has blocked the bulk of foreign travel, and wealthy tourists unable to plan their vacations abroad have taken to horseback riding. They that dealers will resort to hundreds of horses to provide spending their summer roughing it cowboy style throughout the West during the vacation season.

A New York inventor's simple dynamometer utilizes the resistance of the air against a two-bladed fan to absorb the power of an engine being tested.

GATHERED FACTS

War has seriously affected the present trade in Madras, India.

Water valves 12 feet in diameter and so constructed that they will close automatically in event of a break in the pipe line have been built for a hydroelectric plant in Utah.

Newton D. Baker, the new secretary of war, was once a student under President Wilson when the latter was an instructor at Johns Hopkins university.

Beer has been raised in price in Hamburg, Germany, for the second time, because of the high tariff.

A Swiss inventor has developed an aluminum pencil to write on glass or porcelain, producing marks that can be etched with hydrochloric acid or burnished to resemble inlaid silver.

By skillfully grouping 3,000 grains of corn, an Iowa boy has made a remarkable and clever model of the American silver dollar. Corn, however, has looked like money to Iowans for lo, these many years.

Common American Birds

Interesting information about them supplied by the Bureau of Biological Survey of the United States Department of Agriculture

White-Crowned Sparrow

(Zonotrichia leucophrys)

Length, seven inches. The only similar sparrow, the white-throat, has a yellow spot in front of eye.

Range: Brooks in Canada, the mountains of New Mexico, Colorado, Wyoming and Montana, and thence to the Pacific coast; winters in the southern half of the United States and in northern Mexico.

Habits and economic status: This beautiful sparrow is much more numerous in the western than in the eastern states, where, indeed, it is rather rare. In the East it is shy and retiring, but it is much bolder and more familiar in the far West and there often frequents gardens and parks. Its nest is placed on the ground, consists of weed seeds, which amount to 14 per cent of the whole in California this bird is accused of eating the buds and blossoms of fruit trees, but buds or blossoms were found in only 36 out of 516 stomachs and proved to be under exceptional circumstances that it does any damage in this way. Evidently the farmer or fruit grower has much to fear from the white-crowned sparrow. The little fruit it eats is mostly wild, and the grain eaten is waste or volunteer.

Common Crow

(Corvus brachyrhynchos)

Length, nineteen inches.

Range: Breeds throughout the United States and most of Canada; winters generally in the United States.

Habits and economic status: The general habits of the crow are universally known. Its attempts to commit such misdeeds as pulling corn and stealing eggs and fruit and to get rid of young birds are well known and serious. Much of the crow's success in life is due to cooperation, and the injurious army worm) are eaten at all seasons and aggregate 6 per cent. Ants, wasps, bugs, flies, dragonflies, and spiders also are eaten. The vegetable food consists of seeds, including grain, of which oats is the most favored, and fruits, which, in large flocks this bird is capable of doing great harm to orchards.

Flicker

(Colaptes auratus)

Length, thirteen inches. The yellow under surface of the wing, yellow tail shafts, and white rump are characteristic.

Range: Breeds in the eastern United States west to the plains and in the forested parts of Canada and Alaska; winters in most of the eastern United States.

Habits and economic status: The flicker inhabits the open country rather than the forest and delights in parks like regions where trees are numerous and scattered. It nests in any large cavity in a tree and readily appropriates an artificial box. It is possible, therefore, to insure the presence of this useful bird about the farm and to increase its numbers. It is the most terrestrial of our woodpeckers and procures much of its food from the ground. The largest item of animal food is ants, of which the flicker eats more than any other common bird. Ants were found in 574 of the 684 stomachs examined and 96 stomachs contained no other food. One stomach contained over 5,000 and two others held over 2,000 each. White grubs are not a fly eaten by the flicker, one stomach contained 17 chinch bugs. Wild fruits are next to ants in importance in the flicker's dietary. Of these sour gum and wild black cherry stand at the head. The food habits of this bird are such as to recommend it to complete protection.

Red-Winged Blackbird

(Agelaius phoeniceus)

Length, about nine and one-half inches.

Range: Breeds in Mexico and North America south of the barren grounds; winters in southern half of United States and south to Costa Rica.

Stymies.

Stymies were frequent in the classic North and South golf tournament played at Pinehurst, it is reported. What is a stymie? An accidental relation in the position of two golf balls in play which imposes an utterly illegal, indefensible, serious penalty upon a player (or no fault of his own). Frequently the result of the stroke of the opponent of the player who suffers the penalty. The stymie is a destroyer of sweet tempers, a promoter to the use of strong language and hard liquor, an insult to the spirit of sport. The stymie has no reason for being, a nuisance that should be abolished. Stymies have perfume, love, life itself to the makers of the rules of golf.

All Planned Out.

"Why, Johnny," said a mother to her four-year-old son, "aren't you ashamed to go about with such a dirty face?" "Don't you worry about it, mamma," he replied. "As soon as I get a little bigger I'll raise whiskers then you won't notice the dirt."

OUR NATIONAL BOTANIC GARDEN

DOME OF THE HOT HOUSES

FOR several years congress has been urged to give a new lease of life to one of the most interesting institutions in Washington—the National Botanic Garden—by reporting it to a 400-acre tract in Rock Creek park. One need only walk through the garden to appreciate the need for such a change.

The plant palms in the conservatories are crowding and bowling the panes of glass out of the roofs of the buildings in which they are housed. Rare trees and plants encroach upon one another, reaching and struggling in their fabled efforts to reach the light that have been caused to fruit and flower in their prodigious growth in the years of great trouble to the caretakers and botanists.

Here is a Washington Slaters, a gigantic California palm, the largest in the Western hemisphere. Here is a mango tree, from China, which attracts the Chinese of the Pennsylvania avenue colony, and which produces an edible fruit, used for preserving and also for a medicine. Here is a mortmona alba, the sensitive plant, so-called, from Rosan Atacia. One variety closes and shrivels, if touched, another closes at night, as a bird closes its wings and settles down, as if to sleep. Elsewhere is the gambogo, which produces the best sort of oil for artists, which is also edible and which also produces a medicine. In another place is the Arabian coffee plant, in still another the Indian breadfruit, which looks something like a grapefruit. Nearby, is a "travelers' tree" from Madagascar, which the native tap and from which they obtain water in the desert. There are in cones trees from India, Japanese plums, gorgeous, scarlet, hibiscus, alligator pears, and there are also, bananas, the fruit of the latter growing in Washington, if you please.

The conservatory is rich in the fig family, many specimens being gathered here, some of which produce rubber and some fruit. The fig of commerce belongs to the rubber family. Then there is the ficus inst insa, of the family, the most beautiful of all bolly from southern Europe, with dark palms which fruit in winter, rather palms, some with palms, some with tapioca.

Nearby are also to be found the nephelium longanum, so familiarly known to our readers as the litchi or lechee nut—the Chinese Christmas nut. One needs here, too, the cocoa nut palm, which is also known as the lima bean.

There are also betels, nuts which the East Indian troops now in France fighting for England, are reported to have been furnished by the British government that they may chew them, for large a dose of which is said to produce a stupor. There is hemp, from which rope is made, and there is the Cibela, a beautiful lily from the Cape of Good Hope, named for Lord Bute, famous as one of the sixteen viceroys of India.

Outside the Conservatory.

Outside of the conservatory there are hundreds of specimens of trees. One of these is the acacia plant of by General Grant. Another is the Hebrew cedar, which is a fine, inimable name—no less than tolerance, spectabilis, or accomplishment. This is the so-called "ordeal" tree of Madagascar, which is supposed as well as guilty persons in times gone by have been compelled to eat. The "ordeal" to which the accused was jointly founded, always so proved, according to the belief of the Hottentots for the suspected person who was obliged to eat of it always died. At the botanic garden it is said to be the most poisonous of plants. It is said that a seed no longer than an almond suffices to kill twenty persons.

The myrtus communis of southern Europe has recently been the cause of many trips to the garden by Jewish rabbis of Washington. This plant is used by them in the synagogues during the Succoth. If a plant can be found with the leaves, resembling like the three-leaf clover, they cheerfully pay as much as five dollars for it. It is said at the garden that a grower in the West has found a way to produce the three-leaf variety and that he is advertising it for sale and doing a good business.

Some Rare Foreign Plants.

A walk through the conservatories shows this and many other foreign plants. One sees the greater palms pushing their way through the glass window roofs, at times, and the low growth of those roots in the cases of great trouble to the caretakers and botanists.

There is a Washington Slaters, a gigantic California palm, the largest in the Western hemisphere. Here is a mango tree, from China, which attracts the Chinese of the Pennsylvania avenue colony, and which produces an edible fruit, used for preserving and also for a medicine. To make good use of leisure is diffi cult.

The Gilded Treaty.

When he was entertained by the governor of Midhom on his way to South Africa this late Mr. Chamberlain gave the Portuguese ambassador the oldest treaty in the English archives was the first offensive and defensive alliance between Great Britain and Portugal. This may have been made at a time earlier one and filed into with the Flemings in 1374 had gone astray or was for commercial purposes only, for that was the first English treaty with a foreign country. The Portuguese treaty was signed at Windsor on May 9, 1386, largely as a result of the romantic marriage of John of Gaunt gave to John I of Portugal in repelling the Castilians. Five thousand English troops were sent and the allies gained a notable victory at Aljubarrota. A marriage was ordered in 1387 by the marriage of King John to the daughter of John of Gaunt.

Trees and Ghosts.

Among the Druids the oak was held sacred, and many of their rites were performed in England's oak groves, safe from prying eyes. Their reverence for the mistletoe was so great that it was gathered only when they observed that only rarely

DOINGS OF THE VAN LOONS

Father knows when he has enough

COUNCIL PROCEEDINGS

Council Chambers, June 15, 1916.

The common council for the city of Charlevoix met in regular adjourned session on the above date, Mayor Ross presiding. Aldermen present: Sen. Paddock, Hiller, Gelken and Benton. Absent: Alderman Cartlier.

Moved by Ald. Benton and seconded by Ald. Gelken, that the sample post and fixtures complete, for the Michigan and Huron avenue lighting system be installed at the northeast corner of Hurlbut avenue and South Bridge street. Motion carried.

Ald. Sen, seconded by Ald. Hiller, moved the adoption of the following resolution:

Michigan and Dixon Avenue Lighting.

Lighting District No. 1.

Resolved by the common council of the City of Charlevoix, that the establishment of a lighting district in the city of Charlevoix be and the same is hereby ordered, and that the following described property be included in said district, namely:

Beginning at the northwest corner of the intersection of Michigan avenue and the north line of Bridge street, thence south on the west line of said Michigan avenue to the south line of Bridge street, thence east on the south line of said Bridge street to the west line of Dixon avenue, thence south on the west line of said Dixon avenue to the south line of Hurlbut street, thence east on the south line of said Hurlbut street to the west line of Lake Michigan, thence north on the west line of said Lake Michigan to the north line of Bridge street, thence west on the north line of said Bridge street to the place of beginning.

Be it further resolved that the plats, plans, diagrams, specifications and estimates of the question on streets, avenues and public grounds for the placing of the posts and fixtures for ornamental lighting, for the purpose of lighting said district, be and the same are hereby approved, namely: Beginning at the north line of Bridge street on the west side of Michigan avenue, thence south on the west side of said Michigan avenue to the south line of Mitchell street, thence east on the south side of said Mitchell street to the west line of Lake Michigan, thence north on the west side of said Lake Michigan to the north line of Bridge street, thence west on the north side of said Bridge street to the place of beginning, and on Dixon avenue from the south line of Bridge street south to the south line of Hurlbut street, and on Hurlbut street from the west line of Dixon avenue west to the east line of Lake Michigan.

Be it further resolved that the cost and expense of said lighting system shall be assessed upon the property in said district, and that the City of Charlevoix shall be assessed for the same upon the assessed valuation of

The Liberty Bell

By GRIP ALEXANDER

It is bulk without motion; a much that knows lack;
A huge lump of metal; a bell with a crack;
A giant grown weakly; a day without noon;
A song lacking music; a tongue out of tune;
A tale still untold that it never can tell—
So why should we cherish the Liberty Bell?

It was molded in glory and hallowed by age.
It was loved by the patriot, blessed by the sage;
'Tis a composite poem by sentiment fed,
The glowing oration of millions now dead.
'Tis a song that we love and we know very well,
Like the flag 'tis a symbol—the Liberty Bell!

Forever vibrating with freedom it lives!
It gives what it's getting; it gets what it gives.
The good it still praises; the bad it still blames;
And all the world over its message proclaims.
It speaks through our hearts! It is we who must tell
The world of the word of the Liberty Bell!

SAVED BELL FROM BRITISH

Patriotic Philadelphians Carried It to Allentown, Where It Was Buried

NO INFIDELITY of Revolutionary times has more vivid and dramatic contrast in its day than the departure of the Liberty Bell from Philadelphia, writes John A. Sheats, ex-state treasurer of Pennsylvania, in the Philadelphia Press. That trip was to Allentown a year and two months after it became the Liberty Bell, at the time when Howe's army victorious over the Continental forces at the battle of the Brandywine, was advancing for the capture of the city.

When the bell left for the San Francisco exposition last year it departed with the Godspeed of the whole undivided city. It was escorted to the train by the First city troop and by the great assemblage gathered for the Fourth of July exercises on Independence square. It passed through streets thronged with venerating people. On the train it was under the special care of a large body delegated by the constituted municipal authorities. Its passage across the continent was a triumphal progress. A hundred cities along the route poured out their citizens to do it reverence as it passed and it was received at its journey's end in a fashion in reverential awe by a countless multitude.

Carried With First Trip.

That is how the bell travels today. It was carried from Philadelphia in September, 1777. On that first trip to Allentown it went, not in daylight, but in the dead of night. Not with the usual bands and escorted in honor by multitudes, but in silence and under the guard of only one man. It went not in a special train but in a creaking old farm wagon loaded with manure the better to conceal it.

For at that time there were many Tories in Philadelphia. These federal families then counted among the foremost citizens. When the city was evacuated by the Continentals those Tories came out of the obscurity in which they had been prudently lying and from hiding places received Howe and his army. The following winter was a time of rare festivity for the British officers.

The Tories were envied by the city authorities, upon taking possession, to confiscate the church bells as steels of war for the purpose of molding them into cannon. That was recognized as one of their rights as captors. It was to prevent this seizure that the scientific council ordered the removal of the state house bell and the bells of Christ church and of nine other churches to Allentown by way of Bethlehem. I don't know why Allentown was selected unless it be that it was far enough away, to keep the bells safe from the British.

John Jacob Mickle, a soldier of the Continental army, was one of those entrusted for the execution of the task. To him the state house bell was intrusted. John Jacob Mickley was the son of Johann Jacob Mickli (the German version of the name), and arrived in Philadelphia on the sailing vessel "Hope" in the early part of 1733. On August 27, 1733, he took the oath of allegiance to his adopted country. He was a farmer at Whitehall, Lehigh county, when the War of the Revolution broke out.

At Bethlehem Mickley's wagon broke down and the state house bell was transferred to the wagon of Jacob Lesher, upon which it was hauled the remaining four miles. In the records of the Moravian church at Bethlehem is the following entry, under date of September 27, 1777: "The bells from Philadelphia brought in wagons, the wagon of the state house bell broke down here, so it had to be unloaded, the other bells went on."

Buried Under Church Floor.

The state house bell and the chimes of Christ church were buried beneath the floor of Zion Reformed church, Allentown. This church was built in 1767 of logs rebuilt in stone in 1771, and again rebuilt later. The Rev. Abraham Blummer was pastor of the church at the time and assisted in the work of burying the bells. A tablet commemorating the event has been placed upon the church fruit and also a stained glass window with the purpose in the church.

After the evacuation of Philadelphia by the British the bells were brought back and put in their respective places in the latter part of the year 1778.

Almost Purely Virginian.

"The fundamental philosophy of the Declaration of Independence is almost purely Virginian, George Mason of Fairfax county, one of the greatest of our early statesmen, had for years been promulgating the doctrine of independence.

"The Fairfax County Resolves, of which Mason was the author, were adopted July 18, 1774, in Alexandria, three months and a half before the resolutions were 24 in number and, as written by Mason, were unanimously adopted. This was absolutely the most clear and emphatic statement of the rights of the colonies.

America the Hope of the World.

"Quite as well as the fathers, we know that the hope of the world lies with us. In an *epoch of darkness* Europe sees the light breaking here. In the lessons of the past it will learn our own high purposes, must be translated from vague aspirations into concrete programs and constructive action. Each man and woman must ask: How far can I give myself to my country and the world, by striving for the realization of justice and right in my own commonwealth?"

Country Honored Lafayette.

It is said that "republics are ungrateful." That was not the case concerning Lafayette. Congress voted him the sum of $200,000 and a township of land, and, with the progressive development of the United States, the grateful American people named after him many cities, towns and counties, and erected monuments and statues to his memory enough for any measure of ambition.

"Show Me that You Can Rise to the Occasion."

JOHN'S SPEECH

by HERBERT DROCER

ANYTHING between the ridiculous and the sublime probably would have left John Moran with a very uncertain appreciation of the Fourth of July celebration. Neither the one nor the other, in his opinion, could have been very fruitful of results.

Of the two extremes, the sublime had been deliberately planned; it was premeditated. The ridiculous wasn't.

The former was the result of a clever scheme and weeks of hard work. The latter was the chance of a minute, unforeseen, unexpected, and, some might have said on the spot, unpropitious.

For several years John Moran had stood Susan Duval, but so far he seemed to himself no nearer the matrimonial goal than he had been at the beginning. All her people had been assisting him without apparent avail.

He had pleaded with her; he had argued and cajoled and even resorted to coaxes after a mild fashion, his threats reaching that superlative proportion where he promised to identify himself for life with the sublime order of bachelorhood.

Now to all this she merely cast down her eyes demurely and asked him to wait awhile.

A score and one-half years had come and gone around the life of Susan. As her last birthday approached John, who had schemed until his hair was beginning to fall out, decided on a bold stroke.

That night he sat with her on the front porch, after the family had retired. Over them a dim light shining from the parlor window cast a pale glow. John sat quietly waiting, for the silence he depended on for the furtherance of his plan.

After awhile it came, and then, when the stillness had lurked the night in its embrace, he began to hum, "Silver Threads Among the Gold." When he had ceased, tears stood in his eyes.

He drew his chair closer to here, reached out for her hand again and asked her to become his wife. But it was the same old pleasic answer.

"Wait awhile, John," she insisted. "Wait awhile. Do something grand to Show me that you can rise to the occasion."

Rise to the occasion, he would. He resolved that firmly as he stood upon terra firma and bade her good-night. He resolved it all the way home. The next morning he still resolved it. But how?

A happy thought struck him. John had a penchant for happy thoughts. He would make a speech at a Fourth of July celebration. It would be so grand and so eloquent, couched in such rich expressions and so laden with noble sentiment that she could not help but feel the appeal. He would show her that he could "rise to the occasion."

John got out his old school dictionary and brushed the dust from its cover. Then he borrowed an immense volume of masterpiece orations from a friend and read every speech he could find that contained any patriotic reference or expression.

For four weeks he labored almost incessantly, night and day, on his oration, and finally he had it completed.

An obstacle that John had not reckoned on now loomed up. John was a member of the program committee, and he doubted the propriety of having himself included among the list of speakers.

The morning before the celebration he called around to see the chairman of the committee.

"You see—ahem"—Mr. Grubbs, John knew, being one of the committee, I should regret to see any part of the program fall flat."

"Just so," answered the chairman. "I feel the same way."

"Well as a matter of precaution, Mr. Grubbs, I think I shall prepare a few remarks myself today. Should any of the speakers be tardy, or fail to respond, you might call on me."

"Fine idea, John. I'll do it.

Then John took himself around to the residence of Squire Sloan. He knocked at the door and was admitted.

"Ahem, Squire," began John, after an inquiry concerning his host's health, "we are altering the program for tomorrow slightly."

"So?"

"Yes. You see, on account of your advanced years and the fact that you have been telling, we thought it might suit you better to speak, say, at 11:30 than at 11 o'clock."

"I believe it would," answered the old man.

About 11 o'clock the next morning Chairman Grubbs scanned the gathering in vain for a glimpse of Squire Sloan. Then he stood up and announced:

"Though not appearing on the program, the Hon. John Moran has been requested to make a few remarks. It is not necessary that I introduce our esteemed fellow-citizen."

As John approached the edge of the platform he looked down into the face of Susan and made a mental note of the surprise expressed in her countenance. He paused a moment, as if improvising a speech, while he chuckled inwardly at the satisfaction the occasion afforded.

And rise to the occasion he undoubtedly did. His was the most eloquent, the most logical and the most impressive speech delivered that day. As he concluded he was greeted by a loud and prolonged applause.

He stepped down from the platform and made his way toward Susan. As he approached he observed a sudden lie in her eyes, but did not trouble himself with an explanation just then. He was too happy.

She arose and took hold of his arm.

"Let us go off to some place where we can sit alone," she said.

They made their way toward the outskirts of the crowd. When they had reached a point where they could speak without being overheard, he turned to her questioningly.

"Well," he said, "did I do it?"

"You certainly did, John," she interrupted. "Who would have thought it?"

The sublime had been attained.

"Who wrote it for you, John?" she asked.

"Wrote it?" in hurt surprise. "Why nobody."

They walked along in silence.

"How long did it take you to prepare it, John?"

He did not answer.

"Yes, you certainly did rise to the occasion, John. Now I don't want to be careful not to fall. lest—"

Fate would have it that he fell that instant. Twirled and slung by her raillery, he had been walking perilously near the edge of the high dirt bank that overhung the creek, without thought of danger.

As she spoke, the ground beneath his feet gave way, and he went tumbling through the dirt and sand into right foot of water below.

Susan shrieked, and the crowd, alarmed by her cry, began to rush to the spot. As the gathering in front of the speaker stand broke away in large groups, the chairman arose and asked the cause of the commotion. He was answered by a little urchin, who stood up in the seat of a farm wagon.

"Why, Jack Moran's fell in the crick," shouted the lad.

John was fished out at the ford, a short distance down the creek. About his eyes, mouth, nose and ears, and about his clothing, were black splotches of mud.

Resuscitating methods were applied, and as he boxed the ears, the crowd grew back, leaving him surrounded on a soft layer of sand attended by Susan.

When he opened his eyes she was kneeling by his side and looking down into his face.

"Did I rise—" he began.

"There—there," soothingly. "Yes, you did. Now be quiet."

She gently stroked the hair back from his brow. He grasped her hand in his and she suffered him to hold it.

One night, three months later, after the wedding toasts had been proposed and John had made his response, he made a second observation to himself, as he took his seat.

"I wonder," he reflected, "whether it was my celebration speech or the humble I got?"

"Did I Rise?" He Began.

Men That Made History.

The proposal that there be erected at Washington a memorial to the sayers of the Declaration of Independence makes especially interesting some little-known facts concerning that parchment document.

There were 56 signers, and among them were lawyers, merchants, physicians, farmers, soldiers, a shoemaker, a sailor, a minister, a printer and a surveyor; and two slaves whose occupation was set down at the time as "statesmen." The youngest was Thomas Nelson, Jr., of Virginia and William Williams of Connecticut.

The shoemaker was Roger Sherman of Connecticut, the printer was Benjamin Franklin of Pennsylvania, the surveyor was John Morton of Pennsylvania, the sailor was William Ellery of Connecticut, and the minister was John Witherspoon of New Jersey, a statue of whom stands on Connecticut avenue in Washington.

The Liberty Bell was cast in London in 1752 by order of the Pennsylvania assembly for use in their statehouse. It was cracked in 1753 on account of the first crack; its perfect was Crack Galore from about 1779.

The Flag at Lexington

By the rude bridge that spans the flood,
Their flag in April's airs unfurled,
Here once the embattled farmers stood
And fired the shot heard 'round the world.

The farmers of Lexington carried the colors as standard of the Three County Troop. This banner was devised in the counties of Essex, Suffolk and Middlesex, Massachusetts, in 1775. The office of color bearer of this troop was a sort of inheritance in the Page family. The standard was carried in King Philip's war in 1676. When the Minute Man were organized Nathaniel Page III of Bedford took the old flag for use in drill. At the battle of Lexington Captain Page marched up the standard and carried it with him to Concord, where it "waved above the smoke of that battle."

The flag is now preserved under glass in a fireproof safe of the public library at Bedford, Mass., and can be seen by arrangement with the librarian, according to Peleg D. Harrison, in whose volume, "The Stars and Stripes and Other American Flags," the history of the standard is told.

The ground is maroon or crimson colored satin damask emblazoned with an outstretched arm, in the hand of which is an uplifted sword. This representation is the coat of arms of the Page family. The standard was carried in King Philip's war in 1676. When the Minute Men were organized Nathaniel Page III of Bedford took the old flag for use in drill. At the battle of Lexington Captain Page marched up the standard and carried it with him to Concord, where it "waved above the smoke of that battle."

The flag is now preserved under glass in a fireproof safe of the public library at Bedford, Mass., and can be seen by arrangement with the librarian, according to Peleg D. Harrison, in whose volume, "The Stars and Stripes and Other American Flags," the history of the standard is told.

THE KITCHEN CABINET

Good company, good conversation, and good music are the answer of virtue.—Hopkins.

I shall count nothing a failure but failure to do right.—Lisa Hughes.

LIGHT DESSERTS.

After a heavy meal a dainty custard of souffle, something cary of dignation, is in vogue.

Coffee Creams.—Make a pint of very strong coffee, cool and add to it a cupful of thin cream, four eggs, slightly beaten, and four tablespoonfuls of sugar. Strain into small cups and place in a shallow pan, placing several thicknesses of paper under the cups. Put boiling water into the pan until it reaches half way up to the cups. Set into a moderate oven and cook gently until the custard is firm. Serve ice cold with small chocolate cake.

Vanilla Souffle.—Scald a cupful of milk, seasoned with a fourth of a teaspoonful of salt, in a double boiler and mix in two tablespoonfuls of flour and two of butter, creamed together. Cook while stirring for ten minutes. Beat well the yolks of four eggs and three tablespoonfuls of sugar; pour over the mixture in the double boiler. Flavor with orange rind and set away to cool. Just before serving add half hour before serving time fold in the stiffly beaten whites of four eggs; bake in a moderate oven 30 minutes. Serve with chocolate sauce.

Chocolate Souffle.—Cook together two tablespoonfuls of cornstarch, three tablespoonfuls of sugar, three cupfuls of milk and a dash of salt; cook ten minutes. Add a fourth of a pound of chocolate melted and smooth with a little of the hot mixture; add the yolks of three eggs, beaten stiff and pour into a buttered mold; set in water to bake for a minute even about 20 minutes.

Sponge Pudding.—Take a pint of milk, a fourth of a cupful of sugar, a cupful of flour, a tablespoonful of butter and three eggs. Mix the sugar and flour together, then add a little of the milk while cool; stir it into the remainder of the milk boiling hot, and let it cook five minutes. Cool and add the butter and egg yolks; fold in the beaten whites and place in a buttered pudding dish and let stand until tender. Dish on a platter with the gravy poured over it and garnish with brown potatoes.

The man who cannot forgive any mortal thing is a green hand in life.—L. L. Stevenson.

The last resort of wisdom stamps it folly.

He only earns his freedom and axle-dom.

Who dirtily conquers roses.

FEW NICE CAKES.

When eggs are reasonable a sponge or angel cake is not at all expensive, and no butter is needed, yet such cakes are not always liked. The following is a light, delicious cake:

Delicate Yellow Cake.—Put a half cupful of butter, a cupful of sugar and the yolks of seven and the white of one egg into a warm bowl and beat until light; add two cupfuls of flour, sifted, with two teaspoonfuls of baking powder and a half cupful of water; beat two minutes; flavor with grated lemon rind or orange rind and bake in a sheet.

Ribbon Cake.—Take one tablespoonfule of butter, a cupful and a half of sugar, a cupful of milk, two eggs; mix into a warm bowl and beat until light; then add two and a half cupfuls of flour, sifted, with two teaspoonfuls of baking powder and one teaspoonful of cream of tartar; beat two minutes; flavor with grated lemon rind or orange rind and bake in a sheet.

Spanish Steak.—Take six ripe tomatoes or one can, four onions, two chili peppers and one and a half pounds of round steak. Peel and slice the onions, fry a little brown in the steak in serving-sized pieces and put the onions on top, then over these place the peppers, cut in fourths and cleaned, add hot water, cover and cook for half an hour either in the oven or on the back part of the stove.

Dutch Steak.—Cut a thick round steak on both sides, rub in flour, brown, sprinkle with three chopped peppers, cover with hot water and stew until tender.

Baked Round Steak.—Take a two pound steak, cut in serving-sized pieces, score well with a knife. Place in a roasting pan, season, dredge with flour; add a few bits of butter and a slice of onion over the meat. Cover with water, place in the oven and bake slowly for an hour until tender.

Deviled Steak.—Take one large flank steak, one half onion, two tablespoonfuls of butter, two tablespoonfuls of flour, one teaspoonful of salt, one-quarter of a teaspoonful of pepper, one teaspoonful of mustard, three tablespoonfuls of vinegar, two cupfuls of water. Melt the butter in a frying pan, slice the onion and fry in the butter. Remove the onion when brown, cut the steak in pieces, dip in flour and fry in butter. Remove the meat, add the salt, mustard, vinegar and pepper, then add hot water. Replace the steak, cover pan and let it simmer until tender. Dish on a platter with the gravy poured over it and garnish with brown potatoes.

FOOD FOR THE INVALID.

A chafing dish, thermos bottle or a fireless cooker are all invaluable helps in caring for the sick. With an alcohol lamp one may heat a little broth or milk, thus saving many times a long trip to the kitchen and back, when time and strength are both valuable. A nurse to be at her best should never allow herself to be overtired, for it is thus many serious mistakes have been made in caring for helpless people.

When cooking chicken for broth, or in fact for any purpose, scrub it well with a small vegetable brush with soda and water, then rinse and wipe dry. Cut in small pieces and put on in cold water. If or be served as broth. Let simmer five hours, strain, cool and remove the fat. This broth should be made of the meats in bones and tendons, will make a thick jelly, if one wishes, or may be used in boiled rice or barley; serve with a dash of salt in a pretty cup, piping hot.

Mutton broth should cook five hours and strain, then when cold be more very bit of the fat.

Triplex Soup.—This is a soup that is such a favorite and so often recommended by physicians that it should be found in every homemaking cook book. Use equal quantities of beef, veal or mutton, and veal, add a pint of water to each pound of meat. Cut the meat in small pieces, adding the bones; cover with cold water and simmer for four hours. Strain and season with salt. Cool to remove the fat before using. A beaten egg may be added to either of the soups, but not allow it to cook at all, just simply add to the hot soup and serve. A tablespoonful of cream, with a little sliling of celery salt is liked for variety when added to the chicken broth.

In the Days of Superstition.

The earliest record of a witch being burned to death is dated 1275, the witch confessing that she fed her offspring from a toad. In Toulouse, in 1335, 63 persons were accused of being witches, eight of whom were burned and the others imprisoned for life. In 1324 Petronilla de Meta was burned at Kilkenny, Ireland, by orders of the bishop of Ossory. Some 75 years later there were wholesale witch prosecutions at Berne, Switzerland.

The Mystery Deepens.

You have heard of the woman who was shot between the kitchen and the woodshed. But has Erb Jagoda recently went that story one better, like this: The woman's body was found with two bullet wounds in the bathtub.—Associated Advertising.

Pa Trick About It.

Allen, aged three, stood watching her mother baking pancakes. After a few moments silent observation she asked: "Ma, when you turn them over on the stove, turn on stomach, then eat."

Strong Soul Never Gives Up.

The tendency to persevere, to persist in spite of hindrances, discouragements and impossibilities—it is this that is at the root of success; this the strong soul from the weak.—Carlyle.

One Woman's Thought.

"I hate and loathe the sight of the extravagantly dressed woman nowadays." Bess Streeter Aldrich in recently went that story one better, like this: "The woman's body was found with two bullet wounds in the bathtub."—Associated Advertising.

Waited Long for Chance.

Thirty-nine years ago G. H. Fowler of Deshler, O., applied to the United States war department for a job as carcass inspector at Chicago company. He got a form letter saying his application had been filed with 39,999 others. He has just received a letter saying he now heads the list, and if he wants a place some opening.

TORTURING SKIN TROUBLES

Baths with plenty of Cuticura Soap and hot water to cleanse and purify. Dry lightly and apply Cuticura Ointment to soothe and heal. This stops itching instantly, clears away pimples, removes dandruff and scaly irritations, and heals red, rough, sore hands.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

PLEASED THE WOODPECKER

Bird Takes Kindly to Tin Barricade Erected Against Its Pickings.

Mrs. John Power of Main street, Newton, N. J., feared that a fine shade tree on her lawn would be killed by a woodpecker that appeared there every day and pecked away at a hole which he was making larger and larger. Therefore she had her husband tack a sheet of tin over the hole when the bird was absent.

Refusing to be discouraged and pretending he does not know the difference, the woodpecker now goes to a tree very, very far and pecks away like a trip hammer on the tin sheet. The neighbors are nearly crazy with the noise, and there is a law against killing woodpeckers.

Offended Her Taste.

Aproned in semi-seclusion, with comments on academic costume that so often reveal popular ignorance of the symbolism of hoods and gowns is the following story, told by a contemporary:

"A friend of mine," says the narrator, "is a curate in a local suburban parish. Some little time ago he went up to Oxford to take his master of arts degree, and the following Sunday appeared in the pulpit resplendent in his new master of arts hood. A few elderly ladies he was visiting in the house of a prominent parishioner, and was amazed to hear his hostess pleasantly remark:

"'Mr. X, that new hood of yours doesn't suit you at all. I can't imagine why you, with your complexion, should go and get a pink one. In the world, a nice green or an old gold would have suited you much better, and would have been far more effective. You must never know how to dress yourselves.'"

A Man's Worth

depends upon his power to produce what the world recognizes as of value.

And when you skimish around you'll find that this power—health is just power of mind and body—depends to a remarkable degree on the food one eats.

For highest accomplishment one must have the best nourishment. Food which builds well-balanced bodies and brains.

Grape-Nuts FOOD

has that kind of value. It contains all the nutriment of wheat and barley, including the important mineral elements so often lacking in the usual dietary.

Grape-Nuts comes ready to eat, is easy to digest, nourishing, economical, wonderfully delicious—a help in building men of worth.

"There's a Reason"

Common American Birds

Interesting information about them supplied by the Bureau of Biological Survey of the United States Department of Agriculture

Barn Swallow

(Hirundo erythrogastra)

Length, about seven inches. Distinguished among our swallows by its forked tail.

Range: Breeds throughout the United States (except the South Atlantic and Gulf states) and most of Canada; winters in South America.

Habits and economic status: This is one of the most familiar birds of the farm and one of the greatest insect destroyers. From daylight to dark it flies to and fro in its prey, and the insects destroyed are countless. In flight, dashing and gay, it is a barn rather, upon which it sticks its mud basket. Most modern barns are so tightly constructed that swallows cannot gain entrance, and in New England and some other parts of the country barn swallows are much less numerous than formerly. Farmers can easily provide for the entrance and exit of the birds and so add materially to their numbers. It may be well to add that the parasites that sometimes infest the nests of swallows are not the ones the careful housewife dreads, and no fear need be felt of the infestation spreading to her home. Nothing in the building constitute the almost exclusive food of the barn swallow. More than one-third of the whole consists of flies, including several species of some varied parasitic species. Beetles stand next in order and consist of a few weevils and many of the small dung beetles of the May beetle family that swarm around barns in the late spring and summer. Ants amount to more than one-fifth of the whole food, while wasps and bees are well represented.

Brewer's Blackbird

(Euphagus cyanocephalus)

Length, ten inches. Its glossy purplish head distinguishes it from other blackbirds that do not show in flight a trough-shaped tail.

Range: Breeds in the West, east to Texas, Kansas, and Minnesota, and north to southern Canada; winters from the Gulf coast to southern Mexico.

Habits and economic status: Nearly all of our grain and fruit-growing areas and spend comparatively little of their time in fresh water, but Franklin's is a true inland gull. Extensive marshes bordering shallow lakes are its chosen breeding grounds, and in many such areas are being reclaimed for agricultural purposes it behooves

Began to See Most Marvelous Things.

"First of all, Jamie put his head down on the rug, and then Jackie put his head down too. That never just wide awake enough to remember they must lie so the Spirits couldn't fly over on them—for the little Sparks wouldn't know enough to stop their game.

"But through the fender—which Jamie had remembered to put in front of the fire as he began to feel so very sleepy—they could see a little boys began to see most marvelous things.

"For instead of the fire they saw huge castles and towers and turrets and bridges and rural People. Far over in a corner, too, they saw a dark gray stone cave in which was sitting an old, old Fairy, with a long gray robe, with a tall black hat on her head.

"Soon they heard the Kings and Queens and the Princes and Princesses talking. They had low voices, but ever little while a sudden gun would go off and the Princes and Princesses would all keep very quiet.

"What do those guns mean?" asked Jackie and Jamie together.

"It's the Fireplace clock," the Sparks answered.

"But it doesn't seem to keep very good time—I heard it go off three times in a hurry and then not for ages," said Jamie.

"It's not always just time as we care about," said the Sparks. "We're not awfully particular. Anyway, we bright colors and our gorgeous castles and the Fairy Queen without hearing from you that our clock doesn't keep good time.

"Indeed, we do think you're all beautiful, and we love a cool evening when we can have a fire. We don't mind if your clock doesn't keep good time," said Jamie.

"What are you saying about the time?" said the Mother of Jackie and Jamie. "Children! Children! Jamie and Jackie were just being shaken gently and told to come off to their real bed. But as they both crawled into their nice soft sheets, they found that they'd each had the very same dream—and both had seen the Fireplace castle and heard the Fireplace clock which kept such bad time!"

WORDS WORKED EITHER WAY

Whole Sentence That Can Be Read Backward or Forward—Words Spelled Same Way.

A company of young people was trying to find words that could be read the same way, either forward or backward, and some had mentioned "eve." Then "madam" and "level" were brought out, and finally it was remarked that there was a whole sentence that could be read backward. The company laughed at the idea, but the speaker said, "Reverse this sentence 'Sing and raw was I ever I saw ear and gore and you will find it reads just the same."

Where Does Daylight Go?

There is a good deal of truth in the old saying that a man never knows how ignorant he really is until a child asks him questions. "Papa," said little Ethel, aged three, who was watching the sun slowly disappear behind the western horizon, "where does the daylight go when the dark comes?"

Work of 500 Pounds Girl.

Amy Latham, a Pennsylvania farm club girl, raised 500 pounds of tomatoes on her garden plot of thirteen-tenths acre last year.

RUSSIAN PROVERBS

The cynical humor of the Russian is admirably illustrated in their proverbs. Here are some:

A fool shoots: God guides the bullet.

If you are not caught, you are no thief.

When money speaks, truth keeps silence.

Dogs bark, and the wind carries it away.

It is a stupid mouse that knows only one hole.

A woman's hair is long, but her sense is short.

You cannot sew buttons on your neighbor's mouth.

It's a bad soldier that does not aspire to be a general.

A woman laughs when she can and cries when she wishes.

Where God builds a church there the devil has his chapel.

The greatest king must at last be put to bed with a shovel.

A dog is wiser than a woman; he does not bark at his master.

The czar is generous, but his generosity passes through the ministerial sieve.

If you go to war, if you go on a sea journey, pray twice; but pray thrice when you are going to be married.

Even in hell the peasant will have to serve the landlord, for, while the sinners are burning in a furnace, the tormentors will have to put the wood under it.

ALL TRUE

The best poker hand is made up of calling cards.

Small brothers often come in handy as engagement breakers.

Judicious use of "soft soap" has prevented many a black eye.

The chap with the sunny disposition has a shade the butt of it.

A good job can easily dodge a man who has a lame reputation.

The teapyway girl still has plenty of time to look before she leaps.

About half the time the average man is forced to grin and bear it.

Hope is an excellent stimulant—if there is anything for it to stimulate.

A shrewd man is waiting at the door when he expects opportunity to knock.

ADVICE

Advice is also used as a sugar coating for criticism, as a diplomatic method of checking offensive conduct, and as a pastime.

There are two classes of people ebulliently in a condition to give advice: those who have had experience and those who have not.

The person who is wise enough to take good advice and is foolish enough to use it, gives it generally the the knot of perfect friendship.

Advice is a drug on the market. The principal reason why the supply exceeds the demand is because those who need the most take the least.

Advice is a veiled but egotistical attempt to show your neighbor how you surpass him intellectually. It is a magnifying glass which you hand to him, after which you make certain that you are standing at the proper focal distance.—Judge.

BICKERINGS OF A BACHELOR

Deceased females impart no secrets.

More married women than spinsters are disappointed in love.

Many a man's butter-half separates him from his last quarter.

Just so it's a wedding trip, a woman isn't particular as to the route.

A woman always wishes she could keep from wishing she was a man.

When a woman has a train of thought she is apt to be an unlimited express.

The average married man is wedded to art, but he seldom finds it out until after the parson has collected his fees.

WAILINGS OF A WIDOWER

If a woman is a kleptomaniac she always takes things for it.

A woman never tires of shopping as long as her complexion doesn't run.

A woman never objects to her husband kissing the cook—if she is the cook.

Anyway, Adam didn't have to take up the carpets and help his wife clean house.

KEEP YOUNG

As well be young at 10 as old at 50.

Many elderly people suffer lame, bent, aching backs, and distressing kidney troubles, when a little help for the kidneys would fix it all up. Don't wait for gravel, or Bright's disease. Use Doan's Kidney Pills. They have helped thousands, young and old, and are recommended by thousands.

An Illinois Case

Mrs. A. L. Hoffman, Berlin, says: "Doan's Kidney Pills have done me a great deal of good. I had been troubled about a year with a constant pain in the small of my back that broke my rest at night. I felt tired and lazy and had a dull headache and had failed, and I have been in good health since."

Get Doan's at Any Store. 50c a Box.

"His Own Lawyer."

Over and over again, the wisdom of the adage, "A man who is his own lawyer has a fool for a client," and the understanding that inspired the injunction, "Physician, heal thyself," are established in the courts. Every lawyer is familiar with many instances in which the wills of distinguished jurists have been set aside because their authors neglected to attend to a matter of pretty common knowledge which he doubtless could have done his own affairs.

Another exemplification now appears in the conflict about the will of the late Dr. Austin Flint. He was perhaps more frequently employed as an expert witness as to testamentary capacity than any other author in the country. Question of mental fitness, of intent, of motive and of the soundness of a testator's "controlling mind" were before him constantly. Yet his friends can will so far as concerned, so observed, that his executors have been compelled to invoke the aid of the court to determine what the learned testator meant.—Richmond Times-Dispatch.

Dickens' Poor Taste in Dress.

When Charles Dickens was to make his first appearance in America as a reader an immense crowd awaited him at a public hall in Boston. The enthusiasm of the people had risen to fever heat. One of his most ardent admirers advanced to the front in evident of the evening.

With a few exceptions, who wished to welcome him and to show him attention, I was in the little room back of the platform when Dickens arrived. He was a rather stout man, with a somewhat florid face, and I saw, to my surprise, that he was dressed in an exaggerated servility to the extreme of fashion. More than this, he wore a boutonniere in each buttonhole, and two waistcoats, the chance of which were strung expressively across his chest. There was a good-natured taste in his appearance which his friends reproved, knowing how ridiculous it would be to his admirers. Who appreciated his genius and enjoyed his writings.

May Revolutionize River Traffic.

The first self-contained freight barge designed to carry heavy cargoes of freight on the Mississippi river, is expected to revolutionize river traffic on the lower Mississippi river, in the opinion of the large cities from St. Louis to New Orleans. It is known as mule I, and is the first of a 19,000,000 fleet being built.

The barge is 42 feet wide, 240 feet long and is propelled by four 50-horsepower gasoline engines. It has a capacity of 1,000 tons. It is believed the new type of barge will revolutionize freight traffic on the Mississippi river. Similar barges have been put in operation recently on the Warrior river, in Alabama, hauling coal to the seaboard at an extremely low rate.

A woman can keep a secret if nobody cares whether she does or not.

A woman will believe anything a man tells her if he puts it in a letter.

The Answer.

"Mr. Interlocutor," said the end man at the Commutersville Amateur Minstrel Show, "I want to ask you a question."

"Very well, Mr. Bones. What is your question?"

"Why does the railroad company always give only single pass for conductors and brakemen?"

"Before I answer your question, Mr. Bones," replied the interlocutor, "I'd like to ask you one. How do you know that the railroad company always selects single men for conductors and brak

A. L. HART & SON.

LOCAL AND PERSONAL

The Elston Hotel opened Monday under the Bissett management.

Walter Dennis, of the Pentwater coast guard station, is here on a visit with relatives and friends.

L. A. Stites, of Flint, is spending his vacation here with his parents, Mr. and Mrs. Empire Stites.

J. E. Chow, of South Arm township, was elected chairman of the board of supervisors for the ensuing year.

Adam Minyon, operator W. U. at Wequetonsing, spent Sunday here with his father, Chas. Munyon.

The steamship Manitou arrived from Chicago Saturday noon on her first trip, with a good list of passengers.

Clare Coulter, who is filling a good position on the road with the Quaker Oats Co., is here for a few weeks' visit.

Norman Dickie, of the Charlevoix coast guard station, has been transferred to the Grand Haven station, and left Saturday.

Married, June 27th, by Rev. C. E. Taggart, at Sequanota, Mr. Harley J. Gobs, to Miss Mildred Shockley, both of Charlevoix.

You can have more genuine, comfortable enjoyment in Charlevoix 4th of July than at any other place in this section. Decide for Charlevoix now.

The board of supervisors is in session at the court house for the primary purpose of equalization of the tax rolls, and other business that requires attention.

A. F. Bridge joins his wife at Ann Arbor today to be present at the University commencement, in which "Bob" is a senior. He is specializing in banking.

The $500 oil sprinkler which the city recently bought, was put into service Wednesday afternoon on the Belvedere grounds, and proved itself to be a success.

Saturday Street Commissioner Link treated Nichols and Ainslie streets with oil, using the new oil sprinkler. The oil sprinkler does away with one water sprinkler.

A. L. Coulter, now of Indianapolis, spent Sunday in town. Mrs. Coulter remains here for the summer, but expects to join her husband in Indianapolis in the fall.

Married, June 30th, by Rev. C. E. Taggart, at the home of Jay Ashton, this city, Mr. E. Burdette Rogers, of Niagara Falls, to Miss Jessie G. Campbell, of Boyne City.

Hon. A. Butters returned Saturday from Detroit and other Southern Michigan points, on business for the Hoch Product Co., and reports that construction work at the plant will proceed.

Capt. S. M. Ross arrived here Tuesday from Traverse City with the steamer Petoskey, which he raised there, after having been sunk for several months. She is hauled out at Swaile's ship yard for an overhauling.

Frank Wood was advised Saturday of the death of his brother, J. N. Wood, of paralysis at home in Grand Rapids. De ceased never resided in Charlevoix, having spent his younger days on the farm near Advance. He leaves a family.

The board of county road commissioners visited Beaver island Thursday and took the necessary preliminary action toward a two mile section of State reward road on the "King's Highway," which is the main north and south island road.

Parlors of Baptist church will be open to the public all day on July 4th, and will provide a pleasant resting place. A first-class dinner will be served at 12 o'clock, for which tickets will be on sale at an early date, at 25c. Supper served 5 to 8 o'clock, 15c. All will receive a hearty welcome.

Alois Velter, it will be remembered died about a month ago in Mexico, where he was superintendent of a sugar factory. On Wednesday afternoon the remains arrived here for interment in Brookside cemetery. Mr. Velter, whose family resides here, was superintendent of the old Charlevoix sugar factory, and was held in great respect by our people.

At the Majestic Theatre, Friday evening, June 30th, Manager Miles will show "The Spanish Jade" by Maurice Hewett dramatized for the screen by Louis Joseph Vance. A fascinating Spanish tale of love and tragedy with unique costumes and scenes of that quaint country. On Tuesday evening, July 4th, will be shown upon the screen Victor Moore in a picturization of the funny st society comedy ever written, "Slosh" by George Ade and Howard.

A couple of weeks ago, as J. W. Teasdale's coachman, Wm. Pierce, was enroute from St. Louis, Mo., to Charlevoix, a favorite cat that had made the trip to and from the Missouri city on several occasions, left the car during a short stop at White Cloud, and failed to return. A few cards were printed and sent to the postmaster at the latter place, offering a small reward to the finder of the pet, with instructions to ship it to Charlevoix by express. On Monday the cat arrived in good shape, all of writes goes to show that it pays to advertise.

STREET IMPROVEMENT

No town in Northern Michigan can boast of street improvement enterprises equaling those of Charlevoix now in progress.

Work of this character denotes civic pride and an abiding confidence in the future.

It also denotes that we have the wherewith to pay for the best there is in the market in that line. We have the most beautiful town anywhere, and when we buy a new garment for it, it must be of the best material and in style.

If you seek the beautiful, behold it here.

St. John's Day Services

The Sunday services at Christ Church, under the auspices of the Masonic fraternity, were attended by a congregation of 200.

A very interesting and instructive sermon, covering the life and work of St. John the Baptist was delivered by Rev. Henry Harris, of Petoskey, who was assisted in the impressive Episcopal service by Rev. M. B. Kalpack, the resident rector.

The excellent music by the choir was augmented by a duet rendered splendidly by Chas. Hamlin and Leo Kirby.

MASONIC

The officers of Charlevoix Council, Royal and Select Masters, have received definite notice that the lecture on the Holy Land by Companion Arthur H. McLeod, will occur at Charlevoix Theatre on the night of July 3d.

Companion McLeod, who is a 33° degree Mason, and grand lecturer of the Grand Council, has just returned from Palestine with a most interesting collection of eastern slides.

The lecture will be public, and church members are cordially invited.

PEONIES.

(Red, Golden, Pink and White.)

(Written for the sentinel)

No shrinking, modest, woodland flower,
Peering 'neath shade of Flora's bower,
But regal, flaming to the sky,
Proclaim, "a royal cottage sigh."

At June's cart, stately and tall,
Like sunrise's golden, fiery ball
You stand, in bonds proud array,
And trumpet "Summer's on the way."

In sunny shadow's paling pink,
Lovelier in June twilight sink
And welcome Venus, glittering white,
A vestal torch, of Saint John's night.

With subtle fragrance, lasting long,
A friend sent, from frangrant June,
Yet dare an older chance to honor,
Your queenly scorn, amidst vagrant lower.

To beauty, yield we right of way,
Fealty, to lineage pay.
But sought through years, to memory sweet,
Are flowers in shadow, at your feet.

CHICAGO. CHARLEVOIX-MAN.

Charlevoix has a well equipped stock exchange office in the Novak building, on Bridge street. Active operations will begin July 5th. The exchange is a branch of Thompson & McKinnon, of Chicago, members of N. Y. Stock Exchange, N. Y. and New Orleans Cotton Exchanges, and Chicago Board of Trade. They have a special leased wire and are installing every utility and convenience for public benefit. The office will be in charge of H. L. Winters, of Chicago, a member of the firm.

Board of Education

Charlevoix, June 26, 1916.

Regular meeting of the board was called to order by President Hampton. Trustees present: Hampton, Nordrum and Hiller. Absent: Bridge and Crawford.

The treasurer's report shows a balance on hand of $6936.

The following bills were presented and read:

General Fund

261 Charlevoix Sentinel, printing	1 25
262 Charlevoix Lumber Co. material	3 42
263 J. E. Cook, services	2 50
264 Chas. Munyon, services	2 50
265 H. W. Whitfield, fuel	3 00
266 Charlevoix Theater Co. opera house	5 00
267 Gilf Nordquist, expense	1 50

Library Fund

268 John Mitchell, services	2 50
269 Chas. Munyon, services	2 50
270 Anna Jean Hitchcock, services	2 50
271 A. C. McClurg & Co. reference books	1 00
272 Charlevoix Lumber Co. material	14 35

Moved and supported that the bills as read be allowed and the secretary be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried.

Moved and supported that the matter of purchasing coal for the coming school year be referred to the committee on buildings and grounds with power to act. Motion carried.

These minutes were read and approved and on motion the board adjourned to meet July 5th at 7:30 p. m.

E. J. HILLER, Sec'y.

TELEPHONE NO. 22.

Lin-s Hardly Appropriate.

The linen in the Dutch national hymn, "Preserve, O God, the dear old ground, thus to our fathers gave" seems to indicate a considerable modesty on the part of Netherlanders, the supposedly correct fact being that they reclaimed the ground themselves. Providence could hardly bring something of a hindrance, both to its acquisition and its "preservation" for which they pray.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powder. Get at the root of the trouble and thoroughly purge the system with a treatment of Dr. King's New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, adults and aged; aid to a clear complexion. Only 25c, at your druggist.

Excellent Reason.

Another reason why one child is not enough for a family is that when it grows up the father has two houses in the family and the mother and the kid have none.—Houston Post.

Bridge Street Paving, South Terrace Paving District No. 15.

NOTICE is hereby given that a petition signed by more than two-thirds of the owners of all frontage in the above named district has been filed with the undersigned City Clerk, asking that the Common Council of said City proceed to the construction of the work known as the South Terrace Paving District No. 15 in said City, as set forth in the Charlevoix Avenue Improvement Ordinance, including the necessary curbing, gutters, culverts and crossings, in accordance with the plans and specifications of the work known as the South Terrace District on file in said City Clerk's office. Instructions to bidders and blank forms of bids for doing the work, with copies of the plans and specifications of the work known as the South Terrace District, can be obtained at the City Clerk's office. Bidders will be required to make a cash deposit with their bids, and to furnish a bond in the penal sum of $500 for the faithful performance of the work, and to comply with the provisions of the Charlevoix Avenue Improvement Ordinance, which ordinance provides that the work must be completed on or before the 15th day of November, A. D. 1916.

The City of Charlevoix reserves the right to reject any and all bids, and to waive any technicalities in the bids received.

Dated this 30th day of June, A. D. 1916.

CHARLES H. BOLTWOOD,
City Clerk.

The Last Three Days of A. E. MASON'S

BONA-FIDE CASH RAISING SALE

BLANCHARD HARDWARE CO.
209-211 Bridge St. - Phone 45 - Rest Room For Ladies

Barnard Doings.

Mr. and Mrs. J. S. Cole, of Boyne City, called on friends in Barnard Sunday.

The Children's Day exercises were very largely attended. The beautiful flowers and the smiling faces of the children were attractive, and the numbers of the program pleasing.

Mrs. Peter Block entertained last Wednesday for the Ladies' Aid society. Eleven ladies were present and enjoyed the amusements planned. Mrs. Block furnished a very delectable 10c tea. Every two weeks through the summer the society will have a 10c tea and meet socially for entertainment. The first Wednesday in each month will be the regular and business meeting day of the society.

Mrs. and Mrs. Fred Gornell and family, of Charlevoix, were guests at the Henry Gornell farm Sunday.

Mr. and Mrs. Geo. Vance and son, of East Jordan, and Mr. and Mrs. Henry Vance, of Grand Rapids, visited their niece and cousin, Mrs. Clyde Smith, on Friday, making the trip in their auto.

Mrs. Jennie Smith, who is spending the summer at Bay View, spent Friday at her home, returning to Charlevoix Saturday.

The Rev. Van du Houvel, of Atwood, preached two excellent sermons at the Reformed Church here, Sunday. At 2 o'clock the Communion of the Lord's Supper was observed. Mr. Van du Houvel exchanged pulpits with Mr. Bringe.

John Smith called on Arthur Beattie at the hospital Sunday, and reports that Mr. Beattie continues to steadily gain and hopes to return home soon.

Mr. and Mrs. Joe Clarke and Stanley, Mrs. Donald Gale, of Detroit, and John Clarke, with Henry Bisek as chauffeur, motored to Grayling Sunday to visit Sim Clarke, who is a member of the State Militia, and awaiting orders to go to the Mexican border. It was a most interesting day, the camp was thronged with visitors all day. About six thousand soldiers were in camp and more arriving each day. The men all seemed in excellent spirits, and ready for their country's service.

Mr. and Mrs. Frank Kaden, of Boyne City, motored to Barnard Sunday, to visit Mrs. Kaden' uncle, Wm. Burns.

Beaver Island News

Charles Rice, of Harbor Springs, was here one day last week.

Mrs. John Donlevy, of Springfield, Ill., is here visiting relatives and friends.

Miss Laura O'Donnell and brother Frances went to Escanaba to live.

D. D. Hammond, of Charlevoix, Horace Hipp, of East Jordan and Ed Lorch, of Boyne City, county road commissioners were here last week looking over the roads.

R. A. Emrey, of Charlevoix, was a caller here several days last week.

W. Abbott, of Boyne City, was here last week on business.

Supervisor Frank Skupp went to Charlevoix to attend the meeting of the board of supervisors.

Mrs. Geo. Franey and family of Newberry is here visiting her mother, Mrs. Gus McCauley.

Supervisor John Green is at Charlevoix attending the meeting of the board of supervisors.

Miss Clara Bailey returned home after spending a few weeks visiting.

The tug A. & M. Link went to Charlevoix to get some work done on her engine.

Frank Dunlap returned to Chicago after spending two weeks here visiting friends.

Ulysses McCune was to Charlevoix Saturday on business.

Last Wednesday evening Capt. Ward Bennett was surprised by a number of his friends. The occasion being his birthday. After the evening was spent in "auld lang syne" cake was served, and everybody reported a good time, wishing him many more happy birthdays.

Mrs. Tom Hunt was called to Chicago by the death of her husband.

Dr. J. A. Auld, of Charlevoix, was here last week doing some dental work.

Born, June 26th, to Mr. and Mrs. Hugh Cunningham, a boy.

The lighthouse tender Sumac was in port over Sunday.

LEGALIZING VIOLENCE

The petition now being circulated by organized labor asking that the constitution of the state be amended so as to take from the courts the power to issue injunctions in labor disputes is one of the most arbitrary and revolutionary moves ever made in a democratic country in time of peace. The suspension of the writ of habeas corpus would be fraught with no more danger to the rights of citizens than the depriving of certain classes of our people of the right to seek this remedy to prevent the destruction of their property and the ruin of their business. It is the most radical kind of class legislation because it seeks to deliver one class of our citizens, bound and helpless, to the tender mercies of another class.

We might look upon this move with more or less complacency if the evil was to affect only the class at which it is aimed, but the evil effects from such legislation will touch every citizen of the state. We cannot tolerate such a vicious principle. Sooner or later the whole profession, who pay all the bills in the end, will taste the bitter fruit, and it is better that they should realize this before putting their hands to a position which is bound to handicap their commercial activities, work disaster to the whole business and open the door to the flood of vicious legislation. If the fundamental law of the state is to be changed so as to deprive the manufacturer of the power to protect his property by injunction it will pave the way for an orgie of disorder and destruction against which the local authorities will be powerless.

Organized labor may deny that it intends this disorder and destruction, but the very fact that it is asking that its hands be untied upon such acts is a confession of guilt. Organized labor is threatened with destruction at the hands of organized capital, and no one else is be not entitled to the entire force of the constitutional law to protect itself against labor destruction. Organized labor does not ask for special legislation in its behalf, but it does ask for a special law which will place it in a position to destroy property with impunity. It is a most dangerous proposition, for all the disorders, strikes, lockouts and boycotts. The time is not remote when there will be at any city in this state so many factories that employ a number of men to doors to fire and destroy property, that will be interested in the payroll, of our industries? Are we not all interested in the prosperity of our city? Do not the merchants, who afford to place our goods before us, have a right to expect that we will not destroy all those who depend upon the payroll of our industries? Are we not all interested in the prosperity of our city? Do not the merchants, who afford to place our goods before us, have a right to expect that we will not destroy all those who depend upon the payroll of our industries? Are we not all interested in the prosperity of our city? Do not the merchants, who afford to place our goods before us, have a right to expect that we will not destroy all those who depend upon special word from the commissioner that a school is already. The extra plate was sent last November after Miss Becker's visit because she reported that Norwood lacked only the remodeling of their light arrangements. The plate was to be withheld until all the requirements were met. We are now wondering which school will win this plate.

The additional diplomas to eighth students were mailed this week. They are by this time in the hands of their owners.

A set of affidavits for use in district elections were mailed to each of the 59 school clerks on Wednesday.

Blanks for triplicate reports of township clerks are stamped ready for mailing to the 17 townships. They will be held in the office until July 1st.

Kveline has submitted plans to the department and have received return recommendations on the same.

South Arm No. 8 is awaiting an order for extra high window frames.

The Misses Sadie Metz, Jessie Barkley, Louise Liskum, Agatha Kenny and Norma Johnson of East Jordan will be at Mt. Pleasant this summer. Miss Vivia Keller will be home one night after returning from her school in Boyne Valley, she then goes to Mt. Pleasant to attend the normal. Miss Keller will return to her school in Boyne Valley this fall. They will be joined on the normal campus by the following Boyne City girls: Phyllis Shepard, Alta Vogt, Muriel Kerry, Golda Jenson, Lela Rothenberger and Gladys Greenhoe of Clarion.

The Chapel roll call in Ypsilanti will include the following Charlevoix county girls: Ruth Dell, Myra Poole; Mabel Thayer of Boyne City; Mina and Leclon Sidwell, Bidwell Creek; Pay Worden, Mildred Drescher, Ada Coleman, and Ruth Durfee of East Jordan.

Miss Lela Rothenberger will teach the Robinson school next year.

School Commissioner's Column

May L. Stewart, Commissioner

That long delayed shipment of certificates for four months of perfect attendance has finally arrived from Chicago. These are the ones with the red ribbons on that the boys and girls like so well. Two hundred forty one of them were sent this week to deserving students all over the county.

Last Friday evening at East Chandler the students dramatized the "Birds of Killingworth." It was well done and will teach the participants to love our songsters.

The Forest Hill school, which is Chandler 4 and commonly called Camp 25, has just received word that the plans for refreshing the cloak room in their school building are approved by the state department. They have also signed a contract for indoor chemical toilets of the Kaustine order.

Walloon Lake expect to complete the two necessary changes for the receiving of a "Standard School" plate at once. An extra plate has been on hand for some time. The one is that a plate to never seat four from Lansing except upon special word from the commissioner that a school is already. The extra plate was sent last November after Miss Becker's visit because she reported that Norwood lacked only the remodeling of their light arrangements. The plate was to be withheld until all the requirements were met. We are now wondering which school will win this plate.

The additional diplomas to eighth students were mailed this week. They are by this time in the hands of their owners.

A set of affidavits for use in district elections were mailed to each of the 59 school clerks on Wednesday.

SEVEN and one-half acres, close in; will sell at a bargain; well located. Call on or telephone, H. S. HARDIE.

The Awakening

By GEORGE E. COBB

"Blessed are they that mourn, for they shall be comforted."—Matthew, v, 4.

"Sister of sorrows, welcome, thrice welcome."

They were balm to a weary soul seeking sympathy and rest, those fervent, sincere words, she, to whom they were addressed, did not resent the designation. Her proud lip trembled slightly, the clear steady eye was swept with a momentary shadow. Then Helena Hively was the composed, quietly perfect woman she always was to the outside world.

Hers was a tragic story. Within a decade ago she had been a luxurious home and a regal fortune slip from the control of her credulous, easy-going father, the prey of sharpers. Then he had died, her mother had followed him within two weeks and Helena was left alone in the world.

Her beauty was of a striking type, her manner one of impressive reserve. Wealth had given to her knowledge of ceramics made of her an expert, and she secured a paying position in the studio of a firm, catering to a high grade clientele.

And then Helena met the romance of her life. The only man who had ever affected her, Walworth Traxes, became her fiance. He proved false. Then Helena, in a moment of temptation he appropriated money that did not belong to him, generous, and contrite, he died in a prison cell a year later and the romance of Helena's life was ended.

She settled down to a dreary, loveless life. All that was precious to the heart of a sensitive woman had passed her by and left her stranded and bereft. Her father, dreamer of despair, She lived on, she worked on, with but a single gleam of sunshine. Somehow, an old schoolfriend sought her out one she had known as Edith Mannlere, now Mrs. Percival, happily married, with two children and longing for the company of the dearest friend she had ever known.

It took Mrs. Percival a full year to win Helena's consent to come to their home in another city and live with them as a companion friend, a welcomed guest. There were the children to teach, there would be ample leisure to pursue her activities in ceramic art. And at last Helena had decided to leave the dreary old grounds of life and attempt existence under a new and more promising phase.

"We are going to make you forget the old griefs and troubles, Helena dear," said the Edith spirited lady hopefully—Arnold and I. There is surely a happy, happy place for you here. Modest, but comfortable!" queried the speaker playfully, as she noted a calculating expression in Helena's eye as she took in her surroundings.

"It is a beautiful home, everything to so tasteful," began Helena.

"I see what you are thinking," declared Edith. "You supposed that we were rich. We were, but the last year has changed all that."

"That if you have had money trouble, I shall be a burden to you."

"Why, we want you more than ever just on that account," insisted Edith. "Do there a more helpless person in the world than yourself? Think what you can do for the children! No, no, dear, when we first asked you to come to us Arnold was wealthy. A dishonest partner robbed him of over fifty thousand dollars. But when we made your letter conception of our home Arnold was actually joyous. Don't think of deserting us because we are poor."

So Helena settled down into her new life. New delights came daily within her experience. Mr. Percival was a resourceful man, and, though working for others now, earned a very liberal salary. Edith constantly declared that he was a relief to her away from the old follies of fashion. The care of the children was a boon some joy for Helena.

One day in looking over an album a photograph fell to the floor. Helena noted a slight shadow move across the face of Edith as the happy girl recognized the portrait.

"Who is it?" inquired Helena, and she steadfastly regarded the picture.

"That is Bruce Arlington, my husband's old partner."

Helena sighed. She replaced the photograph but when alone the next day took it away from the album.

"Lost the one lost to me," she summured, "the same ingenuous characteristics, a gleam of good impulses but weak as water in resisting temptation think."

Somehow she could not get the circumstance out of her mind. The original of the photograph resembled her dead fiance only in general facial characteristics, yet the presentment involved poignant memories with Helena. One evening some callers referred to this Arlington. They told of his being reestablished in business in another city. The rumor was that he was building up a fortune. A wayward thought came into the mind of Helena.

The following week Helena told her friends that she must return to the city for a few weeks at least. They wondered her decision and deplored her absence. At the end of a month Edith received a startling letter from her chatelaine friend.

In a few plain words Helena wrote that her purpose in coming to the city was to seek out Bruce Arlington, to win his love, to sacrifice herself in marrying him, in order that she might lend him in restore to Arnold Percival the money he had taken from him.

As if purely incidentally, Helena had dashed across the path of Arlington. There was not a womanly attitude of fascination that she did not employ to advantage in luring the man to her side. They became engaged.

More than once Helena felt that she was playing a dangerous game. Much as she deplored the dishonest trait in Bruce Arlington's character, at times something ingenuous, intangible, the secret spring of position in the public of a firm, catering to a high grade clientele.

And then Helena met the romance of her life. The only man who had ever affected her, Walworth Traxes, became her fiance. He proved false. Then Helena, in a moment of temptation he appropriated money that did not belong to him, generous, and contrite, he died in a prison cell a year later and the romance of Helena's life was ended.

She settled down to a dreary, loveless life. All that was precious to the heart of a sensitive woman had passed her by and left her stranded and bereft. Artful Old Man.

It was Helena who nursed him back to health. It was Helena who read his pleadings when convalescence came. And out of her intended great sacrifice for dear friends, there came the deferred happiness of her lifetime.

Artful Old Man.

His Celebration MAN WHO MADE the FOURTH

Photo by Frank Fiske.

LIKE a firecracker that smolders quietly and finally explodes long after the rest of the bunch have banged and scared their way into oblivion, comes tardily the story of the man to whom we owe our Fourth of July. Those who have not heard the story and who endeavor to recall some chapter of American history telling of this great man will search their memories in vain. So obscure has he remained in the annals of those times that even his name is unknown, there is only one glimpse of him, as a rider hurrying through the night with a message that was to bring us our glorious Fourth. The Chicago Post tells the story.

"The friends of a Declaration of Independence were afraid that they might not be in a majority in the great Philadelphia gathering. It is affirmed that they counted noses and were fearful that they would fall short by one or two votes. Then it was that they determined to send a messenger into Delaware to bring back an absent delegate who it was known would vote right if he were present. They looked for a hard rider with the cause at heart, a man who would ride the race for liberty and count fatigue a pleasure. They found him in a man whose name is unknown to posterity, but who deserved well of it.

"The unknown rode on his mission. He tore away, as one of his contemporaries bore witness, as if the devil were at his heels. He broke exhausting records and sent the absent delegate back in a hot hurry and in time to vote. The Declaration debates and proceedings were secret, but there was a story well believed that the resolution carried by one vote. We have Paul Revere's ride in living verse, but no one has sung the song of the unknown rider, The Man Who Made the Fourth.

"Here's to him!"

EMBLEMS MUST NOT FADE

Duty of Americans to Hold High Forever the Glory Handed Down by Their Forefathers.

IT WAS the practice of Americans for many years to observe the Fourth of July patriotically. Their celebrations did not consist of noise alone. Attending all the music, cannonading, bell ringing and marching there was an intellectual feature that heartened the old and inspired the young.

In the numerous festivities of earlier times the treasured emblems and trophies of liberty were all in sight for one day at least, and by recurring to the principles of the Declaration everybody's knowledge of and faith in the doctrines that gave this continent a measure of freedom and justice were strengthened and renewed, says the New York World. If those emblems are fading the fault is due more to our native born inhabitants, who think they have learned all the lessons of liberty, than to the millions of newcomers, whose minds are still open and whose eyes are still keen.

What proportion of the rising generation knows or has accepted the "self-evident truths" upon which the republic rests?

"That all men are created equal?"

"That they are endowed by their Creator with certain unalienable rights?"

"That among these are life, liberty and the pursuit of happiness?"

"That to secure these rights governments are instituted among men, deriving their just powers from the consent of the governed?" And

"That whenever any form of government becomes destructive of these ends it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness."

Interest in these propositions used to be cultivated in various ways, partly as a pleasure, partly as a duty. To day the words are unfamiliar, the flag itself is infrequently seen, and Lifting Jim, Dunker Hill, Saratoga, Valley Forge, Trenton, Savannah, Cowpens, Kings Mountain and Yorktown are dimly remembered.

Yet we may be sure that of the multitudes of recent arrivals in the United States there are many whose steps have been guided by the ideas, symbols and names which to us are vague or forgotten. The valuable things that young Europe is learning here are carried not from America, but from old America. The landmarks of liberty which guided our forefathers are lost or ignores are still plain enough to the young Europe transplanted into America.

There are fading emblems in the case of young Europe also, but they are of crowns and coronets, thrones and scepters, divine right and despotism, a shackled press and stifled speech. To those who hunger and thirst for liberty and opportunity the old American emblems blaze afar. To those who are surfeited with liberty or unappreciative of it they fade and die.

Duty of Citizens of Today.

The States and portraits of Washington and of Jefferson, draped with the Stars and Stripes, appear in the windows always on the eve of the Fourth of July. We do well thus to honor the fathers, but there is a suggestion in these solemn representations of the giants of the past before duty of devotion to the country's highest interests, or at least the greatest constructive task of statesmanship, was somehow finished up in the persons of the founders, and that all we need do is to look at their marble effigies and then, and once a year commemorate their achievements. But the work of the fathers was never done and settled in the foundation and upbuilding of the American republic.

THE FLAG THEY LOVE

Maryland Patriots First.

The patriots of Harford county, Maryland, gathered themselves together at Harford town, which is now called Bush, on March 23, 1775. On the same day they prepared and signed a Declaration of Independence, probably the first one ever made by the colonies, or any part of them.

Serve the State First.

The conception of liberty has no validity unless it is a continuing one. Carved into pallid marble and draped with a flag, it is chilled and dead. It must be renewed each day in flesh and blood, in hearts and brains and sinewy hands. The fathers served the state before they served themselves. We must do the same.

Nation's Debt to Almighty God.

Any celebration of Independence day which does not give the place of prominence to God is inadequate and unworthy. The words of the poet trace our liberties to the right source and give the honor to him to whom the honor is due.

Hail! Independence, Hail! Heaven's next best gift,
To that of life and the immortal mind!

Must Be Torn to Be Opened.

An envelope that cannot be opened except by tearing or cutting the paper is made to order for sweethearts, and for the mucilage with which the flap is sealed. An ordinary envelope can be opened by exposing it to steam for a few moments or immersing it with water. Albumen becomes insoluble when heated. Of course one must put the albumen on an unstamped envelope. It this be not easily obtained, it can be made from the egg itself, cutting this to the proper size and shape. To apply the albumen, take some white of egg and spread it with a brush, a feather or the tip of the finger on the flap. Close this before the albumen has time to dry and pass a hot iron over it. This consists the albumen, and the paper must be torn before the envelope can be opened.

"As Long as We Love."

As long as we love we shall be loved we are of service in life for there is nothing in the world worth living for, as affection and faith; nothing the human creature so desires to extend, if only he can, as love and sympathy. But it is not easy to keep human encouragement and lively. We are born into the world with the sense of a separate self, and that self desires possessions and powers and trappings and ease. We are set into a seething mass of conflicting wills. Interesting and opposing, and there is little harmony except that which we can be gathered together under the flag of a common cause or a common ideal, where a number of people are willing to bear deprivations and exertions for what they believe to be a common good.—Louise Collier Wilcox.

Source of Inspiration.

Lift your eyes unto the hills and, so inspiring, divinely sweet and beautiful will be your spiritual experiences and glorious will be the revelations that will sculpture and fill your soul.—Selected.

THE ENDLESS HUNT

MAN'S SEARCH FOR HAPPINESS TOUCHES ALL PEOPLES.

There's Theme for Poet or Moralist in Strange, Outlandish Indian Legend—Faith in God the Surest Way.

Among the Indians of Guatemala, according to the Christian Herald, who possess many remarkable traditions, a legend has been preserved which might form a theme for the poet or moralist. At the foot of Mount Suarenne lies a lake, placid and beautiful in its solitude—a huge, glittering, gold mared serpent and a water maiden, who is the enchantress of the lake. Her singing has an irresistible charm to draw the casual listener, who is promptly seized by the golden serpent and dragged down to the lake's bottom. There he is delivered to a giant, who is the guardian of a secret treasure hidden in a cave. What the treasure is no one knows; but it is something for which all men seek. Some believe it to be a mass of priceless jewels; others aver that it is a charm which is capable of curing all human ills. But the oldest and wisest of the Indians say their heads knowingly and say that the hidden treasure, which no human power has ever succeeded in grasping, is happiness, and that the great deity who directs the fates of men hides it where it is beyond reach. All through the ages men have sought for it but failed to grasp it, and many have perished in the attempt.

It is only an old heathen legend, yet it proves the universality of the search for happiness which has gripped the human heart since the dawn of time, a search in which live and wealth are the lures that cause the danger and death. Those who are wiser and whose understandings have been enlightened know that happiness is unasked to him who serves God and his fellowmen, and who makes his life a blessing to others. To such a man there comes a peace and a confidence like that of the humble tiller of the soil who, having been true and faithful to his trust, is found quietly standing beside him at the plow, a serene and comforting heavenly counsel. Both are legends and strangely beautiful, but our own hearts tells us which of the two has the real charm of spiritual truth.

Bostonians Save Words.

"Love, hour of joy, hours of brevity" asked the room clerk, holding up a telegram. It simply read, "Tonight." The Chicago Post tells the story.

"That the signer will arrive on a certain train, that purpose is to meet that a room with bath on the eighth floor, with southern exposure, with a bath already drawn, is to be in readiness.

"That's nothing for brevity," remarked an assistant manager who stood by. "We have had a man from Boston here who doesn't have to say a word to get his room ready. He just sends a telegram, and the porter knows that five o'clock train is meant, a sleeping Pullman and a seat midway on the bright side of the dining car."—New York Times.

The Whole Thing Right There.

During its early days, John Fox, Jr., was once taking a trip over Kentucky's new leaf-raising railroad. But it was the next morning before he came to which he was traveling. On the contrary, he was very much concerned at the tremendous rate of speed at which it rounded the sharp curves for which that road is famous. He was a little consoled, however, by the calm manner in which a fellow-passenger across the aisle surveyed the whirling landscape. Finally, unable to control himself longer, the novelist leaned across the swaying car and inquired: "Sir, don't you think this is a bit reckless—going so fast?" What he said next was another train around one of these curves!" "No yeah, suh!" assured the calm one. "We've got the road's entire attention this trip, suh!"

"Why Not?"

"Why do you strike this man?" asked the judge sternly.

"He called me a liar, your honor," replied the accused.

"Is that true?" asked the judge, turning to the man with the mussed-up face.

"Sure it's true," said the accuser. "I called him a liar because he is one, and I can prove it."

"What have you to say to that?" asked the judge of the defendant.

"It's not nothing to do with the case, your honor," was the unexpected reply. "Even if I am a liar I guess I've got a right to be sensitive about it, ain't I?"

Looks Like a Frameup.

Edith—Did you tell him how before you were engaged?

Ethel—Yes; I told him I was going to be engaged—para come along.

"Like the One Lost to Me."

home in another city and live with them as a companion friend, a welcomed guest. There were the children to teach, there would be ample leisure to pursue her activities in ceramic art. And at last Helena had decided to leave the dreary old grounds of life and attempt existence under a new and more promising phase.

"We are going to make you forget the old griefs and troubles, Helena dear," said the Edith spirited lady hopefully—Arnold and I. There is surely a happy, happy place for you here. Modest, but comfortable!" queried the speaker playfully, as she noted a calculating expression in Helena's eye as she took in her surroundings.

"It is a beautiful home, everything is so tasteful," began Helena.

"I see what you are thinking," declared Edith. "You supposed that we were rich. We were, but the last year has changed all that."

"That if you have had money trouble, I shall be a burden to you."

"Why, we want you more than ever just on that account," insisted Edith. "Do there a more helpless person in the world than yourself? Think what you can do for the children! No, no, dear, when we first asked you to come to us Arnold was wealthy. A dishonest partner robbed him of over fifty thousand dollars. But when we made your letter conception of our home Arnold was actually joyous. Don't think of deserting us because we are poor."

So Helena settled down into her new life. New delights came daily within her experience. Mr. Percival was a resourceful man, and, though working for others now, earned a very liberal salary. Edith constantly declared that he was a relief to her away from the old follies of fashion. The care of the children was a boon some joy for Helena.

One day in looking over an album a photograph fell to the floor. Helena noted a slight shadow move across the face of Edith as the happy girl recognized the portrait.

"Who is it?" inquired Helena, and she steadfastly regarded the picture.

"That is Bruce Arlington, my husband's old partner."

Helena sighed. She replaced the photograph but when alone the next day took it away from the album.

"Lost the one lost to me," she summured, "the same ingenuous characteristics, a gleam of good impulses but

WE PAY CASH FOR
MEDICINAL ROOTS, HERBS, LEAVES, BARKS, ETC.
We buy over two hundred different kinds of Medicinal Roots, Herbs, Leaves, Barks, Seeds, Flowers, Etc., for which we pay net cash on arrival.
We make a specialty of Ginseng, Golden Seal Root, Snake Root, Star Root, Star CRASS Root, Beaver, Etc. We pay big cash prices.

DIFFERENCE OF ONE LETTER

Gold-Mine Prospectus Speaks Truth by Accident—John Redmond Learns Of Error.

A printer once made a prospectus for a gold mine speak the truth by accident. It read: "Issue of 100,000 shares at £1 each." The writer meant "shares," of course, but it was truer as it stood.

An Irish paper some time ago, in the course of a long laudatory article on Mr. John Redmond, the highly respected leader of the Nationalist party, stated that the greatest chief Ireland had known since O'Connell." The compositor had lifted a "r" for a "c," that was all. But oh, the difference!

In the days before the Liberal and Tory truce, when party recrimination was rife, the Conservative organ in Dublin was wont to refer to the strangle-hold on the chances of the Liberal party held by the Irish party, and all through a single letter of the alphabet.

The Liberal paper was describing a Tory meeting, and in the course of the proceedings it was stated that the candidate on the platform was greeted by the most uplifted shouts of the entire audience, the ladies making themselves particularly prominent.

"Shouts," the Liberal paper presumed, "shouts of lunatics, even though they be political lunatics, is very unmannerly and the Conservative paper refused to believe its ears when it read that the letter "n" ought to have been "h." It preferred to rub the "snout" of its opponent in the mud.

But probably the climax is reached in the case of the archbishop who was credited with saying "he had been on the drink for a month," when he had only said "brink."—London Answers.

Threshing Them Out.

Mrs. Boardman Harriman sold at a mothers' meeting in Brooklyn:

"I am opposed to parental cruelty. Childhood's spirit should not be crushed. But I am opposed to child spelling, too.

"In short, I believe that, if a man begins to sow wild oats, his parents should begin threshing."

The Delight of Children

The self-developed, inner-flavour of New Post Toasties bear a unique attraction for the kiddies—they even like them dry from the package for their lunches. A box of Toasties provides "eats" that will delight the children.

New Post Toasties are usually served with cream and sugar, in which form the flakes retain their pronounced and the flakes more delicious. These New Toasties do not "chaff" or crumble in the package and they don't mush down in cream—both common defects of old-fashioned "corn flakes."

Then, too, notice the tiny bubbles on the flakes, produced by the quick, intense heat of a new patented process of making which imparts delightful crispness and a substantial body to the flakes.

New Post Toasties are a vast improvement over any old-style "corn flakes."

For tomorrow's breakfast—

SYNOPSIS.

—o—

Peter Knight, famous for political offices he has been decline to venture Mme. Lorelei, famous for her beauty, but fight benefit by the scandal rage of his attending daughter, Lorelei. A well-down order interrupts Lorelei's rehearsal of the stage beauty with Bergman's Barcelona Nights orchestra playing the music. Author Jeffries, Lorelei's admirer, and Hammon, the press agent, later adds his information.

"There is a lesson here for the small town girl who thinks she has a call to go on the stage. Too many pretty lasses from the country meet a bad fate in the sordid life of the city and too little success is bought at the price of sorrow.

CHAPTER II—Continued.

"His mother's son. Need we say more? He's a great help to the family for he keeps 'em from getting too rowdy about Lorelei. He acts introductions to his sister."

Campbell Fopp's exclamation was lost in a babble of voices as a bevy of "fellowing Girls" descended from the exhibition frigates above and emerged out upon the stage. Through the double curtain they could see a dazzling rabbit beard; a voice was crying, "Pizzen!"

"Some Soul Kissers with this troupe, eh?" remarked Hammon, when the assumption of pizzen had ceased.

"Yes, Bergman has made a fortune out of it, all! The original of the friend to the 'Tired Business Man.'"

"Speaking of the weary Wall street workers, Bergman's orchestra is a brilliant winner at the Hammon supper singlers."

"Tell me, is Lorelei Knight a regular politician? Is she very womanish?" "Rose. It's part of the graft."

"I get."

"She has to piece out her salary like the other girls. Why, her whole family is angled her neck—my—her brother and father. Old man Knight was run over by a taxicab last summer. He didn't hurt the machine, but he's got a broken back or something. You know Jeffries, the funny? He's a mine mind him by the way. I never heard of Lorelei's family before. They're bad."

For the moment Campbell Fopp made no reply. Meanwhile a great wave of singing flooded the regions at the back of the theater as the curtain rose and the chorus broke into sunbeams. When he did speak it was with unusual bitterness.

"It's the refinest business in the world, Hammon. Two years ago she was a country girl; now she's a refined way belle. How long will she last d'you think?"

"She's too beautiful to last long," agreed the press agent, soberly, "especially with a big, generous heart in her trail. But her danger isn't so much from the men as from the women. The people she sets with. That family of hers would drive any girl to the bottle. They intend to cash in on her; the mother says so."

"And they will, too. She can have her choice of the wealthy reminders."

"They've got me wrong." Simeon has publicity pleased her. In due course rival managers began to make offers, when they thought, from some of the first test of her business ability, used as levers to raise her salaries already and to pry out of Bergman a five-year contract. The role of the Fairy Princess was a result.

Lorelei had arrived at the point where further advancement depended upon study and hard work; but, alas, she never looked down, showing bits teeth in a grin that was not of pleasure.

"You like it?" he asked.

"It's beautiful, but—the extravagance is almost criminal."

"Don't tell me how many starving newsboys or how many poor families the cost of this supper would support for a year. I hate poor people. Now for the chance—and the humming bird tongues. No doubt there's a pearl in every wineglass. I'm sure to have your palate tickled with a feather when your appetite begins."

"That's what the Romans did, isn't they?"

"Are you a student as well as an artist, Miss Knight?"

"I thought you were going to be polite, Hammon. Why, of course I'm! Lorelei was stuttering fiercely. "I'm a regular bee! I'm a regular bee, Mr.—" They had found their places at the table by chance. Lorelei was nesting her. "I didn't catch your name when we were introduced."

"Hammon," he said, leaning beside her. "It sounded like Rice Curry when you first said it. I'm a bee, too, Lorelei—Mr. T. Merkle."

"Ah! You're a banker. Aren't you pretty rude to be discussing your rank as it vores?"

"Not a banker; also an invalid and an insomniac. You couldn't bring me any more trouble than I have!" Again he looked toward Hammon, and this time he frowned. "Press indications I'll soon be rare company, however."

"Indeed! Is there talk of a divorce?" She noticed her head in the host's direction.

Merkle entered ardently: "My dear child, don't try to act the ingenue. You're in the same shoes as Miss Lynn. Why, everybody knows what's going on. This sort of thing can't continue indefinitely. For Mrs. Hammon's sake I pray it will be soon. Nothing of her daughters. Let's be natural, at least. I have to sleep lively, and I'm not particularly good to be polite."

"Well, I'm sorry, I'll try to be as disagreeable as you are," said Lorelei, and Mr. Merkle signified his prompt acquiescence. He is a huge person, groomed cigarette pushed aside his plate of hors d'oeuvres, and reluctantly turned down his array of wineglasses one by one.

"Can't eat, can't drink, can't sleep," he complained. "Several prines and ever for my portion. Water, bring me a bottle of vichy, and when it's gone bring me another."

The dinner had arranged themselves, and the conversation was left to Jeffries spirit percolated; the ardor of the guest, isolated on by loneliness, gentry and aniline, rose quickly; wine flowed, and a general intimacy began. Introductions were no longer necessary, the talk flew back and forth behind the rim of Bergman's famous cocktails.

Lorelei turned from the men on her left, who had received her with an endless story, the point of which had escaped her in blessed if laughter, and said to John Merkle:

"I'm glad I've met you tonight. I don't like drinking men."

"This is girl in a new position affirm preferences?" he inquired, tartly. Thus far the banker had fully lived up to his reputation.

"All women are extravagant, with preferences, even if I can't afford them. If you were a tippler instead of a man groom I could tell you precisely how you'd act and what you'd talk about. I'd do it if I had to teach you to dance."

Mr. Merkle grunted, "So would I—to shoot myself cruelly. "You are, we're both unpleasant people."

Merkle mellowed in silence while, after attacked her food with a healthy youthful appetite that awoke his envy. "I suppose you see a lot of life and of thing?" he at length suggested.

"There's something of the kind nearly every night. This party isn't as bad as some, for the very reason that most of the men are from out of town, and it's a bit of a novelty to them. But there's a crowd of regular New Yorkers—the younger ones—about town, who are jaded and blasé. I'm accepted one invitation from them. It was quite enough.

"I've traveled some," observed Merkle, "but this city is getting to be too much for me."

She nodded her timber head. "There's more Paris, after all, and Paris is New York."

The meal grew noisier; the orchestra intermingled accordion melodies from the popular successes with the Spanish numbers, airs that had set the city to singing. Sliced footed at tendants dominated time—every eyes were fixed on the guests. There was a flutter of excitement as the women began to examine their favors.

"What is it?" Merkle inquired, leaning toward Lorelei.

"The new addledingy purse. See? It's very French! Good things—and a coin purse and card case inside. See the monogram? Lilas picked those out for Mr. Hammon, and they're equal size. We share the same dressing room, you know."

Merkle regarded her with a sudden new interest.

"Then—I dare say you're close friends?"

"Were close enough—in that room, but scarcely friends. What did you get?"

"A gold safety razor—evidently warning not to play with edged tools. I wonder if Miss Lynn bought one for Jarvis?"

"No, why did you say that," Lorelei asked quickly, "and why did you ask in that peculiar tone if she and I were friends?"

The man leaned closer, saying in a voice that did not carry above the clamor:

"I suppose you know she's making a fool of him! I suppose you realize what it means when a woman of her stamp gets a man with money in her power! You must know all there is to know from the outside. If everyone

"I Suppose You Know She's Making a Fool of Him."

to me that you might also know something about the inside of the affair. Well, I'm afraid not. All I've heard is the common gossip.

"There's a good deal here that doesn't show on the surface. That Hammon is a fine man, a generous people, of whom I happen to be one.

"You speak as if he were a designing one character, and as if she had deliberately entangled him." Lorelei said tartly. "As a matter of fact she did nothing of the sort; she avoided him as long as she could. He pursued, he persecuted her until she was forced to accept him. Men of his wealth can do anything, you know."

"Who had scruples?"

"No more than the rest of us, I presume. She gave her consent finally—for the reason he annoyed her; but he was so in love with her he couldn't help it. He sent for her one evening, and when she went down there was Mr. Hammon, too. When she came upstairs she was hysterical. She cried and begged and pretended she was faint.

"Curious," murmured the man, staring at the object of their controversy. "What did she say?"

"Oh, nothing connected. She called him every kind of a monster, screamed that she'd never forgive him, and—"

"Murder?" The banker started.

"He had made a long spurt to Fifth Avenue, and his position affirm preferences." he inquired, tartly. Thus far the banker had fully lived up to his reputation.

"All women are extravagant, with preferences, even if I can't afford them. If you were a tippler instead of a man groom I could tell you precisely how you'd act and what you'd talk about. I'd do it if I had to teach you to dance."

Mr. Merkle grunted, "So would I—to shoot myself cruelly. "You are, we're both unpleasant people."

Merkle mellowed in silence while, after attacked her food with a healthy youthful appetite that awoke his envy. "I suppose you see a lot of life and of thing?" he at length suggested.

"There's something of the kind nearly every night. This party isn't as bad as some, for the very reason that most of the men are from out of town, and it's a bit of a novelty to them. But there's a crowd of regular New Yorkers—the younger ones—about town, who are jaded and blasé. I'm accepted one invitation from them. It was quite enough.

"I've traveled some," observed Merkle, "but this city is getting to be too much for me."

She nodded her timber head. "There's more Paris, after all, and Paris is New York."

The meal grew noisier; the orchestra intermingled accordion melodies from the popular successes with the Spanish numbers, airs that had set the city to singing. Sliced footed attendants dominated time—every eyes were fixed on the guests. There was a flutter of excitement as the women began to examine their favors.

"What is it?" Merkle inquired, leaning toward Lorelei.

"The new addledingy purse. See? It's very French! Good things—and a coin purse and card case inside. See the monogram? Lilas picked those out for Mr. Hammon, and they're equal size. We share the same dressing room, you know."

Merkle regarded her with a sudden new interest.

"Then—I dare say you're close friends?"

"Were close enough—in that room, but scarcely friends. What did you get?"

"A gold safety razor—evidently warning not to play with edged tools. I wonder if Miss Lynn bought one for Jarvis?"

The man leaned closer, saying in a voice that did not carry above the clamor:

"I suppose you know she's making a fool of him! I suppose you realize what it means when a woman of her stamp gets a man with money in her power! You must know all there is to know from the outside. If everyone

"You'll Pardon Us for Whispering, Won't You?"

noed to quality. "She's square: undecorated."

"Of course: object matrimony." It's the old story, and her mother will see to the rest. Her mother's a terrible. But what's the difference, after all, Hammon? It'll be bad for her, and a pity to the highest bidder, either way."

CHAPTER III.

In his summary of Lorelei's present life Simeon had not been far wrong. Many changes had come to the Knights during the past two years—changes of habit, of thought and of outlook; the entire type of life was necessary to alter their system of living. But it was in the girl that the change showed most. When Mrs. Knight had forced an immediate success for her daughter she had spoken with the wisdom of a Cassandra. Moreover, she took naturally to the work, finding it more like play; and, being quite free from girlish timidity, she felt no stage fright, even upon her first appearance on a vaudeville stage. Her success was impossible in bible and her profession of loveliness as here—and the

"Pour Me Some Champagne, Please."

"Pour Me Some Champagne, Please." Mme. Mme. Knight's voice was compelling and stamped him as a man of breeding. Jeffries was a little fully he pitched Lilas' cheek, then turned with a smile to say:

"Pour me some champagne, please, too."

"Sure it's true," said the accuser, "I called him a liar because he is one, and I can prove it."

"What have you to say to that?" asked the judge of the defendant.

"It's not nothing to do with the case, your honor," was the unexpected reply. "Even if I am a liar I guess I've got a right to be sensitive about it, ain't I?"

Looks Like a Frameup.

Edith—Did you tell him how before you were engaged?

Ethel—Yes; that's how we happen to be engaged—para come along.

BAKER ORDERS MILITIA RUSHED TO AID FUNSTON

Major General Wood Receives Urgent Appeal to Send Troops to the Border.

SEVERAL STATES GET CALL

Illinois Regiments Notified and May Leave Springfield at Once—Medical Examinations Waived in New York.

Washington, June 26.—Unofficial reports reached here that General Funston's units from Texas eliminated by the with a Carranza army, if a late fray this month not be continued.

New York, June 26.—Maj. Gen. Leonard Wood, commander of the department of the East, received from Secretary of War Baker an urgent request to start for the border at once some of the militia organizations under his jurisdiction.

The emergency was considered so important, it was said at Governor's Island, that medical examination of the men would be waived. It was indicated that some of the state troops in the East would entrain today.

The first New York organization to leave, it is said, will be the Seventh, Seventy-first and Sixty-ninth Infantry, the Twenty-second Infantry of engineers and squadron A.

Other Troops to Go

The troops of Massachusetts, New Jersey and Connecticut will start south with in 24 hours, it was announced. The guardsmen of Maine, Vermont, Delaware, District of Columbia, West Virginia and Rhode Island start for the border as soon as necessary equipment is received.

An important wire the message from Secretary Baker considered at General Wood's headquarters that the telegraph was abandoned as a means of communication, and officers of his staff used the telephone to get into touch with the various state commanders and impress upon them the importance of speedy action.

Illinois Troops May Leave

Chicago, June 26.—Illinois regiments may leave Springfield today for the border.

Orders from the war department were received by Gen. Thomas H. Barry, U. S. A., urging him to rush all available troops to the frontier at the earliest possible moment.

Colorado Gets Call

Denver, Colo., June 26.—Orders directing the movement of units of the Colorado National Guard to the Mexican border as fast as they can be mustered into the federal service were received by Adjt. Gen. H. P. Gamble.

Will Entrain Tonight.

Nevada, Mo., June 26.—In order to entrain units of the Missouri National Guard as rapidly as possible was received here today from Adjt. Gen. Clark. The First infantry will be entrained tonight.

Coast Gunners Shifted.

San Diego, Cal., June 26.—Two companies of coast artillery from San Francisco have been ordered to San Diego to patrol the border.

OUTLINE OF CARRANZA'S NOTE

Chief Says Punitive Troops Make Situation Hopeless.

El Paso, Tex., June 26.—Carranza's reply to Lansing's note, sent before the president's ultimatum, will deal mainly with the old protest against the presence of American troops in Mexican territory, according to a telegram from Mexico City, published in the El Paso del Norte, a local Spanish organ.

The dispatch states, on the authority of persons close to the government, that he makes no quarrel or granted Lansing's assertion that the American government desires neither war nor intervention, if with then denote insist to the punitive expedition.

The Carranza government will show with facts and arguments, the dispatch continues, "that the presence of American troops in Mexico is making the situation worse and worse and increasing the difficulties of the de facto government's campaign against bandits."

FLYERS TAKE OATH TODAY

National Guard Aviators to Be Mustered Into the Federal Service.

Washington, June 26.—All National Guard aviators were notified that member officers will be ready to swear them into service in the United States flying corps at the various concentration camps today. A training course of 48 hours is expected to fit the aviators for service.

STOP MUNITIONS TO MEXICO

Two Million Rounds Sent to U. S. Supply Stores.

Laredo, Tex., June 26.—Two million rounds of ammunition consigned to Carranza military authorities in the interior of Mexico, and recently confiscated by United States officials, were sent by special train to the government supply stores at San Antonio.

WILL MY CHILD TAKE DR. KING'S NEW DISCOVERY?

The best answer is Dr. King's New Discovery itself. Its a pleasant sweet syrup, easy to take. It contains the medicines which years of experience have proven best for coughs and colds. Those who have used Dr. King's New Discovery longest are its best friends. Session every bottle is guaranteed. If you don't get satisfaction you get your money back. Buy a bottle, use as directed. Keep what is left for Cough and Cold insurance.

COUNCIL PROCEEDINGS

Council Chambers, June 23, 1916.

The common council for the city of Charlevoix met in regular adjourned session on the above date, Mayor Row presiding. Aldermen present: Paddock, Cartier, Hiller, and Benton.

Absent: Sim and Gelken.

Board of Assessors: E. F. Sloan, D. F. Meech and Chas. J. Zeitler. Absent: None.

Ald. Cartier, seconded by Ald. Hiller, moved the adoption of the following resolution.

Bridge Street Paving, South Terrace Paving District No. 18.

Resolved by the common council of the city of Charlevoix that the roll of special assessments for the improvement of Bridge street in said city, as reported by the board of assessors, be and hereby is approved and confirmed as the roll of special assessments against the property in the city of Charlevoix benefited by the improvement of Bridge street, as platted and recorded in said city, and as ordered by the common council of said city, and that said roll of special assessments be and hereby is made and established a lien upon the respective lots and parcels of land therein mentioned and described, and the amount to be paid and borne by the respective lots and parcels of land therein mentioned and described, and the amount to be paid and borne by the city of Charlevoix as set forth and shown in said roll of special assessments, and that said roll of special assessments, as so established, shall be payable in twenty equal installments, one of which shall be payable each year commencing the 23rd day of June, A. D. 1916, and each subsequent year thereafter, and that said installments be collected with and in the same manner as the general city taxes are collected, and that the entire balance of said installments be collected with and in the same manner as the general city taxes for the year 1916 are collected, and that said installments shall bear interest at the rate of five per cent per annum, payable with and at the same time and in the same manner as the general city taxes are paid, and that said installments be collected with and in the same manner as the general city taxes are collected, one of which shall be payable each year commencing the 23rd day of June, A. D. 1916, and each subsequent year thereafter, and that said interest be collected with and in the same manner as the general city taxes are collected, and that said installments be collected with and in the same manner as the general city taxes are collected, and that said installments be collected with and in the same manner as the general city taxes are collected, and that said installments

Where They Haggle With Uncle Sam

Huge sums involved in suits brought against the government in the court of claims at Washington.

THERE is a government firing line where firing is almost constantly going on. No blood is spilled, but interest is intense always. For it is shooting for money—big money. Long shots prevail.

It is in a queer place for a firing line—in a former art gallery, in other words the old abode of the Corcoran gallery, Seventeenth street and Pennsylvania avenue, Washington, D. C., now housing the United States court of claims; and there nearly every day of the court's sessions counsel confronts some a half-nave and thereby win for themselves and their clients coin of the realm in sums all the way from a few thousands to many millions of dollars. It is a mighty absorbing and always alluring game, because, as a rule, the stakes are high. Competitors are numerous because, if a bit is made, the pay is sure.

At the present writing some ninety-nine millions (to fresh crisply notes of Uncle Sam worth 100 per cent if cash 100 cents) are involved. That is cases are now pending in the court of claims calling for $99,999,115.79.

A judgment by the court of claims, unless reversed by the United States Supreme court, is as good as cash. It follows that the price of prizes in legal circles today is some sort of a fairly well-substantiated claim against the United States government. In numerable such claims are discovered and made. The cases now pending number more than ten thousand.

Needless to say if all or any considerable part of this ninety-nine million dollars is paid it will come out of the United States treasury—i. e., out of the pockets of the people of the United States. Therefore on this firing line the people have their representatives, the same consisting of a numerous staff of attorneys retained upon salaries by Uncle Sam. Nominally their chief is the attorney general, but the attorney general in person is pressed with other matters, the enforcement and enforcement of the greater laws, particularly his antitrust laws. He has very little time to devote to "routine."

The gentleman in actual charge, therefore, is the "assistant attorney general in charge of the defense of suits against the United States." Under the present administration this gentleman is Mr. Huston Thompson of Denver, Colo., former classmate at Princeton of President Wilson. Mr. Thompson holds one of the many big salaried jobs in the government service.

This Denver man, the recent show, has injected western hustle into his job. When he came into the office he found the docket of the court of claims cluttered up with some twenty-odd thousand cases. Now the total is 10,500 cases.

The claims ran all the way from a few thousand dollars into the millions. They originate for the most part in the numerous contracts made by all departments of the government for the building of battleships, cruisers, and other vessels; the erection of public buildings, dredging and improvement of rivers and harbors; the building and maintenance of dams, locks, and spillways; reclamation projects; construction of dry docks; contracts for army supplies; contracts with mail contractors and railroads for carrying mails; claims for the alleged use and infringement of patented devices; and suits where it is contended that an implied contract exists.

In almost the specified "Division case" is the largest. The railroads are attacking the validity of an executive order issued in 1907, which bases compensation for carrying the mails upon a division of the total weight by seven rather than by six. The contention that a seventh was rather than a sixth week was meant in the statute covering railway mail pay. If the government loses this case it must pay to the railroads over $40,000,000.

One of the largest dams in the world has produced one of the biggest law suits in the world. As is shown by the accompanying picture, this dam is a bigger proposition, as far as height goes, than the United States capitol building with its enormous dome. At Washington, D. C., it is the dam which stores water for the Shoshone irrigation project in Wyoming.

The contractors are endeavoring to collect more than $600,000 in addition to the $1,239,000 allowed under the terms of the contract as interpreted by the United States reclamation service. The original contract was let to bankrupts after the first year's work on the job and the bonding company behind the contractors took over the contract. An unprecedented spring flood in the Shoshone river, accompanied by a run of saw logs from a mill upstream a mile or so above the site of the dam, washed out the temporary works which had been erected preparatory to the construction of the present concrete dam.

It is also alleged that the government made requirements not specified in the terms of the original contract which necessitated the removal of the foundation of the dam 12 feet downstream. It is sought to fasten on the government responsibility for the cost of such logs and it is contended that the requirements of the government engineers were unusual and unnecessarily strict.

The contentions of the United States, on the other hand, are that neither contractor appreciated the peculiar difficulties of the work undertaken; that the plant and material brought on the ground for the performance of the work was conspicuously inadequate; that the engineers employed by the contractors were incompetent and inefficient and insufficiently trained and experience for the undertaking of such a work; and, in short, that all of the difficulties encountered grew out of the negligence, inefficiency and improper methods of the contractor.

Too claims growing out of naval matters are numerous and large. There is a device used in manufacturing torpedoes which is known as a "superheater." It is a contrivance whereby fuel is burned in the compressed air driving the motor by which the torpedo is propelled, so that the company that is heated to a high pressure before its energy is utilized. Its use increases the speed and range of torpedoes.

The question now is whether the United States must pay the E. W. Bliss company $500 per torpedo purchased by the United States during the last five years containing this device. The total amount at issue is $225,000. It is an intricate patent case, the decision of which depends upon whether patents held by the Bliss company cover the type of "superheater" used in the American torpedo.

Litigation over sixteen years old involves the question whether the United States government must congress more than $240,000 in addition to the million already paid for the government dry dock at the League Island Navy yard, Philadelphia. The contractor claims he was compelled to make a much greater excavation than was specified in the terms of the contract covering the work. The answer of the government is that the contractor did not follow the method recommended by the board of naval engineers, which had studied the matter, and hence was himself responsible and liable for the extra cost.

The court of claims has sustained the contractor and the department of justice is now asking the Supreme court to overrule the court of claims.

Whatever the government may have to pay for generosity is valued at astonishingly high figures.

A submarine case involves $400,000. It hinges upon a string of patents on buoyancy-regulating apparatus for submarine boats. The Electric Boat company is back of the case. It claims "that the invention described and claimed in said several letters patent, and each of them, are and have been recognized to be of great utility and value in the construction and operation of submarine boats." The original inventor, Lawrence Y. Spear, assigned his rights to the Submarine Boat company. It is carefully pointed out that "Spear was the original, first and sole inventor of the improvements," and it is then declared that the United States has used the inventions without license and has neglected and refused to pay royalty. About the right thing for Uncle Sam to do, it is alleged, is to pay the Electric Boat company, $100,000 per submarine boat containing the Spear apparatus. At the date of the filing of the brief, December 15, 1915, four such boats were in use. The company, however, involves a demand for another $100,000, for each boat built subsequently by the United States in which the inventions are used.

Land-grant railroads, under the terms of their charters, are required to carry troops of the United States free. The question has now come up as to whether the National Guard when transported to the annual maneuvers in various parts of the United States "are troops of the United States." As the test case stands the Southern railroad asks for $2,447.50 for the payment of railway fares for the transportation of officers and men of the Alabama National Guard and the Mississippi National Guard from points in Alabama and Mississippi to the United States military post and camp at Chickamauga Park, Georgia, in 1908 and 1910. When finally disposed of, however, a much larger amount will be involved. It will set a precedent under which, if the Southern railroad is successful, other of the land-grant railroads will come into court and ask pay for transporting the militia.

The established practice of the war and treasury departments is that the organized militia when participating with the regular army at a military troop or joint maneuvers and field instructions are entitled to the pay, subsistence and transportation allowances of the officers and men of the regular army; that said organized troops when so transported are traveling under orders of the war department, and payment for their transportation can only be made on the same basis applicable to the regular troops. This would mean that transportation for militia over land-grant railroads would be subject to the land-grant deductions made for the transportation of regulars. It is held that the expression, "troops of the United States," as used in land-grant acts is sufficiently broad to include organized militia when traveling under the orders of the war department.

The court of claims has already held that the members of the National Guard do not become "troops of the United States" until they are called out and mustered into the service by the president. Here, this court has declared that the Southern railroad ought to be paid the extra $7,447.50. The matter is now before the court of justice demurred and is now asking the Supreme court to overrule of the case.

That little vest-pocket stamp book, with a dozen stamps in it, cost the government a deal of money in suits in which Uncle Sam is sake" to pay more than $1,000,000 damages. It is declared to be worth also the patentee of the stamp book.

The case goes back to 1898. In that year, through Senator Penrose, two models of a stamp book patented by Frank C. Farnham, together with a printed pamphlet explanatory of the device, were referred to the then third assistant postmaster general. John A. Merritt was third assistant at the time and reported that the proposed device "is inexpedient to sell postage stamps in the way suggested. However, after July 1, 1898, the then third assistant postmaster general, Edwin C. Madden, designed without knowledge of the existence of the Farnham patent a stamp book which was used by the department. The bureau of engraving and printing, the Washington, D. C., manufacture and the post office department began the publication of a twenty-cent stamp book.

Farnham wants the alleged profits of the government on the sale of the stamp books during the twenty-year period from 1898 to 1918, the statements sells 12 twenty-cent stamps for a quarter, charging one cent for the book. The contention is that the profits on the sale of the books during the ten years have exceeded a million dollars.

Farnham's attorneys have appealed to the Supreme court, where a final decision is now expected.

Another interesting case is that brought by the contractor who constructed lock and dam No. 37, Ohio river, which cost, approximately, $1,250,000. The contractor wants an additional $147,000.

This lock and dam is located about ten miles below Cincinnati and at the time of its completion is about five years ago was the largest "movable, adjustable dam in the world." It is the largest in the world, being 600 feet across the navigable pass alone, with the lock on the Ohio side and three bear trees each 50 feet wide on the Kentucky side of the river. A bear trap consists of two concrete piers or walls with wooden shutters at each end hinged to the bottom of the dam structure.

The shutters may be raised or lowered for the purpose of allowing surplus water to escape, thus obviating the continual raising and lowering of the dam proper in the navigable pass. The dam is movable in that its construction is of chanelon wire, which consist of cylinders about 15 feet high and 3 feet wide, and are upon hinges submerged in water and are embedded in the concrete foundation extending to bedrock. When the cylinders are water filled, the structure in the navigation pass resembles a high board fence, and vessels then pass through the lock, and when the river rises sufficiently they are lowered and boats pass right over them. The suit grows out of the alleged misrepresentation by the government of the depth to which the contractor would have to excavate to bedrock.

The contractor claims he was misled by the government's representations that the rock would be found at a depth of 50 feet above the surface by which time the contractor would have to excavate to bedrock.

The KITCHEN CABINET

Whether a life is noble or ignoble may be decided by what on the ceiling which is adopted, but no one knows what is to be followed.—Sir John Lubbock.

CHOICE PUDDING SAUCES.

The same attention should be given to the preparation of pudding sauces as is given to meat sauces, as well as the proper sauce to serve with each pudding.

German Sauce.—Boil together one cupful of sugar and a half cupful of water for 15 minutes. Then whisk into it the beaten yolks of three eggs and continue beating over hot water until thick. Add a tablespoonful of butter, one of vanilla, and the stiffly beaten whites of three eggs. Stir over the boiling water three or four minutes until the eggs are cooked. The vanilla should be added after the sauce is cooked. If other flavors, like cocoanut, or fruit juice of various kinds, are added, it is not so important when it is added.

Opera Sauce.—Cream a fourth of a cupful of softened butter with a cupful and a fourth of light yellow sugar. Add slowly as much cream as it will take without curdling. Flavor to taste.

Current Jelly Sauce.—Heat a cupful of double cream until thick; add currant jelly till a light pink is color.

Brown Sugar Sauce.—Take a cupful and a half of medium brown sugar, add a pint of boiling water and a tablespoonful of cornstarch; boil ten minutes. Just before serving add a little of a teaspoonful of butter and a grating of nutmeg.

Creamy Sauce.—Cream two tablespoonfuls of butter with a cupful of powdered sugar. Add a tablespoonful of vanilla or any desired flavor and two tablespoonfuls of cream, beating well. More cream can be added if it is not soft enough to drop easily from a spoon.

Orange Sauce.—Heat four yolks with a tablespoonful of powdered sugar, a cupful of cream and the grated rind of an orange. Cook like custard until smooth; strain and serve with a fruit salad.

Chocolate Sauce.—Boil together for five minutes a half cupful each of sugar and water. Cool the syrup before stirring in four ounces of chocolate, melted. Add a half teaspoonful of vanilla or a pinch of cinnamon. Stand in a pan of hot water, and when ready to serve add a half cupful of thin cream.

Every good and commendable movement, in the annals of the world is the triumph of enthusiasm. Nothing great was ever accomplished without it.—R. W. Emerson.

The most wasted of all days is that on which one has not laughted.—Chamfort.

GARNISHES FOR SOUP.

The garnishes for soup will often make an otherwise common soup quite out of the ordinary.

Marrow Balls.—Take a tablespoonful of finely cut marrow, three tablespoonfuls of fine bread crumbs, a teaspoonful of chopped parsley, salt and pepper to taste. Work to a smooth paste, adding a little raw egg if needed to make it smooth. Form in balls the size of a filbert, drop into the boiling soup and let simmer fifteen minutes.

Spinach Balls.—Take an equal bulk of finely chopped cooked spinach and very fine bread crumbs. Season and bind with raw egg. Add enough egg white to moisten, then let stand for half an hour. Form in balls the size of hickory nut; poach in the hot soup for five minutes and serve four to each plate.

Forcemeat Balls.—Scrape enough lean veal or chicken to make a half pound. Soak half a cupful of bread crumbs, free from crust, in milk, when soft squeeze dry; add two tablespoonfuls of butter, the scraped meat and the yolks of two eggs, pound the whole smooth and force through a coarse sieve. Season with salt, pepper and nutmeg. Form between two teaspoons into almond shaped balls, cook about five minutes in stock that just simmers.

Ham may be used as above, with parsley and onion juice, leaving out the salt and nutmeg. Pound to a paste and to half a cupful of meat add Shape into large balls and cook in stock. They should be as light as a sponge and may be served with any soup.

Who is the happiest of men? He who values the merits of others, and in their pleasure takes joy, even as though it were his own.—Goethe.

DELICIOUS CAKE FILLINGS.

An ordinary cupcake or a plain, cheap, simple cake recipe may be so varied by frostings and fillings that it is always different.

Pineapple Filling—Take a tablespoonful of gelatin dissolved in a little pineapple juice and a half cupful of grated pineapple and enough lemon to make it pleasantly tart; add very stiff boiled frosting to bake sufficient quantity of icing, and filling.

Orange Filling—This is especially delicious with any white cake, but is a great favorite as a filling for chocolate cake. Grate the rind of an orange as well as the juice, put into a bowl with the cup with water, cook two tablespoonfuls of cornstarch, a pinch of salt, the yolks of two eggs and a half cup of sugar. Add sugar. Add a teaspoonful of butter and a little lemon juice. Cool before using on cake.

Jelly Filling.—Take a cupful of seeded raisins, a half pound of blanched almonds, a half pound of figs, the same amount of dates, the juice of a pound of citron. Put these twice through the meat chopper and add enough boiling frosting to make a soft mass.

Plain Chocolate Icing and Filling.—Melt two ounces of chocolate over hot water and when it is quite smooth, add a half cupful of milk and a teaspoonful of butter; cook until it makes a soft ball in cold water. Cool, add a little cinnamon and stir until thick enough to spread. Add a little while the cake is warm.

Maple filling is delicious, using maple sugar for the sirup and beating it as any boiled frosting.

Nellie Maxwell

Good to Remember.

Every young man should remember that he becomes is just a little above expenses every day, he will eventually become well off. If his receipts daily lack a little of meeting his expenditures, he will in time become a candidate for public favors at the poorhouse. Honest work at any calling is honorable; while idleness and apeldrift habits are a disgrace to anyone, young or old.—New Canaan (Conn.) Advertiser.

The Best Kind.

When a man has established a reputation for honesty and integrity, he can't do better than to go on endeavor to be a good citizen and to support his family in comfort, and be a good neighbor, and the community in which he lives is better for his having lived in it, he represents the very best society to be found on earth.

Be a Good Spender.

"Blow it!" seems to be the modern idea.—Kansas City Journal.

Some Achievements.

There's nothing wonderful in the story of the boy who learned basic who became an expert penman. Similar instances are legion in the intellectual world are started by men who have lost their heads.

Too Much to Expect.

"That boy promised he wouldn't steal a pin," said Mr. Goode. "I never thought much of his pin test," answered Mr. Cayenne. "Try him with an umbrella."—Stray Stories.

Putting It Strongly.

Eddie was fond of his sister's friend. One day at lunch there was a pudding of which he was fond. He had one serving and saw there was enough for another, but he was afraid some one else might want it. After asking each one individually and finding no one wanted it, he swept all with a glance, saying "Wouldn't you eat it if I was dead?"

Diggers of Anthracite.

In an article in World's Work on the situation in the anthracite coal regions Guy W. McConnell explains that during recent years the old type of coal miner from Great Britain and Germany has disappeared out of the mines and that, "driven into field places by the extreme and peculiar hardness of the seams, they gouge the crust of the earth, have come hordes upon hordes of racial types more physically fit to fight off the rheumatism lurking in the "hole" of a wet chamber and less susceptible to the prevalent miner's asthma and forms of tuberculosis. These are the peasantry of southeastern Europe, Hungary and Poland. They are the rank and file of the anthracite field where general conditions have grown steadily worse." said President White of the United Mine Workers of America the other day. "Being to the increase of 17 per cent in the cost of living during the last few years, many of our men are in debt to the landlord and installment houses, the dollar has signified to keep wife and six in school, substituting on oatmeal three times a day. Families are frequently forced to live three and four in one house."

At the Opera.

Her father the performance—What did you think of the great tenor?

Her—I think less of him than I do of the "tenor." I had to give up for our seats.

Give a man a good dinner and it takes the edge of his criticism.

A Sensible Thing To Do

When the drug, caffeine—the active principle in coffee—shows in headache, nervousness, sleeplessness, jumpy heart, and so on, the sensible thing to do is to quit the coffee.

It's easy, having at hand the delicious pure food-drink

Instant Postum

It is made from wheat roasted with a bit of wholesome molasses and is free from any harmful substance.

Thousands who prefer to protect their health, use Postum with comfort and delight.

Made in the cup—instantly—with hot water. Convenient, nourishing, satisfying.

"There's a Reason" for POSTUM

Caldwell's Theory

By HAROLD CARTER

(Copyright, 1916, by W. G. Chapman.)

"I tell you," insisted Caldwell at the club, "there isn't a man in business or professional life who can't be blackmailed. If he's approached the right way. Everyone has done something which he prays will never come to light."

"I repeat that I don't believe you," retorted Simpson. "Human nature is better than you imagine. Now take Clay. Do you suppose anybody could blackmail Clay?"

"What, the multimillionaire?" inquired Caldwell. "How do you suppose he got his millions? How did he come to command the money market? Of course he can be blackmailed. It may be he cheated a partner once, or he may simply have stolen a secret from his lucidity. He had to get his start, didn't he?"

"Saved it," said Simpson.

"Bah!" retorted Caldwell.

"Did you ever hear the story of the joker who sent a wire to the bishop, 'Fly at once! All is discovered?' asked Caldwell, warming to his subject. "Bishop disappeared. And that's a fact."

"Well, why don't you get ten thousand out of Clay?" asked Simpson caustically.

Ten thousand?" retorted Caldwell with a withering look. "Make it ten and. Yes, I'll do it."

A bet was made, and four days later James Clay, manager of Wall street, was with pursed brows reading a letter which had come to his private residence and was marked "Strictly Personal."

"If you remember a certain episode in Bowville, a number of years ago, and want to forget it, you are advised to pay fifty thousand dollars to the nonendorsed," the letter ran. "Put in advertise your willingness in the personal column of the Clarion."

Clay came from Bowville. It seemed, therefore, a safe proposition. If Clay had swindled somebody, he had done it there, where he had been in business for five years before moving to the metropolis, many years before.

The next morning Clay was wan during the day. Everyone has done something which he prays will never come to light." "I repeat that I don't believe you," retorted Simpson. "Human nature is better than you imagine. Now take Clay. Do you suppose anybody could blackmail Clay?"

"What, the multimillionaire?" inquired Caldwell. "How do you suppose he got his millions? How did he come to command the money market? Of course he can be blackmailed. It may be he cheated a partner once, or he may simply have stolen a secret from his lucidity. He had to get his start, didn't he?"

"Saved it," said Simpson.

LOCAL AND PERSONAL

Percy Crane, of Chicago, spent the 4th here with his parents.

Mrs. W. H. Carter, of Chicago, is here for a few weeks' visit.

Mrs. M. Lamphear, of Flint, arrived Saturday for a short visit.

At the home of W. A. Cline, in Chicago, a son has arrived.

Angus Campbell, of Flint, a cousin of Mason Rose, is here for the summer.

Nat Barns has added an auto truck to his city dray line.

Mrs. Geo. Myler, of Detroit, is the guest of her mother, Mrs. Louis Mercier.

Mrs. Robert O'Neill has her flower booth open again at the old stand, and reports business opening good.

A letter from our good friend James Perry, dated Haverhill, Mass., states that he is well.

Mrs. Frank Metcalf, who has been at Iron Mountain visiting her sister for several weeks, returned home Saturday.

W. C. Kerr and wife, of Russell, Manitoba, are the guests this week of Wm. J. Ferguson, nephew of Mr. Ferguson.

Miss Jane, daughter of Mr. and Mrs. John Mitchell, is here for her summer vacation. Miss Mitchell is a Detroit teacher.

The Hotel Charlevoix and Hotel Michigan, are both under Bissnat management. The Michigan, formerly Elston, was opened Monday for the summer.

Ed. Chaloupka and wife arrived here Sunday, having made the trip from Oregon in their auto, with no mishaps. They will remain for the summer at least.

Arthur Beattie, who has been in the Petoskey hospital several weeks, recovering from his injuries, returned to his Marion home on Tuesday, in good health and spirit.

Mr. Jesse Gregory, of Marion township, and Miss Jessie Hamlin, of Hayes, were married at the Baptist church Saturday evening, Rev. Vinyard, the pastor, officiating.

The Petoskey Independent after many years as a democrat paper and then an "independent" when the Democrats were hopelessly out of power has now changed to a straight-out Republican paper.

An important business meeting will be held at Christ Episcopal Church on Friday evening, at 7:30. All communicants and others interested in the affairs of the Parish are urgently requested to be present.

A ten cent tea will be served at the home of Mrs. Emmet Coulters, July 12th, for the benefit of the Congregational church. The regular meeting of Ladies Aid of the Congregational church will be held on the same date and at the same place.

Eugene Fry was shot at from the bushes adjoining the railroad track north of town Wednesday morning by some unknown party. The bullett went through his cap grazing his head. A big fat tramp was seen in that vicinity about that time.

Some idea of what Charlevoix's fishing these summer days may be gathered when you grasp the fact that, including the four city carriers, the post office force numbers eleven people. This does not include the R. F. D. carriers or the janitor.

Rev. L. C. Vinyard left Tuesday on the Manitou for Chicago, accompanied by Florence Milner, Wahneta Herrington, Cecil and Frank Poole, and others, to attend the 25th annual convention of the International Baptist Young Peoples Union, July 6-9. Mr. Vinyard will visit his former home at St. Louis for ten days before his return.

When you build a road, don't forget to build the maintenance into the road. In doing this, your first cost will be a little greater, but if you don't do it, your after cost will grow larger and larger every year until at last you have to rebuild the road entirely and then you will discover that your blockheadness better than your foresight by "another" sight.

At a recent session the public domain commission re-elected Ma. William R. Oates, of Marquette, state game warden for a period of three years. John Baird, of Saginaw, was re-elected chief deputy, also for a three-year term. The commission, however, abolished the office of game commissioner at Marquette and ordered all business transacted at the Lansing office hereafter. Mr. Oates reappointed all of his present assistants.

Van Pelt is figuring on the longest apple orchard in the world and it is to be located in Charlevoix County. Further reference will be made to this later. He wants concrete roads built, over which he can carry the fruit, so that it will arrive at its destination in perfect order. At we all know, the nine foot roads now being built soon become only two ruts and a lot of "thank-you-marms" or chuck holes, and transporting over such roads would bruise the apples, thereby reducing their value and injuring the reputation of "Van Pelt's Flavor, Grown in Charlevoix County."

THE BIG FOURTH

IMMENSE CROWD, IDEAL WEATHER, AND EVEREODY HAPPY

Charlevoix scored a big success on its celebration of Independence Day. The weather could not have been better, and the crowd was greater in numbers than ever before gathered here.

The 10 o'clock parade was really an attraction. It embraced floats representing leading business establishments. Now the fishermen supplying one which very correctly typified their calling. The "State Wide" advocates had one of the finest in the parade. But the most striking feature of the day's doings was the tremendous automobile display all day. They supplied a steady stream on both sides of Bridge street, making it somewhat difficult for pedestrians to cross. The big resorters' cars were a display of themselves, but the city cars and the many from the country and from neighboring town constituted a show of themselves. And there were no accidents.

Three bands,—Harbor Springs, East Jordan and Ellsworth—were on duty all day.

The committees which arranged and carried out the program are certainly entitled to much credit. The utmost harmony prevailed—Three drunks jailed but no fights, which in former back door saloon days marred the pleasures of the day.

The celebration was a success.

The city park came in for its share of honors and usefulness. Most of the day it was crowded with picnickers and those who get out of the crowd and the not sun.

RURAL FREE DELIVERY

COUNTRY MAIL CARRIERS OF THE STATE ARE HERE IN LARGE NUMBERS

The State Association of Rural Free Delivery Carriers is in session here as we go to press (Wednesday and Thursday). As we close these columns members are arriving, and an attendance of 200 is expected.

Headquarters of the Association are at the Hotel Michigan. Last evening (Wednesday) the Association was addressed by Geo. H. Van Pelt, on subjects appropriate to the carriers' work, especially good roads.

DOING THINGS

Charlevoix is doing things!

The year 1916 will be writ large in the history of "The Beautiful."

Outsiders express surprise, and ask how we can do it.

We just do it!

Taxes? Yes, we are paying for it; but it is an investment.

There are those who growl at the tax roll, but there are very few of them who would not pay an amount equal to the tax excess if asked to do so as a voluntary subscription.

The cost hits our pocket book, but it correspondingly enhances our pride in "The Beautiful."

On the Fourth of July, 1866, in the village of Romeo, Mich., Mr. Wm. Henry Webb and Miss Harriet Nicloy were united in marriage. Last Tuesday Mr. and Mrs. Webb celebrated the fiftieth anniversary of their marriage at their pleasant home in Ironton. In the morning, at a large gathering of friends, some of whom had come from a distance, they stood up before Rev. C. E. Taggart and renewed the vows which have bound them together for half a century. Mr. Webb is a veteran of the civil war. They are both in vigorous health and bid fair to see the return of their wedding anniversary many times. A number of valuable gifts testified to the esteem in which they are held by their friends. The perfect day, the large and interested gathering, the fine dinner which was served under the trees, the unusual character of the celebration combined to make the occasion one which will long be remembered.

A clean cut, bright eyed little patriot of seven summers was out on Park Avenue early Tuesday morning with torpedoes, fire crackers and other things, making all the noise he could. It was "Bobbie" Lee, son of Mrs. Lee, of 214 Park Avenue. "Bobbie" has a good right to celebrate. He has mighty American blood in his veins, being a grand nephew of Gen. Robert E. Lee, whose name all good Americans delight to honor.

WANTED—Two nice rooms and board with private family for six weeks beginning Aug. 10th, in desirable location, for man, wife and daughter. S. W. LAVINE, 4032 Indiana Ave., Chicago, Ill.

A HACKING COUGH WEAKENS THE SYSTEM

Don't suffer with a hacking cough that has weakened your system—get a bottle of Dr. King's Discovery, in use over 40 years, and breaking all who use it, the soothing pine balsam with tar heal the irritated lungs, loosens the mucous and prevents racking the body with coughing. Dr. King's New Discovery induces natural sleep and sides nature to cure you.

PERE MARQUETTE

Why the Road "Went Broke"

The Pere Marquette Railroad is, I believe, after two years' study of the situation, not in bankruptcy for the reasons commonly accepted by those who have not given serious thought to the matter, but for the very plain and simple reason that **it has not been able to earn enough during its existence to pay its way because of—**

First, **Light traffic density,** and Second, **Low rates.**

Light traffic density—While the Road serves considerable territory which is well settled, and in those portions of the State the density of traffic is fairly heavy, half of its mileage is in branch and side lines, most of which run through sections but sparsely settled. One hall brings in three-fourths of the passenger revenue, for example, while the other earns but one-fourth.

The Pere Marquette is not a trunk line with an abundance of heavy traffic and long hauls. It is rather an originating and distributing line for other roads which handle the through business. For tl is reason it is impossible for it to make the same showing as trunk line roads operating in this territory.

Low rates—The freight rates in the section in which Michigan is located, are the lowest of any in the United States, the average being but six mills per ton mile. In other words, **the Pere Marquette carries a ton of freight on the average one mile for six-tenths of a cent, or three miles for less than the value of a two-cent postage stamp.**

Before the system was organized, the lines which were put together to form it were earning an average of nine mills per ton mile, but the decline of the lumber industry, which furnished about one-third the traffic at fairly good rates, forced the Road to look somewhere else for business, and now it is handling a third of its tonnage in coal, which carries a low rate. The average rate in Michigan, already low because based on the through rate from Chicago to New York, was reduced 33⅓% through this purely economic change.

Passenger rates were also lowered through legislative action in 1907 by the same percentage.

While the earning power of the railroad was being cut one-third, operating costs were going up, taxes, materials and supplies, wages, in fact everything the Road used or had to have jumped in price. The "high cost of living" hit the Pere Marquette as well as everyone else.

To me, it is no wonder that the Road "went broke." It would have been a miracle if it had not. Like any other business, when "it costs more than it comes to," there is bound to be trouble.

Freight rates have been advanced somewhat (about 5%), and interstate passenger fares increased to 2½ cents per mile. These are steps in the right direction and have helped the situation. The next step should be to increase passenger rates within the state to 2½ cents to conform to the interstate rate.

What the Pere Marquette needs is business to support its mileage and fair rates for handling it. Then it will pay its way and stay out of bankruptcy, and be in a position to give more and better service to the people of Michigan.

Paul H King
Operating Receiver.

Talk No. 6

"A candidate for the reason that I believe I can save the tax-payers money."

DANA H. HINKLEY
Candidate For State Senator—Twenty-Ninth District.

HINKLEY'S WORK.

No member of the present legislature has done better work for the state of Michigan during this session than Rep. Dana H. Hinkley of Genesee county. His efforts have stood out with conspicuousness since the day when he was granted chairmanship of the ways and means committee of the house.

As the head of the most important committee in the lower body of the legislature he has carried more responsibilities than any one member in the house. With these responsibilities rest great duties that can be met by his credit that he used this power sparingly and wisely.

Not like other years his service has been his determined effort to curtail the expenses which will attend the operation of the state government during the next two years.

During the last session of the legislature Senator Charles Foster, of Lansing, whose ball making an appropriation of $250,000 for a new state building passed the senate by unanimous vote, was assured by members of the house that the bill would be passed if it could be pried out of the ways and means committee. It was reported favorably by the house committee on public buildings, but Chairman Harry Hinkley of the ways and means committee refused to report it out on the ground that the state could not spare the money.—Grand Rapids Press.

Another state legislator who should be returned to the house of Michigan—is Representative D. H. Hinkley of Petoskey. Hinkley has served as Chairman of the Ways and Means Committee of the Lower House. He knows just how badly Michigan needs a "Budget System" for making appropriations. He can be of immense service in perfecting a workable "budget system" that will produce results. His experience and his advice will be of inestimable value in this end. Mr. Hinkley rendered Michigan invaluable service as Ways and Means Committee Chairman.—Grand Rapids Herald.

Up in the 29th Senatorial District, Dana H. Hinkley of Petoskey is a candidate for the Republican nomination. Hinkley has the exceptional record of having served three terms in the House of Representatives, being nominated each of his three terms without opposition in the primaries. Starting as a lumber piler in a saw mill, and later operating one, his most ardent supporters have been former employes. "Harry," as he is known to his closer friends, started profit sharing with his employes in 1907. He served in the last two sessions as chairman of the Ways and Means committee which by itself marks the influence he wielded in Legislative and many bills aimed at taking money from the State treasury sailed along smoothly until they bumped into Chairman Hinkley and the Ways and Means committee where they were peacefully put to sleep. His experience on this committee has been unusual opportunity to study the problems that have brought on the agitation for a budget system in this state, and if experience counts for anything, Mr. Hinkley ought to be the man who will make Michigan can render invaluable service in working out legislation looking to a change in the policy of making the budget. Mr. Hinkley thinks ten per cent. of a cool million dollar saving is conservative and he would like to participate in making the bill that will bring about this result. Being in the 29th District I can nominate and elect Mr. Hinkley, they are assured of a strong Senator, who will be a credit to their District and will bring them additional credit and prestige in the state at large.—Charlotte Republican.

Message for Nervousness.

Light, air, exercise, massage, is a good corrective for nervousness, deep, seductive hour massage, which is used for liver complaint and for obesity, is too severe for the nervous patient. Besides, so many of the nerves lie so near the skin that the region of the skin is the real seat of operation for cure. Light massage by coaxing the blood to the surface and inducing a new and stronger interflow among them feeds the nerves and strengthens them.

Find Strength in Nature.

When i would recreate myself I seek the darkest wood, the thickest and most interminable and, to the citizen, most dismal swamp. I enter a swamp as a sacred place. There is the strength, the marrow of nature. The wildwood covers the virgin mold—and the same soil is good for men and for trees.—Thoreau.

What It Looked Like.

In a New Zealand town one of the municipal candidates, a Scotchman, had received a present of a huge Scotch thistle, which he had carefully tempted to be lying on the table of his reception room. A friend, entering, withdrew suddenly, with the remark, "I beg your pardon; I did not know that you were at luncheon."

For Sale!

Geo. Bostart, Int. Bds. 2-3-4, due 1-6-16	21 00

Moved by Ald. Cartier and seconded by Ald. Paddock, that the report be read be accepted and the mayor and clerk be authorized to issue warrants on the city depositories for $11,795.62 and the clerk be instructed to draw orders on the various funds for the amount of each respective bill. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

The petition of C. J. Bradshaw for permission to dock ferry boat at Clinton street dock was referred to the police, fire and license committee.

Moved by Ald. Benton and seconded by Ald. Cartier, the adoption of Ordinance No. 133, an Ordinance to amend Section 3 of Ordinance No. 65, entitled "an Ordinance regulating the keeping of dogs within the city of Charlevoix and providing for licensing and taxing thereof," as amended by Ordinance No. 118, adopted May 5, 1913, and Section 9 of Ordinance No. 65, as amended by Ordinance No. 109, adopted February 27, 1912. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller and Benton. Nays: Geiken.

The matter of an Ordinance relative to licensing of junk dealers was referred to Commerce, Charter and Ordinance committee.

Moved by Ald. Geiken and seconded by Ald. Paddock, that the request of the Charlevoix Commercial Association relative to site for Chatterson & Son be granted. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

The mayor referred the matter of location of site for Chatterson & Son to the Charter, Commerce and Ordinance committee.

Moved by Ald. Paddock and seconded by Ald. Geiken, that bunting be purchased for decorating the Bridge on July 4th, 1916, at a cost not to exceed $5.00. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

Moved by Ald. Cartier and seconded by Ald. Benton, that the dispensing of hay on Detention Hospital property be referred to the Finance, Purchasing and Printing committee with power to act. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

There being no further business, the council adjourned.

F. L. SLAGHT,
Deputy City Clerk.

Council Chambers, July 3, 1916.

The common council for the city of Charlevoix met on the above date, Mayor Ross presiding. Ald. Present: Cartier, Hiller, Geiken and Benton. Absent: See and Paddock.

The minutes of the meeting of June 26 were read and approved.

Enter: Aldermen Paddock.

Moved by Ald. Hiler and seconded by Ald. Geiken, that the policy of the Fidelity and Casualty Company be accepted. Motion carried.

Moved by Ald. Paddock and seconded by Ald. Hiller, that the matter of water extensions on Division street and West Lincoln avenue be referred to Electric Light and Water committee with power to act. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

The mayor referred the South Terrace Bridge street paving bids to the Streets, Sewers and Public Health committee for compilation.

Moved by Ald. Hiller and seconded by Ald. Benton, that all bids presented pertaining to South Bridge street paving be rejected. Motion carried.

Moved by Ald. Benton and seconded by Ald. Cartier, that bids be re-advertised for South Bridge street paving, to be received up to 4:00 o'clock Friday, July 7, 1916. Motion carried.

Moved by Ald. Hiller and seconded by Ald. Benton, that when we adjourn we adjourn until Friday, July 7th, 1916, at 7:30 in the afternoon. Motion carried.

Moved by Ald. Paddock and seconded by Ald. Hiller, that Capt. Berdan be allowed $2.00 for each sewer connection with new sewers and sewers connected with Round Lake and Pine River, that were formerly discontinued. Motion carried by the following aye and nay vote: Ayes—Paddock, Cartier, Hiller, Geiken and Benton. Nays—None.

There being no further business, the council adjourned.

CHARLES H. EMREY,
City Clerk.

Notice!

The annual meeting of School District No. 1, of the Township and City of Charlevoix for the election of School District Officers and for the transaction of such other business as may lawfully come before it, will be held at High School Building on Monday, the 10th day of July, 1916, at 7:30 o'clock p. m.

E. J. HILLER, Sec.

School Commissioner's Column

Mrs. L. Stewart, Commissioner

Miss Bessie Allan will teach the Springvale Standard school next year.

Fred Dolsorth will remain in Horton Bay another.

Miss Acretha Keeney has been engaged in Cedar Valley, which is Winn No. 1.

The T ening Demonstration was a credit to our Agricultural college, and to both Miss Cowles and her assistant, Miss Rogers. Those attending report a good time. Some of you don't know what you missed, and yet there was a fine crowd for this busy season.

July 10th is a big day for schools. That's the day of the annual meeting and you want to be there. Notices are posted in three places in each district at least six days previous to the meeting. Everyone of these notices tells you that this is the one big day of the school year, the one day when you have a chance to do something extra for your school, the day when you elect the men who are to have that school in charge for the entire year. You want your school to be the best school and you want your children to have a better chance than you had. The law gives you a chance to work with this and in view and to use your voice to this effect at the annual meeting. It is your duty and your privilege to be there. Be sure to go! Monday, July 10th, that's the day!

No notes during the following month.

Just What Did She Mean?

Mrs. Jones was on a visit to her parents and wrote the following postcard to her next-door neighbor at home: "Will you do me a favor, while I am away? Will you put on a little food in our back porch every day or so, for the little stray cat I have been feeding? The kids will eat almost anything, but do not put yourself out."

REMOVE FACE BLEMISHES

Her husband and mother outflower Lorelei's amusement when they visit her backstage, while his fellow-legislator, Lawrence Hammond, a gorgeous entertainer, kiss Marie Merkle, a sensitive dressmaker. Mrs. Wharton, a wealthy dowager, invites Lolly to her home for

> Adores Domorest is a queer woman. Nobody really knows anything about her life. She is advertised as violent merely because such advertisement attracts attention to her and money to the theater owner. Her place in this story makes the story much better than it would be otherwise. Pay heed to Adorée's doings.

CHAPTER IV—Continued.

"Why Don't You Ask Miss Domorest?"

"Why don't you ask Miss Domorest? She cares little."

Wharton sighed hopelessly. "Something queer about that Jinx. I'd love to know what made her like that. She won't let me close on the way down."

"Maxy Melcher?"

"The same. Do you know his business?"

"No."

"He is a gambler, a political power, a crafty, unscrupulous fellow who rent-controls big people. He helps me, for instance, cover many innocent personal indiscretions. Well, most of all, perhaps, Hammond himself."

Lorelei was silent for a moment. "This is very unusual" she said at length. "I don't know whether to believe you or not."

"Suppose, then, you let the matter rest and keep your eyes open. When you convince yourself who means best by Jarvis—Miss Lynn and Mister Knight, or I and mine—make your decision. You may name your own price."

"There wouldn't be any price," she said him, frankly. "I'll wait."

Merkle bowed. "I can trust your discretion. Thank you for listening to me, and thank you for being agreeable to an irksome old dyspeptic. Will you permit me to drive you home and show you're ready?"

"I'm ready now."

But as Lorelei made her way unobtrusively toward the cloakroom she encountered Robert Wharton, who barred her path.

"Fairy Princess, you run away," he declared, accusingly.

"I'm leaving." She saw that his intoxication had reached a more advanced stage. His cheeks were flushed and his eyes were glassy and unsteady.

"Good news! The night is young; we're worth it now, eh?"

"Thank you, no. I'm going home."

"I'm serious, darlin'. Others have tried and failed." With extreme gravity he pouched his gauze upon her, adding, "Tissue is the one place that our mayor can't close."

She extended her hand. "Good night."

"Don't understand. Speak English."

"Good night."

Wharton's countenance darkened unpleasantly, and his voice was rough. "Where'd you learn that line? It's foreign stuff. Where'd you learn that line? It's foreign stuff. Where'd you learn that line? It's foreign stuff.

Federal Inquiry or Railroad Strike?

Faced by demands from the conductors, engineers, firemen and brakemen that would impose on the country an additional burden in transportation costs of $100,000,000 a year, the railroads propose that this wage problem be settled by reference to an impartial Federal tribunal.

With these employes, whose efficient service is acknowledged, the railroads have no differences that could not be considered fairly and decided justly by such a public body.

Railroads Urge Public Inquiry and Arbitration

The formal proposal of the railroads to the employes for the settlement of the controversy is as follows:

"Our conferences have demonstrated that we cannot harmonize our differences of opinion and that eventually the matters in controversy must be passed upon by other and disinterested agencies. Therefore, we propose that your proposals and the proposition of the railways be disposed of by one or the other of the following methods:

1. Preferably by submission to the Interstate Commerce Commission, the only tribunal which, by reason of its accumulated information bearing on railway conditions and its control of the revenue of the railways, is in a position to consider and protect the rights and equities of all the interests affected, and to provide additional revenue necessary to meet the added cost of operation in case your proposals are found by the Commission to be just and reasonable; or, in the event the Interstate Commerce Commission cannot, under existing laws, act in the premises, that we jointly request Congress to take such action as may be necessary to enable the Commission to consider and promptly dispose of the questions involved; or

2. By arbitration in accordance with the provisions of the Federal law" (The Newlands Act).

Leaders Refuse Offer and Take Strike Vote

Leaders of the train service brotherhoods, at the joint conference held in New York, June 1-15, refused the offer of the railroads to submit the issue to arbitration or Federal review, and the employes are now voting on the question whether authority shall be given these leaders to declare a nation-wide strike.

The Interstate Commerce Commission is proposed by the railroads as the public body to which this issue ought to be referred for these reasons:

No other body with such an intimate knowledge of railroad conditions has such an unquestioned position in the public confidence.

The rates the railroads may charge the public for transportation are now largely fixed by this Government board.

Out of every dollar received by the railroads from the public nearly one-half is paid directly to the employes as wages; and the money to pay increased wages can come from no other source than the rates paid by the public.

The Interstate Commerce Commission, with its control over rates, is in a position to make a complete investigation and render such decision as would protect the interests of the railroad employes, the owners of the railroads, and the public.

A Question For the Public to Decide

The railroads feel that they have no right to grant a wage preferment of $100,000,000 a year to these employes, now highly paid and constituting only one-fifth of all the employes, without a clear mandate from a public tribunal that shall determine the merits of the case after a review of all the facts.

The single issue before the country is whether this controversy is to be settled by an impartial Government inquiry or by industrial warfare.

Northern Michigan

The Hotel Oden, at Oden, owned by John D. Rawdon, of Lookwood avenue, Petoskey, was burned to the ground early Wednesday morning at a loss of about $25,000. No one seems to know just where the fire started.

Traverse City: Members of the Ancient Order of Gleaners of the Grand Traverse region will meet here for their annual picnic and business session on Aug. 17 and 1,500 people are expected to attend. Grant H. Slocum, founder and supreme secretary of the order, and Miss Lucia Bellamy, instructress in ritualistic and drill work, will be present. The address of welcome will be delivered by Parm C. Gilbert of this city.

East Jordan Enterprise: We are sorry to note that East Jordan is to lose one of her best citizens. Hon. H. I. McMillan has purchased a flouring mill at Conklin, some eighteen miles out from Grand Rapids, and left this week to take charge of it. It is a steam power mill with a good equipment, and located in a good section for local trade. "Mac" has hosts of friends here whose best wishes will follow him to his new location.

Petoskey News: Arthur Beattie, of Charlevoix, the farmer who was so badly injured recently in a runaway accident, and who was brought to Petoskey hospital, where one arm was amputated and one leg which was badly crushed to pieces, was put together and placed in a cast, seems to be getting well. When seen at the hospital Thursday he seemed quite cheerful and it is believed he will be able to return to his home within a week or two.

Now is the time to destroy the worms which are such a pest to fruit trees. The web as well as the worm is yet small, although close scrutiny will generally reveal the nest in or near the crotch. They usually construct their nest well towards the end of a branch. By looking closely you may be able to see where they hatch. It is a little blotch, usually a little farther out on the branch and which much resembles a small blister. On closer examination it will be found to contain many tiny cells from which the little worms emerged some weeks ago. They can easily be destroyed now. They are already feeding on the tender shoots and blossoms.

Traverse City Special: Five Charlevoix residents have put in claims for the $350 reward offered by the county for the capture of Harry Powers and the supervisors will have to decide who is entitled to the money. Mrs. Anna Morford wants the money because she telephoned Sheriff Campbell to the effect that Powers had stopped at her house; Mrs. Cora E. Boizset claims it because she in company with Rev. Quinton Walker discovered the men in her vacant hotel and Mr. Walker insists he is the legitimate claimant because he gave the alarm to the village officers. The actual arrest was made by Marshal Jeffries, but Turnkey Charles Howard also claims the money on the grounds that he assisted in making the arrest. As the board was unable to decide who is the rightful claimant a settlement was left to the finance committee.

H. H. Bradley, of Seattle, Wash., decided to live in Walloon Lake, Mich., Consequently, he built a box on the rear end of his auto, loaded in his belongings, cranked up, and started. When he passed through Traverse City his speedometer registered 3,828 miles, and he was just finishing his thirty-second day of journeying. While running through the Sierra Nevada mountains, he skidded over the top of 30-foot snow banks, many times having to lay up during the heat of the day, waiting for the night cold to freeze the crust so that it would sustain the weight of the automobile. His aggregate repair bill for the trip amounts to 85 cents.

David R. Jones, of the state game and fish department, and William Pearson, of the state forestry department, have been in the northern part of the state for two weeks looking after the forest fire service and organizing the force for the summer. They have selected four of the highest points in the northern half of the state on which to erect fire signal towers and in other ways prepared for trouble. Towers will be erected at once and the service placed in full operation. Since the recent hard rains there have been no fires in the woods, but a few days of real warm weather and with warm winds would place the timber sections in good condition again for bad fires.

The following letter from I. B. McLean, now of Lansing, will be of interest to his many friends. The enclosed clipping is from the State Journal: "Announcement has been made of the incoporation of the Johnson-McLean Realty company. The new real estate company has purchased a 21 acre plot on East street, 300 feet north of the city limits. The land has been platted and the lots, to be sold at moderate prices, soon will be placed on the market. The rapid growth of the north section of the city and the great demand for workingmen's homes lead to the purchase of the land. It is but a five minutes' walk from the Gier Pressed Steel company plant now in process of construction. Herbert E. Johnson is president of the new company. The other officers are C. B. Smith, vice-president; C. I. B. McLean, secretary and manager; Josephine B. Smith, treasurer.

Notice to Public

Persons taking flowers and shrubbery from Brookside cemetery are liable to arrest if caught, and will be punished to the fullest extent of the law.

St. By order of
CEMETERY BOARD.

SPECIAL SALE—On 5 and 7 tooth Cultivators, by Chas. Zeitler, all this week.

Mackinac Island—The entire island is in mourning over the death of one of its most prominent and most beloved citizens—Captain John McCarty—who passed peacefully away at 10 o'clock Tuseday morning after a prolonged illness. Captain McCarty was a native of Mackinac Island, having been born here July 20, 1848, and the island had been his home all during life. It may be said that Captain McCarty was the father of the ice crusher, as it was he who conceived the idea of winter navigation through the straits when on the Algomah. It was during the winter that the Algomah in attempting to cross the straits in the ice had all of the buckets on her wheel broken off and in this condition he backed the boat safely to land, using the stubs of the wheel's bucket to crush the ice and make a passage. He then conceived the idea of the ice crusher, which was later put into effect and is in use on the great ferries constructed for winter navigation today.

Ordinance No. 133

An ordinance to amend Section Three (3) of Ordinance No. 65 entitled, "An ordinance regulating the keeping of dogs within the city of Charlevoix and providing for licensing and taxing thereof," as amended by Ordinance No. 118, adopted May 5th, 1913; and Section Nine (9) of Ordinance No. 65, as amended by Ordinance No. 68, as amended by Ordinance No. 109, adopted February 27th, 1912.

The City of Charlevoix Ordains:

Section 1. Section three of Ordinance No. 65, entitled, An Ordinance regulating the keeping of dogs within the city of Charlevoix and providing for the licensing and taxing thereof," as amended by Ordinance No. 118, adopted May 5th, 1913; and Section Nine of Ordinance No. 65, entitled, "An Ordinance regulating and keeping of dogs within the city of Charlevoix, and providing for licensing and taxing thereof," as amended by Ordinance No. 109, adopted February 27th, 1912, be and the same are hereby amended to read as follows:

Section III. The clerk shall deliver to each person to whom a license is issued at the time of issuing of the same, a metal check bearing the number of the license duly stamped thereon and the year when issued, together with the words, "Dog License, Charlevoix, Michigan." For each license said clerk shall at the time and before issuing of the same and for each renewal thereof, collect of such applicant and pay into the city treasury one dollar for each male and three dollars for each female.

Section IX. No dog shall be released from the pound unless the owner or person entitled to demand the same shall pay to the pound-master one dollar for a male dog and three dollars for a female, together with the releasing fee of one dollar: Provided, however, that any owner of an impounded dog, who shall exhibit a license evidencing the licensing of such dog, and that he duly provided the same with the collar and tag as herein required, shall be entitled to have such dog surrendered to him upon payment of a releasing fee of one dollar. The pound-master shall keep a careful record of all dogs received by him with a description thereof and the disposition of the same. He shall weekly pay into the treasury all money received by him for the impounding, release or sale of dogs, and shall weekly file with the city clerk a report showing the number and sex of all dogs impounded during the week, the disposition of the same, and containing the treasurer's receipt for all money paid into the treasury.

This Ordinance shall take effect twenty days after its adoption.

Adopted at a special meeting duly called by written notice signed by the Mayor and served upon each and every Alderman of the city of Charlevoix at least six hours prior to such meeting of the said common council of the city of Charlevoix, this first day of July, A. D. 1916.

Countersigned, ANDREW ROSS,
CHARLES H. EMREY, Mayor.
City Clerk.

Senator Morford Asks For Second Term

I wish to announce to the Republican electors of the twenty-ninth Senatorial District that I am a candidate to succeed myself for senatorial honors, and trust the voters of our district will consider my candidacy with favor at the primaries August twenty-ninth and maintain the precedent so long established relative to second terms. Unless I have failed to perform my duties as a servant of the public, I believe that I am entitled to the nomination.

I am an advocate of legislation that will reduce taxes to the lowest possible figure, ever mindful of the fact that our commonwealth is fast becoming one of the most important states and may require additional funds to carry on its large business. I believe in and will support the Budget method to bring about systematic economy.

The development of Northern Michigan means much in the way of reducing our State Budget, and will bring prosperity to our northern country. I am in hearty accord with the enactment of laws that will give encouragement and practical aid to the settler, thereby assisting in the more rapid development of the cut over lands of the state.

I believe that the people of my district will find that my legislative record has been consistent at all times tending toward the best public interests. Very truly yours,

Pol. adv. J. LEE MORFORD.

To The Voters of Charlevoix County.

I wish to announce to the voters of Charlevoix County that I will be a candidate for nomination for the office of Register of Deeds at the Primary Election to be held August 29, 1916, and ask your support. If nominated and later elected will administer the duties of the office to the best of my ability.

Pol. adv. NED B. FOX.

Announcement.

I hereby announce myself as a candidate for the office of county clerk, on the republican ticket, subject to the ratification of the August primaries. If elected I pledge myself to faithfully perform the duties of the office.

J. H. GRAFF.

To The Voters of Charlevoix County, Mich.

I hereby announce myself as a candidate for nomination on the Republican ticket for Member of the State Legislature. If elected I promise to support the Republican Platform, and render faithful service to all the people of my district.

If these sentiments meet with your approval, I will appreciate your support at the Primaries August 29th, 1916.

Respectfully Yours,
EDWIN W. ABBOTT,
Pol. adv. Boyne City, Mich.

To The Electors of Charlevoix County

I wish to announce my candidacy for the office of Representative of the Charlevoix County Legislative district, on the Republican ticket, at the coming August Primaries. Hoping to meet you during the coming few months. With my assurance will do all I can to merit your support. Thanking you, I am yours truly,

JACOB E. CHEW,
From South Arm. East Jordan.

For 5 days we offer 5 percent discount where two or more tires are ordered at one time.

PIQUA TIRE & RUBBER CO.
PIQUA, OHIO.

Announcement.

To the Electors of Charlevoix County:

I have decided to be a candidate for the office of Register of Deeds on the republican ballot at the August primaries. I have been a resident of Charlevoix county for thirty-five years, and I respectfully solicit your support.

M. A. McDONALD.
Eveline Township.

E. C. Chew For County Road Commissioner

To the Voters of Charlevoix County:

While the announcement of my candidacy for County Road Commissioner, on the Republican Primary Ticket has not been generally made, I hereby do so and state that I will be a candidate for the above office at the primaries to be held the 29th day of August, 1916.

I appreciate to the fullest extent the responsibility of the office of County Road Commissioner should I receive the nomination at the primaries in August and be elected it shall be my firm purpose to serve the people of this county to the very best of my ability. It may be impossible for me to call upon every voter in the county but it is my desire to become personally acquainted with as many of the voters and tax-payers as possible during the present campaign.

6-29-3 Respectfully,
Adv. EZEKIEL C. CHEW

Bridge Street Paving, South Terrace Paving District No. 15.

NOTICE is hereby given that sealed proposals will be received by the City Clerk of the City of Charlevoix at his office until four o'clock in the afternoon on the 7th day of July, 1916, for grading an 1 paving Bridge Street with oil macadam from the south line of East Hurlbut Avenue south to the south line of East Garfield Avenue, thirty-one feet in width, including the necessary curbing, gutters, man holes, cross walks, sewerages and approaches. Plans and specifications of the work are on file and may be seen at this office. Instructions to bidders and bidding blanks will be furnished by the Clerk on application, and all bids must be on the bidding blanks furnished by the Clerk and in accordance therewith.

The City of Charlevoix reserves the right to reject any and all bids and to award the contract as it may deem for its best interests.

Dated the 3rd day of July, A. D. 1916.
CHARLES H. EMREY,
City Clerk.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by Minnie Bedford and Edward S. Stacks, widower, to Nicholls Buttars and Bridge, Copartners, consisting of John Nicholls, Archibald Buttars and Albert F. Bridge of the city of Charlevoix, Michigan, dated August 12th, 1910, and recorded in the Register of Deeds office for Charlevoix county, Michigan on August 17th, 1910 in Liber Forty-five of Mortgages, on page 235, and containing a power of sale on which mortgage there is claimed to be due at the date of this notice, April 24th, 1916 the sum of One Thousand Nine Hundred and One Dollars and Sixty-Three Cents of principal and interest and the further sum of Forty-Three Dollars and Fifty-Two Cents unpaid taxes and interest on same on said property, which said taxes the mortgagees are liable for and will have to pay on the property described in said mortgage and an attorney fee of twenty-five dollars, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage or any part thereof or for any money paid for taxes levied on said describ d property.

Notice is hereby given that by virtue of the power of sale contained in said mortgage and the statute in such case made and provided on the First day of August A. D. 1916, at ten o'clock in the forenoon, the undersigned, will, at the front door of the Court House in the City of Charlevoix, that being the place where the Circuit Court is held, sell at public auction to the highest bidder the premises described in said mortgage or so much thereof as may be necessary to pay the amount as aforesaid due on said mortgage and for taxes for which mortgagees are liable with seven per centum per annum interest from April 24th 1916 and all legal costs, together with said attorney fee to-wit: Lots one (1) and two (2) and three (3) and the southwest quarter of section nine (9) in Township thirty-four North of Range Seven West, containing three hundred and eighteen acres more or less, excepting the Right of Way of the Pere Marquette Railway Co. across said lands.

Dated, Charlevoix, Michigan, April 24, 1916.

Nicholls, Buttars and Bridge, copartners, consisting of Estate of John Nicholls, deceased, Archibald Buttars and Albert F. Bridge.

MORTGAGE SALE

WHEREAS, Merritt W. Swift, of Evansville, Indiana, made and executed a certain mortgage bearing date the 18th day of April A. D. 1914 to the Ferris Institute of Big Rapids, Michigan, which was recorded in the office of the Register of Deeds of the county of Charlevoix on the 27th day of April A. D. 1914 at nine o'clock in the forenoon in Liber 54 of mortgages on page 92;

AND WHEREAS, the amount claimed to be due upon said mortgage for principal and interest is two hundred twenty and 18-100 ($220.18) dollars, and no suit or proceeding has been instituted at law to recover the debt now remaining secured thereby or any part thereof.

AND WHEREAS, default has been made in payment of the money secured by said mortgage whereby the power to sell contained therein has become operative;

NOW THEREFORE, notice is hereby given that by virtue of said power of sale and in pursuance thereof and of the statute in such case made and provided, the said mortgage will be foreclosed by a sale of the mortgaged premises, at public vendue, to the highest bidder at the front door of the court house in the city of Charlevoix, in said county of Charlevoix, that being the place of holding the circuit court within said county, on Friday, the 18th day of August, A. D. 1916, at ten o'clock in the forenoon; the description of which said premises contained in said mortgage is as follows: Lot 105 in Block O. of South Boyne Addition to Boyne City, Michigan, except (50) feet off the northwest end from dedication of village plat, also lot 334 in block 31, N. & M. Third Addition to South Boyne, Boyne City, Michigan.
